

Digital I and English Project/Presentation

Pick a topic in the computer industry in which you could write a manual explaining how to do your topic on the computer. An example would be how to convert music from an LP album into mp3 file format music. You have to be writing this to someone who only knows how to be a basic user on the computer, meaning that they know how to use a mouse and keyboard only. You also must prepare a PowerPoint presentation in which each member of the group must speak for at least five minutes. You must hand in to each instructor a copy of the manual and the PowerPoint presentation. Also, a report on what roles each person did on the project, how did the group work on the project (email, meeting, and/or IM), and how often did you work on the project as a group.
