Office Automation
Web Site Development

In response to the impact of computer technology on communications and industry, CCRI offers various degree and certificate programs through the Computer Studies and Information Processing Department.

Associate in Science (A.S.) Degree Programs are:

Computer Programming, which prepares students to enter a modern programming environment. This program stresses problem definition and solution design using different programming languages in the development of applications. To meet the requirements for the associate in science degree, students must take and pass all courses listed in the program of study and complete a total of 64 credits for the Programming Option or the Microcomputing Systems and Networking Option.

Microcomputing Systems and Networking prepares students to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. Depending on the selection of courses, this program could prepare an individual to be employed in computer user support services. **Concentrations in this program include:** General Microcomputing, Networking, IT Support Specialist, and Web Site Development

Certificate Programs are: **General Microcomputing, IT Support Specialist, Networking, Web Site Development and Office Automation.** Certificate programs emphasize technical course work only and do not require students to take electives that are required in the associate degree options.
