

Fire Safety

Campus Police

The Community College Fire Safety Program is directed by Campus Police and is committed to ensuring that the community is compliant with all applicable State of Rhode Island, federal and local fire codes and requirements. The prevention of loss of life and property due to fire is the main focus of the program.

The college works closely with the State of Rhode Island, and municipal Fire Marshalls where our campuses are located to conduct fire drills and fire safety inspections in all campus buildings.

The Fire Safety Program is responsible for inspecting and maintaining the many fire extinguishers located throughout the campus. It also provides fire extinguisher training to Campus Police and Physical Plant personnel on an annual basis. Maintenance and weekly checks of the emergency safe zones and intercoms are conducted by Campus Police.

For any questions or concerns related to fire safety please contact the Campus Police office located on your campus.
