

Practical Prototyping Tips

The following are some general prototyping objectives

1. It does not have to be pretty
2. It has to be functional
3. It has to show proof of concept
4. It should allow for adjustments
5. It should allow for easy assembly and disassembly
6. It should as modular as practical
7. It should be low cost
8. It should allow for reuse of components
9. It should meet a timeline goal
