

Cybersecurity Degree (CYBR)

Associate in Science Degree in Computer Studies and Information Processing (AS_COMI)

Available on all four campuses; daytime, evening or online.

The Cybersecurity program is designed to provide students with a strong foundation in the principles and methods of cybersecurity, as well as the fundamental knowledge and tools for applying security measures across a variety of network architectures and settings. In addition to serving as a strong foundation for pursuing a bachelor's degree in cybersecurity, this associate degree program will provide the educational background and hands-on training necessary to prepare students for entry in the cybersecurity sector. The curriculum includes a combination of general education, computer science and network technology courses to provide students with the knowledge, skills and training necessary for successful transition into a career in security, and to meet NSA and Centers of Academic Excellence core foundational content and standards.

Note: Students must earn a grade of at least C in all computer course requirements and must maintain a 2.0 GPA. Many courses require prerequisites, corequisites and/or testing. [See course descriptions for details.](#)
