

1. Discussion of the draft interim report of 6/13/06. Any suggestions for changes?

2. Discussion of survey results.

We should probably respond to each item in the survey, including the comments.

Do we want to further revise the language concerning the qualities of an educated person?

What about the rather strong response to the question regarding the math/science requirements?

3. Somehow our draft Gen Ed requirements were forwarded to the Dept. of Ed. for comments. Here's the covering memo and I've attached what she wrote.

4. The next steps.

Connecting up with Program Coordinators/Dept. Chairs for whom the proposed general education requirements might pose a difficulty.

Specifying which courses meet the requirements of each of the categories. I think we can expect that some programs will want to require specific courses in fulfillment of the Gen Ed requirements.

Contacting NEASC to ascertain the degree of flexibility that might be available in meeting their accreditation standards.

Finalizing the recommendations.

5. Adjournment
