

CCRI - NURSING PROGRAM
LPNU 1030: NURSING III - SUMMER 2009
SYLLABUS C: LEARNER ACTIVITIES

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
1	Introduction to LPN Nursing - Professor Clifton	1			NOTE: Except where noted, all titles are video cassettes. CS- Clinical simulations
1	Medical--Surgical Nursing: Care of the Patient with Sexually Transmitted Diseases	2	Care for patients with exposure/potential exposure to STD's Discuss nursing care strategies for selected NANDA diagnoses related to sexually transmitted diseases Reflect on the effect of infectious diseases on the adolescent. Develop a plan of care for a patient with a STD using NIC/NOC interventions	Leifer, Ch 11, p254-261 Brunner, p. 2504-2509, 1834-5, 1817 Karch, p117-120, 132-144	American Cancer Society: http://www.cancer.org New Mexico Aids Info Net: http://www.aidsinfonet.org Videocassettes OB-089V Pelvic Inflammatory Disease- A pregnancy complicated by a STD PD 056 & 057: Growth & Development
1	Growth & Development Review	1	Identify growth and development milestones.	Leifer, Ch 15, 16, 17, 18, 19, 20	
1	Maternity Nursing: Prenatal Development	1	<ul style="list-style-type: none"> Reflect on: The positive and negative factors of the mother's health as having an impact on the developing fetus. Discuss adequate folic acid intake before conception. View reproductive models: uterus, pelvis, fetal head and developing stages of the fetus. Discuss the environmental factors which may influence the health of the developing fetus. 	Leifer Chapter 3 Grodner, Ch 11, to p 251	OB 23 Miracle of Life - video CAI:CD's) Maternity Nursing Simulations OB 121-123 Pregnancy, Labor, & Delivery
1	Maternity Nursing: Care of the Antepartal Patient	4	<ul style="list-style-type: none"> Calculate the expected date and duration of pregnancy for selected patients. Interview a pregnant patient about her physiological changes during pregnancy Discussion questions: <ul style="list-style-type: none"> What are the special nutritional considerations for the pregnant adolescent? Why is adequate weight gain and eating wellbalanced meals important for the pregnancy? Design a sample menu for a pregnant woman. Interview patients concerning the impact of culture on food choices	Liefer, Ch 4	"Mrs. Kathy Shaw, antepartal care for a primigravida client
1	Maternity Nursing: Care of the Intrapartal Patient	4	Demonstrate by the use of Models, the relationship between the fetal head and the maternal pelvis during the birth process Discuss psychological support of the mother and significant	Leifer, Ch 6, 7	OB-085V "Family/child Providing Care During Delivery (65 min)

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
			<p>other during the labor process.</p> <p>Identify different cultural and religious beliefs regarding childbirth</p> <p>Discuss the theoretical basis of such techniques as massage, stroking, music, and imagery to reduce sensation of pain during childbirth</p> <p>Utilizing the Nursing Process construct a patient care plan for the Labor Patient</p>	Karch, Chapter 40	Maternity Nursing (CD) 4 programs
1	Maternity Nursing: Care of the Postpartal Patient	5	<p>While in a postpartum setting, provide care for a postpartum mother/infant couplet</p> <p>For students who have experienced birth, share their physiological experiences during their postpartum</p> <p>Describe the routine postpartum assessment and apply these skills on the post partum unit</p> <p>Develop a discharge teaching plan for the postpartum family</p> <p>Outline a teaching plan for the (a) breast feeding mother and (b) formula feeding mother.</p>	Chapter 9 p 203-216	<p>Video -- Feeding Your Baby</p> <p>Video cassettes:</p> <p>OB-086 "Family/child Care: Providing Care During Post Partum"</p>
2	Pediatric Nursing: Safety/Health Risk Identification: Injury Prevention	1	<p>Research in text and/or in nursing journals what types of accidents are most common in children between the ages of five and nine years. List measures to prevent injury.</p> <p>Discuss the dangers of trampoline use as a recreational form of exercise for children.</p>	<p>Leifer, 16, 17, 18, 19</p> <p>Grodner, p 270</p>	<p>PD 060 Children as Accident Victims (40 min)</p> <p>PD 79-81 Rapid Assessment of the Ill or Injured Child</p> <p>PD 75-76 Physical Assessment of Children</p>
2	Pediatric Nursing: Care of the Patient with Musculoskeletal Disorders	3	Determine appropriate NOC and NIC labels and specific nursing interventions for the Nursing Diagnosis: Deficient Diversional Activity, related to immobilization and hospitalization, secondary to skeletal traction. (age 10)	Leifer Chapter 24	
2	Pediatric Nursing: Care of the Abused Child	1	Discuss the nurse's role in child abuse, including prevention, advocacy, and treatment.	<p>Leifer, p. 565-570</p> <p>Videbeck, p 193-195</p>	
2	Maternity Nursing: Care of the Newborn	5	<p>Complete a Newborn Assessment and perform newborn Care in the Clinical Setting</p> <p>Complete a newborn admission to the nursery with faculty supervision.</p> <p>Detail methods used to prevent heat loss</p> <p>Discuss problem solving skills to maintain newborn's temperature.</p> <p>Observe the newborn in the periods of adaptation to extra uterine life.</p> <p>Linkage - compare vital signs of the newborn with the adult</p>	<p>Liefer, Intro to Maternity Pediatric Nursing</p> <p>Leifer, Chapter 6, p 151</p> <p>Ch 9 p 215-235</p> <p>Chapters 12 & 13</p> <p>Grodner, Ch 11, p 251-256</p>	<p>OB-160 Assessment of a Newborn</p> <p>Video:</p> <p>OB115</p> <p>"Physical Assessment of the Neonate: Physical Exam" (28 mins)</p> <p>OB116</p> <p>"Physical Assessment of the Neonate: Gestational Age Assessment" (24 mins)</p> <p>PowerPoint Presentation</p>

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
			patient		
2	Maternity Nursing: Care of the Antepartal Patient: Antepartal Complications	3	<p>Explain the use of fetal diagnostic tests in women with complicated pregnancies</p> <p>Describe antepartal complications, treatment, and nursing care</p> <p>Observe patients in a prenatal outpatient setting</p> <p>Discuss ethical and legal issues of prenatal testing.</p> <p>Care for a patient with a specific disorder during pregnancy and discuss the testing, results, and nursing care as a clinical conference. Investigate resources available to families who have experienced grief or loss during a pregnancy.</p> <p>Discuss maternal and fetal disorders that place the mother and baby at risk</p>	<p>Leifer, Chapter 5</p> <p>Grodner, p 438-439</p>	
2	Maternity Nursing: Care of the Intrapartal Patient: Intrapartal Complications	2	<p>Assess patient in Labor for S & S of various complications including fetal distress, Hemorrhage, dystocia and Premature rupture of membranes</p> <p>Observe an ultra-sound for an amniotic fluid index</p> <p>Discuss the nurse's role for a laboring patient who experienced a prolapsed cord</p> <p>Discuss the methods used for induction and augmentation of Labor</p> <p>Explain the benefits of tocolytic agents used for preterm labor</p> <p>Discuss the early S & S of preterm labor you would teach pregnant women</p> <p>Describe the nursing care of a Post-C-Section Birth</p>	<p>Leifer, Chapter 8</p>	
2	Maternity Nursing: Care of the Postpartal Patient: Postpartal Complications	2	<p>Discuss Postpartum complications such as Hemorrhage, puerperal infection, mastitis and thromboembolic disorders</p> <p>Review signs and symptoms of infection and develop a care plan utilizing critical thinking skills to care for a patient with a postpartum infection</p> <p>Discuss normal coping mechanisms utilized by the New Mother and Family</p> <p>Relate symptoms of Postpartum Mood disorders.</p> <p>Identify symptoms that may indicate depression</p> <p>Identify community - based resources for patients experiencing postpartum depression</p>	<p>Leifer, Ch 10</p>	
3	Pediatric Nursing: Care of the Patient with Respiratory Disorders and Ear, Nose, and Throat Disorders	4	<p>Utilizing the nursing process, discuss the care of a child with Croup.</p> <p>Discuss the nurse's role in sudden infant death syndrome, include psychosocial needs of the family, effect on sexuality, and psychological support of the family.</p> <p>Describe assessments for child with a hearing problem</p>	<p>Leifer Ch 25 p 590-595</p> <p>Ch 23 p 519-524</p>	

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
3	Pediatric Nursing: Care of the Patient with Gastrointestinal Disorders	3	List points to be emphasized in developing a teaching plan to prevent salmonella-caused gastroenteritis.	Leifer, Ch 27	
3	Pediatric Nursing: Care of the Patient with Neurological Disorders, and Disorders of the Eye	3	Develop a nursing care plan for a child with Cerebral Palsy, utilizing nursing process and Maslow's Hierarchy of Needs List 3 primary health promotion strategies to prevent blindness	Leifer Ch 23 p. 525-548	
3	Medical-Surgical Nursing: Care of the Female Patient with Reproductive Disorders	4	Discuss previously learned anatomy and physiology of the female reproductive system Prepare a presentation on topics pertinent to women's health care issues: abortion, infertility, contraception, gynecologic and breast problems Prepare a NCP for common gynecological and breast problems, including emotional, cultural and social issues, using NANDA, NIC/NOC interventions Care for patients with women's health issues in various inpatient and outpatient settings	Leifer Chapter 11 Brunner, Ch 46, 47, 48 Karch, Chapter 40	The National Women's Health Information Center http://www.4women.gov Patient care: http://www.patientcareonline.com Videocassettes: OB-090V Menopause and Hormone therapy OB-100V Gynecological cancer OB-101V Uterine Surgery OB109V, OB-110V, OB-111V, OB-112V Journey to Recovery Breast Cancer
3	Pediatric Nursing: Care of the Patient with Infectious Disease and Skin Disorders	3	Describe nursing actions which prevent or decrease skin irritation State NIC based interventions to provide comfort for a child experiencing pruritis associated with a skin rash.	Leifer Ch 31 Ch 29	PD 051 Before It's Too Late: Vaccinate PD 062 Oncological/Infectious Diseases
4	Pediatric Nursing: Care of the Patient with Cardiovascular Disorders and Hematological Disorders	3	Discuss the psychosocial needs of the child with a congenital heart defect and its effects on the family. Develop a nursing care plan for a child with Leukemia, utilizing nursing process and Maslow's Hierarchy of Needs	Leifer Chapter 25 pp. 596-606 Chapter 26	
4	Pediatric Nursing: Care of the Patient with Genitourinary Disorders	2	Utilize nursing process to develop a care plan for a child with glomerulonephritis Assess a child for edema	Leifer Ch 28	
4	Pediatric Nursing: Care of the Patient with Endocrine and Metabolic Disorders	2	Develop a nursing care plan specifying three NANDA/NOC/NIC labels and individualized nursing interventions for a 13 year old child with Type I Diabetes Mellitus. Compare for a child with Type II Diabetes Mellitus.	Leifer Ch 30 Grodner, p 440-443	
4	Foundations of Psychiatric Nursing Historical Perspectives: Legislation,	4	Describe the evolution of your clinical facility. Who are the	Videbeck, , Chapter 1,4, 5, 6, 9, 10, 13, 19	

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
	<p>Deinstitutionalization, Homelessness, Social Stigma Roles & Responsibilities of the LPN Health Promotion: Primary, Secondary (Community Based Care, Hospital care, Interdisciplinary treatment team), Tertiary (Rehabilitative Settings) Legal & Ethical Issues: Commitment, Guardianship, Patients' Rights, Patient Advocates, Court ordered treatment The Therapeutic Nurse-Patient Relationship Components Therapeutic use of self Phases, Blocks to Therapeutic Communication Therapeutic roles of the nurse Therapeutic communication process Management of anger, hostility, aggression Basic Care of Patients with Anxiety Disorders and Somatoform Disorders Clinical Manifestations Collaborative management Nursing management: NANDA, NOC, NIC Recognition of complications</p>		<p>patients and how are they admitted? Compare the roles of members of the interdisciplinary team. Visit a homeless shelter. Determine the relationship between homelessness and mental illness in RI. Discuss primary prevention of mental illness.</p> <p>Examine patient advocacy: NAMI and RI Mental Health Advocate Relate admission criteria under the Mental Health Law. Practice therapeutic communication with selected patients with psychiatric disorders,</p> <p>Consider techniques in managing anger, hostility, and aggression. Recognize symptoms of anxiety disorders in selected patients.</p>		<p>PY 177-179 One Voice: Domestic Violence PY166-167 "The Anxiety Disorders" Therapeutic Issues in Mental Health : Empowering Clients in Treatment Settings</p>
4	<p>Psychiatric Nursing: Basic Care of Patients with Cognitive Disorders, Addiction Disorders, Personality Disorders, and Schizophrenia Clinical manifestations Collaborative management Nursing management: NANDA, NOC, NIC Recognition of complications</p>	4	<p>Review clinical management of patients with cognitive disorders. Visit an addiction support group. Discuss dual diagnosis. Differentiate among various personality disorders. Formulate a nursing care plan for a patient with schizophrenia</p>	<p>Videbeck Chapter 21, 17, 16, 14</p>	<p>PY183-186 "Substance Abuse" PY162-165 "Personality Disorders" PY157 "Schizophrenia"</p>
4	<p>Psychiatric Nursing: Utilization of the Nursing Process as it relates to Basic Psychiatric Nursing Assessment Patient's response, history, appearance, mood, thought process, intellectual process, sensory-perceptual, judgment, self-concept, roles Collaborative Data: DSM IV Taxonomy Nursing Diagnosis Planning: NOC Outcomes Implementation: NIC based actions Collaborative Efforts Assisting with therapeutic regimen: Psychotherapies, Psychopharmacology intro</p>	3	<p>Recognize assessment data relating to psychiatric diagnoses. Find diagnostic labels in five axis areas, in selected patient records. Formulate nursing diagnoses, NOC labels for outcomes, and NIC interventions, as part of care planning activities. Observe psychotherapeutic interventions among staff and patients, both in the hospital and in rehabilitative settings. Observe therapeutic and side effects of</p>	<p>Videbeck Chapter 7, 8, 2, 3 Karch, Chapters 20, 21, 22,</p>	

TEST	CLASS CONTENT	CLASS HOURS	INTERACTIVE LEARNING STRATEGIES	READING ASSIGNMENT	RESOURCE TECHNOLOGY
	Delegation Evaluation		psychopharmacological agents. Reflect on the prognoses of psychiatric disorders, and the prospect of continuing care.		
5	Psychiatric Nursing: Collaborative Efforts continued Psychopharmacology Electroconvulsive Therapy Basic Care of Patients with Mood Disorders, and Disorders related to Abuse and Violence Clinical Manifestations Collaborative management Nursing management: NANDA, NOC, NIC Recognition of Complications	4	Recognize prototypes of seven classes of psychopharmacologic agents. Discuss the impact of medication noncompliance, and remedies. Differentiate between clinical manifestations of thought and mood disorders. Discuss priority nursing diagnoses for a patient with bipolar disorder.	Videbeck p 26-39 Chapter 15, 11	PY 168-171 "Mood Disorders"

5	Leadership and Nursing Management Role of LPN and The Nurse Practice Act Effective Nursing Leadership and Management Leadership and Management Skills Communication Problem Solving and Decision Making Delegation	3	Delegate effectively and appropriately. Communicate patient needs and nursing care from one team to another team. (Take and give report) Develop an assignment for a team member recognizing the needs of the patient and the capabilities of the team member. Identify the role of the Practical Nurse according to the Nurse Practice Act of Rhode Island.	<u>Taylor</u> Chapter 23, 21 (review), p.89-92, (Evidence based practice, decision making) p. 323-326(delegation)	BN 174, 175, 176, 177 Nursing Leadership & Management: Building Teams, Problem Solving, and Decision Making: Dealing With Difficult People; Critical Thinking In Action; Delegating Effectively and Appropriately
5	Medical-Surgical Nursing: Basic Care of Patients with Skin Disorders Review of Anatomy / Pathology Health Promotion Nursing Process Assessment parameters Nursing Diagnoses: NANDA Planning: NOC Outcomes, NIC Interventions Implementation Nursing actions, prevention of complications Collaborative management: Treatments, drugs Evaluation Specific common skin disorders	3	Summarize drug management for common skin disorders, including nursing responsibilities.	<u>Brunner</u> Ch 55, 56 Karch, p 1014-1019 (assorted topical agents)	#BN-162 Wound Care and Applying Dressings (24 min.) MS 057 Skin Diseases (30 min)
5	Medical-Surgical Nursing: Basic Care of the Patient with Burns Pathology Health Promotion Nursing Process Assessment Nursing Diagnosis: NANDA Planning: NOC Outcomes, NIC Interventions	2	Discuss the significance of presence in the nursing care of a patient/family experiencing severe trauma of burns. Share experiences demonstrating the levels of presence and describe the impact of presence on student nurse/family.	Brunner, Ch 57 Karch, p 1017 (burn preparations)	MS 207 Burns: Emergency Procedures (15 min) MS 208 Burns (29 min)

<p>Implementation Nursing actions, recognition of complications, rehabilitation Collaborative efforts Evaluation Medical Surgical Nursing: Basic emergency nursing Health Promotion: Prevention of Accidents Emergency care concepts: Treatment areas, triage Nursing Process Assessment Nursing Diagnosis: NANDA Planning: NOC Outcomes, NIC Interventions Implementation Evaluation Specific emergency problems: Accidents, sudden illness, rape Disaster protocols and roles of the LPN</p>	<p>2</p>	<p>Explain the role of the triage nurse in the emergency department in relation to Maslow's Hierarchy of Needs.</p> <p>Reflect on the needs of caregivers who participate in trauma care/disaster response. Investigate support available within the state for these workers.</p>	<p>Taylor, Chapter 26, p 687-690 Brunner, Ch 71, 72</p>	<p>HE 105 Caring for Ourselves (29 min)</p>
<p>Medical Surgical Nursing Basic Care of the patient with Immune Function Excess/ Allergic Disorders Pathophysiology of Hypersensitivity / Allergy, Autoimmunity Health Promotion Nursing Process Assessment parameters Nursing Diagnosis: NANDA Planning: NOC Outcomes, NIC Interventions Implementation Nursing management Collaborative management Evaluation</p>	<p>2</p>	<p>Plan health promotion strategies which serve to empower a patient with an allergic disorder to assume an active role in his own care.</p>	<p>Brunner, Ch 53</p>
