

*At the end of the Fall and Spring semesters
a special
“End of Semester” schedule is published. It is
important to consider this schedule as extra
time to complete your course.*

*You should attend the Lab every hour you
are scheduled and are invited to spend extra
hours in the Lab so that you can receive
additional help and have additional time for
taking tests.*

*You must make every effort to stay close to
the suggested testing dates if you are to
finish the course by the end of the session.*

*In order to complete a Lab course by the end
of a session you should plan on taking (and
passing) a test every 2 weeks.*

*Good Luck with your study of Mathematics
at the Community College of Rhode Island*
