Directions to Campuses

- **Main Campuses**
  - Knight Campus, Warwick
  - Flanagan Campus, Lincoln
  - Liston Campus, Providence
  - Newport County Campus, Newport
- **Satellite Campus**
  - Westerly Education Center, Westerly

**Main Campuses**

**Knight Campus, Warwick**

_400 East Ave._  
_Warwick, RI 02886-1807_  
_Telephone: 401-825-1000_

The Knight Campus is located on 205 acres adjacent to I-95 and I-295 in Warwick.

If traveling north on I-95: Take Exit 11 (I-295). Then take Exit 1 onto Route 113 west; continue straight. The campus entrance will be on the left at the traffic light.

If traveling south on I-95: Take Exit 12B. Bear left at the fork to Route 113 west. The campus entrance will be on the left at the traffic light.

**Flanagan Campus, Lincoln**

_1762 Louisquisset Pike_  
_Lincoln, RI 02865-4585_  
_Telephone: 401-333-7000_

The Flanagan Campus occupies a 300-acre site off Louisquisset Pike in Lincoln. It features one building composed of three connected modules, totaling nearly seven-and-a-half acres of floor space.

If traveling north or south on I-295: Take Exit 18A to Route 146 south and follow directions below for traveling south on Route 146.

If traveling north on I-95: Take Exit 23 onto Route 146 north and follow directions below for traveling north on Route 146.

If traveling south on I-95: Take Exit 23 (Charles Street). Turn right onto Charles Street and continue straight for approximately 0.3 miles, following signs for Route 146 north. At the second traffic signal (across from the entrance to Home Depot), turn left onto the 146 north on-ramp and follow directions below for Route 146 north.

If traveling south on Route 146: Take the Breakneck Hill Road exit and turn right onto Route 123 west. At first traffic light, turn left onto Route 246; continue for 0.1 miles. The campus entrance will be on the right.

If traveling north on Route 146: Take the Breakneck Hill Road exit to Route 123 west. Turn left onto Route 123 west. At the first traffic light, turn left onto Route 246.

**Liston Campus, Providence**

_One Hilton St._  
_Providence, RI 02905-2304_  
_Telephone: 401-455-6000_

The Liston Campus is located on almost seven acres of land on the capital city’s south side.

If traveling north on I-95: Take Exit 18 (Thurbers Avenue). Bear left. At the second light, take a right onto Eddy Street. Travel Eddy Street to Willard Avenue. Turn left onto Willard Avenue. Take a left onto Staniford Street. The campus entrance is on the right.
Community College of Rhode Island

If traveling south on I-95: Take Exit 19 (Eddy Street/Rhode Island Hospital). Take a right at the exit light, which puts you on Eddy Street. Travel Eddy Street and turn right onto Willard Avenue. Take a left onto Staniford Street. The campus entrance is on the right.

Newport County Campus, Newport

One John H. Chafee Blvd.
Newport, RI 02840
Telephone: 401-851-1600

From the south via the Pell Bridge: At the end of the bridge, remain on access road headed toward Fall River/Cape Cod (Do not take the Scenic Newport exit.) At the end of the ramp, bear right onto Admiral Kalbfus Road. Do not enter the rotary, staying to the right on Coddington Highway. A shopping plaza will be on your right. CCRI is approximately 1 mile ahead on the right, past the Little League fields.

From the north via the Sakonnet or Mount Hope Bridge: Follow 114 south for approximately 8 miles. Directly past the Middletown Public Library, turn right onto Coddington Highway. CCRI will be approximately 1 mile ahead on your left.

Westerly Education Center, Westerly

23 Friendship St.
Westerly, RI 02891
Telephone: 401-825-2320

CCRI’s satellite campus at the Westerly Education Center enables students in southern Rhode Island and eastern Connecticut to take advantage of credit courses closer to home.

From I-95: Take Exit 1 for Route 3 toward Hopkinton/Westerly. Follow Route 3 south to Friendship Street in Westerly. Turn right onto Friendship Street.
Accreditation

The Community College of Rhode Island is accredited by the New England Commission of Higher Education (NECHE), one of seven regional higher education accrediting bodies in the United States. NECHE is recognized by both the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA) as a reliable authority on the educational quality provided by degree-granting institutions.

In 2014, the Community College of Rhode Island was granted continued accreditation by NECHE in response to the college’s decennial self-study and site visit. A “continued accreditation” designation indicates that the college meets the commission’s Standards for Accreditation and complies with its policies, providing the public with assurances of institutional educational quality. Additionally, the Community College of Rhode Island submits NECHE Annual Reports and Interim Fifth-Year Reports between decennial self-studies, with the next self-study scheduled for 2024.

Specific inquiries pertaining to the accreditation status of the Community College of Rhode Island should be directed to the college’s administration. Inquiries may also be directed to:

New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100
Burlington, MA 01803-4514
781-425-7785

In addition to its institutional-level accreditation, several academic programs at the college have received specialized accreditations (listed below). Information pertaining to these specialized accreditations can be obtained directly from the agencies’ websites.

Institutionwide Accreditation
• New England Commission of Higher Education (NECHE)

Specialized Accreditations include:
• Accreditation Commission for Education in Nursing (ACEN)
• Accreditation Council for Business Schools and Programs (ACBSP)
• Accreditation Council for Occupational Therapy Education (ACOTE)
• Commission on Accreditation for Respiratory Care (CoARC)
• Commission on Accreditation of Allied Health Education Programs (CAAHEP)
• Commission on Accreditation in Physical Therapy Education (CAPTE)
• Commission on Dental Accreditation (CODA)
• Commission on Massage Therapy Accreditation (COMTA)
• Joint Review Committee on Education in Radiologic Technology (JRCERT)
• Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS)
• National Accrediting Agency for Clinical Laboratory Science (NAACLS)
• National Association for the Education of Young Children (NAEYC)
• National Association of Schools of Art and Design (NASAD)
• National Association of Schools of Music (NASM)
President's Message

Welcome to the Community College of Rhode Island. We are pleased to welcome you to New England’s largest community college.

You are joining a college community that includes more than 70,000 graduates who are working in boardrooms, hospitals and businesses across our state and beyond. You are also entering a college dedicated to helping you succeed. We are committed to giving you an outstanding education so you can graduate, transfer to a four-year college and secure quality employment.

Whether you are a recent high school graduate or an adult learner, you have taken an important step by enrolling at CCRI. You have chosen to commit yourself to your education. In return, you will find a community of dedicated faculty and staff members working together to support you through graduation.

Our CCRI community is inclusive and diverse. We serve first-generation college students, recent high school graduates and working parents. We educate veterans who have returned from deployment and are embarking on their second career. We serve high school seniors enrolled through our Running Start program, eager to get a head start on the college experience, and we welcome adult learners who are setting foot inside an institution of higher learning for the first time after many years. Our diversity is a point of pride for us, and our students inspire us every day.

We know higher education enriches the lives of our students and their families, and we are proud to provide all Rhode Islanders with the opportunity to successfully pursue postsecondary education and high-quality employment.

In this catalog, you will find an introduction to our college’s program offerings and support services. Please also refer to our website, ccri.edu.

We look forward to supporting you as a valued member of our CCRI community.

Sincerely,

Meghan Hughes, Ph.D.
CCRI President
MISSION OF THE COLLEGE
The Community College of Rhode Island is the state's only public comprehensive associate degree-granting institution. We provide affordable open access to higher education at locations throughout the state. Our primary mission is to offer recent high school graduates and returning adults the opportunity to acquire the knowledge and skills necessary for intellectual, professional and personal growth through an array of academic, career and lifelong-learning programs. We meet the wide-ranging educational needs of our diverse student population, building on our rich tradition of excellence in teaching and our dedication to all students with the ability and motivation to succeed. We set high academic standards necessary for transfer and career success, champion diversity, respond to community needs and contribute to our state's economic development and the region's workforce.

NONDISCRIMINATION POLICY
CCRI does not discriminate in admissions, recruitment, services or employment on the basis of race, color, national or ethnic origin, citizenship status, marital status, gender, gender identity or expression, religion, disability, age, sexual orientation or status as a protected veteran (either disabled, recently separated, qualified covered, Armed Forces service medal, or any other protected veteran status), except in those special circumstances permitted or mandated by law. Anyone who has reason to believe he or she has been discriminated against may contact the Office of Institutional Equity and Human Resources, 400 East Ave., Warwick, RI 02886-1807, 401-825-1230. Individuals who are interested in attending CCRI events but require special accommodations because of a disability should contact the director at least one week before the event. CCRI campuses are accessible to individuals with disabilities. Questions regarding access and evacuation procedures should be directed to Campus Police: Flanagan Campus in Lincoln, 401-333-7035; Newport County Campus, 401-851-1620; Liston Campus in Providence, 401-455-6050; or Knight Campus in Warwick, 401-825-2109.

SMOKING POLICY
The Community College of Rhode Island prohibits smoking in all of its campus facilities as well as at all points of access and egress from its facilities, including all connecting ramps and walkways such as those at the Knight Campus megastructure. Smoking is allowed at or beyond designated enclosures located at each campus or at a distance equal to those enclosures from the building. Smoking includes traditional tobacco products as well as "electronic cigarettes" and similar devices. Failure to comply will result in disciplinary action as stipulated by the dean of students for student infractions, and the appropriate disciplinary process as set forth in collective bargaining agreements or Board of Education policy for faculty and staff.

The prohibition within all facilities will not apply to the use of tobacco products as part of a preapproved, limited classroom demonstration or research project.

At the time of its creation, information contained in the 2019–2020 edition of CCRI’s catalog was known to be accurate and complete to the best of the knowledge of CCRI faculty and staff. Please be advised the college reserves the right to make changes at any time to admissions policies, degree requirements, curricula and any other information contained in the catalog as it deems necessary, without notice or obligation. Also be aware that tuition and fees at the Community College of Rhode Island may be adjusted by the action of the Rhode Island Board of Education. Every reasonable effort will be made to communicate these changes in a timely manner to minimize any inconvenience to students. Students may find the most current information on courses by visiting the Available Courses page of the college's website.
About the Community College

• Why CCRI?
• Flexibility
• Affordability
• Career Choices
• Transferability
• Diversity
• Athletics

Why CCRI?
No matter where you are in life, you have a place at CCRI. We’re in your neighborhood, we have an easy application process and we’re here with support at whatever level you need throughout your academic career.

CCRI students are from Rhode Island, are educated and trained here, and find careers here.

Simply put, CCRI has an immediate and positive impact on your life, your community and Rhode Island’s economy. Apply today.

Flexibility
CCRI’s high-quality education fits your busy schedule. Credit and noncredit courses are offered day or evening and online, meaning you can find and schedule classes that work for you.

We also offer a wide variety of academic support services, whether you are brand new to college, returning after an absence or continuing your education. Find out more about our Student Services here.

CCRI has four campuses and one satellite location, so we’re close to wherever you live or work.

• Knight Campus, 400 East Ave., Warwick
• Flanagan Campus, 1762 Louisquisset Pike, Lincoln
• Liston Campus, One Hilton St., Providence
• Newport County Campus, One John H. Chafee Blvd., Newport
• Westerly Education Center, 23 Friendship St., Westerly

Affordability
As part of our mission to provide affordable open access to higher education, CCRI has the lowest college tuition in Rhode Island. We also offer financial aid to students who otherwise might be unable to further their education. Find out more about financial aid here.

In many cases, CCRI also gives credit for prior learning, so if you gained experience or knowledge in your chosen field while in the military or on the job, we can help you save time and money pursuing your education. Find out more about Credit for Prior Learning here.

Career Choices
We offer a wide variety of courses, degrees and certificates based on the employment needs of our community. Whether you have always known what you wanted to be, are trying to find your path or are somewhere in between, we have the time, resources and classes to get you where you want to be. See a list of our degrees and certificates here.

Transferability
If you choose to continue your education after earning an associate degree at CCRI, we have transfer agreements with dozens of four-year colleges to give you a seamless transition. There are also programs to help you get a jump-start on a four-year degree while attending CCRI. Find out more about transfers here.

Diversity
CCRI is committed to respectful dialogue, fostering a diverse and inclusive community, sharing different perspectives, promoting understanding and education, and respecting the dignity and worth of each human being.
Whether you are a first-generation college student or you are returning to finish a degree, you won’t feel alone at CCRI. Our student body is rich with diversity, allowing you to find fellow students who share your background while expanding your educational experience to include new and different voices and ideas.

Athletics
CCRI is home to one of the Rhode Island’s finest and most successful intercollegiate athletic programs. Since its inception in 1965, the program has long been considered a front-runner in New England community college and junior college athletic circles. Find out more about our Athletics program here.
Admissions

- Requirements
- Admission Dates
- Admissions and Registration
- Rhode Island Promise
- International Student Admission
- New England Regional Student Program
- Undocumented Students Living in Rhode Island
- Special Programs for High School Students
- Veterans Educational Assistance

Requirements
The Community College of Rhode Island has an open admissions policy that offers Rhode Island residents an opportunity for education beyond the high school level.

A high school diploma or its equivalent is not a general admissions requirement of the college provided the student is 18 years of age, the compulsory age for high school attendance in Rhode Island. Students who are younger than 18 years of age must submit official high school or GED® transcripts indicating a graduation date prior to enrolling at the college.

A high school diploma or its equivalent is required for admission to the following Health Sciences programs. In addition, individual departments may have specific admissions requirements that students must meet. Because many of the programs listed below have specific space limitations for admission, it is to the student’s benefit to complete special admissions requirements as soon as possible.

CCRI has instituted a performance-based application process for selected Health Sciences programs. Please see this page for more information.

All transcripts submitted for admission must be official and sent to CCRI’s Office of Enrollment Services directly from the respective institution. Applicants with GED® credentials should have a transcript of equivalency scores sent to CCRI from the General Equivalency Center. Equivalencies from correspondence schools are not acceptable.

Home-school transcripts must be official, and documentation from the local school district approving the home-schooling program should be submitted to the Office of Enrollment Services.

In the case of secondary education received outside of the United States, transcripts must be evaluated to determine whether they meet U.S. secondary school completion requirements. A list of authorized agencies that evaluate foreign transcripts is available on the Admissions website.

Although the College Board SAT® test is not required for admission to CCRI, students who take the SAT® or ACT® may list CCRI as a report school. Test scores will provide additional information for course placement.

The Rhode Island Board of Education established the residency rules for students attending the three state institutions of higher education: the University of Rhode Island, Rhode Island College and the Community College of Rhode Island. The residency policy is available here.

Admission Dates
Applications are processed as they are received. Performance-based Health Science applications are accepted during designated months. Please see this page for more information. Students should apply online as early as possible.

Admissions and Registration

RHODE ISLAND PROMISE
High school graduates of the Class of 2019 who live in Rhode Island can attend CCRI tuition free through the Rhode Island Promise Scholarship, regardless of family income. Learn about the specific requirements here.

INTERNATIONAL STUDENT ADMISSION
International students can begin their studies at CCRI every fall semester. To ensure we complete the application process in a timely manner, prospective students living outside the U.S. need to submit the competed application by May 31. Students already in the U.S. must submit completed applications by June 28. The International Student Application is available here.
1. Completed Application for Enrollment.

2. Evidence of proficiency in the English language demonstrated by submitting one of the following:
   a. Official test score results of the Test of English as a Foreign Language (TOEFL). Minimum acceptable score is 500 on the paper-based TOEFL, 61 on the Internet-based TOEFL OR
   b. Official transcript from an accredited college or university indicating completion of an equivalent three-credit Composition I course with a minimum grade of C OR
   c. Acceptable score on the English placement exam given by CCRI’s Department of Advising and Counseling.

3. An evaluation by an accrediting agency certifying that secondary school transcripts indicate equivalency to U.S. secondary school completion. A list of authorized agencies is available in the Office of Enrollment Services or on this international student form.

4. Personal Data Statement, a form included in the foreign applicant packet.

5. If the applicant’s personal funds are not supporting his or her education, the college will accept a sponsor’s evidence of financial support and a signed affidavit written in or translated into English stating that the sponsor is accepting full financial responsibility for the student while he or she is in attendance at the Community College of Rhode Island.

International students
- must pay out-of-state tuition and fees.
- are not eligible for financial aid.
- must attend full time (12 credit hours) each semester.
- do not have on-campus housing available.

Once accepted, students will be issued an acceptance packet with an accompanying I-20 form (Certificate of Eligibility for Nonimmigrant [F-1] Student Status).

NEW ENGLAND REGIONAL STUDENT PROGRAM
The New England Board of Higher Education (NEBHE) Regional Student Program allows students to attend CCRI at a regional tuition rate, which is 150 percent of the current in-state tuition rate. To be considered for the regional rate, students must be enrolled in a degree or certificate program.

- Students who live in any New England state outside of Rhode Island qualify for the 150 percent NEBHE tuition rate.
- Students who return to CCRI after a break in enrollment are held to the NEBHE policy in place at the time of their return.

For further information, please visit this page.

UNDOCUMENTED STUDENTS LIVING IN RHODE ISLAND
In 2011, the Rhode Island Board of Education approved a measure granting in-state tuition to students who are neither U.S. citizens nor permanent residents of the United States, provided they attended a Rhode Island high school for three or more years and continue to live in Rhode Island; graduated from an approved Rhode Island high school or received a GED® credential; and signed an affidavit confirming that they are seeking legal status. Students who wish to apply for in-state tuition based upon these criteria must complete and submit an application and affidavit, which can be found on this page. Students must also collect and submit documentation to show that they meet the requirements for receiving in-state tuition and fees.

For more information, visit the OES website or call the Office of Enrollment Services at 401-825-2003.

SPECIAL PROGRAMS FOR HIGH SCHOOL STUDENTS
For more information about special programs for high school students, visit the OES website or call CCRI’s Office of Enrollment Services at 401-825-2003.

Running Start Program
High school seniors who wish to study at CCRI on a full-time basis during the day may be eligible to earn college credit and credit toward high school graduation simultaneously. The Running Start Program is for high school students who have demonstrated academic achievement and the maturity necessary to enroll in college courses during their senior year of high school. The Running Start application is available here.

High School Enrichment Program
High school juniors and seniors who wish to take CCRI courses on a part-time basis (up to eight credits) are required to complete an application for the High School Enrichment Program, which is available in high school guidance departments or may be found here. Course selection is made at the discretion of the high school counselor or principal. Registration may be contingent on course availability and instructor agreement.
Community College of Rhode Island

High School/Community College of Rhode Island Partnership Program

The High School/Community College of Rhode Island Partnership Program offers high school students the opportunity to earn college credits while in high school. Students enrolled in selected high school courses that meet CCRI curriculum requirements obtain college credits upon successful completion of the high school course, high school graduation and enrollment at CCRI. Interested high school students should contact their school counselor as soon as possible so they may enroll in appropriate classes while in high school. To obtain credit, students must submit an official high school transcript and an Articulated Credit Form.

Prepare RI

State funds are available to support special programs for high school students. For more information about Prepare RI dual and concurrent enrollment programs, please visit the Rhode Island Department of Education website.

VETERANS EDUCATIONAL ASSISTANCE

Students who qualify for veterans educational benefits may obtain enrollment and certification information by visiting this page.

According to Rhode Island General Law (30-30.2-3 (2), all combat veterans of the United States Armed Forces, the National Guard, the Reserves and the United States Coast Guard shall have priority course registration at any Rhode Island public institution of higher education.
Tuition and Fees

- Deferred Payment Program
- Explanation of Fees
- Waivers
- Refund Policy for Drop/Withdrawal
- Refund Policy for Drop/Withdrawal from Modular Courses

TUITION PAYMENT

Critical information regarding paying your tuition: As a student at CCRI, you have a financial responsibility to meet payment obligations on your account by the payment due date, even if you do not receive a bill or the account is being paid by a third party. You are responsible for paying the tuition for any classes in which you are enrolled, whether you attend classes or not, unless you drop the classes during the published drop period.

The following financial responsibilities and policies apply to all CCRI students.

- Students are charged for all classes in which they are enrolled.
- Students must pay their tuition and fees by the published bill due date. This date can be found at on the Bursar's Office website.
- Students will be charged for all enrolled classes even if they do not attend them, unless they officially drop those classes by the published drop date.
- Delinquent bills will be reported to national credit bureaus and can damage a student’s credit rating.
- A student’s current account status is always available on MyCCRI.

Tuition and Fees (Fall 2019– Spring 2020)
The tuition and fees listed below are accurate as of March 1, 2019. However, CCRI is a state-supported agency so tuition and fees are subject to change by action of the Rhode Island Board of Education. We do expect tuition and fees to change. Please check the Bursar’s website for the most up-to-date information.

*Generally, lab fees for one-credit courses are $10. For courses with two or more credit hours, lab fees are $20. Certain art courses will be assessed a $50 studio fee.

Nonresidents
- U.S. citizens who are not permanent residents of Rhode Island and who do not qualify under the New England Regional Student Program are charged tuition at the out-of-state rate. Questions about in-state residency should be directed to the Office of Enrollment Services: admission@ccri.edu or 401-825-2003.
- Students who are not U.S. citizens or who do not possess a Resident Alien Card (I-151, I-551) or I-94 signifying refugee status may be charged tuition at the out-of-state rate. For more information, please visit this page.

Tuition Rates
A residency policy is in effect and determines if students will be charged the in-state, out-of-state or regional tuition rate. Please visit the OES website for information regarding this policy.

PAYMENT METHODS
Cash, checks, money orders, Visa, MasterCard and Discover Card payments are accepted at the Warwick, Lincoln, Providence and Newport campuses. Visa, MasterCard and Discover Card payments can also be made through MyCCRI. CCRI also accepts check (ACH) payments online.

DEFERRED PAYMENT PROGRAM
The CCRI EasyPay deferred payment program allows eligible students to divide their semester payments into three or four equal installments with no interest for fall and spring semesters. For summer sessions, students can divide semester payments into two or three equal installments. To be eligible, students must have an account balance of at least $300. A $30 enrollment fee is required for each semester that students enroll in the program. Learn more at the Bursar's Office website.

EXPLANATION OF FEES
Unless specified as nonrefundable, fees may be refundable based on the date of a student’s drop or withdrawal. Check the official college calendar for specific add/drop dates.

General Tuition Fee covers the cost of courses. The amount is determined by the number of credit-hour equivalents (CHEs) for which a student is registered each semester.

Student Activity Fee is required of all students. This fee covers student services such as IDs and orientation programs as well as the various activities sponsored by student organizations and admission to all college home athletic events held at the field house.

Registration Fee is required of all full- and part-time students. This fee is nonrefundable.

Laboratory Fee is required for certain courses in addition to the tuition for the course. Generally, for one-credit courses, lab fees are $10. For courses with two or more credit hours, lab fees are $20.

Learning Resource Fee is required of all CCRI students. This fee assists student support programs and related library-based activities.

Technology Fee is required of all students. This fee is used to maintain computer labs and the technology infrastructure.
Commuting and Parking Fee is required of all students. It will be used to fund the discounted RIPTA fare program for students and parking improvements at all campuses.

Extra Credit Administrative Fee is billed to students enrolled in 16 credit hours or more. This fee helps to better align the differential in the per-credit tuition rates between full- and part-time students.

Art Studio Fee supports those art courses utilizing materials and equipment common to the environment necessary to work in specialized studio facilities.

Late Registration Fee is assessed when students register during the late registration period (or a date designated by CCRI). See Late Registration page for more specific information. This fee is nonrefundable.

Applied Music courses carry additional fees as do certain other courses depending upon their nature. The cost of studio lessons is in addition to regular semester fees. The nonrefundable Applied Music Fee is to be paid to the Bursar after registering for one- and/or two-credit applied music courses. Contact the Performing Arts Department for information: 401-825-2168.

Culinary Arts Fee is an additional fee assessed to certain Culinary Arts courses.

Returned Check Fee [$25] is charged for any check returned by the bank. This fee is nonrefundable.

Nursing Clinical Fee is an additional fee assessed to certain Nursing courses to offset the rising costs of maintaining a high-quality program of study. This fee is nonrefundable.

Nursing Testing Fee is for the Health Educational Systems Incorporated (HESI) tests and Live Review to promote success on the national licensure exam.

Dental Hygiene Fee is an additional fee assessed to certain dental hygiene courses to offset the rising costs of maintaining a high-quality program of study.

Payment Plan (Set up) Enrollment Fee is assessed to those students who enroll in the CCRI deferred payment plan. This fee is assessed each semester to those students who in enroll in this program. This fee is nonrefundable.

Payment Plan Late Fee is assessed to a student’s account for each late or missed payment plan installment. This fee is nonrefundable.

WAIVERS
Tuition waivers are available in the following categories: unemployment, senior citizen, disabled veteran and Rhode Island National Guard. Exact dates of registration and criteria for acceptance into these programs are publicized online.

Some waivers may not be used for courses that reserve places for students upon acceptance to specific programs as listed on the waivers page. Additionally, waivers do not cover the cost of books.

A waiver exchange policy established by the Rhode Island Board of Education states that a student who pays full-time tuition “at one of the public institutions of higher education in Rhode Island may enroll for a maximum of seven credit hours of study per semester at one of the other public institutions at no additional expense,” subject to certain requirements of each institution’s own policies. Interested students should contact CCRI’s Office of Enrollment Services: webadmission@ccri.edu or 401-825-2003.

For further information, please visit the waivers page or contact the Bursar’s Office during regular business hours: bursar@ccri.edu or 401-825-2151.

REFUND POLICY FOR DROP/WITHDRAWAL
All part- and full-time students are subject to the refund policy.

• Refunds are determined by the date specified on the notification of withdrawal, or the date on which the student drops or withdraws from class(es).
• Students who drop and/or withdraw from classes up to 10 days prior to the start of classes (or a date designated by CCRI) receive a 100 percent refund of tuition and all fees.
• Students who drop and/or withdraw from classes 10 days prior to the start of classes (or a date designated by CCRI) through the add/drop period receive 100 percent refund of tuition and course assessed lab fees only. Other fees, including Registration fee, are not refunded.
• Students who drop or withdraw from classes after the add/drop period WILL NOT receive any refund of tuition or fees.
Refund Policy for Drop/Withdrawal from Modular Courses (courses that do not meet the standard 15 weeks.)

All part- and full-time students are subject to the following refund policy.

- Refunds are determined by the date specified on the notification of withdrawal, or the date on which the student drops or withdraws from class(es). Visit the Bursar website for more information.
- Students who drop or withdraw from classes on or before two days prior to the first day of a modular session receive a 100 percent refund of all tuition and fees.
- Students who drop or withdraw after two days prior to the first day of class through the established course adjustment period for the modular session will receive a 100 percent refund of tuition and course assessed fees only. All other fees will not be refunded.
- Students who drop or withdraw from courses after the end of the drop period for the modular session do not receive any refund.
- Students with extenuating circumstances may appeal for consideration of a refund by contacting the Associate Vice President for Student Services.
- For questions about the refund policy, call the Bursar’s Office at 401-825-2151.
Financial Aid

- Types of Financial Aid
- Withdrawal from the College
- Satisfactory Academic Progress Policy (SAP)
- Consequences for Not Meeting the Requirements

The Community College of Rhode Island offers financial assistance to students who might otherwise be unable to further their education without such support. Depending on the type of aid, eligibility is based on one or more of the following criteria: financial need of the individual (in the case of dependent students, family need is used), educational costs, academic program and availability of funds.

TYPES OF FINANCIAL AID

**Pell Grant**
A federal grant awarded when the student does not have a B.S./B.A. degree or equivalent. Awards are based on students’ enrollment status and their expected family contribution. Awards for full-time students range from $657 to $6,195 per academic year.

**Federal Supplemental Educational Opportunity Grant (FSEOG)**
A federal grant that is awarded when a student demonstrates exceptional need and does not have a B.S./B.A. degree or equivalent.

**College Work Study Program (CWS)**
A federal work program that provides jobs to help pay for educational expenses. This program encourages community service and work related to the student’s course of study. Students will be paid at least the federal minimum wage and can work up to 15 hours per week.

**Student Help**
A CCRI institutional non-need-based student work program on campus. Students will be paid at least the minimum wage and can work up to 15 hours per week. Students who are not eligible for need-based CWS may be considered for the Student Help program.

**Federal Direct Subsidized Stafford Loan**
When a student’s need cannot be met with other forms of financial aid, a federal direct Stafford Loan may be recommended. A subsidized loan has a fixed interest rate of 3.76 percent*. No interest is charged while a student is in school at least half-time, during the grace period or during deferment periods. Repayment is deferred until six months after students graduate, withdraw or enroll less than half time. An origination fee is charged at time of disbursement. Students must be enrolled at least half time (six credits) at time of disbursement.

**Federal Direct Unsubsidized Stafford Loan**
Not based on financial need. Unlike the subsidized Stafford Loan, interest is not deferred while the student is enrolled, during grace periods and/or during deferment periods. Repayment is deferred until six months after students graduate, withdraw or enroll less than half time. Unsubsidized loans have a fixed interest rate of 3.76 percent*. An origination fee is charged at time of disbursement. Students must be enrolled at least half time (six credits) at time of disbursement.

**Federal Direct PLUS Loan**
PLUS loans allow parents of dependent undergraduate students to borrow up to the cost of education minus other financial assistance. Refer to this page for current interest rates. Like the direct unsubsidized Stafford Loan, interest is not deferred during all in-school, grace and deferment periods. An origination fee is charged at disbursement. Unless deferred, repayment begins 60 days after the last disbursement of the academic year. Student must be enrolled at least half time (six credits) at time of disbursement.

**CCRI Grant**
A CCRI institutional grant for students enrolled in an eligible certificate or degree-granting program. Student must be enrolled in at least six credits each term and meet certain eligibility requirements. The grant may be prorated based upon students’ enrollment status when considering the amount of grant to be awarded.
Scholarships
Awarded by the CCRI Foundation and the Alumni Association to assist incoming, continuing, graduating and transferring students in meeting their financial needs. More than 90 scholarships, which are need-based and/or merit-based, are awarded to deserving students each year. Detailed information about each scholarship and the application are available here.

WITHDRAWAL FROM THE COLLEGE
Repayment of Title IV Funds
The Federal Financial Aid Title IV Refund Policy requires colleges to calculate how much federal aid a student has earned if he or she withdraws or stop attending all courses prior to completing more than 60 percent of the semester. Students may have to return a portion of the aid received, as well as owe the college a portion of the tuition and fees.

The policy allows a student to earn a portion of the financial aid awarded for each day of enrollment. In addition, the policy requires a student to repay the U.S. Department of Education a portion of the unearned funds received depending on the withdrawal date. A student who remains enrolled beyond the 60 percent point earns all aid for the semester for which the aid was awarded.

If the student unofficially withdraws (stops attending) or the student’s academic transcript reflects unsuccessful completion of all courses, the Community College of Rhode Island will have student aid calculated based on 50 percent completion of the term. Documentation of an academic-related activity, including notification from the faculty, may be used to recalculate aid eligibility based on the last date of attendance. Students who have questions should contact their campus Enrollment Services or Financial Aid office.

SATISFACTORY ACADEMIC PROGRESS POLICY (SAP)
Federal regulations require students to demonstrate satisfactory academic progress (SAP) toward an eligible degree or certificate program to qualify for financial assistance. Satisfactory academic progress includes both quantitative (number of credits earned divided by the number of credits attempted) and qualitative measures (financial aid grade point average).

SAP for financial aid applicants is reviewed at the end of each spring semester regardless of financial aid received for the semesters being reviewed. SAP will be measured at the end of each semester (fall, spring and summer) for students enrolled in a certificate program and/or who have an appeal approved to ensure compliance with the conditions of their education plan.

Requirements
• Students must maintain a cumulative financial aid grade point average (GPA) of 2.0 to retain eligibility for financial assistance.
• Students must earn at least 67 percent of all cumulative credits attempted. For example, students who have attempted nine credits must earn six credits to maintain a 67 percent completion rate. Students who have attempted 24 credits cumulatively must earn 16 credits cumulatively. Transfer credits accepted by CCRI are included when calculating completion rates.
• Students must complete their program of study within 150 percent of the time frame allowed. For example, students enrolled in a 60-credit degree program must complete their program before exceeding 90 attempted credits. Transfer credits accepted by CCRI are included when calculating maximum time frame.
• The first 30 credits of a student’s developmental coursework do not count toward the 150 percent limit; however, developmental credits attempted and grades earned in these courses are counted in the qualitative and quantitative academic progress measures. Any developmental coursework above 30 credits will count toward the 150 percent limit and, therefore, may affect the student’s eligibility to receive financial aid. Financial aid does not pay for developmental coursework above the allowed 30 credits.
• The financial aid GPA includes all grades from developmental coursework. The institutional GPA excludes developmental coursework.
• All courses withdrawn from are considered credits attempted but not earned.
• Attempted credits are all credits registered for at the end of the add/drop period. To earn credits, a student must receive a final grade of A, B, C, D or P. Students who receive a final grade of F, I, IC, NA, NR, NS, W, WP or WF will not earn credits for that course.
• The Financial Aid office is not notified when grades are changed after the final grading period. It is the responsibility of the student to request a re-evaluation of his or her eligibility.
• All students can repeat a course one time. Once the student repeats the course, the following applies:
  a. If a student receives a letter grade of A, B, C, D or F, financial aid will not pay for a third attempt.
  b. If a student receives W, WF, WP or NA in a course, it is considered attempted and not completed. Financial aid will pay for additional attempts until a student receives a grade of A, B, C, D or F.

A course is considered completed when a grade of D or better is earned. Therefore, courses initially graded as Ws and Fs are eligible for Financial Aid until a D grade or better is assigned. Once a student receives a grade of D or better, option 1 or 2 will apply.
• All students receiving financial aid should register only for courses applicable to their current program of study.
Consequences for Not Meeting the Requirements

- Students who do not meet the requirements will be notified via email following the semester that their progress falls below the standards. Students also may view their current SAP status via the Academic Progress link on the “For Students” tab of MyCCRI.
- A student will become academically ineligible and placed on financial aid suspension if not making SAP following any warning or probationary period. This will result in ineligibility for all federal, state and institutional financial aid (including federal work-study, student help and direct student loans). Once placed on financial aid suspension, a student may regain financial aid eligibility by completing a cumulative average of 67 percent of all attempted credits with at least a 2.0 cumulative financial aid at CCRI.
- When a student becomes academically ineligible, the student has the right to appeal the suspension of his or her financial aid based on mitigating circumstances. All appeals must be submitted in writing and documentation must be provided when applicable. Situations such as serious illness and family emergencies may be considered as mitigating circumstances. The Office of Financial Aid then may grant the student a probationary semester based on these mitigating circumstances and may adjust the maximum time frame requirements.
- Students who are placed on probation after exceeding the 150 percent time frame will be given a plan of study by an academic adviser. During the probationary period, students must earn all credits attempted with at least a 2.0 financial aid GPA, and must continue to enroll in only those courses outlined in the plan of study and/or courses specifically required for graduation from their current program of study. Failure to follow these conditions will result in the loss of financial aid for subsequent semesters without the right of appeal.

Visit the OES website for further information about:

- How to apply for financial aid.
- Student loan information.
- CCRI bookstore authorizations.
- Student employment.
- Determining eligibility.
- Terms and conditions.
Transfer Information

- Transfer Articulation with Four-Year Institutions
- Joint Admissions Agreement (JAA) with RIC and URI
- Transferring from CCRI to Other Colleges and Universities
- Transferring Credits to CCRI

Transfer Articulation with Four-Year Institutions

The Community College of Rhode Island has both college-to-college and program-to-program transfer articulation agreements with many four-year institutions, and the number of agreements continues to grow. These agreements guarantee CCRI students who graduate with an associate degree and a specific grade point average will be accepted and will receive both transfer credit and advanced standing upon transfer to the four-year institution.

Transfer planning should begin during a student’s first semester at CCRI. For transfer information and planning, contact Advising and Counseling: advising@ccri.edu or 401-825-2301.

Our program-to-program agreements allow students to focus on a particular major while at CCRI and prepare for transition to a specific major at a four-year institution. The agreements allow students to maximize their transfer credits and enter the four-year institution as juniors. Detailed information about our current agreements is online.

Our college-to-college agreements allow students to transition to a four-year school after graduating with an associate degree from CCRI. Students are encouraged to contact representatives from the four-year schools to help maximize their transfer credits. For additional information regarding these agreements, visit this page.

Additionally, CCRI has numerous program transfer agreements and Joint Admissions Agreement options with Rhode Island College and the University of Rhode Island. For the most up-to-date information, please visit the RI Transfers website.

JOINT ADMISSIONS AGREEMENT (JAA) WITH RIC AND URI

Students interested in earning a bachelor’s degree from Rhode Island College (RIC) or the University of Rhode Island (URI) may participate in JAA at CCRI. JAA is a program for first-time college students who sign up before earning 30 college-level credits.

JAA participants

- Earn an associate degree in General Studies at CCRI.
- Complete one of the approved JAA transition plans within five years.
- Meet with a CCRI and a RIC or URI advisor each semester.
- Graduate from CCRI with at least a 2.4 cumulative GPA.
- Meet all the requirements of the JAA program.

Benefits to JAA participants

- Access advising from CCRI and RIC or URI.
- Conditional acceptance at RIC or URI while attending CCRI.
- Eligibility for a tuition reduction by earning a 3.0 GPA or higher.
- Savings through waived application fees at RIC or URI.
- Once at RIC or URI, register for courses with other degree students with the same number of credits.

Students interested in JAA should meet with an advisor in the Department of Advising and Counseling to discuss transfer options and complete the Joint Admissions Agreement application: 401-825-1233 or jaa@ccri.edu. More information on JAA can be found on their website.

TRANSFERRING FROM CCRI TO OTHER COLLEGES AND UNIVERSITIES

Transfer planning should begin during a student’s first semester at CCRI. While some four-year institutions prefer that students complete associate degree requirements before transferring, the entrance requirements at four-year colleges vary widely. Catalogs and websites of four-year colleges usually indicate this information, including the minimum cumulative grade point averages required for transfer, application procedures and deadlines.

- Transfer requirements range from a minimum of 2.0 (C average) GPA at many institutions to near 4.0 (A average) at more selective institutions.
- Students need to follow a plan of study at CCRI that is consistent with specific program requirements at the transfer institution. For example, Business Administration students need to complete a core of courses that most colleges recommend be taken at CCRI. This kind of planning ensures a maximum number of transfer credits since individual institutions have their own specific requirements.
• Students who want to transfer should have their programs continually monitored by the Advising and Counseling staff, faculty advisors and representatives from the institutions they wish to attend. A transfer fair is held each semester at CCRI’s main campuses for this purpose. In addition, representatives from various colleges are routinely invited to campus to meet personally with students regarding transfer.
• Students who want to transfer with advanced standing to other institutions must meet academic criteria and course requirements set by the receiving institution. Transfer credits for advanced standing are accepted at the option of the four-year college.
• Students applying for transfer to some four-year colleges and universities must show evidence of a high school diploma or its equivalent.

A , based upon the Board of Education Policy for Articulation and Transfer, is available to provide students with information about requirements to transfer to Rhode Island College and the University of Rhode Island: www.ritransfers.org. Students are also encouraged to discuss their plans with the admissions officers at RIC at 401-456-8234 or URI at 401-874-7100.

Interested students may call the Department of Advising and Counseling at 401-333-7160 in Lincoln, 401-825-2301 in Warwick, 401-455-6063 in Providence or 401-851-1625 in Newport, to make an appointment with a counselor who can discuss options and assist in selecting courses for future semesters.

TRANSFERRING CREDITS TO CCRI
CCRI does not automatically give credit for courses taken elsewhere. Students who satisfactorily completed collegiate-level courses at other regionally accredited institutions may have their courses evaluated once their academic goals have been established. Preparatory classes are not transferable. Contact transfer@ccri.edu or 401-825-2003 to find out how to have your courses evaluated. Additionally, quarter-hour credits earned are converted to semester hour credits by a three-quarter ratio.

Grades of C- or better in courses required by the CCRI program of study are required for transfer. Some programs may have more stringent policies. Except for literature, speech, writing and select art courses, credits completed beyond 10 years do not transfer, unless the student seeks approval of the chairperson responsible for the intended major.

If transferred coursework meets the benchmark (minimum grade requirement) for Performance-Based Health Sciences admissions, additional transfer coursework for the same requirement cannot be granted. However, if a student chooses to repeat the required course, it can be completed only at CCRI. Students should first meet with an admissions officer or academic advisor for guidance and an academic plan: advising@ccri.edu or 401-825-2301. Additionally, applicants to the Nursing program must have completed Human Physiology within five years of entering NURS 1010.

Transfer students are required to take the ACCUPLACER placement exam. However, if a student transfers the equivalent of ENGL 1005 - College Writing or ENGL 1010 - Composition I, the writing portion of the exam may be waived. Failure to take the appropriate placement exam may cause problems when trying to register for courses that require testing scores as prerequisites.

Additionally, individuals with military training or substantial life experience in a specific field can explore Prior Learning options. See more about Credit for Prior Learning here.

The total number of credits transferred, including Prior Learning Credit awards, may not exceed 75 percent of the credits required for a degree or certificate program. The transfer credit review process takes an average of two to three weeks to complete and may take longer during peak periods. Therefore, students are encouraged to send official transcripts from all prior institutions immediately after applying to the college: transfer@ccri.edu. Students will be notified by mail once transcripts have been evaluated.

Potential students are encouraged to review our databases showing how courses have historically transferred to CCRI.

Reverse Transfer
Reverse transfer enables current or former Community College of Rhode Island students to apply credits they earn at the University of Rhode Island or Rhode Island College toward a degree at CCRI. Find out more at the OES website.

To earn an associate degree through reverse transfer, you need

• At least 60 college-level credits, with at least 15 from CCRI.
• A combined GPA of 2.0 or higher.
• To resolve any financial obligations to any school.
• A transcript review.

After reviewing your transcripts, a CCRI advisor will help you figure out which courses you need to complete your degree or certificate. If you think you qualify for reverse transfer or have questions about the process, please contact us: reversetransfer@ccri.edu or 401-333-7092.
Community College of Rhode Island

Foreign Transcripts
Foreign transcripts must be evaluated by an outside agency prior to submission to the Community College of Rhode Island Office of Enrollment Services. A course-by-course evaluation with grade and credit hour equivalency is required for transfer credit assessment. Please visit the OES website for a list of approved agencies.
CCRI’s Definition of an Educated Person

Four Abilities

The faculty and staff of the Community College of Rhode Island have established four critical abilities that define the learning outcomes of a CCRI graduate. These four abilities can be applied in many contexts and are critical skills that must be developed not only at CCRI but over the course of a lifetime. These core abilities are reflected in our General Education Core Requirements and guide students, faculty and staff in establishing educational goals and assessing learning within and across the primary domains of knowledge: arts and humanities, science and mathematics, and the social sciences.
Community College of Rhode Island

1. Effective Communication
   - Use standard English grammar and mechanics.
   - Create work that addresses a given purpose and context and responds to the target audience.
   - Present a central idea, supported by concrete, relevant details.
   - Establish a clear and consistent sequence of ideas.

2. Critical Thinking
   - Identify and analyze complex ideas.
   - Determine a research focus and the nature and scope of information needed.
   - Locate, evaluate and use information effectively.
   - Draw logical conclusions from information.
   - Express well-reasoned or innovative perspectives.

3. Quantitative, Mathematical and Scientific Reasoning
   - Demonstrate an understanding of mathematical, quantitative or scientific principles.
   - Apply a scientific approach in asking questions.
   - Apply mathematical, quantitative or scientific principles in solving problems.
   - Interpret numeric information in graphical form.

4. Social Interaction
   - Evaluate ethical dimensions of decisions.
   - Use teamwork to accomplish tasks in groups.
   - Demonstrate an understanding of global, cultural and historical perspectives.

Assessment of Student Learning
CCRI is committed to providing quality education and assuring that students acquire the knowledge and skills necessary to be successful.

Assessment of student learning provides the information needed to make improvements in program structure, course content and pedagogy. To this end, information, including samples of student work provided by faculty, may be collected at the classroom, department and institution levels. The information collected is completely anonymous and has no impact on student grades. Aggregated results are used for program planning purposes and may be included in institutional research analyses and reports. In addition, students may be asked to submit samples of their coursework and engage in focus groups. They also may be asked to complete a questionnaire assessing the quality of academic services.

These activities help determine the extent to which students demonstrate competency in the areas outlined in CCRI’s Definition of an Educated Person and in their area of concentration.

General Education Core Curriculum Requirements
Minimum Credits
A minimum of 20 credits of General Education coursework is required to meet the accreditation standards established by the New England Commission of Higher Education (NECHE) for associate degree programs. Each degree program at CCRI includes courses from the three broad General Education categories of Humanities, Mathematics and Science, and Social Sciences.

To ensure both breadth and depth, a minimum of three credits from one area and a minimum of six credits from two areas are required.

Most CCRI degree programs have specific General Education requirements as outlined in their program requirements, and many include more than the minimum requirement of 20 General Education credits.

All courses within each of the specific disciplines must be numbered at the 1000 level or higher to qualify as fulfilling the General Education requirements.

Courses Approved for General Education Credits
The following courses have been approved for meeting general education credits within the listed disciplines.

Humanities

HUMN

Humanities courses present knowledge concerned with humanity and world culture: philosophy, literature, language study and the fine arts. The fine arts include music, theater and visual arts. The following are accepted general education humanities courses:
View a list of Attribute Courses

Mathematics and Science

MSCI

These courses present systematized knowledge derived from observation, study and experimentation. The following are accepted general education mathematics and science courses:

View a list of Attribute Courses

Social Sciences

SSCI

Courses within the social sciences are concerned with the study of people and their behavior, both individually and as a member of groups, nations, cultures and societies. The following are accepted general education social sciences courses:

View a list of Attribute Courses

Course Attributes

Many courses have been assigned an attribute, a quality that signifies that a particular course will satisfy a specific academic program requirement. Please see individual Programs of Study - Degrees and Certificates pages for more detail.

For a complete listing of courses in each attribute category, select the specific link below.

- **FINE** = Fine Arts
- **HUMN** = Humanities
- **LABS** = Lab Science
- **LANG** = Foreign Languages
- **LITR** = Literature
- **MTHH** = Mathematics
- **MSCI** = Mathematics and Science
- **PROG** = Programming
- **SSCI** = Social Sciences

Community College of Rhode Island

(also used by the Nursing, Allied Health, Rehabilitative Health and Dental Health departments when a student fails the clinical component of any course)
Some programs may have more stringent grading matrices.

The following designations are not calculated in the grade point average.

**S: Satisfactory**
This is used for noncredit courses except MATH 0099, 0100 and 0101 and field experience.

**U: Unsatisfactory**
This is used for noncredit courses except MATH 0099, 0100 and 0101 and field experience.

**I: Incomplete Work**
This temporary grade designation is awarded at the end of a course. It is awarded only when a student is PASSING, has attended or completed at least 75 percent of the course and is unable to complete the course due to extenuating circumstances (e.g. illness, death, unforeseeable accident, unavoidable circumstance.). With the instructor’s consent, a Contract for Completion of Incomplete Coursework form must be completed by the instructor and student with the understanding that all remaining work must be completed by the end of the following semester. (Exception: If I is given in spring, work must be completed by end of fall semester.) Should the work not be completed by the established date of the contract, the I will change to an F.

**W: Official Withdrawal**
This is used when a student officially withdraws from a course during weeks three through 10 or two-thirds of the length of the course. It is included in attempted credits but not in the grade point index.

**WP: Unofficial Withdrawal, Passing**
This is used when a student unofficially withdraws from a course at any point in the course and has a passing grade. It is included in attempted credits but not in the grade point index.

**WF: Unofficial Withdrawal, Failing**
This is used when a student unofficially withdraws from a course at any point in the course and has a failing grade. It is included in attempted credits but not in the grade point index.

**NA: Unofficial Withdrawal, No Assessment**
This is used when a student unofficially withdraws from a course before the instructor has made any academic assessment. It is included in attempted credits but not in the grade point index.

**AU: Audit**
Refer to Academic Information/Audits on page 32 in this catalog.

Grade Reports
Grades are available online through MyCCRI provided all financial obligations to CCRI are met.

In-House Credits
In-house credits are counted for time status (full time or part time) and for reasons of financial aid and academic progress. They are not counted in overall GPA, do not count toward any degree or certificate, and will show on the student transcript as “exclude credit.” An asterisk (*) following a letter grade on a transcript indicates in-house credit.

Confidentiality And Review Of Records
Refer to FERPA information.

**Academic Standards Policy**
**Goal Of The Policy**
The main goal of any academic standards policy is to provide assistance to those students who are experiencing academic difficulty. An early warning to students experiencing academic problems often results in their seeking academic support through a variety of options that help students achieve academic success. An early warning may limit the number of credits a student may take in a semester. They also may be required to select special courses or other student support options that provide special academic assistance. The goal for the college and its students is to improve academic performance so that students may attain their academic and career goals.
The Standards

The following chart details the measures that will be used to determine a student’s academic standing. The standards have a quality component (GPA) measured against a quantitative component (number of credits attempted).

<table>

* Students who are dismissed from a degree program are not permitted to enroll in courses as a nondegree student until they have consulted with an advisor to develop an academic plan of study.

† Students receiving financial aid must remain in good academic standing and are required to successfully complete a minimum of 67 percent of all courses attempted.

WHAT THE CATEGORIES MEAN

If a student fails to successfully complete enough courses in a semester and/or does not meet a required grade point average, the student may be placed under one of the following academic restrictions:

**Academic Warning:** Students are restricted to 13 semester credits and may be required to take three credits of developmental courses. Students must see an academic advisor.

**Academic Probation:** Students are restricted to 10 semester credits. Students are required to see an academic advisor who may require at least six of the 10 credits to be developmental courses.

**Program Dismissal:** Students will be dismissed from their program of study. These non-matriculating students must see an academic advisor to review various academic and developmental options to regain good academic standing. When the student is readmitted to his or her program of study, that student will remain on probation for one academic semester. The academic advisor will determine the number of credits allowed for study.

The developmental interventions and academic options may include a variety of skill development coursework, career skills/goals assessment, and program change or course load reduction.

STUDENT APPEAL OPTIONS

Students may appeal program dismissal status to the Committee on Academic Standards.

**Appeals Process:** If a student feels there are serious extenuating circumstances that contributed to poor academic performance, the student has an opportunity to appeal the academic sanction of “program dismissal.” Students who wish to appeal the sanction of dismissal must meet with a counselor in the Department of Advising and Counseling to discuss the merits and procedures of the appeal. If it is decided that the student has grounds for an appeal, the following procedures will apply:

1. Students must present their appeal of academic dismissal in writing and state the specific circumstances which merit consideration of an appeal.
2. The letter of appeal will be addressed to the Academic Appeals Committee and mailed to the Office of the Dean of Arts, Humanities and Social Sciences, 400 East Ave., Warwick, RI 02886.
3. The Academic Appeals Committee will review the request for appeal and will render the decision of the committee. The student will be notified in writing of the committee’s decision.
OTHER OPTIONS

The Academic Renewal (Forgiveness) Policy

CCRI students may request academic renewal (forgiveness) to allow removal of poor grades from the calculation of their overall GPA based upon two options:

Option 1: Academic renewal based upon past academic performance

Option 2: Academic renewal based upon change of curriculum

General provisions that apply to both Option 1 and Option 2

1. A student may request academic renewal once under the academic performance option and once under the change of curriculum option.
2. If a student requests forgiveness for a course or courses in which he or she has earned a grade of D or F, the credits earned in any such course or courses will be removed from the total credits earned and the student will receive no credit for the course. However, courses including grades will remain on the student’s official transcript designated with a special code for academic renewal.
3. All requests should be submitted using the Academic Appeal Form and forwarded to the Academic Appeals Committee. Waiver forms are available from any advisor/counselor in the Advising and Counseling office on any campus.

Specific provisions for Option 1* – Academic renewal based upon past academic performance

1. After three consecutive years of nonattendance at CCRI, a student may request academic renewal based upon past academic performance.
2. After the student completes 12 credits with a GPA of 2.5, the request will be reviewed by the Academic Appeals Committee.
3. If the student’s request is approved by the Academic Appeals Committee, grades of D or F for the courses from the prior attendance period will be excluded from the calculation of the student’s grade point average. However, the courses and grades will remain on the student’s official transcript designated with a special code for academic renewal.

Specific provisions for Option 2* – Academic renewal based upon change of curriculum

1. A student may request academic renewal based upon a change of program of study/ major any time after matriculation and after completion of 12 or more credits with a GPA of 2.5 in his or her new program of study.
2. If a student’s request is approved by the Academic Appeals Committee, grades of D or F in courses that were required by the previous program but are not required by the new program will be excluded from the calculation of the student’s grade point average. However, courses, including grades, will remain on the student’s official transcript designated with a special code for academic renewal.

The Academic Renewal Policy applies to matriculated CCRI students who have completed 12 credits with a GPA of 2.5 or better.

*For financial aid purposes, all attempted credits and grades from all courses (GPA), including those that were forgiven, must be included when determining financial aid eligibility. For details on the standards required for financial aid, visit this page.

All past academic work will remain part of the official transcript but will not be averaged into the cumulative grade point average.

Students enrolled in any of the Health and Rehabilitative Sciences programs must be aware of the following:

Academic standards specified by the Health and Rehabilitative Sciences programs supersede the college-wide academic standards. Students in these programs must follow the established academic standards policies for the specific department/program. Please refer to the specific program pages of this catalog or the respective department Web pages for specific policies and standards.

Student Schedules

SEMESTER SCHEDULES

The academic calendar for each semester/term can be found on the online college calendar page.

COURSE LOAD

To be considered enrolled full time, students must register for at least 12 credits. Any student who is registered for fewer than 12 credits is considered a part-time student and is billed accordingly. Consult Advising and Counseling to make sure you don’t need to take more than 12 credits per semester: advising@ccri.edu or 401-825-2301.

ADDING A COURSE

Using MyCCRI, students may add available courses to their schedule without permission of the instructor during the published add period found on the online college calendar. Students must add themselves to the waitlist for any courses that are full (See information about the waitlist below.)
DROPPING A COURSE
Students may drop a course from their schedule without permission of the instructor during the published drop period found on the online college calendar. While permission to drop is not required, we strongly encourage each student to consult with the instructor, or in the case of those students who withdraw from the college, to speak with the Department of Advising and Counseling. Students must use the online MyCCRI system to officially drop a course.

Courses officially dropped prior to the end of the official published drop period are not graded and do not appear on the college transcript. Courses officially dropped during weeks two through 10 are graded with a W (official withdrawal) and appear on the transcript. Official withdrawal from a course is not permitted after week 10 or two-thirds the length of the course. Modular courses may be officially dropped and/or graded with a W depending on each course’s official drop period. Consult the Office of Enrollment Services regarding modular course official drop periods: webadmission@ccri.edu or 401-825-2003.

If students decide to drop a course that constitutes only a part of their schedule (leaving other courses of study in their schedule), they should follow the official drop procedure as noted above. Students will be subject to the prorated fees and rules as specified.

WAITLIST
Prior to the start of classes, CCRI courses have an electronic wait list for students registering for this academic year. There are a few exceptions. Nursing courses do not have a waitlist option. The wait list is activated when the maximum enrollment for a class is reached and allows additional students to indicate an interest in the class.

Students on a waitlist will not be added to the class automatically. When an existing student drops the course, a MyCCRI email notification goes out to the first student on the waitlist. That student has until the date and time indicated in the email notification to register. If the student does not register by that date and time, a MyCCRI email notification will go to the next student on the waitlist. The student who originally received the notice is no longer eligible to register for the course and is no longer on the waitlist.

Students wishing to get back on the wait list must go to their MyCCRI account, drop the waitlisted course from their schedule, click Submit, and then re-register for the waitlist if there are still seats available.

CAPACITY OVERRIDE
Students may register online for classes only if there are seats available. If a course section is at capacity, faculty will have the option to assign the student a capacity override. Students issued a capacity override will receive a MyCCRI email notification with registration instructions. Students must register themselves using MyCCRI.

COURSE CANCELLATION POLICY
Courses that do not meet minimum enrollment standards will be canceled according to the college calendar for each semester. Any student affected by a cancellation will be notified via campus email prior to the first meeting. Registration for another section may be done online. Refunds due to course cancellations are made in full.

COURSE CREDIT POLICY
This policy governs all CCRI credit-bearing courses.

For each credit hour, academic lecture courses will include one contact hour (50 minutes) involving direct faculty instruction (or its equivalent online) and a minimum of two hours of out-of-class work per week over a 15-week period. One credit hour will be awarded for laboratory and field/clinical courses which meet from 120 to 180 minutes per week over a 15-week period. The amount of time assigned to laboratory and field/clinical courses is determined by a consideration of the transfer of theory to practice. For courses meeting in shorter timeframes, comparable equivalencies of contact time and out-of-class work are established.

This means, for example, that students in a three-credit course will meet with the instructor for 150 minutes (3 credits × 50 minutes) per week and will be responsible for an additional six hours (3 credits × 2 hours) of out-of-class work/homework. Laboratory or field/clinical courses will meet for three hours of direct faculty instruction plus an additional two to three hours of laboratory or field/clinical experience each week. Classes will meet for 15 weeks unless courses are specifically identified as having an alternate timeframe.

WAIVING COURSE PREREQUISITES
Department chairs may waive course prerequisites online through the first week of classes. Students must register themselves through MyCCRI during the published add period.
PERMISSION OF INSTRUCTOR
Where “permission of instructor” is indicated in the course description of the catalog, instructors may assign an electronic override after the published add period. Students must register themselves through MyCCRI.

LATE REGISTRATION
For information about the late registration period refer to this page. Students registering after the tuition due date must make payment on the day they register.

REPEATING A COURSE
When a student retakes a course for any reason, only the highest grade earned will be figured into the cumulative grade index. However, all the grades received for the course will appear on the student’s transcript. The recomputation of the highest grade earned in the cumulative index is automatic. This change must be made before the degree or certificate program is completed. Please note that repeating classes will affect a student’s financial aid eligibility.

WITHDRAWAL FROM COLLEGE
If a student drops all courses (or a course that is the only one for which he or she is registered), the student is considered to be withdrawing from the College for that term. Students who withdraw after the add/drop period must do so by completing an official withdrawal form through the Department of Advising and Counseling: advising@ccri.edu or 401-825-2301.

LEAVE OF ABSENCE
Leaves of absence are issued only for Health Sciences programs. Students may request a leave from their program of study by completing a Leave of Absence form available from the department chair of their program. The leave of absence does not officially withdraw the student from the College. Students must complete an official withdrawal form through the Department of Advising and Counseling. If a Leave of Absence form is not filed, students may not be readmitted to their program upon returning to CCRI. Students whose leave forms are signed by the department chair may be granted a leave of up to two consecutive semesters.

Students who find it necessary to leave CCRI and who are enrolled in programs other than a Health Sciences program do not need to fill out a Leave of Absence form. They must, however, officially withdraw from the college.

ATTENDANCE
Regular class attendance is an essential part of student success in community college life. When the number of absences becomes excessive, the privilege of continuing in the course is jeopardized. Students are responsible for making up all academic work missed for any reason.

Attendance in First Week of Class is Critical
During the verification of enrollment (attendance) period, faculty will be reporting the names of the students who have attended their classes in the first week of the semester. Attendance is a condition of enrollment. Students must attend class during the first week of class or contact the instructor to make arrangements to continue in the course. If the instructor does not hear from the student during the first week of class, the student will be dropped from the class as a “no-show.” Being marked as a “no-show” means that the student is no longer officially enrolled in the class.

Verification of Enrollment
Title IV eligible institutions are required to verify student enrollment. All faculty members are required to complete verification of enrollment per the dates in the college calendar. The verification of enrollment is used to verify that students are enrolled and to identify students who have failed to attend and failed to contact their instructor. These students will be reported as a “no-show.”

Students marked as a “no show” will be sent an email notification that they have been dropped from the course. In cases where a student believes he or she was erroneously marked as a “no-show,” a request can be made for re-admittance. The instructor will have the option of assigning an electronic permission code which will allow registration back into the class.

AUDITS
Individuals may audit lecture courses. This means that students may attend and participate in classes but choose to receive no grade or credits. To register as an auditor, students should follow the in-person registration procedures, indicating at that time the desire to audit. Auditors pay tuition and fees. Financial aid does not cover audits.

Experiential Education
CCRI students are provided the opportunity to participate in experiential learning outside the classroom. This option includes a supervised work experience related to a student’s academic interests or program of study. The work experience can be for academic credit or as a noncredit internship.
If taken for credit, students develop learning objectives to practice and reinforce classroom theory. The work experience gained before graduation helps students confirm career choices, builds credible work experience, provides opportunities to network and gives students a competitive edge in the job market. Students who choose to earn academic credit can receive four to eight credits by completing one to two semesters of Cooperative Work Experience. These seminars are taken in conjunction with a field (work) placement. (see Cooperative Work Experience MEDL 2910 and LIBA 1010).

JAA students are encouraged to talk to their academic advisor about transferability of Cooperative Work Experience credits. Alternately, students can choose to participate in internships without academic credit to build experience in their field. For more information, call Career Planning at 401-825-2322.

Credit for Prior Learning
Put your prior learning, knowledge, and experience to work at CCRI. We have a long history of and commitment to recognizing, evaluating and awarding college credit for knowledge gained outside of CCRI, providing accelerated pathways to reduce the time and cost of acquiring a degree or certificate.

Students can earn college credit for prior learning in their field of study. This list below shows some of the opportunities to earn Credit for Prior Learning. Find out more at Prior Learning.

Prior College-Level Education
- Advanced Placement (AP) exams
- International Baccalaureate Diploma Programme
- Credit from other colleges and universities
- Servicemembers Opportunity Colleges (SOC)

Testing – through our CCRI Testing Center
- GED, with score of 175-200
- College Board College-Level Examination Program (CLEP)
- DANTES Subject Standardized Test (DSST)
- UExcel® and Excelsior College® Examinations.

Military, Corporate, and Professional Training
- Military training and experience
- Corporate-sponsored training
- Standardized Credit Awards for workplace training (e.g., apprenticeships, banking, management, police academy, real estate, and tourism)

Other
- Self-Directed Learning (e.g., creative writing, machinist, artist, entrepreneur)
- Departmental Challenge Tests
- Prior Learning Assessment (PLA) of portfolios

To find out if you are eligible for prior learning credit, contact the office of Academic Affairs.

Additional Academic Information
DEAN’S LIST
A Dean’s List is published at the end of fall and spring semesters. A student is eligible for Dean’s List honors when he or she:

- is enrolled in a degree program;
- has earned 12 or more credits in one semester (not including any in-house credits or developmental classes);
- has achieved a grade point average of 3.25 or higher with no grade lower than C for the current semester.

Note: Students who earn a grade of I, IC, WP, WF are not eligible for the Dean’s List.

DISMISSAL FROM THE COLLEGE
Students dismissed from the college or a program for academic, social or other reasons are notified in writing at the time of dismissal. Some departments and programs have specific dismissal policies and students should acquaint themselves with them.
GRADUATION AWARDS
Academic achievement will be recognized at graduation for students who have met the following criteria:

- Graduation Honors: 3.25 cumulative grade point index
- Graduation High Honors: 3.50 cumulative grade point index
- Graduation Highest Honors: 3.75 cumulative grade point index

Note: To be eligible for honors, students must earn at least one-half of the credits for their program at CCRI.

AWARDING MULTIPLE DEGREES
The Community College of Rhode Island will award multiple associate degrees of the same designation only if there is a 30-credit difference between the two programs in which the degree is being earned.

CONFIRMED GRADUATES
Students will be confirmed as a graduate of the Community College of Rhode Island if degree requirements for the program of study in which they are enrolled have been satisfied according to the following schedule:

- Spring graduates will be confirmed in May.
- Fall graduates will be confirmed in December.
- Summer graduates will be confirmed in August.

HONORS PROGRAM
The Honors Program reflects the college’s commitment to academic excellence. By creating learning communities and by strengthening the opportunities for intellectual dialogue, the Honors Program enhances the educational experience at CCRI.

Students can earn honors credits through supplementary projects within existing course sections and specially designated “honors” courses. Each honors project must be sponsored by an instructor. Students may take a maximum of two honors projects in any one semester.

To be eligible for the Honors Program, students must have completed at least 12 semester hours and earned at least a 3.25 grade point average.

Participation in the Honors Program provides students an opportunity to acquire additional knowledge and skills. Students and faculty work together as “colleagues in learning” – a cooperative spirit that reflects the fundamental purpose of the academic community. In addition, the student’s official transcript will reflect all honors credits. These unique designations on the transcripts not only promote transfer to four-year institutions, but also can lend an advantage with regard to competitive status in the workplace. An extra half credit is available for honors projects integrated into existing course sections. Students who complete four honors projects or more at CCRI will receive special recognition at the graduation ceremony.

For more information, email Lynne Andreozzi-Fontaine, Ph.D., at landreozzifont@ccri.edu or Karen Kortz, Ph.D., at kkortz@ccri.edu.

STUDY ABROAD
CCRI offers a study abroad program through the College Consortium for International Studies. This program provides students the opportunity to study in one of more than 30 countries on six continents to enhance their educational experience through exposure to new cultures and educational systems. A study abroad experience can be a path to self-reliance, independent thinking, and valuable job skills.

The consortium consists of more than 100 two- and four-year public and private colleges and universities (some of which are sponsors) that cooperate to offer students study abroad opportunities each year. A wide range of academic programs is offered. Except for language studies, most courses are taught in English. All programs are accredited and approved by the college and the consortium. Study abroad programs are available for a semester, full-year or summer.

For more information, call Deborah Notarianni-Girard, Ph.D. at 401-825-2254 or visit the World Languages and Cultures website.

Students may be eligible for financial aid. Call 401-825-2468 for more information.

INTER-INSTITUTIONAL AGREEMENT
Any full-time student enrolled in a degree program may enroll in a maximum of seven credits of his or her full-time schedule during each of the fall and spring semesters at the University of Rhode Island and/or Rhode Island College at no additional expense. Students must be enrolled for at least five credits at CCRI and the total number of credits taken at all institutions combined must be at least 12 credits but not to exceed 18 credits. Summer
session registrants are not eligible for this program. Students interested in participating in this agreement should contact the Office of Enrollment Services.

Following completion of the course(s) at the University of Rhode Island and/or Rhode Island College, students must have an official transcript sent back to CCRI’s Office of Enrollment Services as noted on the signed agreement.

**CCRI FINANCIAL AID CONSORTIUM AGREEMENT**

The CCRI Financial Aid Consortium Agreement may be used by students receiving financial aid who are enrolled in a degree-granting program at CCRI and want to enroll at another institution at the same time. This also may apply for summer enrollment and/or Study Abroad.

CCRI’s Financial Aid office will pay only for courses that are required for the student’s current program of study.

Financial aid can be received at only one institution per semester/term. To have a student’s financial aid applied for classes taken at another school, each semester the student must complete a consortium agreement and proof of enrollment at the “host” institution. The consortium form must be returned to the CCRI Financial Aid office.

Tuition payment arrangements must be made with the “host” school. Financial aid funds paid by CCRI for consortium classes may not be available until four weeks after the start of the Community College of Rhode Island’s semester.

At the end of the semester/term, the student must request that an academic transcript for classes taken at the “host” school be sent to CCRI. These transcripts must be received before additional financial aid can be applied or disbursed at CCRI.

CCRI Financial Aid Standards of Academic Progress apply for classes at “host” schools through a consortium agreement.

**The consortium agreement must be completed and approved within 30 days from the first day of classes for the current term at CCRI.**

**ACCUPLACER PLACEMENT TESTS**

English and Math Placement Assessments

CCRI requires that all students accepted into a degree or certificate program complete the mandatory ACCUPLACER writing, reading and math placement tests before registering for classes. Nondegree students who wish to enroll in a course requiring a prerequisite also must complete the ACCUPLACER test. This assessment does not affect admission, but the results help to place students in appropriate courses. Students who have taken ACCUPLACER at another college within the last year must have an official copy of the scores sent to the Department of Advising and Counseling at any campus.

Testing takes approximately 2.5 hours and can be completed in the Department of Advising and Counseling.

**PLAGIARISM**

The term “plagiarism” includes, but is not limited to, the use, by paraphrase or direct quotation, of the published or unpublished work of another person without full and clear acknowledgment. It also includes the unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials.

Any student found to have committed plagiarism misconduct is subject to the disciplinary sanctions outlined in the Student Handbook available on the Dean of Students website.

**PROGRAM CHANGES/CHANGE OF MAJOR**

Students may change from one CCRI program or curriculum to another through the “Change My Major” link found on the “For Students tab” in their MyCCRI account. In some cases, this requires approval from the academic department. For more information about the Health Sciences admission process, please visit Admission Guidelines for Health & Rehabilitative Sciences.

**RETURNING TO CCRI**

Students who stopped attending for at least one semester are required to register for classes through their MyCCRI account and are held to the degree requirements published in the catalog for the year they return. Information concerning this process is located in the Admissions section of the college’s website.
Student Services

- Army ROTC
- Transcripts
- Advising and Counseling
- Athletics and Physical Education at CCRI
- Campus Stores
- Career Services (See Division of Workforce Partnerships)
- Dining Facilities
- Health Services
- Library
- Student Success Centers
- Opportunity and Outreach
- College Police
- Vetsuccess on Campus
- Student Clubs and Organizations

ARMY ROTC
Under an arrangement with the U.S. Department of Defense and Department of the Army, Community College of Rhode Island students may attend Military Science classes on the Providence College campus while attending CCRI and thereby complete their first two years of the four-year ROTC program.

The courses included are ROTC 1010 - Freshman Military Science, ROTC 2050 - Sophomore Military Science and ROTC 2070 - Sophomore Military Science and Lab.

Students who successfully complete the four-year ROTC program and graduate from college with a bachelor’s degree will be commissioned second lieutenants in the U.S. Army Reserve.

TRANSCRIPTS
Transcripts are issued from CCRI’s Office of Enrollment Services and are issued only after all financial obligations to the college have been paid. One week is required for transcripts to be processed during grading, graduation and registration periods.

ADVISING AND COUNSELING
CCRI’s Department of Advising and Counseling offers a full range of academic advising, career, educational and personal counseling services. Academic advising is available for students with program and course selection concerns. Career counseling, consisting of interest, values and personality assessments, is provided to students requesting help in establishing educational and career goals. Counselors also assist students with transfer planning to ensure a smooth transition and maximum transfer of credits to four-year institutions.

Short-term counseling also is available for students who are experiencing personal difficulties as they relate to their academic success. All meetings are strictly confidential.

For information on walk-in hours or to make an appointment, call 401-333-7160 in Lincoln, 401-825-2301 in Warwick, 401-455-6063 in Providence, and 401-851-1625 in Newport.

ATHLETICS AND PHYSICAL EDUCATION AT CCRI
CCRI is home to one of the Ocean State’s finest and most successful intercollegiate athletic programs. Since its inception in 1965, the CCRI program has long been considered a front-runner in New England community college and junior college athletic circles.

The basketball, baseball, volleyball, cross country, and soccer teams have all been nationally ranked. The 2002 women’s soccer team captured the school’s first national championship, while a number of other squads, including men’s basketball and women’s soccer, were national runners-up. With over 5,800 victories, 227 All-Americans, and 895 All-Region selections, CCRI is a leader among New England community colleges. Great coaching is the key to CCRI’s success, and the school has always featured legendary coaches. From Hall of Fame athletic director and men’s basketball coach Vin Cullen, to baseball coaches Whitey Fell and Art Pontarelli, tennis coach Ray Carr and volleyball coach Gail Davis, the tradition of top-flight teaching continues through the present day.

A member of the National Junior College Athletic Association and associate member of the National Collegiate Athletic Association, the College fields intercollegiate men’s teams in baseball, basketball, soccer, cross country, and indoor and outdoor track. Intercollegiate women’s teams
include volleyball, basketball, cross country, soccer, softball, and indoor and outdoor track. Additionally, our Club Sport offerings include men's and women's swimming, women's Beach Volleyball, men's volleyball, and eSports.

The Community College of Rhode Island has proven to be a stepping stone for many student athletes who moved on to complete their academic and athletic careers at four-year colleges and universities throughout the nation.

CAMPUS STORES
The College Campus Stores sell school and art supplies, imprinted clothing and gifts, bus passes, and new and used textbooks. They also offer rental on some textbooks. When classes are in session, the bookstores are open the following hours.

Knight and Flanagan campuses (fall and spring semesters)
Monday through Thursday, 8:15 a.m. to 7 p.m., and Friday from 8:15 a.m. to 3:30 p.m.

Liston Campus
Monday and Tuesday from 8:15 a.m. to 6 p.m., Wednesday through Friday from 8:15 a.m. to 3:30 p.m.

Newport County Campus
Monday through Friday from 8:15 a.m. to 3:30 p.m.

When classes are not in session, the Campus Stores are open Monday through Friday from 8:15 a.m. to 3:30 p.m. The Campus Stores also offer extended hours during the first week of classes. For more information, please visit the bookstores' website.

DINING FACILITIES
The college contracts with an outside vendor to operate full-service cafeterias and vending services on each campus. Hot and cold meals are served daily when classes are in session.

HEALTH SERVICES
The Office of College Health Services is staffed by a registered nurse in collaboration with a medical doctor. Generally, the office is open Monday through Friday from 8 a.m. to 4 p.m. Any change of hours is posted at the office, located on the Knight Campus, Room 1240, in Warwick, and on a voice message accessed at 401-825-2103.

For medical emergencies, students should contact the Campus Police on their respective campus: Lincoln, 401-333-7035; Warwick, 401-825-2109; Providence, 401-455-6064 or Newport, 401-851-1650.

Central office services include first aid treatment, emergency medical care, blood pressure checks, health education and counseling, treatment referrals and color blindness testing for students, faculty and staff. The nurse also works in conjunction with the Wellness Committee to organize the Wellness Fair and other wellness initiatives.

The primary function of Health Services is to ensure all immunization requirements mandated by the state of Rhode Island are met and documented upon enrollment at CCRI and that those records are maintained.

Rhode Island law requires any student entering college full time (12 credits or more), any student studying on a visa, or any full- or part-time student in a health-related field of study to have the following immunizations or blood proof of immunity:

- One Tdap vaccine (tetanus, diphtheria, pertussis)
- Two MMR vaccines (measles, mumps, rubella)
- Three-shot series of hepatitis B vaccine
- Two doses of varicella (chickenpox) vaccine or a statement signed by your health care provider stating that you have a history of chickenpox disease
- Meningococcal vaccine (strongly recommended for students under the age of 22)

In the event students know they received vaccines but cannot obtain their vaccination records from either previous schools or physicians, they can obtain titers (lab tests for immunity). Students who wish to obtain the titers can contact the CCRI nurse at the Knight Campus in Warwick for a discounted lab slip.

Requirements for Health Sciences students
Students and faculty in Health Sciences programs are required to obtain health insurance. Health insurance is not provided by the College or clinical agencies.
Community College of Rhode Island

See the Health Sciences program page for more requirements for students in Health Sciences programs. The Health Services nurse can assist you with information about how to obtain necessary documentation: nurse@ccri.edu or 401-825-2103.

LIBRARY
The Community College of Rhode Island Library offers a welcoming environment and a commitment to support the diverse cultural and intellectual interests of the college and local community. As a full partner in the educational experience, the CCRI Library provides the materials, resources and services to support the college curriculum, enhance teaching and learning and encourage independent and lifelong learning. The library actively promotes information literacy, critical thinking skills, collaborative learning and intellectual development.

Each campus has a library with printer access and online books, journals and other resources. Our catalog and databases can be accessed on or off campus. Each library is equipped with an electronic classroom with networked computers and printers.

Librarians are available to assist students individually with research questions. Librarians also work with faculty to provide specialized library instruction classes. College-level research classes are offered. See course descriptions for more details.

The CCRI Library is a member of the HELIN (Higher Education Library Information Network) consortium. CCRI students with a library-activated CCRI ID may borrow material from all CCRI campuses and HELIN member libraries: Johnson & Wales University, Providence College, Rhode Island College, Roger Williams University, Salve Regina University, and Wheaton College.

STUDENT SUCCESS CENTERS
The Student Success Centers provide academic assistance through tutoring services, coordinate information and referrals to college resources, seek ways to improve student satisfaction and retention, facilitate New Student Welcome Days, and assist students achieve their goals. Academic Coaches help students understand their individual learning needs, develop better study habits and behaviors, and create plans to achieve their goals.

Academic Coaching, Peer Tutoring, & Study Strategy Workshops
An essential part of success at any college is the amount of time and effort students put into preparing for their weekly lectures and exams. The Student Success Centers can help you learn how to use your course materials more effectively, integrate online study materials, explore strategies on how to take notes and prepare for exams. Learn how, when and where to study and to better manage your time. Special workshops such as HESI test preparation and pre-semester preparation sessions are offered throughout the year.

In addition, the Student Success Centers provide free peer tutoring for CCRI students in most subject areas. Tutoring allows students to connect with a peer tutor recommended by department faculty to tutor a specific subject. Tutoring is an opportunity for students to ask questions and review course concepts. There is no charge to receive tutoring or to participate in workshops. You may schedule tutoring and workshops from any computer, tablet, or cell phone with internet access by visiting the Student Success Center website.

New Student Welcome Day
At New Student Welcome Day you will learn about the people and resources that can help you make your first year at CCRI a success. This interactive, hands-on program introduces new students to their campus and both the strategies, and places to go to solve problems and get support.

College Success Course (LRCT 1020)
This course will give new students practical tips and strategies that will help them succeed in college. Emphasis is on attitude, study habits, time and stress management. In a setting of active and collaborative learning, students are engaged in a variety of instructional experiences, including discussions with reading, speaking, writing and listening assignments. The course will require the creation of a personal success plan that will include educational and career goals and will introduce and make use of the college's resources and personnel.

OPPORTUNITY AND OUTREACH
The Community College of Rhode Island’s Office of Opportunity and Outreach offers several programs that help Rhode Islanders successfully enter and complete college.

ACCESS/TRIO Student Support Services
ACCESS is a TRIO Student Support Services program, funded by the U.S. Department of Education. ACCESS serves 440 students each year across CCRI’s four campuses and offers individualized support to students from acceptance into a program through graduation from CCRI. Services include academic, career, transfer and financial aid advising, and financial literacy. Professional tutoring also is available in several subject areas. Counselors offer workshops designed to address academic skill building and college adjustment. To be eligible, students must be enrolled in an associate degree program, and be the first generation in college (neither parent completed a baccalaureate degree), low-income and/or have a . Selection for participation in ACCESS is competitive and decisions are made on the strength of an interview and on a first-come, first-served basis. For more information, contact 401-825-2305 or visit the Access Website.
Community and Social Resources
The Community and Social Resources office is available to help students facing non-academic barriers to success by connecting them with social support systems in their community. Examples of such assistance includes emergency food, emergency housing, child care, medical assistance, mental health/substance dependency treatment, transportation and legal services. All services are free and confidential. For more information contact 401-455-6156 or visit the Community and Social Resources website.

Disability Services for Students
Disability Services for Students (DSS) provides support services and coordinates reasonable academic accommodations for students with documented disabilities under the ADA and Section 504 of the Rehabilitation Act. Academic accommodations include, but are not limited to, the use of assistive technology, alternative testing, course accommodations, sign language interpreters, reader/audio taping services, scribes and peer notetakers. Students are responsible for identifying themselves to the DSS office and submitting appropriate documentation in advance of the requested accommodation. In addition, the DSS office serves as a resource to faculty and staff, works to dispel negative and limiting stereotypes, and promotes a campus environment that is sensitive, accepting and responsive to the needs and contributions of all CCRI students.

For more information, visit the Disability Services for Students website or contact DSS: 401-825-2164 in Warwick; 401-333-7329 in Lincoln; 401-455-6064 in Providence; or 401-851-1650 in Newport.

Gateway to Success
This free program is designed to help students enhance their Reading and/or Math skills and possibly improve their Accuplacer test scores. At the end of the program, students will have an opportunity to re-take the Accuplacer and, hopefully, test into higher-level courses, saving both time and money. Students interested in learning more about the program can contact Naglaa Gaafar at 401-825-2407 or at nagaafar@ccri.edu

REACH (Realizing Educational and Career Hopes)
REACH assists Rhode Island Works participants throughout Rhode Island to acquire the educational, vocational and personal skills required to be self-sufficient and gainfully employed. The program provides academic and career guidance to help participants develop educational and career plans. In addition, RI Works referred participants are assigned a REACH coordinator who provides case management, mentoring and direction to support services during their program of study at CCRI. REACH is funded by the Rhode Island Department of Human Services.

For more information, visit the REACH website or contact the REACH office nearest you: 401-825-2290 in Warwick, 401-333-7166 in Lincoln, 401-455-6064 in Providence or 401-851-2290 in Newport.

Rhode Island Educational Opportunity Center
The Rhode Island Educational Opportunity Center (RIEOC) is a TRIO program funded by the U.S. Department of Education that provides comprehensive, individualized support to Rhode Island adults who want to continue their education. RIEOC services include financial aid application assistance, admissions application assistance, fee waivers, career counseling, GED® and ESL information, default loan counseling, transfer information and post-secondary placement. RIEOC serves more than 3,000 individuals each year, has offices on all four campuses, and maintains a presence in community-based organizations statewide. For more information, visit the EOC's website or contact 401-455-6028.

CAMPUS POLICE
Professionally-trained Campus Police are on staff at each campus. Also, in accordance with the Campus Crime Awareness Act, campus crime statistical information is available on each campus in the Campus Police office and on the CCRI website.

Officers are also available to escort students on campus, should they feel unsafe or uneasy. Your safety is paramount to everyone at CCRI.

If you have an emergency on campus, don’t hesitate to contact CCRI Campus Police at x2000 from any campus (825-2000). You may also dial 911. For non-emergencies, you can call 401-333-7035 at the Flanagan Campus in Lincoln, 401-455-6050 at the Liston Campus in Providence, 401-851-1620 at the Newport County Campus, or 401-825-2109 at the Knight Campus in Warwick. Campus Police are available 24 hours a day, seven days a week at 825-2109 and x2000 (Emergencies).

Find out more about campus policies, fire safety, emergency procedures and incident reporting on the Campus Police website.

VETSUCCESS ON CAMPUS
VetSuccess on Campus is offered at CCRI through the Veterans Benefits Administration and places an experienced vocational counselor on campus who serves as a “one-stop liaison” for student veterans, helping them understand their VA education benefits and access resources on campus and at the VA. Rhode Island was one of the original seven states to have an on-campus counselor from the VA, and the program has now expanded across the country.
Community College of Rhode Island

Micaela Black Estrella is the VetSuccess on Campus representative for Rhode Island and has offices on the Liston and Knight campuses. Veterans can contact her at micaela.black@va.gov or 401-648-1597.

Student Clubs and Organizations
For the most up-to-date listings, visit the Student Groups website.
Division of Workforce Partnerships

The Division of Workforce Partnerships, formerly the Center for Workforce and Community Education (CWCE), builds strategic partnerships with industry leaders and works collaboratively to deliver programming for students to secure employment now and continue their education and growth into high-wage careers. Workforce programs include Workforce Partnerships, Career Services, Adult Education, and Transportation Education. Grant-funded programs enable qualified participants to receive skill training, develop foundational academic skills, or gain workforce training. Courses are taught on each campus, online, or at worksites throughout RI.

**Workforce Programs** provides academic courses and customized training courses for employers throughout the state. Students can take pre-employment classes in healthcare, manufacturing, technology, Microsoft Office, trades, apprenticeship training, and more. Many programs are designed in response to the needs of the RI community to educate, train, and certify individuals for success in the 21st century economy. To speak with staff, please call 401-333-7070.

**Adult Education** provides adult learners opportunities to gain foundation skills through GED preparation and testing and English as a second language (ESL) courses. There are multiple levels of both GED and ESL classes to meet a range of educational needs. Staff also helps students transition from ESL and GED classes to credit-bearing or certification courses. To speak with staff, please call 401-455-6144.

**Career Services** provides support at every stage of a student’s education. Career advisors assist students with a variety of career concerns from making a career choice, matching majors to occupations and devising a career action plan to reach one’s educational or occupational goal. Assistance is provided to students seeking internship opportunities, job search help, résumé review, interview preparation and on-campus and off-campus employment. Students are encouraged to meet with a Career Services advisor or placement officer early and often. To speak with staff, please email careerservices@ccri.edu or call 401-825-2322.

**Transportation Education** provides Driver’s Education, Motorcycle Rider Education, CDL, driver retraining programs, and school bus driver training to participants. To speak with staff, please call 401-825-1214.

For more information, please visit the [Division of Workforce Partnerships website](http://www.ccri.edu/division-of-workforce-partnerships).

Office of Institutional Advancement

MISSION
The Office of Institutional Advancement (OIA) leads the philanthropic efforts of the Community College of Rhode Island (CCRI). Working collaboratively with the CCRI Foundation and the CCRI Alumni Association, OIA responsibly promotes philanthropy to maximize the resources raised to support students in service of CCRI’s mission and institutional priorities through a donor-centered, comprehensive, sustainable plan. Our work reflects the high standards and ethics adopted by the Council for the Advancement and Support of Education (CASE), Association of Fundraising Professionals (AFP), and Uniform Prudent Management of Institutional Funds Act (UPMIFA), and is accomplished by creating relationships with our internal and external constituencies, fostering a spirit of engagement, mutual support and integrity.

CCRI FOUNDATION
The Community College of Rhode Island Foundation was established in January 1979 as an independent, nonprofit corporation to encourage and provide support from private sources for CCRI and its students. Funds are used for student scholarships, strategic programs and the college’s professional development initiatives, capital improvements, the purchase of educational equipment and college priorities. For more information, visit the CCRI Foundation website.

ALUMNI ASSOCIATION
The CCRI Alumni Association works with the CCRI Foundation to raise funds for the college, sponsor alumni engagement events for graduates and friends, and present annual scholarships, book awards, and emergency funding for students. Alumni Association membership is open to all graduates of the college. Since 1964, CCRI has graduated more than 70,000 students. For more information, visit the Alumni website.

GRANTS
Our goal is to support faculty and staff in seeking, obtaining and administering grant-funded programs that uphold the mission of the College. The Office of Institutional Advancement assists faculty and staff through the initial process of notifying college administration of interest in obtaining external funding, developing an idea, coordinating funding opportunities, seeking external funding resources and assisting the program director once the project is funded. For more information, visit the Office of Institutional Advancement’s website.

This list is accurate as of March 2019. The most updated information can be found at [www.ccri.edu/programs/](http://www.ccri.edu/programs/).

Additional workforce training programs are offered by the Division of Workforce Partnerships.

**Post Associate Certificate**

This is offered to any student who successfully completes 30 credits beyond the associate degree. Courses may be taken from any discipline but must be taken at CCRI after completion of an associate degree. A minimum of a 2.0 GPA is required.
Professional Studies

PROGRAMS

- Associate Degree Program Concentrations
  - Administrative Assistant/Secretary (ADAD)
  - Legal Administrative Assistant/Secretary (LGAD)
  - Medical Administrative Assistant/Secretary (MDAD)
- Certificate Program Concentrations
  - Basic Office Skills Concentration (BOSC)
  - Customer Service Specialist Concentration (CSPC)
  - Hospitality Concentration (HOSP)
  - Legal Office Assistant Concentration (LOAC)
  - Medical Insurance Billing Specialist Concentration (MIBC)
  - Medical Transcription Concentration (MEDT)
  - Office Administration Concentration (OFAC)
  - Travel and Tourism Concentration (TRVL)

The Professional Studies programs are designed to emphasize a variety of computer tasks created by new technologies as well as traditional office responsibilities. With the shift of work responsibility away from middle management, the role of the office professional has become critical. All organizations need timely and effective office and administrative support to operate efficiently.

The International Association of Administrative Professionals defines administrative professionals as “individuals who are responsible for administrative tasks and the coordination of information in support of an office-related environment and who are dedicated to furthering their personal and professional growth in their chosen profession.”

Administrative Assistant/Secretary Concentration (ADAD)

Associate in Science Degree in Professional Studies (AS_ADOT)

This program is available full time or part time, days or evenings.

The Administrative Assistant/Secretary concentration prepares students for careers such as executive assistant, office manager and senior word processor. Students who successfully complete the program have a background in Microsoft Office applications, administrative office management and advanced transcription. Career opportunities for the graduates of this program are expected to remain constant.

The program trains students to perform a variety of tasks encountered by the administrative assistant involving decision-making, accepting responsibility and managing an office. In their last semester, students are given the opportunity to work in the office of a local business.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Total Major Requirements Credits: 41

Total Program Credits: 62
Basic Office Skills Concentration (BOSC)

Certificate in Professional Studies (CERT_ADOT)

This program is available full time or part time, days or evenings. The Basic Office Skills concentration provides students with immediate job training for entry-level office positions. Such positions include office assistant, word processing typist, receptionist and data entry clerk. Students who successfully complete the program have a background in word processing, accounting and file management.

Since this program consists of the first-semester course requirements for Professional Studies degree programs, all credits earned in this certificate are fully transferable to these degree programs or other department certificates. In addition, credits earned in this certificate program may be applied to the elective credit portion of the General Studies and Liberal Arts degree programs.

Note: General Studies and Liberal Arts students can use the elective credits portion of their degree programs to earn a certificate in Basic Office Skills (20 credits) and/or Office Administration (36 credits) as well as other department certificates. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Total Certificate Requirements Credits 20

Total Program Credits 20
Customer Service Specialist Concentration (CSPC)

Certificate in Professional Studies (CERT_ADOT)

Flanagan Campus, Lincoln and Knight Campus, Warwick

The Customer Service Specialist concentration provides students with the training necessary for employment in entry-level customer service positions. Front-line customer service representatives interact with their customers every day. This program gives students the skills and techniques required to provide outstanding customer service and support. Students who successfully complete this program may sit for the Help Desk Institute’s customer service exam.

Credits earned in this certificate program can be applied toward an Professional Studies or General Studies degree.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

Legal Administrative Assistant/Secretary Concentration (LGAD)

Associate in Science Degree in Administrative Office Technology (AS_ADOT)

Flanagan Campus, Lincoln
Knight Campus, Warwick

This program is available full time or part time, days or evenings.

The Legal Administrative Assistant/Secretary concentration prepares students for careers such as legal secretary, legal transcriptionist and legal office assistants who work in a variety of office settings including law offices, legal departments and insurance companies. Career opportunities for the graduates of this program are expected to remain constant.

Students who successfully complete this program demonstrate the ability to understand basic legal terminology, the elements of legal style and the use of standard clauses within legal documents and forms. Students develop high-level skills in managing a law office and in the production of accurate legal documents. In their last semester, students are given the opportunity to work in a local legal office.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Legal Office Assistant Certificate (LOAC)

Certificate in Professional Studies (CERT_ADOT)

Flanagan Campus, Lincoln
Knight Campus, Warwick

The Legal Office Assistant certificate program is designed specifically for students interested in acquiring the skills needed for entry-level legal administrative support positions in the least amount of time. Rewarding career opportunities for graduates of this program are expected to remain constant.

Students who successfully complete this program have a background in legal terminology, Microsoft Office applications and language skills. In their last semester, students are given the opportunity to work in a local legal office. All credits earned in this certificate program may be applied to the Legal Administrative Assistant degree program.

This program is available full time or part time, days or evenings. Some courses are offered days only. To complete this program within the two semesters, applicants must be able to type at the rate of 25 words per minute before enrolling or they must enroll in the Microcomputer Keyboarding course, which will extend completion time.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Medical Administrative Assistant/Secretary (MDAD)

Associate in Science Degree in Professional Studies (AS_ADOT)

Knight Campus, Warwick only

The Medical Administrative Assistant/Secretary concentration prepares students to perform administrative and clinical duties. Some responsibilities encountered by graduates include preparing medical correspondence, assisting physicians with medical reports and histories and arranging for patient hospitalization, including insurance and billing practices. This is currently considered one of the fastest-growing occupations.

This program provides the highly technical training necessary for a competent medical assistant/secretary. In their last semester, students are given the opportunity to work in a local medical office.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Medical Insurance Billing Specialist Concentration (MIBC)

Certificate in Professional Studies (CERT_ADOT)

Knight Campus, Warwick only
This concentration provides students with the knowledge, skills and abilities to process medical insurance forms and to code medical records using the CPT and ICD-CM coding systems. Upon completion of the program, students are eligible to take the national Certified Professional Coders examination. Employment of medical records and health information technicians is expected to grow much faster than average for all occupations.

Certificate program credits may be applied toward an Professional Studies or General Studies degree.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Medical Transcription Concentration (MEDT)

Certificate in Professional Studies (CERT_ADOT)

Knight Campus, Warwick only
Program offered during days only.

The Medical Transcription concentration prepares students for employment in the health field. Students are trained in the use of medical terminology, the transcription of various types of medical reports and the handling of medical office duties. Cooperative work experience in a medical office is a requirement of this program. Job opportunities for graduates are projected to remain constant.

Certificate program credits may be applied toward an Professional Studies or General Studies degree.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Certificate in Biotechnology (CERT_BIOT)

PROGRAMS

CCRI’s Biotechnology program includes courses in biotechnology, microbiology, chemical technology and instrumentation. Coursework is designed to mirror many of the concepts and techniques used in biotechnology and related industries. In addition to coursework, students will have access to industry professionals through classroom speakers, manufacturing facility tours, industry seminars and professional networking.

The Biotechnology program offers hands-on, competency-based instruction designed for entry-level students or retraining for individuals with previous workplace and/or educational experience. The 18-credit certificate program focuses on the techniques and skills leading companies look for in the area of biomanufacturing. Biotechnology certificate credits can be used toward the completion of the Science track leading to an Associate in Science (A.S.) degree. This allows students the option of working in the biotechnology field while completing their degree. Alternatively, students can complete the Associate in Science degree and the Biotechnology certificate program concurrently.

For more information, see the “Science” track entry in the catalog or contact Program Coordinator Scott Warila at 401-825-2136 or srwarila@ccri.edu. Additional information is available through the Biology Department on the CCRI website.

Note: Students are required to receive a grade of C or better in the courses required for the Biotechnology certificate or obtain special permission from the program coordinator. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

- First semester (Fall): BIOL 1000 AND/OR INST 1010*
- Second semester (Spring): CHMT 1121+ AND/OR BIOL 1310
- Summer or Fall (2) (semester 3): BIOL 1300 AND/OR 2480*

*also offered in spring, +offered some summers

Business Administration

PROGRAMS

- Associate Degree Program Concentrations
  - Accounting
  - Financial Services
  - General Business
  - Management
  - Marketing
- Certificate Program Concentrations
  - Accounting
  - Entrepreneurship
  - Financial Services
  - Management
  - Marketing

Associate degree programs in the Department of Business Administration are nationally accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

The goal of all business programs is to provide students with the opportunity to develop their communication, interpersonal, leadership and teamwork skills. The core program provides students with a basic understanding of the business environment in support of the learning objectives of each specific major concentration.

Students who are interested in transferring to another college to earn a bachelor’s degree should select courses that will meet requirements at the college of their choice. Students planning to develop career skills to use directly after graduation may elect courses to prepare for jobs in accounting, management, marketing, financial services and general business administration.

Associate in Science Degree in Business (ASB_BUSN)

Accounting Concentration (ACCT)

Associate degree programs in the Department of Business Administration are nationally accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

The Accounting concentration assists students in developing analytical skills through a critical exploration of the fundamentals of accounting and the use of accounting for decision-making purposes. Students use the latest technology to perform various accounting functions. In addition, students work on developing communication, interpersonal, leadership, and teamwork skills. This concentration prepares students for entry-level positions such as accounting clerk, staff accountant, accounting assistant, bookkeeper, assistant auditor and tax preparer in public, private and governmental agencies. Students also may choose to transfer to four-year institutions to earn bachelor’s degrees and should consult colleges for information on transferable courses.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

TRANSFER OPTIONS

OPTION 1: Complete a CCRI Business Administration degree program and transfer to one of the four-year colleges with which CCRI has transfer agreements. Course credits transfer differently from college to college. Consult with Advising and Counseling for specifics. Under the articulation transfer policy, students completing a CCRI associate in science degree in business with at least a 2.4 GPA are guaranteed admission to Rhode Island College (RIC) or the University of Rhode Island (URI). The applicability of courses toward the baccalaureate degree is determined by the receiving institution. For more information, visit www.ritransfers.org and contact your CCRI adviser.

OPTION 2: Participate in the Joint Admissions Agreement (JAA) and take the courses in one of the approved JAA transition plans for transfer into specific business-related majors at RIC or URI. Students who successfully complete JAA requirements are guaranteed transfer of their courses.
Community College of Rhode Island

and acceptance for the intended major at RIC or URI. For more information on the benefits of participating in JAA, visit www.ccri.edu/jaa or www.ritransfers.org and contact your CCRI adviser.

Certificate in Business Administration (CERT_BUSN)

Accounting Concentration (ACCT)

By providing an academic foundation in accounting, this certificate program prepares students for entry-level positions in the accounting field. It also may be completed to enhance skills of individuals currently employed in accounting-related positions. Students interested in this program should develop a plan of study to coordinate the timing and availability of all courses.

**Note:** Most credits earned in this certificate program can be applied toward the associate degree program in Business with a major in Accounting or General Business. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

**RECOMMENDED COURSE SEQUENCE**

- First semester: ACCT 1010; COMI 1420; MATH
- Second semester: ACCT 1020; BUSN 1040
- Third semester: ACCT 1030, 2010
- Fourth semester: ACCT 1500, 2020

Entrepreneurship Concentration (ETRC)

Certificate in Business Administration (CERT_BUSN)

This concentration provides individuals with a basic understanding of the principles, concepts and procedures necessary to start a small business. After completing core and elective courses, students apply their knowledge through an entrepreneurial capstone course that requires the development of a complete business plan. During this capstone course, students work independently, with faculty guidance, but without the benefit of classroom instruction. Business plans are reviewed by a committee of volunteer advisers from the business community who may establish their own guidelines and requirements for the business plan.

Note: Most credits earned in this certificate program can be applied toward the associate degree program in Business with a major in General Business. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE
- First semester: ACCT 1010; BUSN 1010; LAWS 2050
- Second semester: BUSN 1000, 2060
- Third semester: BUSN 1050, 1060
- Fourth semester: BUSN 2061, 2100

Financial Services Concentration (FNBK)

Associate in Science Degree in Business (ASB_BUSN)

Students enrolled in the Financial Services concentration develop analytical and critical-thinking skills essential for success in today’s financial environments. In addition, students develop their communication, interpersonal, leadership, and teamwork skills. The Financial Services concentration prepares students for entry-level positions in the financial services industry including banking, insurance, and investments. Employment opportunities include bank teller, loan officer, insurance sales and customer service representatives. Students also may choose to transfer to four-year institutions to earn bachelor’s degrees and should consult colleges for information on transferable courses.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Financial Services Concentration (FNSC)

Certificate in Business Administration (CERT_BUSN)

This concentration in Financial Services is designed to prepare students for entry-level positions in the financial services industry, which includes banking, insurance and investments. Also, individuals who are already working in the industry and seeking promotion to a higher position can benefit from earning this certificate. Courses in accounting, personal income taxes, personal finance, money and banking and investments will provide a strong foundation. A course in sales will enable the student to acquire tools to sell the types of products offered by companies in the industry.

Note: All credits earned in this certificate program can be applied toward the associate degree program in Business with a concentration in Financial Services (except ACCT 1500) or General Business. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

General Business Concentration (GBUS)

Associate in Science Degree in Business (ASB_BUSN)

Associate degree programs in the Department of Business Administration are nationally accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

The General Business concentration provides students with an opportunity to develop communication, interpersonal, leadership, and teamwork skills as well as a solid understanding of the contemporary business environment. Major requirements provide a strong foundation in business and the program allows for flexibility in the elective offerings. Students also may choose to transfer to four-year institutions to earn bachelor’s degrees and should consult colleges for information on transferable courses.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Management Concentration (MGTC)

Certificate in Business Administration (CERT_BUSN)

The Management concentration begins with a study of basic principles, concepts and procedures. Upon successful completion of these initial courses, students apply their knowledge in a capstone management strategy course. This final course allows students to apply previous learning through cases, simulations and integrated activities. Students are expected to use and demonstrate reasoning skills, strategies and a basic understanding of decision-making.

Note: All credits earned in this certificate program can be applied toward the associate in science degree in Business program with a concentration in Management or General Business. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Management Concentration (MNGT)

Associate in Science Degree in Business (ASB_BUSN)

Associate degree programs in the Department of Business Administration are nationally accredited by the Accreditation Council for Business Schools and Programs (ACBSP).

Students who successfully complete the Management concentration demonstrate a fundamental knowledge of a range of management concepts and approaches. They also are able to successfully apply tools and techniques for management decision-making and can conduct research using a variety of resources, including online databases. In addition, this program assists students in developing communication, interpersonal, leadership and teamwork skills essential in today’s business environment.

Management Strategy (BUSN 2070) serves as the capstone course for this concentration. The Management concentration prepares students for entry-level positions such as assistant manager or manager-in-training in various organizational settings. Students may choose to transfer to four-year institutions to earn bachelor’s degrees and should consult colleges for information on transferable courses.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Marketing Concentration (MARK)

Associate in Science Degree in Business (ASB_BUSN)

Associate degree programs in the Department of Business Administration are nationally accredited by the Accreditation Council for Business Schools and Programs.

Students who successfully complete courses in this concentration develop communication, interpersonal, leadership and teamwork skills. Program graduates understand the role and importance of marketing in organizations, demonstrate critical-thinking, decision-making, strategic planning and communications skills, and are able to use technological resources – including online databases – to conduct research.

The Marketing concentration prepares students for entry-level positions such as marketing assistant or coordinator, advertising assistant, or salesperson or customer service representative. Students may choose to transfer to four-year institutions to earn bachelor’s degrees and should consult colleges for information on transferable courses.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

TRANSFER OPTIONS

OPTION 1: Complete a CCRI Business Administration degree program and transfer to one of the four-year colleges with which CCRI has transfer agreements. Course credits transfer differently from college to college. Consult with Advising and Counseling for specifics. Under the articulation transfer policy, students completing a CCRI associate in science degree in business with at least a 2.4 GPA are guaranteed admission to Rhode Island College (RIC) or the University of Rhode Island (URI). The applicability of courses toward the baccalaureate degree is determined by the receiving institution. For more information, visit www.ritransfers.org and contact your CCRI adviser.

OPTION 2: Participate in the Joint Admissions Agreement (JAA) and take the courses in one of the approved JAA transition plans for transfer into specific business-related majors at RIC or URI. Students who successfully complete JAA requirements are guaranteed transfer of their courses and acceptance for the intended major at RIC or URI. For more information on the benefits of participating in JAA, visit www.ccri.edu/jaa or www.ritransfers.org and contact your CCRI adviser.

Marketing Concentration (MRKC)

Certificate in Business Administration (CERT_BUSN)

This concentration provides students with both an academic foundation and practical skills development in the field of marketing. It is ideal for individuals already working in the business world who seek a background in marketing or those who wish to explore the field by studying a variety of up-to-date topics.

Note: All credits earned in this certificate program can be applied toward the associate degree program in Business with a concentration in Marketing or General Business. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

• First semester: ACCT 1010; BUSN 1010
• Second semester: BUSN 1000, 2060
• Third semester: BUSN 2061, 2063
• Fourth semester: BUSN 2065, BUSN 2050

Chemical Technology (CHEM)

PROGRAMS

- Associate Degree Program Concentrations
  - Chemical Technology (AAS_CHMT)
- Certificate Program Concentrations
  - Certificate in Chemical Technology (CERT_CHMT)

CCRI offers a certificate and an associate in applied science degree in Chemical Technology. Either program can be taken on a part- or full-time basis, but the program is designed to allow students to fit their education into their busy lives. It is recommended that all students initially enroll in the certificate program because employers often do not discriminate between certificate- and degree-holding job candidates. Students can continue on to earn the associate in applied science degree. The A.A.S. degree in Chemical Technology transfers to most four-year institutions as the first two years of a traditional baccalaureate program in Chemistry.

For more information contact Program Coordinator Wayne Suits at 401-825-2010 or wsuits@ccri.edu.

Chemical Technology Certificate

Certificate in Chemical Technology (CERT_CHMT)

Knight Campus, Warwick only

The chemical industry is one of the fastest growing industries in the United States. Its need for trained technicians in quality control, analysis, and research and development laboratories is extensive.

The Chemical Technology certificate program prepares graduates to enter the chemical field in any one of a variety of capacities – chemical research technician, laboratory assistant, chemical production technician, junior chemist or analytical technician. The program is structured to develop a fundamental understanding of general, organic and analytical chemistry, with emphasis on laboratory applications and techniques. The certificate program consists of the four core Chemical Technology courses, an English course and mathematics proficiency.

Note: Students must take the ACCUPLACER test to ensure proficiency in mathematics. If the ACCUPLACER test indicates, MATH 0100 (3 credits) or MATH 0101 (3 credits) is required. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

- First semester: CHMT 1120; ENGL 1010
- Second semester: CHMT 1220
- Third semester: CHMT 2320*
- Fourth semester: CHMT 2420

*CHMT 2320 starts in January and ends in August.

Communication (COMM)

- Associate in Arts Degree in Communication and Film/Media (AA_COMM)
  - Communication Concentration (COMG)
  - Film/Media Concentration (COMF)
- Certificate in New Media Communication (CERT_NMCC)
  - Media Production Concentration (NMPR)
  - Media Post-Production Concentration (NMPP)
  - Media Studies Concentration (NMST)
  - Media Communication Concentration (NMCM)

Communication and Film/Media

Associate in Arts Degree in Communication and Film/Media (AA_COMM)

Communication Concentration (COMG)

The Communication and Film/Media associate degree program offers students a choice of two concentrations, both of which prepare students to enter a career in various communication and media disciplines or to transfer to a four-year college where they can further refine and develop their skills, earning a bachelor’s degree. Transfer agreements with local and regional colleges enable students to make a seamless transition into a four-year institution. Program faculty mentor students to help them select, balance, and sequence courses.

Whether creating content for traditional or digital media platforms, enrolled students will acquire the skills to craft and communicate a message. A combination of core course requirements, as well as specialized courses and general electives, provide students with theoretical background and hands-on application. Field placement, portfolio, and experiential learning are built into the program so graduates are prepared to enter careers with work experience.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Communication (COMM)

Certificate in New Media Communication (CERT_NMCC)

- Certificate Program Concentrations
  - Media Production Concentration (NMPR)
  - Media Post-Production Concentration (NMPP)
  - Media Studies Concentration (NMST)
  - Media Communication Concentration (NMCM)

The New Media Communication certificate offers practical training in the foundational skills of video, audio and media production; critical studies; writing and rhetoric. Whether creating content for traditional or new media platforms, students will gain an understanding of how to craft and communicate a message from pre-production through post-production. Through their participation, students will be prepared to enter various communication and media disciplines as videographers, producers, directors, writers and editors in the following industries: television, radio, new media journalism, the Web and social media management. Students also will develop a solid foundation that prepares them to enter four-year degree programs where they can further refine and develop their talents and skills.

**Note:** Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

- Certificate in Computer and Networking Technology Concentrations
  - Networking Technician (NWTC)
  - Advanced Networking Technician (NWAC)
  - Computer Desktop Technician (CDTC)

In response to the impact of computer technology on communications and industry, CCRI offers various degree and certificate programs through the Computer Studies and Information Processing Department.

Associate in Science (A.S.) degree programs:

- **Computer Programming** prepares students to enter a modern programming environment. This degree program stresses problem definition and solution design using different programming languages in the development of applications.

- **Computer and Information Processing Concentrations** prepares students for careers in modern office environments, emphasizing both client and server technologies.

- **Cybersecurity** is one of the fastest-growing, high-demand fields of information technology and the workplace in general. This degree program offers students the opportunity to acquire the skills needed to compete for these jobs and to prepare for a career in cybersecurity. The program will also provide a strong foundation for students intending to pursue a bachelor’s degree in the field as well as an opportunity for industry professionals to update their skills to meet the demands of their employers.

Associate in Applied Science in Computer and Networking Technology Concentrations (A.A.S)

- **Computer Networking Technology** places an emphasis on operating principles of hardware and software, networking models, operating systems, internetworking components, and industry standards along with hands-on laboratory activities for developing practical problem-solving skills.

Certificate programs:

- **Computer Programming**, **General Information Processing**, **IT Support Specialist**, **Networking**, **Web Technologies**, **Office Automation**, **Networking Technician**, **Advanced Networking Technician**, and **Computer Desktop Technician**. Certificate programs emphasize technical coursework only and do not require students to take electives that are required in the associate degree program.
Advanced Networking Technician Concentration (NWAC)

Certificate in Computer and Networking Technology (CERT_CNTD)

Knight Campus, Warwick only

Students will learn about complex network configurations, diagnostics and troubleshooting techniques. More advanced instructions allow students to gain essential knowledge and skills used to design and implement converged, scalable and secured LANs and WANs. Courses that prepare the student to sit for the CCNP exam are integrated into this program.

Note: This certificate requires completion of the Networking Technician concentration (NWTC) prior to enrollment or permission of the department. All courses in this certificate can be applied to the Computer and Networking Technology A.A.S. degree (AAS_CNTD). Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

- First semester: CNVT 2200 AND 2010 OR 2030
- Second Semester: CNVT 2010 OR 2030 AND 2060

Computer Desktop Technician Concentration (CDTC)

Certificate in Computer and Networking Technology (CERT_CNTD)

No Longer accepting new students.
Knight Campus, Warwick only

Computers continue to expand in all aspects of our personal activities in business, manufacturing, education and health care. This program provides balanced coverage of technology fundamentals, computer hardware and computer software. Emphasis is placed on operating principles of hardware and software, networking models, operating systems, internetworking components, industry standards and hands-on laboratory activities for developing practical problem-solving skills. Students develop the ability to configure and troubleshoot basic PCs. Courses that prepare the student to sit for both the Comp TIA A+ and the MCITP exams are integrated into the program.

Note: All courses in this certificate program can be applied to the Computer and Networking Technology A.A.S. degree (AAS_CNTD). Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Community College of Rhode Island

Computer Desktop Technology Concentration (CDTO)

Associate in Applied Science Degree in Computer and Networking Technology (AAS_CNTD)

Knight Campus, Warwick only

Computers and networks continue to expand in all aspects of our personal activities to business, manufacturing, education and health care. This program provides a balanced coverage of technology fundamentals, computer hardware, computer software and networking technology. Emphasis is placed on operating principles of hardware and software, networking models, operating systems, internetworking components, and industry standards along with hands-on laboratory activities for developing practical problem-solving skills. Students develop the ability to configure and troubleshoot basic PCs, local area networks (LANs) and internetworks using routers and switches. Integrated into the program are courses that prepare students to sit for both the Cisco CCNA and the CompTIA A+. Depending on the track taken, students can sit for either the Cisco CCNP or the MCITP.

Note: Because several courses are required in all Physics and Engineering concentrations, students may transfer between concentrations fairly easily without losing much educational time. Consult with a faculty adviser in selecting electives to determine transferability. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Computer Programming Concentration (CPCT)

Certificate in Computer Studies and Information Processing (CERT_COMI)

Knight Campus, Warwick only

The Computer Programming concentration emphasizes technical coursework only, and does not require the electives needed for the associate degree option. This certificate prepares students for programming positions and gives a broader knowledge of information technology.

Note: To be awarded this certificate, students must be registered as matriculating in the Computer Studies program and successfully complete all certificate courses with a grade of C or better. Credits earned in this certificate program may be applied toward the associate degree program. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

- Course sequence and prerequisites for major courses are under review. See Computer Studies department faculty for guidance.

Total Program Credits 63

Suggested electives for Database emphasis
COMI 1225, 1260, 2010, 2036

Students planning to transfer to RIC or URI should please check the recommendations on this page.
Computer Studies and Information Processing

Associate in Science Degree in Computer Studies and Information Processing (AS_COMI)

Please visit this page for detailed information about transfer from CCRI to RIC and URI.

RECOMMENDED COURSE SEQUENCE

• First semester: COMI 1100, 1150
• Second semester: Programming Elective, COMP 1200
• Third semester: COMI 1800 OR 1840, COMI 1510
• Fourth semester: COMI 2510, COMP 1230

Take other required major courses in any sequence.

OTHER CONSIDERATIONS

If possible, use the inter-institutional agreement to take these courses.

• RIC courses: CSCI 312 (Prerequisite: COMI 2510)
• URI courses: CSC 110 (no prerequisite), CSC 212 (Prerequisite: COMI 2510)

GENERAL EDUCATION COURSES

• The Computer Studies Department's Computer Studies Transfer page contains links to documents that provide students helpful advice in choosing their general education courses to make sure they align best with the General Education requirements at RIC and URI.
Community College of Rhode Island

Cybersecurity Degree (CYBR)

Associate in Science Degree in Computer Studies and Information Processing (AS_COMI)

Available on all four campuses; daytime, evening or online.
The Cybersecurity program is designed to provide students with a strong foundation in the principles and methods of cybersecurity, as well as the fundamental knowledge and tools for applying security measures across a variety of network architectures and settings. In addition to serving as a strong foundation for pursuing a bachelor's degree in cybersecurity, this associate degree program will provide the educational background and hands-on training necessary to prepare students for entry in the cybersecurity sector. The curriculum includes a combination of general education, computer science and network technology courses to provide students with the knowledge, skills and training necessary for successful transition into a career in security, and to meet NSA and Centers of Academic Excellence core foundational content and standards.

Note: Students must earn a grade of at least C in all computer course requirements and must maintain a 2.0 GPA. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

**COMI 2020, 2035, 2036, 2037 OR** take any COMI/COMP/CNVT to total seven elective credits.
Networking Technician Concentration (NWTC)

Certificate in Computer and Networking Technology (CERT_CNTD)

Knight Campus, Warwick only

Networks continue to expand in all aspects of our personal activities in business, manufacturing, education and health care. This concentration provides a balanced coverage of technology fundamentals and networking technology. Emphasis is placed on operating principles, networking models, operating systems, internetworking components and industry standards, along with hands-on laboratory activities for developing practical problem-solving skills. Students develop the ability to configure local area networks (LANs) and internetworks using routers and switches. Courses that prepare the student to sit for the Cisco CCENT and CCNA exams are integrated into the program.

Note: All courses in this certificate program can be applied to the Computer and Networking Technology A.A.S. degree (AAS_CNTD). Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE
- First semester: CNVT 1810, 1820; COMI 1840
- Second semester: CNVT 1830, 1840: CNVT 2100 OR COMI 2020

Total Program Credits 18
Office Automation Concentration (OFFA)

Certificate in Computer Studies and Information Processing (CERT_COMI)

The Office Automation concentration prepares students for paperless office environments and enables proficiency managing a corporate office. Students gain strong English-language skills and learn current software and hardware to record, code, sort, calculate, summarize, store and communicate information. Certificate programs emphasize technical coursework only, and do not require the electives needed for the associate degree option.

Note: To be awarded this certificate, students must be registered as matriculating in the Computer Studies program and successfully complete all certificate courses with a grade of C or better. Credits earned in this certificate program may be applied toward an associate degree program. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Web Technologies Concentration (CWTC)

Certificate in Computer Studies and Information Processing (CERT_COMI)

The Web Technologies concentration is designed for individuals who wish to pursue a career in a Web-related field and acquire the training and technical skill set that is necessary to prepare them for a career in a Web-related occupation. It is also ideal for those wishing to gain a broader knowledge of computer software and/or hardware. The certificate program emphasizes technical coursework only and does not require students to take electives that are required in the associate degree options.

Note: Students must obtain a grade of at least C in all computer course requirements and must maintain a 2.0 GPA. To be awarded this certificate, students must be registered as matriculating in the Computer Studies program and successfully complete all certificate courses with a grade of C or better. Credits earned in this certificate program may be applied toward the associate degree program. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Physics and Engineering

PROGRAMS

The Department of Physics and Engineering offers an array of associate degree and certificate programs to provide students with the skills and foundation for careers and advancement in engineering, engineering technology, and advanced manufacturing technology.

The Department offers three associate degree and six related certificate programs. Three certificates and four concentration tracks can lead to the Engineering Systems Technology associate degree. The Engineering Transfer associate degree transfers to most engineering bachelor degree programs and offers nine concentration tracks.

Three certificates can lead to the Advanced Manufacturing Technology associate degree.

• Associate Degree Programs
  • Associate in Science Degree in Engineering Concentrations (AS_ENGN)
    • Biomedical (ENBI)
    • Chemical (ENCH)
    • Chem-Biology (ENBC)
    • Civil (ENCI)
    • Computer (ENCM)
    • Electrical (ENEL)
    • Industrial (ENIN)
    • Mechanical (ENME)
    • Ocean (ENOC)
  • Associate in Science in Engineering Systems Technology Concentrations (AS_ETST)
    • CNC Manufacturing (ETCT)
    • Electrical (ETET)
    • Energy Utility (ETPT)
    • Mechanical (ETMT)
  • Associate in Science in Advanced Manufacturing Technology (AS_ETMA)
    • Advanced Manufacturing Technology Degree (ETMA)
• Certificate Programs
  • Certificate in Engineering Systems Technology Concentrations
    • Introduction to CNC Manufacturing (ETCI)
    • Energy Utility Technology (ETUT)
    • CNC Manufacturing and 3D-Modeling (ETCA)
  • Certificate in Advanced Manufacturing Technology Concentrations
    • Manufacturing Design and Rapid Prototyping (ETMD)
    • Advanced Manufacturing Machining (ETMM)
    • Manufacturing Automation and Quality (ETMQ)

Electrical Concentration (ENEL)

Associate in Science Degree in Engineering (AS_ENGN)

Knight Campus, Warwick only

Successful completion of this program enables qualified students to transfer to an accredited engineering curriculum and apply most credits to a Bachelor of Science degree in engineering. This program provides a firm background in basic engineering principles. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses that are applicable to most Bachelor of Science degree programs.

Entrance to the program requires a mathematics placement examination at a calculus level (student is ready to take MATH 2141) or the completion of CCRI Pre-calculus (MATH 2111). It is recommended that all applicants take a mathematics placement examination prior to the summer session.

For courses to transfer to accredited engineering programs, it is important that students adhere to the required prerequisites and corequisites. When in doubt, refer to the course descriptions.
Although most courses apply to the curriculum of many B.S. in engineering programs, the course sequences and schedules listed on the following pages will allow students to apply their studies toward one of nine University of Rhode Island engineering programs. These course sequences are for full-time, day students who enter in the fall semester, allowing them to complete the Associate in Science degree requirements at CCRI in four semesters and transfer to the University of Rhode Island as a junior. For the first semester, all engineering students take all the same courses. In all other semesters, the required courses will depend upon the desired engineering program. For most engineering programs, students are required to take courses only offered by URI. For CCRI students taking 12 or more credits, up to seven of these credits can be taken per semester at URI under the inter-institutional agreement at no additional cost. See description of the agreement on this page.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Advanced Manufacturing Machining Concentration (ETMM)

Certificate in Engineering Systems Technology (CERT_ETMA)

Knight Campus, Warwick only

This certificate program gives students extensive hands-on experience with manual, conversational and computer numerical control (CNC) machines. Emphasis will be placed on safe and efficient setup and operation of industrial-grade machining equipment. Overall, the program will prepare students to read blueprints, select appropriate machining technology and produce a unit that meets design specifications. All credits can be applied to the Associate in Science Degree in Advanced Manufacturing Technology.

Advanced Manufacturing Technology Degree (ETMA)

Associate in Science in Advanced Manufacturing Technology (AS_ETMA)

Knight Campus, Warwick only

Modern advanced manufacturing has been revolutionized by the use of computers for design, machining and automation. Today almost all product and component design uses computer-aided design (CAD) and computer-aided manufacturing (CAM) programs. The manufacturing process uses computers to control all aspects of subtractive and additive manufacturing (3-D printing). Computer numerical control (CNC) machining is at the heart of advanced manufacturing and the production of complex components accurately and efficiently. Advanced manufacturing also uses computers to control materials, inspection, quality assurance and distribution of finished products.

This program will provide students with extensive hands-on laboratory experience, and the basic skills and knowledge for employment in a variety of advanced manufacturing positions. The program will cover areas of science and mathematics and their applications to machining practices and CNC programming, and places emphasis on both theoretical and practical phases of the design, cost, quality and production of machined parts.

This associate degree is linked to three certificates or tracks: Manufacturing Design and Rapid Prototyping (ETMD), Advanced Machining Skills (ETMM) and Manufacturing Automation and Quality (ETMQ). Students can start their studies with one or more of the certificates or have all credits apply to the associate degree. The degree path requires prerequisites of MATH 0101 and ENGL 1005. Full-time students can expect to complete this program in five semesters.

CNC Manufacturing Concentration (ETCT)

Associate in Science in Engineering Systems Technology (AS_ETST)

Knight Campus, Warwick only

Developing the skills and knowledge to support today’s complex technology requires a shift to a systems engineering approach. Systems engineering is an interdisciplinary view of complex systems that considers customer needs, product functionality, operation, performance, testing and manufacturing. This program incorporates system modeling, simulation, automation, robotics, electronics, digital systems, networking, machine design and electrical power. Emphasis is placed upon understanding the principles of electromechanical systems, automation, system control, machine design and energy systems. Students will develop skills in creative problem solving, design principles, machine programming, computer networking and system troubleshooting.

Throughout the program, students will be required to produce written reports, verbal presentations and portfolio entries; function in teams and complete a capstone project. The program is structured around a set of core technology courses and four concentration areas – electrical, mechanical, energy or manufacturing technology. The program will prepare students to be employed in a variety of technical support positions in the fields of electronics, electromechanical systems, automation, manufacturing, renewable energy technologies and the energy utility industry.

Three certificates and four concentration tracks can lead to the Engineering Systems Technology Associate Degree. All certificate courses map to the degree concentration track with no credit loss. This gives students the opportunity to start at the certificate level, increase employment opportunities while attending classes, and work toward the associate degree on a full or part-time basis.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Total CNC Manufacturing Technology (ETCT) Credits 28

Total Program Credits 65
CNC Manufacturing and 3D-Modeling Concentration (ETCA)

Certificate in Engineering Systems Technology (CERT_ETST)

Knight Campus, Warwick only

To enroll in this certificate program, students must have successfully completed the Introduction to CNC Manufacturing concentration (ETCI). See 
Introduction to CNC Manufacturing Concentration for more information.

Today modern manufacturing depends upon the use of computers, robots, CNC and 3D-printing technology and digital technology and PLCs. This program builds on the basic skills and knowledge developed in the Introduction to CNC Manufacturing certificate (ETCI). The certificate will increase CNC programming skills and introduce the concepts of rapid prototyping, digital direct manufacturing and the use of 3D-laser scanning and 3D-printing. The courses will make extensive use of 3D-modeling with SolidWorks, tool control with G and M codes and MasterCam. Students will also develop a basic understanding of digital systems and the programming of PLCs. The final course is a capstone course, requiring 140 hours of an industry practicum or internship.

The certificate can be completed in one spring semester, or one fall and one spring semester. The accelerated one-spring semester version requires attending classes four days a week. The combination of the two certificates, ETCI and ETCA, can be applied toward the Engineering Systems Technology A.S. degree without a loss of credit.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

This program provides a firm background in basic engineering principles. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses that are applicable to most Bachelor of Science degree programs.

Entrance to the program requires a mathematics placement examination at a calculus level (student is ready to take MATH 2141) or the completion of CCRI Pre-calculus (MATH 2111). It is recommended that all applicants take a mathematics placement examination prior to the summer session.

For courses to transfer to accredited engineering programs, it is important that students adhere to the required prerequisites and corequisites. When in doubt, refer to the course descriptions.

Although most courses apply to the curriculum of many B.S. in engineering programs, the course sequences and schedules listed on the following pages will allow students to apply their studies toward one of nine University of Rhode Island engineering programs. These course sequences are for full-time, day students who enter in the fall semester, allowing them to complete the Associate in Science degree requirements at CCRI in four semesters and transfer to the University of Rhode Island as a junior. For the first semester, all engineering students take all the same courses. In all other semesters, the required courses will depend upon the desired engineering program. For most engineering programs, students are required to take courses only offered by URI. For CCRI students taking 12 or more credits, up to seven of these credits can be taken per semester at URI under the inter-institutional agreement at no additional cost. See description of the agreement on this page.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Electrical Concentration (ETET)

Associate in Science in Engineering Systems Technology (AS_ETST)

Knight Campus, Warwick only

Developing the skills and knowledge to support today’s complex technology requires a shift to a systems engineering approach. Systems engineering is an interdisciplinary view of complex systems that considers customer needs, product functionality, operation, performance, testing and manufacturing. This program incorporates system modeling, simulation, automation, robotics, electronics, digital systems, networking, machine design and electrical power. Emphasis is placed upon understanding the principles of electromechanical systems, automation, system control, machine design and energy systems. Students will develop skills in creative problem solving, design principles, machine programming, computer networking and system troubleshooting.

Throughout the program, students will be required to produce written reports, verbal presentations and portfolio entries; function in teams and complete a capstone project. The program is structured around a set of core technology courses and four concentration areas – electrical, mechanical, energy or manufacturing technology. The program will prepare students to be employed in a variety of technical support positions in the fields of electronics, electromechanical systems, automation, manufacturing, renewable energy technologies and the energy utility industry.

Three certificates and four concentration tracks can lead to the Engineering Systems Technology Associate Degree. All certificate courses map to the degree concentration track with no credit loss. This gives students the opportunity to start at the certificate level, increase employment opportunities while attending classes, and work toward the associate degree on a full or part-time basis.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Energy Utility Technology Concentration (ETUT)

Certificate in Engineering Systems Technology (CERT_ETST)

Knight Campus, Warwick only

This concentration program provides students with a core set of skills and competencies required by the energy industry. Coursework covers technical math, safety, AC and DC circuits and controls, the business side of the energy industry, operations and technology. Workplace readiness skills are integrated into the curriculum including critical thinking, problem solving, time management and teamwork. Hands-on training is provided through a nine-week field practicum (one day per week/eight hours per day) where students apply theoretical classroom knowledge in a real-world environment. Students are required to complete experiments with lab reports, special projects and a portfolio illustrating key learning outcomes.

At the present time, National Grid can accommodate the first 20 students accepted into the program for its practicum. All other students will be assigned an alternate practicum.

This program is offered as a full-time, daytime program, starting in the fall semester. Some courses can be taken in the evening. Full-time students can complete the certificate in as little as two semesters. All credits earned for the certificate will apply towards the Engineering Systems Technology A.S. degree.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

• First semester: ETEE 1050, 1800; ETUT 1060, 1160; MATH 1179
• Second semester: ETEE 1500, 2390; ETUT 2500; PHYS 1070

Total Certificate Requirements Credits 27

Total Program Credits 27
Industrial Concentration (ENIN)

Associate in Science Degree in Engineering (AS_ENGN)

Knight Campus, Warwick only

Successful completion of this program enables qualified students to transfer to an accredited engineering curriculum and apply most credits to a Bachelor of Science degree in engineering. This program provides a firm background in basic engineering principles. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses that are applicable to most Bachelor of Science degree programs.

Entrance to the program requires a mathematics placement examination at a calculus level (student is ready to take MATH 2141) or the completion of CCRI Pre-calculus (MATH 2111). It is recommended that all applicants take a mathematics placement examination prior to the summer session.

For courses to transfer to accredited engineering programs, it is important that students adhere to the required prerequisites and corequisites. When in doubt, refer to the course descriptions.

Although most courses apply to the curriculum of many B.S. in engineering programs, the course sequences and schedules listed on the following pages will allow students to apply their studies toward one of nine University of Rhode Island engineering programs. These course sequences are for full-time, day students who enter in the fall semester, allowing them to complete the Associate in Science degree requirements at CCRI in four semesters and transfer to the University of Rhode Island as a junior. For the first semester, all engineering students take all the same courses. In all other semesters, the required courses will depend upon the desired engineering program. For most engineering programs, students are required to take courses only offered by URI. For CCRI students taking 12 or more credits, up to seven of these credits can be taken per semester at URI under the inter-institutional agreement at no additional cost. See description of the agreement on this page.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Introduction to CNC Manufacturing Concentration (ETCI)

Certificate in Engineering Systems Technology (CERT_ETST)

Knight Campus, Warwick only

Companies are integrating computers into engineering and manufacturing environments at a rapid pace. At the heart of advanced manufacturing is CNC machining and the computer applications that support the design and manufacturing process. This program builds the basic skills and knowledge for employment opportunities in the CNC manufacturing environment. The certificate covers areas of science and mathematics as they apply to machining practices and CNC programming. Emphasis is placed on both theoretical and practical phases of the design, cost and production of machine parts.

The certificate can be completed in a summer and fall semester, or in a summer, fall and spring semester. The certificate courses are offered in the day and evening. The accelerated summer-fall version will require attending classes four days a week. Certificate completion prepares students to enroll in a second, more advanced CNC-centered certificate – CNC Manufacturing and 3D-Modeling (ETCA). The combination of the two certificates, ETCI and ETCA, can be applied toward the Engineering Systems Technology A.S. degree (ETCT) and the Advanced Manufacturing Technology (ETMA) without a loss of credit.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE (accelerated version)

- Summer semester: ENGR 1030
- Fall semester: ENGT 2090; ETME 1020; ETCN 1100, 1200, 1300

Manufacturing Automation and Quality Concentration (ETMQ)

Certificate in Engineering Systems Technology (CERT_ETMA)

Knight Campus, Warwick only

The Manufacturing Automation and Quality certificate teaches students to measure the quality of manufactured products and develop efficient manufacturing processes. Students will gain experience with a variety of advanced manufacturing technologies, including wire EDM, plasma cutting, 3-D printing and laser cutting.

The program has been designed to provide the student with extensive hands-on laboratory experience using a recently renovated laboratory. This experience will maximize the skills advocated by the college’s manufacturing advisory board. The student will receive an OSHA10 certification and the opportunity to attend four industry presentations.

All credits can be applied to the Associate in Science degree in Advanced Manufacturing Technology.

Manufacturing Design and Rapid Prototyping Concentration (ETMD)

Certificate in Engineering Systems Technology (CERT_ETMA)

Knight Campus, Warwick only

Students in this certificate program develop the knowledge and skills to prepare files and drawings for a variety of mechanical devices and components. Students learn contemporary CAD software to produce files suitable for machining and 3-D printing. Emphasis will be placed on designing for advanced manufacturing technology, rapid prototyping using 3-D printers and mechanical simulation. All credits can be applied to the Associate in Science Degree in Advanced Manufacturing Technology.

Mechanical Concentration (ETMT)

Associate in Science in Engineering Systems Technology (AS_ETST)

Knight Campus, Warwick only
Developing the skills and knowledge to support today’s complex technology requires a shift to a systems engineering approach. Systems engineering is an interdisciplinary view of complex systems that considers customer needs, product functionality, operation, performance, testing and manufacturing. This program incorporates system modeling, simulation, automation, robotics, electronics, digital systems, networking, machine design and electrical power. Emphasis is placed upon understanding the principles of electromechanical systems, automation, system control, machine design and energy systems. Students will develop skills in creative problem solving, design principles, machine programming, computer networking and system troubleshooting.

Throughout the program, students will be required to produce written reports, verbal presentations and portfolio entries; function in teams and complete a capstone project. The program is structured around a set of core technology courses and four concentration areas – electrical, mechanical, energy or manufacturing technology. The program will prepare students to be employed in a variety of technical support positions in the fields of electronics, electromechanical systems, automation, manufacturing, renewable energy technologies and the energy utility industry.

Three certificates and four concentration tracks can lead to the Engineering Systems Technology Associate Degree. All certificate courses map to the degree concentration track with no credit loss. This gives students the opportunity to start at the certificate level, increase employment opportunities while attending classes, and work toward the associate degree on a full or part-time basis.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

    - Jazz Studies Concentration (JAZZ)
    - Music Concentration (MUSC)

Art Concentration (ARTS)

Associate in Fine Arts Degree (AFA_FINE)

The Art program is designed for both students who plan to transfer to a four-year college, university or design school and students seeking an introduction to art. The curriculum at CCRI is the equivalent of the freshman and sophomore years in many four-year bachelor's degree programs in art or a foundation program at a design school. The art curriculum is structured as an introductory level for non-majors, the foundation level, specialized disciplines and intermediate level.

Students enrolled in the A.F.A. degree program should work closely (beginning in the first semester) with full-time faculty members from the Art Department in selecting and sequencing courses. Students should check the transfer requirements of the four-year program for which they are preparing and retain all of their work in a portfolio.

- Students should take a balance of general education and major requirements each semester. Where possible, take courses in the order they are listed here starting with the 1000 level and moving up to the 2000 level.
- Studio courses are demanding and require extended blocks of time. See course descriptions for details.
- Complete major requirements before enrolling in any visual art elective courses.
- Do not enroll in more than one art history course per semester.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

The Fine Arts Program is accredited by the National Association of Schools of Art and Design (NASAD)

Jazz Studies (JAZZ) or Music Concentration (MUSC)

Associate in Fine Arts Degree (AFA_FINE)

Knight Campus, Warwick; Day program only
CCRI is a full member of the National Association of Schools of Music, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190-5248 Tel: 703-437-0700.

The Music and Jazz Studies concentrations prepare students for transfer to four-year colleges or universities. The two-year curriculum at CCRI is designed to provide music courses appropriate to the freshman and sophomore years in four-year bachelor’s degree programs in music and jazz studies. The CCRI program helps prepare students for careers in professional performance, private music instruction, arranging (Jazz Studies) or music education in the classroom. The curriculum is sequential, and students enrolled in the degree program should work closely with an adviser from the Music faculty (starting in their second semester) who is familiar with the program and its transfer requirements. CCRI Music and Jazz Studies graduates have transferred successfully to four-year colleges and universities both locally and nationally.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Concert Attendance

Students attend five CCRI Music events on campus or CCRI Music field trips each semester or concerts at other nearby college/universities.

Total Major Core Requirements (All students) Credits 24

Please Note:

The requirements below are for the Music and Jazz Studies concentrations, Associate in Fine Arts (A.F.A.) degree. Where possible, take courses in the order they appear starting with the 1000 level and moving up to the 2000 level. Take a balance of fine arts and humanities courses each semester. Studio courses are demanding and require additional practice, so plan accordingly. For detailed information, students should refer to this page.

Theatre-Performance Concentration (DRAM) Theatre-Technical Concentration (TDRA)

Associate in Fine Arts Degree (AFA_FINE)

Students who wish to major in Theatre follow a curriculum that includes a study of both fine arts and the humanities. The curriculum is flexible enough to serve both students who plan to transfer to four-year colleges or professional schools and students who wish to pursue a career in a related field.

Two curriculum sequences are available. The Performance concentration is recommended for students who wish to pursue a career as a performer. The Technical concentration is recommended for those who wish to pursue a career as a designer/technician. Either track is appropriate for those planning to transfer to a Bachelor of Fine Arts program in theatre. Students enrolled in the CCRI degree program should work closely (starting in their first semester) with an adviser from the CCRI Theatre faculty who is familiar with the program and its transfer requirements. All students must participate in the CCRI Theatre productions.

Note: Where possible, take courses in the order they appear starting with the 1000 level and moving up to the 2000 level. Take a balance between Fine Arts courses and Liberal Arts courses each semester. Theatre courses are demanding and require serious effort and time. Full-time students should take a minimum 15 to 16 credits each semester. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

For more information visit the Theatre website.

General Studies

Associate in Arts Degree in General Studies (AA_GENS)

The degree in General Studies should enable students to demonstrate a broad understanding of the arts and sciences. Graduates should demonstrate effective communication and computational skills and possess the capacity for continued learning and logical reasoning. The program allows students the opportunity to select any instructional credit courses at CCRI for which he or she satisfies the prerequisites.

Note: Many courses required in this program are transferable to four-year colleges and universities in pursuit of a bachelor's degree. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

  • Phlebotomy
  • Renal Dialysis Technician
  • Therapeutic Massage

The Health Care Interpreter program is currently under review. Information will be made available at the CCRI Nursing website as this program is updated and revised.

GENERAL POLICIES

The following general policies apply to ALL Health Sciences programs. Requirements specific to a particular program are listed on the program page.

Technical Standards
Each program has developed technical standards to assist interested applicants and continuing students to understand the tasks that a person working in that job would typically be expected to perform. These standards provide a sense of the physical requirements, psychomotor skills and affective behaviors associated with a particular occupation. Standards are listed with each individual program. These are available on the department websites.

Academic Progress
For most programs, students must maintain a 2.0 GPA while in the program. Physical Therapy, Occupational Therapy and Therapeutic Massage students must achieve a grade of 75 percent in each course required by the program. Dental Hygiene students must achieve a grade of 75 percent in each didactic course required by the program. Nursing, Occupational Therapy Assistant, Physical Therapist Assistant and Opticianry students must maintain a 75 percent passing grade in each major course and maintain a 2.5 GPA to progress. Students who do not maintain the expected level of academic progress will be dismissed from the program.

Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical, or professional performance.

Accommodation
Students in the health programs with a documented need for reasonable accommodation are encouraged to contact the Office of Disability Services for Students as early as possible. This will help ensure that reasonable accommodations are provided in a timely manner.
Admission Requirements
Official high school or GED® transcript is a component of the Health Sciences application process. Anyone with a degree from a regionally accredited higher education institution may have this requirement waived following submission of the official college transcript. See individual programs.

Performance-Based Health Sciences (PBHS) Application Process
Health Sciences programs have a competitive application process and many have limited application windows. Students who want to earn Health Sciences degrees or certificates must first declare a General Studies major and take required classes. Once all admissions requirements are met, students can start the performance-based Health Sciences application process. Emergency Management/Homeland Security and Fire Science/Emergency Medical Technician are the only programs exempt from this performance-based application. Please visit the CCRI Health Sciences website for admission guidelines.

Advanced Placement/Challenge Examinations
Applicants with previous education or experience who wish to discuss advanced standing or challenge specific courses should contact the department chair or program director for information.

Background Check
Students are required to have a criminal background check in compliance with requirements of clinical agencies. Persons convicted of a crime, as defined by applicable state or federal law, cannot be offered admission to Health Sciences programs until they have served their sentence, and their criminal background check shows no evidence of criminal activity for at least seven years following the completion of their sentence, probation and/or parole. For more information, program department chair contacts can be found at the CCRI Health Sciences website.

CPR Certification*
All CCRI Health Sciences students must have current CPR certification, American Heart Association Basic Life Support (BLS), obtained through an AHA-recognized community training center. This course is also available at CCRI (HEAL 0200). Students must provide proof of AHA CPR certification to the department as part of health record documentation per program policies.

Health Insurance
Students are required to obtain health insurance. Health insurance is not provided by the college or clinical agencies. Students are responsible for their own health care expenses.

Health Records*
Students accepted into Health Sciences programs must submit complete health records to begin the clinical/technical courses. The health record requires a physical exam and specific documentation showing vaccination and immunity. See program policies for more detail on when health records are due. Students without complete health records, including titers, will not be allowed to start clinical rotations/field placements.

All students enrolled in CCRI Health Sciences programs are required to take the Hepatitis B series of three vaccinations, unless there are medical or religious reasons against it. Contact the department chair of your program for more information. Applicants are encouraged to begin the Hepatitis B series as soon as possible, and provide documentation of vaccinations as they are given, and show follow-up titers prior to entrance into one of the Health Sciences programs.

Individuals who disclose the presence of blood-borne infectious disease will be shown the same consideration as non-infected individuals and will be offered reasonable accommodations. Information regarding the health status of an individual is considered confidential and protected by the Family Education Rights and Privacy Act of 1974.

Occupational Titles
For more information about occupational titles, refer to the Dictionary of Occupational Titles at the Dictionary Of Occupational Titles website.

Advanced Placement
Selected Health Sciences programs may have advanced placement options for eligible applicants. Additional documents may be required for verification and eligibility. Applicants deemed eligible enter a program with a specific cohort. If you are eligible for an advanced level course you will be notified to register. Space availability is not automatic because of clinical/class space constraints.

Reinstatement
Reinstatement in CCRI Health Sciences programs is not automatic. Priority is given to students in good academic standing at the time of withdrawal. Students wishing to be readmitted must meet the following criteria.
Submit a letter of intent to the department chair and program director at least one semester prior to the requested date of re-admittance.

Nursing students must submit a letter requesting reinstatement via email to the Scholastic Standing Committee chairperson.

See individual programs for GPA requirements.

Meet with the department chair and program director.

Students who have been dismissed from a health program may request reinstatement only once. Students who are dismissed from the program for academic reasons a second time may not return to the program. Students who do not follow the recommended sequence may delay their graduation date.

Students returning to any Health Sciences program may be required to repeat previous coursework and be approved by the Scholastic Standing Committee. See program pages for specific reinstatement information.

Upon notification, student will be permitted to register.

Transportation

Students are responsible for transportation to all clinical/technical experiences both on and off campus.

Uniforms and Equipment

Students are responsible for purchasing necessary equipment and/or uniforms, if applicable.

Program Graduation

Students are responsible for completion of **ALL program requirements** to be eligible for graduation. This includes general education and specialty course requirements.

*Emergency Management/Homeland Security students are exempt from CPR certification and health-record requirements.

**Computed Tomography Imaging**

**Certificate in Computed Tomography Imaging (CERT_CTIC)**

Flanagan Campus, Lincoln only

Computed Tomography is a dynamic technology used in the diagnosis of disease, in monitoring patient progress, in controlled screenings to help prevent disease or in research. This two-semester program, which combines classroom instruction, online learning and supervised clinical practice, focuses on understanding the basic principles of computed tomography imaging and the care of patients requiring diagnosis or treatment. The goal of this program is to prepare students who can competently and safely perform computed tomography procedures, display the personal qualities of integrity, responsibility, and reliability and who function as active members of the healthcare team.

Graduates receive a certificate in Computed Tomography imaging and are prepared to sit for the national credentialing examination offered by the American Registry of Radiologic Technologists. They are eligible for employment in hospitals, clinics, and private imaging facilities.

**Note:** Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

**GENERAL POLICIES**

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Computed Tomography Imaging certificate program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; CTIC should be the second choice.

2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.

3. **ARRT Certificate** – Current certification as a radiologic technologist through the American Registry of Radiologic Technologists. (ARDMS and NMTCB, Nuclear Medicine Technology Certification Board certifications are acceptable substitutes.)

4. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. **Note:** For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses.
   a. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better.
5. **GPA** – A cumulative grade point average of 2.0 or better for all college courses taken.

6. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See [www.ccri.edu/dean-hrs](http://www.ccri.edu/dean-hrs).) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.

7. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

### Program Requirements

- The major requirements of this program must be taken in sequence. They are open only to students who are formally accepted into the program.
- No grade less than a C is acceptable in any of the technical courses (CTIC).
- Maintain a cumulative GPA of 2.0 or greater.
- Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or professional performance.

### RECOMMENDED COURSE SEQUENCE

- First semester: CTIC 1010, CTIC 1020, CTIC 1030
- Second semester: CTIC 2010, CTIC 2020, CTIC 2030

Dental Assisting

Certificate in Dental Assisting (CERT_DENT)

Occupational Title: Dental Assistant
Flanagan Campus, Lincoln only

This program is accredited by the American Dental Association Commission on Dental Accreditation, 211 E. Chicago Ave., Chicago, IL, 60611.

The primary function of the dental assistant is to assist the dentist. Students in this program attend lecture and laboratory classes and receive actual clinical experience through assignments at a variety of dental healthcare facilities.

This course of study prepares students for the certification examination given by the Dental Assisting National Board, Inc. Students who successfully complete the program are awarded a certificate by the college. Students are responsible for purchasing dental instruments and uniforms, as well as paying fees for the certification exam. Participation in the dental hygiene program exposes students to infectious diseases, blood born pathogens and ionizing radiation.

Technical standards: The physical activity (strength) for dental assistant (079.361-018) is classified as “light” by the Department of Labor in the Dictionary of Occupational Titles

Note: Many courses require prerequisites and/or testing. See course descriptions for details.

CCRI also offers a Dental Hygiene associate degree program, see this page for details.

GENERAL POLICIES
See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements needed to apply to the Dental Assisting

1. **CCRI application** – Submit a completed CCRI Application for Enrollment. General Studies should be first choice; DENT should be second choice.
2. **High school transcript** – Send an official copy of a transcript from an accredited high school or GED® certification, including date of graduation, or if the applicant holds a baccalaureate degree from an accredited college/university, the high school transcript may be waived; college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI's Department of Advising and Counseling. Students may retake the ACCUPLACER test once before completing any remedial course(s).
   a. **Math**: Demonstrate competency by placing into MATH 0100 with a test score of 65 in the arithmetic section or completion of MATH 0100: Foundations of College Mathematics with a "C" or better. The entry course for MATH 0100 is MATH 0095. The following courses will substitute for MATH 0100: 0101, 1025, 1139, 1240, 1241, 2077, 2110, 2111, 2138, 2141, 2142, or 2243.
   b. **English (writing) test** must show readiness to take ENGL 1010: Composition I, or applicant must have completed ENGL 1005: College Writing with a grade of "C" or better. ENGL 1300 will not substitute for ENGL 1010.
   c. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890: Critical Reading with a grade of "B-" or better.
4. **Optional: Complete courses required for admission with a grade of "C" or better** – DENT 1000: Introduction to Dental Health Careers
5. **GPA** – A cumulative grade point average of 2.0 or better for all college courses taken.
   a. All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into the Dental Assisting Program, the student must attend a mandatory orientation conducted by the Dental Health Department.
6. **Health Sciences application** – Submit a completed performance-based Health Sciences application including a preadmission degree evaluation. Deadlines are listed on form.
7. **BCI** – Students are required to submit a background check when directed by notification from Enrollment Services. Results of BCI may prevent admission due to clinical agencies requirements.

Program Requirements
• A cumulative grade point average of 2.0 or better is required to proceed in the program.
• General education courses in the dental assisting curriculum may be taken prior to the semester recommended. All courses must be completed by the recommended semester.
• Program faculty reserve the right to dismiss any student from the program or to refuse reinstatement based on academic, clinical or professional performance.
• ENGL 1300 may not be substituted for ENGL 1010.
• BIOL 1070 must be completed prior to the second semester

RECOMMENDED COURSE SEQUENCE
• First semester: BIOL 1070; ENGL 1010; DAST 1010, 1020, 1030, 1225; DENT 2010, 2225
• Second semester: COMM 1100; DAST 1040, 1050, 1060; PSYC 1030

Community College of Rhode Island

Dental Hygienist

Associate in Applied Science Degree in Dental Hygiene (AAS_DHYG)

Occupational Title: Dental Hygienist
Flanagan Campus, Lincoln only

This program is accredited by the American Dental Association, Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL, 60611.

The dental hygienist is a licensed professional who provides primary preventive dental services to patients in a wide variety of settings. Students in this program attend lecture and laboratory classes and provide treatment in a modern, state-of-the-art dental hygiene clinic at the Flanagan Campus in Lincoln. This course of study prepares students for board examinations required for dental hygiene licensure. Participation in the dental hygiene program exposes students to infectious diseases, blood born pathogens and ionizing radiation.

Technical Standards: The physical activity (strength) level for dental hygienist (078.361-010) is classified as “light” by the Department of Labor in The Dictionary of Occupational Titles.

Note: Many courses require prerequisites and/or testing. See course descriptions for details.

CCRI also offers a Dental Assisting certificate program, see this page for details.

Minimum requirements needed to apply to the Dental Hygiene program

1. **CCRI application** – Submit a completed CCRI Application for Enrollment. General Studies should be first choice; DHYG should be second choice.
2. **High school transcript** – Send an official copy of a transcript from an accredited high school or GED® certification, including date of graduation or, if the applicant holds a baccalaureate degree from an accredited college/university, the high school transcript may be waived; college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI's Department of Advising and Counseling. Students may retake the ACCUPLACER test once before completing any remedial course(s).
   a. **Math** – Demonstrate competency by placing into MATH 0101 with a test score of 75 or above for the algebra section or completion of MATH 0101: Foundations of College Algebra with a grade of "C" or better. The entry course for MATH 0101 is MATH 0095. The following courses will substitute for MATH 0101: 1025, 1139, 1175, 1240, 1241, 2077, 2110, 2111, 2138, 2141, 2142 or 2243.
   b. **English (writing) test** must show readiness to take ENGL 1010: Composition I or applicant must have completed ENGL 1005: College Writing with a grade of "C" or better. ENGL 1300 will not substitute for ENGL 1010.
   c. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890: Critical Reading with a grade of "B-" or better.
4. **Complete courses required** for admission with a grade of C or better:
   a. CHEM 1010 - Survey of Biomedical Chemistry (Chemistry placement testing is required prior to enrolling in CHEM 1010.)
   b. DENT 1000 - Introduction to Dental Health
   c. BIOL 1010 - Human Anatomy
   d. BIOL 1020 - Human Physiology
5. **GPA** – A cumulative grade point average of 2.0 or better for all college courses taken. All science courses must have earned a final course grade of "C" or better. If not, the science course(s) must be repeated.
   a. All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into Dental Hygiene, the student must attend a mandatory orientation conducted by the Dental Health Department.
6. **Health Sciences application** – Submit a completed performance-based Health Sciences application including a preadmission degree evaluation. Deadlines are listed on form.
7. **BCI** – Students are required to submit a background check when directed by notification from Enrollment Services. Results of BCI may prevent admission due to clinical agencies requirements.

Program Requirements

- Students must complete all BIOL, CHEM, and DENT 1000 with a grade of C or better.
- A cumulative grade point average of 2.0 or better is required at the end of each semester to proceed in the program.
- General education courses in the Dental Hygiene curriculum may be taken prior to the semester recommended. BIOL 2210 must be taken prior to or during the second semester.
• Program faculty reserve the right to dismiss any student from the program or refuse reinstatement based on academic, clinical or professional performance.
• ENGL 1300 may not be substituted for ENGL 1010.
• All science courses must be completed with a grade of C or better or the course(s) must be repeated.
• Students must complete all DHYG and DENT courses with a grade of C+ or better.

Readmission
Any student who leaves the program for any reason may apply for readmission in a subsequent year. Such application must be made by letter to the program director and must be received by Oct. 15 or March 15 preceding the semester for which readmission is sought. Consideration for possible readmission will be by concurrence of the Dental Hygiene Readmittance Committee and the program director who will review each request individually. There is no guarantee that a student will be readmitted to the Dental Hygiene program.

A student may be readmitted to the Dental Hygiene program only once and must comply with the recommendations of the Dental Hygiene Readmittance Committee and the program director.

These recommendations may include but are not limited to:
• reinstatement on a space available basis;
• reinstatement that may include repeating any previously completed clinical courses;
• reinstatement that may include repeating or auditing any previously completed didactic courses;
• denial of reinstatement with no further consideration for readmission.

RECOMMENDED COURSE SEQUENCE

PREADMISSION Requirements
These courses must be taken prior to program admission.

Emergency Management/Homeland Security

Associate in Science Degree in Emergency Management/Homeland Security (AS_EMGD)

Evenings only

The program in Emergency Management/Homeland Security is designed to provide students the core skills needed to work in the field of emergency management or homeland security. This discipline covers a broad spectrum of job opportunities in the public and private sectors. Job opportunities are in such fields as local, state and federal government; military; Department of Homeland Security; businesses; private security; public safety; hospital systems and universities.

Students learn about risk assessment, terrorism, disasters, natural and man-made hazards, emergency response, incident command, emergency planning and many other aspects of emergency management and homeland security.

Students who successfully complete the program earn a well-rounded degree, fulfilling both general education requirements and completing core courses that provide in-depth competencies needed to work in the field. The program finishes with a practicum and professional development course tying together acquired knowledge and skills.

Note: Not all courses are offered every semester. Many courses require prerequisites and/or testing. See course descriptions for details.

Emergency/Disaster Management

Certificate in Emergency/Disaster Management (CERT_EMER)

All campuses, evenings only

This fast-growing field presents opportunities for individuals who seek employment in various emergency management capacities. This program is based upon the Emergency Management Institute (EMI) for higher education and is designed to enhance the emergency/disaster management skills and knowledge of police, fire service, hospital personnel, business, security personnel, risk managers, etc.

Courses in this certificate can be applied to the Associate degree in Emergency Management/Homeland Security. Learn about the associate degree.

All applicants must have a high school diploma or GED® credential.

Note: Many courses require prerequisites and/or testing. See course descriptions for details.

GENERAL POLICIES
See important general policies on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Requirements for admission into the Emergency Management program
1. Complete and submit a CCRI Application for Enrollment to General Studies.
2. Submit an official copy of high school or GED® transcript including graduation date or, if the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.

Program Requirements
• All courses must be completed with a C or better.
• Check GPA requirements for progression in this program.

RECOMMENDED COURSE SEQUENCE
• First semester: EMER 1000; ENGL 2100
• Second semester: EMER 1010 OR 1020, 1030; GEOL 1030
• Third semester: EMER 1040 OR EMER 2500

Students must be accepted into the program before enrolling in any required courses.

Total Certificate Credits 18
Fire Science/Emergency Medical Technician

Associate in Applied Science Degree in Fire Science/Emergency Medical Technician (AAS_FIRE)

The Fire Science program is for individuals who are interested in or currently serving in the fire service or related fields. Graduates work for municipal fire departments or obtain positions in the fields of industrial fire safety and security, fire protection engineering technology, fire insurance inspection, investigation underwriting and ambulance services.

A balanced combination of professional and general education courses equips students with the knowledge and skills needed in this increasingly technological field. Fire protection systems and codes, tactics and strategies, hydraulics and equipment, offiership and administration, and hazardous materials are studied.

Note: Not all courses are offered every semester. See department chair or semester schedule of courses. FIRE 1010 - Principles of Fire and Emergency Services, Safety and Survival and FIRE 1060 - Fire Behavior and Combustion are delivered to meet FESHE standards. However, these courses are not required as part of the degree program. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

GENERAL POLICIES

See important general policies on the performance-based Health Sciences application process, academic progress, advanced standing, background check, CPR certification, health insurance, health records, reinstatement, transportation, and uniforms and equipment.

Requirements for acceptance into the Fire Science program

1. Complete and submit a CCRI Application for Enrollment to General Studies.
2. Submit an official copy of high school or GED® transcript including the graduation date. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. Provide proof of completed Tdap vaccine and titers.

Health Care Interpreter

Certificate in Health Care Interpreter (CERT_INTC)

Occupational Title: Health Care Interpreter
Liston Campus, Providence only

The Health Care Interpreter certificate program is a two-semester program that prepares an assistant-level practitioner for the healthcare community. These individuals are prepared to provide high quality and skilled interpreting services in a variety of healthcare facilities; acute care, long-term care and community health care agencies. The program includes a total of 16 credits for three distinct courses. Students gain an understanding of the critical role that healthcare interpreters fulfill within the healthcare team through theory presented in the classroom, simulated clinical experiences, as well as practice experience in the selected healthcare settings.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES
See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms and equipment.

Minimum requirements to apply to the Health Care Interpreter certificate program:

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; INTC should be the second choice.
2. **High school transcript** – An official copy of a high school or GED# transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Must earn English placement test results (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling:
   a. Reading comprehension test must show competency of 80 or above OR students must complete ENGL 0890 - Critical Reading with a grade of “B-” or better.
   b. Readiness to take ENGL 1005 - College Writing or higher OR the applicant must have completed ENGL 0500 - Basics of Composition with a “C” or higher or ENGL 0250 - Compensatory Writing Skills with a “B-” or higher or ENGL 1300 - Composition I for Speakers of English as a Second Language with a “C” or higher.
4. Completion of the Versant Oral Proficiency Test in Spanish with a minimum score of 76 (test available at Knight Campus only).
5. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation.
6. **Background Check** – Students are required to submit a background check when directed by Enrollment Services. Results of BCI (Bureau of Criminal Investigation) check may prevent admission due to clinical agencies’ requirements.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. At the time of admission, the student must meet the current admission requirements. Students declining acceptance into the program must resubmit a performance-based Health Sciences application and meet the current admission requirements.

Program Requirements:
- Student must successfully complete all courses in the Health Care Interpreter program to be certificate eligible.
- Student must maintain a GPA of 2.0 or higher throughout the program to be certificate eligible.
- Students must have required immunizations completed before any field work.
- Course sequence: RHAB 1010 - Medical Terminology of Rehabilitative Health and INTC 1300 - Interpreting in Health Care I, both with a grade of “C” or better is required for progression to INTC 1310 - Interpreting in Health Care II.

**RECOMMENDED COURSE SEQUENCE**
- First semester: RHAB 1010; INTC 1300
- Second semester: INTC 1310

Certificate Requirements

Note: Students must be accepted into the program before taking major requirements.

Histotechnician

Associate in Applied Science Degree in Histotechnician (AAS_HSTO)

Occupational Title: Histotechnician
Liston Campus, Providence only

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road., Suite 720, Rosemont, IL, 60018; 773-714-8880.

Histotechnicians are integral members of the healthcare team. It is the job of the histotechnician to prepare sections of human tissue from biopsy or autopsy for microscopic examination by processing and cutting tissues, mounting them on slides and staining them with special dyes for microscopic examination by a pathologist for the diagnosis of disease. Most histotechnicians work in hospital laboratories, medical research laboratories, veterinary pathology and forensic laboratories.

The CCRI Histotechnician program prepares students to enter this challenging and rewarding field and provides them with entry-level knowledge, application and problem-solving skills needed to function as active members of the healthcare team. Graduates of the program are eligible for:

- Employment in a hospital, crime lab, veterinary lab and public health facility.
- Transfer to a bachelor’s degree program.
- Sitting for the national certification examination for HT given by ASCP Board of Certification (BOC).

Technical standards: The physical activity level for Histotechnician (078.261.030) is classified as “light” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for details.

GENERAL POLICIES
See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Histotechnician program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; HSTO should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. Note: For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better. ENGL 1300 will not substitute for ENGL 1010.
4. Complete courses required for admission with a grade of C or better:
   a. BIOL 1010 - Human Anatomy
   b. CHEM 1030 - General Chemistry I or permission of the department
5. GPA – A cumulative grade point average of 2.0 or better for all college courses taken.
6. **Aptitude Examination** – Take the PSB Health Occupations Aptitude Examination administered through Advising and Counseling. The exam may be taken no more than three times. (See psbtests.com.)
7. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See www.ccri.edu/dean-hrs.) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.
8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.
Program Requirements

- Major requirements must be taken in sequence and are open only to students who are formally accepted into the program.
- Students must be accepted to the program before taking any major requirements.
- Students must complete all courses in this program with a cumulative index of 2.0 to qualify for the Associate in Applied Science degree.
- **No grade of less than C** is acceptable in any technical course (HSTO). Students receiving less than C will be dismissed from the program.
- Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or behavioral performance.
- Students are responsible for the purchase of books, uniforms, and transportation prior to clinical assignments.
- ENGL 1300 may not be substituted for ENGL 1010.

Homeland Security
Certificate in Homeland Security (CERT_HMLS)

- Concentrations:
  - Cybersecurity Concentration (HMCS)
  - Emergency Management Concentration (HMEM)
  - Law Enforcement Concentration (HMLE)

Homeland Security has become an integral part of our society. The certificate in Homeland Security provides students with the opportunity to choose three pathways in homeland security.

Each pathway consists of three core courses focusing on the history and development of homeland security, intelligence analysis and how agencies share information to stop terrorist attacks, and border and transportation security issues.

Students then decide which track they wish to pursue. The concentration in emergency management focuses on the depths of terrorism. The concentration in law enforcement provides students with the tools to enter into the law enforcement community, and the concentration in cybersecurity provides a pathway for students interested in defending our nation from a cyberterrorist attack or cyber disruption.

Courses in the Emergency Management concentration can be applied to the Associate Degree in Emergency Management/Homeland Security. See this page for information on the associate degree.

Note: Many courses require prerequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

Cybersecurity concentration
- First semester: HMLS 1000; COMI 2035, 2036
- Second semester: HMLS 1010, 1020; COMI 2037

Emergency Management concentration
- First semester: HMLS 1000; EMER 1020, 1040
- Second semester: HMLS 1010, 1020; EMER 1010

Law Enforcement concentration
- First semester: HMLS 1000; LAWS 1000, 1010
- Second semester: HMLS 1010, 1020; LAWS 1020

Magnetic Resonance Imaging

Certificate in Magnetic Resonance Imaging (CERT_MRIC)

Flanagan Campus, Lincoln only

Magnetic resonance imaging is a dynamic technology used in the diagnosis and treatment of disease. This two-semester program, which combines classroom instruction with supervised clinical practice, focuses on understanding the basic principles of magnetic resonance imaging and the care of patients requiring diagnosis or treatment. The goal of this program is to prepare students who can competently and safely perform magnetic resonance procedures, display the personal qualities of integrity, responsibility, and reliability and who function as active members of the healthcare team.

Graduates receive a certificate in magnetic resonance imaging and are prepared to sit for the national credentialing examination offered by the American Registry of Radiologic Technologists. They are eligible for employment in hospitals, clinics, physician’s offices and mobile MRI facilities.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Magnetic Resonance Imaging certificate program

1. CCRI application – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; MRIC should be the second choice.
2. High school transcript – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. ARRT Certificate – Current certification as a radiologic technologist through the American Registry of Radiologic Technologists. (ARDMS, American Registry of Diagnostic Medical Sonographers and NMTCB, Nuclear Medicine Technology Certification Board certifications are acceptable substitutes.)
4. Placement testing – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. Note: For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses.
   a. Reading comprehension test must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better.
   b. English (writing) test must show readiness to take ENGL 1010: Composition I or students must complete ENGL 1005 - College Writing with a grade of C or better. ENGL 1300 will not substitute for ENGL 1010.
5. GPA – A cumulative grade point average of 2.0 or better for all college courses taken.
6. Health Sciences application – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. IMPORTANT: Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See www.ccri.edu/dean-hrs.) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.
7. Background check – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements

• The major requirements of this program must be taken in sequence. They are open only to students who are formally accepted into the program.
• No grade less than a C is acceptable in any of the technical courses (MRIC).
• Maintain a cumulative GPA of 2.0 or greater.
• Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or professional performance.
• ENGL 1300 may not be substituted for ENGL 1010.
RECOMMENDED COURSE SEQUENCE

- First semester: MRIC 2260, 2270; ENGL 1010; PSYC 2010
- Second semester: MRIC 2280, 2290; COMI 1100; General Education Elective

Medical Laboratory Technology

Associate in Applied Science Degree in Medical Laboratory Technology (AAS_CLAB)

Occupational Title: Medical Laboratory Technician
Flanagan Campus, Lincoln only

The Medical Laboratory Technology program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL, 60018; 773-714-8880.

Tremendous advances in medicine have resulted in an ever-increasing demand for diagnostic laboratory tests. The complexity of laboratory sciences today requires a highly trained technician to carry out these intricate analyses. The Medical Laboratory Technology program prepares students to enter this interesting and rewarding field.

This program provides the classroom and laboratory preparation required for students to work under supervision in a hospital or a public or private health laboratory, performing a wide variety of blood, chemical, microbiological, immunological and other clinical laboratory tests. Students undertake three semesters of preparation at CCRI and two semesters at an affiliated site where clinical practices are performed under the supervision of qualified, registered, professional personnel. Techniques of the operation, care, and maintenance of the latest equipment are emphasized throughout the clinical and academic experiences.

The Medical Laboratory Technology program prepares students as medical laboratory technicians with entry-level knowledge, application, and problem-solving skills to competently and safely perform a variety of laboratory procedures and function as an active member of the healthcare team.

Graduates of this program are eligible for employment in a hospital, public or private health laboratory, health care clinic, veterinary office, research lab, crime lab or pharmaceutical lab, performing a wide variety of blood, chemical, microbiological, immunological and other clinical laboratory tests. They also may choose to transfer to a bachelor’s degree program at a four-year college or university.

Graduates are eligible to sit for the national certification examination for MLT given by the ASCP Board of Certification (BOC).

Technical standards: The physical activity (strength) level for medical laboratory technician (078.381-014) is classified as “light” by the Department of Labor.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Medical Laboratory Technology program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; CLAB should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. **Note:** For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses.
   Reading comprehension test must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better. ENGL 1300 will not substitute for ENGL 1010.
4. **Complete courses required** for admission with a grade of C or better:
   a. BIOL 1002 - Introductory Biology: Cellular
5. **Aptitude Examination** – Take the PSB Health Occupations Aptitude Examination administered through Advising and Counseling. The exam may be taken no more than three times. See psbtests.com
6. **GPA** – A cumulative grade point average of 2.0 or better for all college courses.
7. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See [www.ccri.edu](http://www.ccri.edu)/)
At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.

8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

**Program Requirements**

- Students are responsible for the purchase of books, uniforms, and transportation to clinical assignments.
- Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or behavioral performance.
- Students must complete all courses in this program with a cumulative index of 2.0 to qualify for the Associate in Applied Science degree.
- **No grade of less than C** is acceptable in any technical course (MLTC). Students receiving less than C will be dismissed from the program.

**RECOMMENDED COURSE SEQUENCE**

**PREADMISSION General Education Requirement**

This course must be taken prior to program admission.

Nursing

Associate of Science Degree in Nursing

The Associate Degree of Nursing Program is accredited by the Accreditation Commission for Education in Nursing, Inc. (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA, 30326; 404-975-5000.

Continuing Accreditation for Associate Degree in Nursing: Last evaluation visit: September 27-29, 2011; Most recent action: March 2012; Substantive change approved April 27, 2016; Next evaluation visit: Fall 2019. Students who complete and receive an Associate of Science degree in Nursing are eligible to take the licensure examination for Registered Nursing (NCLEX-RN).

The Nursing Program is offered at the Knight (Warwick), Flanagan (Lincoln), Liston (Providence) and Newport County Campuses. An evening/weekend option is offered at the Flanagan campus. Students may apply to any campus. Once accepted, students may not transfer between campuses.

Applicants may earn credits in advance of applying for degree status, but this must be done in consultation with the Office of Enrollment Services. Courses may be taken at the Community College of Rhode Island or at any other accredited college.

Technical Standards: The physical activity (strength) level for a registered nurse (075.364-010) is classified as “medium” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Many courses require prerequisites, co-requisites and/or testing. See course descriptions for details.

IMPORTANT:
All admission requirements must be completed satisfactorily BEFORE an applicant can be offered acceptance into the Nursing Program. At the time of admission, the student must meet the current admission requirements of the program. Students declining acceptance into the program for the semester offered must reapply to the program and meet the current admission requirements. Once accepted into Nursing, the student must attend a mandatory orientation conducted by the Nursing Department.

GENERAL POLICIES
See important general policies in the beginning of this section on the Performance-Based Health Sciences (PBHS) application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Nursing Program

1. CCRI Application for Enrollment in General Studies with a pre-nursing concentration
2. Official copy of a high school or GED® transcript, or baccalaureate transcript from an accredited institution, including date of graduation or completion
3. ACCUPLACER test issued by CCRI's Department of Advising and Counseling
   a. Reading Comprehension Requirement:
      • Score of 90 or above in Classic Accuplacer is required in Reading Comprehension OR score of 259 or above in Next Generation Accuplacer is required in Reading Comprehension OR ENGL 0890: Critical Reading with a grade of B- or better
   b. Mathematics Requirement:
      • Score of 80 or above in Classic Accuplacer is required for Math (Arithmetic) OR score of 255 in Next Generation Accuplacer is required for Math (Arithmetic) OR MATH 0100: Fundamentals of Mathematics with a grade of B- or better
      • Entry point into MATH 0100 is MATH 0095
4. HESI A² Test*
   a. Reading Comprehension and Math with a score of 80 percent or better
   b. Vocabulary/General Knowledge, and Grammar with a score of 75 percent or better

*HESI A² Test* If the student does not achieve a minimum score on one or more of the tests, the student may retake the necessary test(s) once within the next 12 months. Students are limited to two attempts within a 12-month period from the date the original test was taken. A minimum of two weeks between exams is required. Please note: HESI test scores do not expire.
5. Complete the following prerequisite courses. (These courses are limited to two attempts.)
   a. BIOL 1010: Human Anatomy with a grade of B- or better
   b. ENGL 1010: Composition I with a grade of C or better
   c. PSYC 2010: General Psychology with a grade of C or better
   d. NOTE: All attempts prior to Jan 1, 2015, including transfers, are considered ONE attempt regardless of the number of times the class was taken. If a student fails to meet the satisfactory grade requirements within two attempts, the student must wait five years from the last attempt to retake the course.
6. A minimum overall cumulative grade point average of 2.7 is required to apply to the program and must be maintained until enrolled in the Nursing program.
   All above requirements must be met satisfactorily BEFORE submission of the PBHS application and do not guarantee acceptance. Students declining acceptance into the program for the semester offered must resubmit a PBHS application for the program and meet current requirements, in order to be considered for acceptance at a later date.
7. Complete and submit an online PBHS application at www.ccri.edu/oes/admissions/performancebasedapplications.html. Deadlines are listed on the form.
   a. If applicable, indicate on PBHS application if you have an active CNA certification. Additional admission points will be granted for current CNA certification.
8. Conditionally accepted students are required to complete the following:
   a. When directed by Enrollment Services, submit a background check through CastleBranch.com. Results of BCI may prevent admission due to clinical agencies’ requirements.
   b. Submit all health care requirements to CastleBranch.com by the deadline identified. If applicable, submit a copy of active CNA certification to CastleBranch.com by the deadline identified.
   c. Final acceptance is based upon completion of the above criteria by stated deadline.

Program Requirements
   • A cumulative GPA of at least 2.5 is required for graduation and the awarding of an Associate of Science degree.
   • Students must maintain a passing status (75 or above) in the theoretical and clinical components of each Nursing course. In the event that a student fails either the theory or the clinical component of a required Nursing course, the course must be repeated in its entirety. Nursing courses are graded using a department-specific grading policy (75=C). “C” is considered a passing grade for all nursing courses.
   • At this time, BIOL 1020 (Human Physiology) is required in Semester 1 of the Nursing Program. Students must achieve a grade of B- or better in the course. If required benchmark for this course is not achieved, student may not progress in the program. Students are limited to two attempts. Note Human Physiology: BIOL 1020 grade is valid for five years.**

Reinstatement
   • Reinstatement to the Nursing Program is based on space availability. Priority is given to students in good academic standing at the time of withdrawal. Students returning to the Nursing Program must be approved by the Scholastic Standing Committee and may be required to repeat previous and/or complete additional course work.
   • A student is eligible to repeat only one non-clinical Nursing course, with the exception of dropping/failing both Nursing non-clinical courses simultaneously during a single semester (NURS 1015 and NURS 1061 during Semester 1). If only one non-clinical Nursing course is dropped/failed during Semester 1, that single class will be considered their one and only repeat attempt.
   • A student is eligible to repeat only one clinical Nursing course, with the exception of dropping/ failing both clinical Nursing courses simultaneously during a single semester (NURS 1023 and NURS 1020 during Semester 2; NURS 2040 and NURS 2050 during Semester 3, or NURS 2060 and NURS 2500 during Semester 4). If only one clinical Nursing course is dropped/failed during Semesters 2, 3, or 4, that single class will be considered their one and only repeat attempt.
   • A student requesting to repeat a Nursing course must meet the current admissions criteria.

RECOMMENDED COURSE SEQUENCE

Suggested course progression reflects full-time status with a minimum of 12 credits.

LPN's interested in becoming a Registered Nurse can continue their education through the LPN to RN option within the Associate Degree Nursing Program. Click here for more information.

Total Semester 4 Credits: 13

Total Prerequisite and In-Program Credits: 65
Community College of Rhode Island

**Biology Requirements - Changes to Anatomy and Physiology Courses**

- BIOL 1010 - Human Anatomy will be offered for the final time in Summer 2019. This course is limited to two (2) attempts.
- BIOL 1020 - Human Physiology will be offered for the final time in Fall 2019. This course is limited to two (2) attempts.
- Anatomy and Physiology 1 (A&P1) will be first offered in Fall 2019. This course is limited to two (2) attempts.
- Anatomy and Physiology 2 (A&P2) will be first offered in Spring 2020. This course is limited to two (2) attempts.

*What does this mean?*

**For students interested in the August 2019 application period (for Spring 2020 entrance):**

You MUST have completed the BIOL 1010 entrance requirement prior to or during Summer 2019 AND you MUST complete BIOL 1020 prior to or during Fall 2019, as it will no longer be offered after that time. If you do not successfully complete BIOL 1020 in Fall 2019, you MUST take an equivalent* course at another college or university during or prior to the first semester of the Nursing program, when BIOL 1020/A&P2 is required.

If you do not successfully complete BIOL 1020 in Fall 2019 and do not pass an equivalent* course at another college or university in Spring 2020, you will not be allowed to progress to Semester 2 of the Nursing Program.

**For students interested in the February 2020 application period (for Fall 2020 entrance):**

Before submitting your application, you will need to have completed either of the two options below:

- BIOL 1010 and BIOL 1020 at CCRI or equivalent courses at another college or university*. Remember that BIOL 1010 is last offered in Summer 2019 and BIOL 1020 is last offered in Fall 2019.

OR
- A&P1, which will first be offered in Fall 2019. **Note:** A&P2 is not a pre-requisite course, but is a program requirement. You may choose to complete A&P2 prior to entrance into the Nursing Program.
Nursing

Practical Nursing Diploma

The Practical Nursing diploma program is accredited by the Accreditation Commission for Education in Nursing, Inc. (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA, 30326; 404-975-5000.

At this time, graduates of the Community College of Rhode Island’s Practical Nursing Program are not permitted to take the NCLEX-PN licensure examination in Massachusetts, by order of the Massachusetts Board of Registration in Nursing (MABON), nor will MABON allow CCRI Practical Nursing graduates to obtain licensure in another state and then apply for a Massachusetts license by endorsement/reciprocity.

Students who complete the Practical Nursing course of study receive a diploma and are eligible to take the examination for licensure as a Practical Nurse (NCLEX-PN). Students who complete first semester classes of the Practical Nurse program are eligible to take the examination to become a certified nursing assistant (CNA).

The Practical Nursing program is offered at the Knight (Warwick) campus.

Applicants may earn credits before applying for diploma status, but they must consult with the Office of Enrollment Services. Courses may be taken at the Community College of Rhode Island or at any other accredited college.

Technical Standards: The physical activity (strength) level for a licensed practical nurse (075.374-017) is classified as “medium” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Some courses require prerequisites, co-requisites and/or testing. See course descriptions for details.

IMPORTANT:
All admission requirements must be completed satisfactorily BEFORE an applicant can be offered acceptance into the Practical Nursing program. At the time of admission, the student must meet the current admission requirements of the program. Students declining acceptance into the program for the semester offered must reapply to the program and meet the current admission requirements. Once accepted into the Practical Nursing program, the student must attend a orientation conducted by the Nursing Department.

GENERAL POLICIES:
See important general policies in the beginning of this section regarding the Performance-Based Health Sciences (PBHS) application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply for the Practical Nursing program
1. CCRI Application for Enrollment in General Studies with a pre-practical nursing concentration
2. Official copy of a high school or GED® transcript, or baccalaureate transcript from an accredited institution, including date of graduation or completion
3. If applicable, submit copy of current CNA licensure to the Office of Enrollment Services. Additional admission points will be granted for current CNA licensure.
4. **ACCUPLACER** test issued by CCRI’s Department of Advising and Counseling
   - **Reading Comprehension Requirement:**
     - Score of 90 or above in Classic Accuplacer is required in Reading Comprehension **OR** score of 259 or above in Next Generation Accuplacer is required in Reading Comprehension **OR** ENGL 0890: Critical Reading with a grade of B- or better
   - **Mathematics Requirement:**
     - Score of 80 or above in Classic Accuplacer is required for Math (Arithmetic) **OR** score of 245 in Next Generation Accuplacer is required in Math (Arithmetic) **OR** MATH 0100: Fundamentals of Mathematics with a grade of B- or better
     - Entry point into MATH 0100 is MATH 0095

**NOTE:** All attempts at MATH 0100 (or MATH 0099 prior to January 1, 2018), including transfers, are considered ONE attempt regardless of the number of times the class was taken. If a student fails to meet the satisfactory grade requirements within two attempts, the student must wait five years from the last attempt to retake the course.

5. **HESI A² Test:** Score of 70 percent or better on each section. If a student does not achieve a 70 percent on one or more of the HESI A² tests, he or she may retake the necessary test(s) once within the next 12 months. Students are limited to two attempts within the 12-month period from the date the original test was taken. A minimum of two weeks between exams is required. **Please note:** HESI test scores do not expire.

6. Complete the following prerequisite course: ENGL 1010: Composition I, with a grade of C or better. **NOTE:** This course is limited to two attempts. All attempts prior to Jan 1, 2015, including transfers, are considered ONE attempt regardless of the number of times the class was taken. If a student fails to meet the satisfactory grade requirement within two attempts, the student must wait five years from the last attempt to retake the course.

7. A minimum overall cumulative grade point average of 2.0 is required to apply to the program and must be maintained while enrolled in the Practical Nursing program. **All above requirements must be met satisfactorily BEFORE submission of the PBHS application and do not guarantee acceptance.** Students declining acceptance into the program for the semester must resubmit a PBHS application for the program and meet current requirements.

8. Complete and submit an online PBHS application at [www.ccri.edu/oes/admissions/performancebasedapplications.html](http://www.ccri.edu/oes/admissions/performancebasedapplications.html) Deadlines are listed on the form.

9. Conditionally accepted students are required to complete the following:
   a. When notified by the Office of Enrollment Services, submit a background check, by the deadline identified, through CastleBranch.com. Results of BCI may prevent admission due to clinical agencies’ requirements.
   b. Submit all health record requirements to CastleBranch.com by the deadline identified.
   c. If applicable, submit a copy of active CNA certification to CastleBranch.com by the deadline identified.
   d. **Final acceptance is based upon completion of the above criteria by the deadlines identified in the conditional acceptance notification.**

**Program Requirements**
- A cumulative GPA of at least 2.0 is required for graduation and the awarding of a Practical Nursing diploma.
- Students must maintain a passing status (75 or above) in the theoretical and clinical components of each Practical Nursing course. In the event that a student fails either the theory or the clinical component of a required Practical Nursing course, the course must be repeated in its entirety. Nursing courses are graded using a department specific grading policy (75=C). “C” is considered a passing grade for all nursing courses.
- BIOL 1070: Anatomy and Physiology, is required in semester 1 of the Practical Nursing program. Students must achieve a grade of C or better in the course. If required benchmark for this course is not achieved, student may not progress in the program. Students are limited to two attempts. Note: The requirement of BIOL 1070 will be waived if the student has taken both BIOL 1010 and BIOL 1020 and received a grade of C or better in both of them. **Note:** BIOL 1020 (Human Physiology) grade is valid for five years.
  - BIOL 1010 (Human Anatomy) will not be offered as of Fall 2019; BIOL 1020 will not be offered as of Spring 2020.

**Reinstatement**
- Reinstatement to the Practical Nursing program is based on space availability. Priority is given to students in good academic standing at the time of withdrawal. Students returning to the Practical Nursing program must be approved by the Scholastic Standing Committee and may be required to repeat previous and/or complete additional course work.
- A student is eligible to repeat only one non-clinical Nursing course, with the exception of dropping/failing both Nursing non-clinical courses simultaneously during a Semester 1 (NURS 1015P and NURS 1061P). If only one non-clinical Nursing course is dropped/failed during Semester 1, that single class will be considered their one and only repeat attempt.
- A student is eligible to repeat only one clinical Nursing course. If one clinical Nursing course is dropped/failed during any semester, that single class will be considered their one and only repeat attempt.
• A student requesting to repeat a Nursing course must meet the current admissions criteria.

Suggested course progression reflects full-time status with a minimum of 12 credits for the first two semesters. Students in the Practical Nursing program are required to take only 11 credits in their final semester.

Occupational Therapy Assistant

Associate in Applied Science Degree in Occupational Therapy Assistant (AAS_OCTA)

Occupational Title: Occupational Therapy Assistant
Newport County Campus only
Evening/Weekend Program (Fieldwork-days)

The Occupational Therapy Assistant program at CCRI is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE). You may find out more at www.acoteonline.org or you may contact ACOTE at 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20824-3449 or call 301-652-2682.

Occupational therapy is the use of purposeful activity and interventions to promote health and achieve functional outcomes in areas such as activities of daily living, work, play, or education activities. Achieving functional outcomes means to develop, improve or restore the highest level of independence to any individual who is limited by physical injury or illness, cognitive impairment, psychosocial dysfunction, mental illness, developmental or learning disability or an adverse environmental condition. Occupational therapy helps people of all ages lead productive, satisfying lives.

The Occupational Therapy Assistant program is offered at the Newport County Campus. It is an evening/weekend program; however, fieldwork experiences are offered during the day. Although Occupational Therapy Assistant courses are offered at the Newport County Campus, the required general education courses may be taken at other CCRI campuses or sites prior to acceptance. All fieldwork courses shall be completed within 18 months following completion of the academic preparation.

Students successfully completing the accredited program earn an Associate in Applied Science degree in Occupational Therapy Assistant (AAS_OCTA) and are eligible to sit for the national certification examination for occupational therapy assistants, which is administered by the National Board for Certification in Occupational Therapy, Inc. (NBCOT). An individual must successfully pass the certification examination to apply for licensure to practice as a certified occupational therapy assistant in the state of Rhode Island.

Technical standards: The physical activity level for occupational therapy assistants is classified as “medium” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Occupational Therapy Assistant program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; OCTA should be the second choice.
2. **High school transcript** – Send an official copy of the applicant’s high school or GED® transcript, including date of graduation. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. Complete RHAB 1100 - Foundational Kinesiology (recommended) and it may be considered in the performance-based acceptance process.
4. **Placement** – Complete a standardized test (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling. Competency of 250 or above is required for reading comprehension or completion of ENGL 0890 - Critical Reading with a grade of B- or better.
5. **Complete the following courses** with a grade of C or better:
   a. BIOL 1020 - Human Physiology or BIOL 2202 Anatomy and Physiology II
   b. MATH 1025 - Introduction to College Math or MATH 1200, 1210, 1139, 1138, 1175, 1240, 1241, 2077, 2138, 2111, 2141, 2143, 2243. (Highest grade earned in any of these courses will be calculated in the point system.)
   c. ENGL 1010 - Composition I. ENGL 1300 will not substitute.
   d. PSYC 2010 - General Psychology
   e. PSYC 2030 - Developmental Psychology
   f. COMM 1100 - Oral Communication I
6. **Complete the following courses** with a grade of B- or better:
   a. BIOL 1010 - Human Anatomy or BIOL 2201 Anatomy and Physiology I
   b. OCTA 1000 - Introduction to Occupational Therapy
   c. RHAB 1010 - Medical Terminology for Rehabilitation
7. **GPA** – Earn a cumulative grade point average of 2.7 or better for all college courses taken.

8. **Health Sciences application** – Complete and submit performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period. The application and instructions can be found at [www.ccri.edu/oes/admissions/index.html](http://www.ccri.edu/oes/admissions/index.html).
   a. **IMPORTANT:** All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into the Occupational Therapy program, the student must attend a mandatory orientation conducted by the Rehabilitative Health Department.

9. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services. Final acceptance to the program is dependent on the results of the background check.

**RECOMMENDED COURSE SEQUENCE**

**PREADMISSION General Education Requirements**
These courses must be taken prior to program admission.

Opticianry

Associate in Applied Science Degree in Opticianry (AAS_OPTI)

The responsibilities of dispensing opticians include the fitting and fabrication of optical frames and lenses, helping patients decide on the correct frames for their prescription, conferring with doctors on the best or needed types of lens products for a patient, and daily management of an optical practice. Opticians can work as independent practitioners, for an ophthalmologist, optometrist or for any type of business where the dispensing of eyewear is needed. Opticians also can branch into sales of frames, lenses, machinery or management.

The CCRI Opticianry program, one of only four programs located in New England, integrates classroom and laboratory preparation with clinical practice for students to learn and practice the skills and behaviors required to be an optician. Core courses include lecture, laboratory and clinical education experiences in various ophthalmic settings where students utilize skills in the clinic that were learned in the classroom while being mentored by a preceptor who is a licensed ophthalmologist, optometrist or optician.

General education courses for the Opticianry program can be taken at any campus. Major courses in the Opticianry program are primarily offered in a distance learning format. Each course has online modules which students are required to complete independently within a specific time frame. Some onsite participation is required for course lectures and hands-on training sessions which are typically held on Saturdays or evenings for approximately three hours at a time. Clinical experiences are scheduled at optical facilities and typically run during daytime hours Monday through Saturday. The specific clinical experience schedule depends on the schedule of the clinical site and the clinical instructor to which each student is assigned.

Successful completion of the CCRI Opticianry program allows students to apply for licensure in Rhode Island and nationally and take the National Opticianry Competency Examination (NOCE) administered by the American Board of Opticianry (ABO) as well as complete a regional practical examination.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Opticianry program

1. CCRI application – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; OPTI should be the second choice.
2. High school transcript – Send an official copy of the applicant’s high school or GED® transcript, including date of graduation. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. ENGL 1300 will not substitute for ENGL 1010.
4. Placement testing – Complete a standardized test (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling.
   - Reading comprehension test must show competency of 250 or above or students must complete ENGL 0890: Critical Reading with a grade of B# or better
   - English (writing) test must show readiness to take ENGL 1010: Composition I or students must complete ENGL 1005: College Writing with a grade of C or better. ENGL 1300 will not substitute for ENGL 1010.
5. Prerequisites – Complete the following prerequisite courses with a grade of C or better: – MATH 1179 - Applied Technical Math or MATH 1200 - College Algebra
   May substitute MATH 1175, 1240, 1241, 2077, 2138, 2111, 2141, 2142, 2243. (Highest grade earned in any of these courses will be calculated in the point system.)
6. GPA – Earn a cumulative grade point average of 2.0 or better for all college courses taken.
7. Health Sciences application – Complete and submit performance-based Health Sciences application including a predmission degree evaluation during the open enrollment period. The application and instructions can be found at www.ccri.edu/oes/admissions/index.html.
   a. IMPORTANT: All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into the Opticianry program, the student must attend a mandatory orientation conducted by the Rehabilitative Health Department.
8. Background check – Students are required to submit a background check when directed by notification from Enrollment Services. Final acceptance to the program is dependent on the results of the background check.

Phlebotomy

Certificate in Phlebotomy (CERT_PHLE)

Liston Campus, Providence – Days; Fall and Spring semesters
Liston Campus, Providence – Evenings; Fall semester

Phlebotomists are essential members of the healthcare delivery team who primarily are responsible for collecting blood specimens from patients for laboratory testing. The phlebotomist plays a vital role by obtaining quality specimens that enable the laboratory to deliver meaningful and accurate test results to assist the physician in diagnosis.

The Phlebotomy certificate program is a part-time, two-semester program, offering three classes per year. The program includes lectures and laboratory experiences at CCRI as well as practical training at a clinical site. Instruction is designed to provide both the technical and interpersonal skills required for the competent and professional practice of phlebotomy.

Upon successful completion of this program, graduates are eligible to sit for a national certification examination for phlebotomy given by recognized agencies. Qualified phlebotomists may be employed in hospital laboratories, private laboratories, doctors’ offices, clinics, emergency rooms or blood donor centers.

Phlebotomy students are eligible for financial aid and the Dean’s List.

Technical standards: The physical activity level (strength) level for phlebotomist (079. 36.022) is classified as “light” by the Department of Labor Dictionary of Occupational Titles.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Phlebotomy certificate program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; PHLE should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. **Note:** For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses.
   a. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better. ENGL 1300 will not substitute for ENGL 1010.
4. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See [www.ccri.edu/dean-hrs](http://www.ccri.edu/dean-hrs)) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements.
5. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements

- Maintain at least a grade of C in PHLE I and II.
- Maintain a cumulative GPA of 2.0 or greater.
- Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or professional performance.
- ENGL 1300 may not be substituted for ENGL 1010.
RECOMMENDED COURSE SEQUENCE

- First semester: ENGL 1010; PHLE 1010; MLTC 1960; MEDL 2400
- Second semester: PHLE 1020; MLTC 1170; RESP 2140

Physical Therapist Assistant

Associate in Applied Science Degree in Physical Therapist Assistant (AAS_PHTA)

Occupational Title: Physical Therapist Assistant
Newport County Campus only

The Physical Therapist Assistant program is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE), 1111 North Fairfax St., Alexandria, VA, 22314; accreditation@APTA.org; www.capteonline.org; 703-706-3245.

Physical therapist assistants work under the supervision of a physical therapist utilizing prescribed activities to help patients recover physical function lost through disease, injury or other causes, and to relieve pain and promote healing. Licensed physical therapist assistants work in public or private hospitals, clinics, school systems or other health agencies.

The Physical Therapist Assistant Program is a full-time, day program. It consists of a variety of courses that includes physical therapy theory and practice as well as supporting courses from general education.

Students who successfully complete this program are eligible to take the licensure examination for physical therapist assistants.

Technical standards: The physical activity level for the physical therapist assistant is classified as “medium” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

Minimum requirements to apply to the Physical Therapist Assistant program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; PHTA should be the second choice.

2. **High school transcript** – Send an official copy of the applicant’s high school or GED® transcript, including date of graduation. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.

3. **Placement testing**
   - Must earn English placement test results (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling, must show readiness to take ENGL 1010: Composition I or the applicant must have completed ENGL 1005: College Writing with a grade of "C" or better. ENGL 1300 will not substitute for ENGL 1010.
   - Complete a standardized test (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling. Competency of 250 or above is required for reading comprehension or completion of ENGL 0890L Critical Reading with a grade of “B-” or better.
   - Demonstrate competency at MATH 1025 level or complete MATH 0099 with a C or better. The following courses will substitute for MATH 1025: MATH 1200, 1210, 1139, 1138, 1175, 1240, 1241, 2077, 2138, 2111, 2141, 2142, 2243, 1910, 1920, 2910. (Highest grade earned in any of these courses will be calculated in the point system.)

4. Complete RHAB 1100 - Foundational Kinesiology (recommended) and it may be considered in the performance-based acceptance process.

5. **Complete the following courses** with a grade of B- or better:
   a. BIOL 1010 - Human Anatomy or BIOL 2201 Anatomy and Physiology I
   b. PHTA 1000 - Introduction to the Physical Therapist Assistant
   c. RHAB 1010 - Medical Terminology for Rehabilitation

6. **GPA** – Earn a cumulative grade point average of 2.7 or better for all college courses taken

7. **Health Sciences application** – Complete and submit performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period. The application and instructions can be found at www.ccri.edu/oes/admissions/index.html.
   a. **IMPORTANT:** All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into Physical Therapist Assistant program, the student must attend a mandatory orientation conducted by the Rehabilitative Health Department.

8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services. Final acceptance to the program is dependent on the results of the background check.

Radiography

Associate in Applied Science Degree in Radiography (AAS_XRAY)

Occupational Title: Radiologic Technologist
Flanagan Campus, Lincoln only

The Radiography program offered by the community college is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 2850, Chicago, IL, 60606; 312-704-5300.

This is a 24-month program that begins in June. Students enrolled in the program participate in six semesters of classroom instruction at the college and clinical education at imaging facilities affiliated with the program. Students should apply in February during the open application period for the Health Sciences programs.

Students successfully completing the program are eligible to take the American Registry of Radiologic Technologists examination. Graduates of this program are prepared for entry-level employment as radiographers in hospitals, clinics, and private offices. Radiographers are licensed in the state of Rhode Island.

Technical standards can be accessed through the Radiography program Web page at www.ccri.edu/alliedhealth/radiography.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Radiography program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; XRAY should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/courses. **Note:** For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better
4. **Complete courses required** for admission with a grade of C or better:
   a. ENGL 1010 - Composition I. ENGL 1300 will not substitute for ENGL 1010.
   b. MATH 1200 - College Algebra (MATH 2111 and 2141 also meet this requirement.)
   c. XRAY 1000 - Introduction to Radiography
5. **GPA** – A cumulative grade point average of 2.0 or better for all college courses taken.
6. **Aptitude Examination** – Take the PSB Health Occupations Aptitude Examination administered through Advising and Counseling. The exam may be taken no more than three times. (See psbtests.com.)
7. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See www.ccri.edu/dean-hrs.) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.
8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements

- Students must complete all courses in this program with a cumulative GPA index of 2.0 to qualify for the Associate in Applied Science degree.
• No grade less than C is acceptable in any of the technical courses (XRAY); students receiving less than C will be dismissed from the program.
• Program faculty reserve the right to require withdrawal of any student from the program or to refuse reinstatement based on the student’s academic, clinical or professional performance.

Renal Dialysis Technology

Certificate in Renal Dialysis Technology (CERT_RENL)

Liston Campus, Providence

The Renal Dialysis certificate program is a two-semester program that prepares individuals to work as renal dialysis technicians in outpatient settings. Students receive theoretical and practical preparation. Various aspects of kidney disease and the principles of dialysis are covered. Dialysis modalities, dialysis devices, dialyzer reprocessing and water treatment also are included. A practicum in a dialysis facility provides students, under the supervision of an instructor in the clinical area, the opportunity to experience first-hand the role of a renal dialysis technician. Successful completion of the program qualifies graduates for entry-level employment as a dialysis technician. Students are eligible to sit for the National Nephrology Technician Certification Examination after 18 months of practice in a dialysis unit.

Note: Students must be enrolled in the Renal Dialysis Technology certificate program to register for RENL 1010, 1020, 1030, MLTC 1170 and 1180. Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Renal Dialysis Technology certificate program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; RENL should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. Note: For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses.
   a. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better.
   b. **English (writing) test** must show readiness to take ENGL 1010 - Composition I or students must complete ENGL 1005 - College Writing with a grade of C or better. ENGL 1300 will not substitute for ENGL 1010.
4. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT**: Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See [www.ccri.edu/dean-hrs](http://www.ccri.edu/dean-hrs)) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.
5. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements

- Student must hold current CPR certification (AHA Healthcare Provider Level) prior to RENL 1010.

RECOMMENDED COURSE SEQUENCE

- First semester (Fall): ENGL 1010; MLTC 1170, 1180; RENL 1010
- Second semester (Spring): RENL 1020, 1030

Respiratory Therapy

Associate in Applied Science Degree in Respiratory Therapy (AAS_RESP)

Occupational Title: Respiratory Therapist
Flanagan Campus, Lincoln only
Program accredited by the Commission on Accreditation for Respiratory Care (CoARC), P.O. Box 54876, Hurst, TX, 76054-4876; www.coarc.com; 817-283-2835. Visit www.coarc.com/students/programmatic-outcome-data.aspx for programmatic outcomes data

Respiratory therapy is an allied health profession in which respiratory therapists work under the direction of a physician to evaluate, treat and care for patients with breathing disorders. This two-year program incorporates college classes with clinical practice. Students learn fundamental respiratory care concepts and to perform procedures with attention to critical detail while maintaining aseptic technique and appropriate safety precautions.

The program offers students clinical training in a variety of settings, including neonatology, critical care, pulmonary function, clinic and home care.

Graduates of the Respiratory Therapy program are eligible to sit for the National Board for Respiratory Care (NBRC) Entry Level (CRT) credentialing examination (requirement for state licensing) and the National Board for Respiratory Care (NBRC) Advanced Level (RRT) credentialing examinations.

The mission of the Respiratory Therapy program is to prepare students as registered respiratory therapists

Technical standards: The physical activity (strength) for respiratory therapy (076.361-014) is classified as “medium” by the Department of Labor in the Dictionary of Occupational Titles.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Respiratory Therapy program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; RESP should be the second choice.
2. **High school transcript** – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.
3. **Placement testing** – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/ courses. **Note:** For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses. **Reading comprehension test** must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better.
4. **Complete courses required** for admission with a grade of C+ or better:
   a. ENGL 1010 - Composition I. ENGL 1300 does not substitute.
   b. MATH 1175 - Statistics for the Health & Social Sciences (MATH 1200 and MATH 1025 also meet this requirement)
   c. RESP 1000 - Introduction to Respiratory Therapy
   d. BIOL 1010 - Human Anatomy
   e. CHEM 1010 - Survey of Biomedical Chemistry (CHEM 1180 - Health Science Chemistry I or CHEM 1030 - General Chemistry also meet this requirement.)
5. **GPA** – A grade point average of 2.5 or better for all college courses taken.
6. **Health Sciences application** – Complete and submit a performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See www.ccri.edu/dean-hrs.) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.
7. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements

- Maintain a cumulative GPA of 2.5 or higher
- Obtain at least a grade of C+ in MATH, BIOL, and RESP-coded courses

**RECOMMENDED COURSE SEQUENCE**

**PREADMISSION Requirements**

These courses must be taken prior to program admission.

Sonography Concentrations

Associate in Applied Science Degree in Diagnostic Medical Sonography (AAS_DMSD)

Occupational Title: Diagnostic Medical Sonographer

The Diagnostic Medical Sonography program is accredited by the Commission on Accreditation of Allied Health Education Programs, 25400 US Highway 19 North, Suite 158, Clearwater, FL, 33763; 727-210-2350, upon recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography, 6021 University Blvd., Suite 500, Ellicott City, MD, 21043; 443-973-3251.

Diagnostic medical sonography is a rapidly growing technology used to locate, evaluate and record pertinent anatomical, pathological and functional data to aid the physician in the diagnosis and prevention of disease. The Diagnostic Medical Sonography associate degree program is a 24-month program that begins in September. Students participate in five semesters of classroom instruction at CCRI and associated clinical education facilities to learn a wide variety of imaging techniques.

Students must select a concentration in either general ultrasound, vascular or echocardiography.

For concentration information see:

- General – Society of Diagnostic Medical Sonographers (SDMS)
- Vascular – Society of Vascular Ultrasound (SVU), www.svu.org
- Echocardiography – American Society of Echocardiography (ASE), The American Society of Echocardiography website or contact Paula Cardillo, CCRI DMSD program director, pcardillo@ccri.edu

Students successfully completing the program are eligible to take the American Registry of Diagnostic Medical Sonographers (ARDMS) registry examination. Graduates of this program are prepared for entry-level employment as sonographers (ultrasonographers) in hospitals, clinics, and private offices and/or for transfer to bachelor’s degree programs.

Technical Standards: The physical activity (strength) level for sonographers (078.364.010) is classified as “light” by the Department of Labor in the Dictionary of Occupational Titles

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Diagnostic Medical Sonography program

1. CCRI application – Complete and submit an Application for Enrollment to CCRI. General Studies should be the first choice; DMSD should be the second choice
2. High school transcript – An official copy of a high school or GED® transcript, including date of graduation, must be provided. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded
3. Placement testing – Complete a standardized test (ACCUPLACER) issued by CCRI’s Department of Advising and Counseling. Students may NOT retake the ACCUPLACER test before completing the remedial course/courses. Note: For application purposes, ACCUPLACER testing can be waived for students who provide documentation of a bachelor’s degree or higher. Students are advised that individual departments may still require ACCUPLACER testing as a prerequisite for their courses. Reading comprehension test must show competency of 80 or above or students must complete ENGL 0890 - Critical Reading with a grade of B- or better.
4. Complete courses required for admission with a grade of C or better:
   a. ENGL 1010 - Composition I. ENGL 1300 will not substitute for ENGL 1010.
   b. MATH 1200 - College Algebra. MATH 2111 and MATH 2141 also meet this requirement.
   c. PHYS 1000 - Physical Science. PHYS 1030 also meets this requirement.
5. Complete courses required for admission with a grade of B- or better:
   a. BIOL 1070 - Human Anatomy and Physiology OR BIOL 1010 - Human Anatomy
6. Aptitude Examination – Take the PSB Health Occupations Aptitude Examination administered through Advising and Counseling. The exam may be taken no more than three times. See the Psychological Services Bureau website.
7. GPA – A grade point average of 2.0 or better for all college courses taken.
8. **Health Sciences application** – Complete and submit performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period.
   a. **IMPORTANT:** Submission of a performance-based Health Sciences application does not guarantee acceptance to the program. Acceptance is based on points earned as listed in the program acceptance criteria point system. (See CCRI’s Dean of Health & Rehabilitative Sciences.) At the time of admission, students must meet the current admission requirements. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application and meet the current admission requirements. Once accepted, students must attend a mandatory orientation conducted by the Allied Health Department.

9. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services.

Program Requirements
- The major requirements for this program must be taken in sequence. They are open only to students who are formally accepted into the program.
- Students must complete all courses in the program with a cumulative index of 2.0 to qualify for a certificate.
- **No grade less than a C** is acceptable in any of the technical courses (DMSD). Students receiving less than a C will be dismissed from the program.
- Program faculty reserve the right to require withdrawal of any student from the program or refuse reinstatement based on the student’s academic, clinical or professional performance.

**RECOMMENDED COURSE SEQUENCE - Echo**

**RECOMMENDED COURSE SEQUENCE - General Ultrasound**

**RECOMMENDED COURSE SEQUENCE - Vascular**

**PREADMISSION ALL CONCENTRATIONS.**

Therapeutic Massage

Certificate in Therapeutic Massage (CERT_TMSC)

Newport County Campus, Newport

The Therapeutic Massage program is accredited by the Commission on Massage Therapy Accreditation (COMTA), COMTA 2101 Wilson Blvd., Suite 302, Arlington, Va, 22201; www.comta.org; 202-888-6790.

CCRI's Massage Therapy Certificate Program combines a strong scientific basis for the understanding and application of various soft tissue massage therapy techniques, with high standards in professional development. The intensified evening weekend program is a 655-hour, 34-credit curriculum leading to a Massage Therapy Certificate. Our program is accredited by the Commission on Massage Therapy Accreditation (COMTA). The program emphasizes ethics, clinical assessment, critical thinking, and entrepreneurship. Students are prepared for the Massage and Bodywork Licensing Exam (MBLEx), overseen by the Federation of State Massage Boards, to apply for a license to practice massage in the state of Rhode Island. The program can be completed in 12 months.

CCRI graduates, who are licensed massage therapists, are employed in a variety of settings that include rehabilitation clinics, wellness centers, chiropractic and acupuncture offices, health clubs and spas. Additionally, many of our graduates have opened successful private businesses. CCRI's Therapeutic Massage Program rigorously prepares students to be able to work in hospitals, medical environments and with clients who have compromised health or physical impairments.

Students must be able to perform basic massage techniques and demonstrate the ability to give and receive a therapeutic massage treatment. Student must be at least 18 years old prior to taking TMSG 1000. Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for details.

This certificate program can be applied toward the associate degree in applied science in Therapeutic Massage. Students interested in completing the associate degree program in Therapeutic Massage may continue by enrolling in:

**Fifth semester (Fall):** TMSG 2030, 2040; COMM 1100; PSYC 2010 (online option)

**Sixth semester (Spring):** MATH 1025; PSYC 2030; General Education Elective

Total Additional Credits for Associate Degree: 21

GENERAL POLICIES

See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Therapeutic Massage certificate program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; TMSC should be the second choice.

2. **High school transcript** – An official copy of the applicant’s high school or GED® transcript, including date of graduation or, if the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded

3. **Placement testing** – Complete a standardized test (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling. Competency of 250 or above is required for reading comprehension or completion of ENGL 0890 - Critical Reading with a grade of B- or better

4. **Complete the following courses** with a grade of C or better:
   a. BIOL 2201 - Human Anatomy and Physiology
   b. TMSG 1000 - Introduction to Therapeutic Massage
   c. RHAB 1020 - Fundamentals of Palpation

5. **Age requirement** – Must be 18 years of age or older to register for TMSG 1000 - Introduction to Therapeutic Massage.

6. **GPA** – Earn a cumulative grade point average of 2.0 or better for all college courses taken.

7. **Health Sciences application** – Complete and submit performance-based Health Sciences application including a preadmission degree evaluation during the open enrollment period. The application and instructions can be found at [www.ccri.edu/oes/admissions/index.html](http://www.ccri.edu/oes/admissions/index.html).
   a. **IMPORTANT:** All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. At the time of admission, the student must meet the current admission requirements of the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements. Once accepted into Therapeutic Massage certificate program, the student must attend a mandatory orientation conducted by the Rehabilitative Health Department.
8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services. Final acceptance to the program is dependent on the results of the background check.

**RECOMMENDED COURSE SEQUENCE**

- Preadmission requirements: BIOL 2201; TMSG 1000, RHAB 1020
- First semester (Fall): TMSG 1020, 1040; ENGL 1010; RHAB 1010
- Second semester (Spring): RHAB 1030; TMSG 1030
- Third semester (Summer): TMSG 2010, 2020, 2021

**PREADMISSION General Education Requirement**

This course must be taken prior to program admission.

Therapeutic Massage

Associate in Applied Science Degree in Therapeutic Massage (AAS_TMSG)

Occupational Title: Massage Therapist
Newport County Campus, Newport

The Therapeutic Massage program is accredited by the Commission on Massage Therapy Accreditation (COMTA), COMTA 2101 Wilson Blvd., Suite 302, Arlington, Va, 22201; www.comta.org; 202-888-6790.

The Therapeutic Massage associate degree program offers students a strong scientific background for the understanding and application of various soft tissue techniques to promote health and wellness. Eastern and Western practices will be studied to ensure an education that includes a holistic approach to massage. The program is guided by the Massage Therapy Foundation’s Mission:

The Massage Therapy Foundation advances the knowledge and practice of massage therapy by supporting scientific research, education, and community service.

The Therapeutic Massage Program offered at CCRI is accredited by the Commission on Massage Therapy Accreditation (COMTA), elevating CCRI to COMTA-endorsed curriculum status. The program offered at CCRI’s Newport campus is a modified evening and weekend program with the core courses offered at the Newport location. All of the required general education courses may be taken at other CCRI campuses prior to acceptance into the program. Graduates receive an Associate in Applied Science (A.A.S.) degree after completing a combined 1135 hours and 60 credits of coursework and clinical internship. All internship courses must be completed within 18 months following completion of the academic training.

All graduates are eligible to sit for the state licensing (State licensure requirements vary state to state) and the Board Certification exams. An individual must successfully pass the Massage and Bodywork Licensing Exam (MBLEx), overseen by the Federation of State Massage Boards, to apply for a license to practice massage in the State of Rhode Island. The Board Certification Exam is administered by the National Certification Board of Therapeutic Massage and Bodywork (NCBTMB). The NCBTMB has designated CCRI as an Assigned School, which allows CCRI graduates to sit for an optional exam to become board certified therapeutic massage and bodywork practitioners.

CCRI graduates, who are licensed massage therapists, are employed in a variety of settings that include rehabilitation clinics, wellness centers, chiropractic and acupuncture offices, health clubs and spas. Additionally, many of our graduates have opened successful private businesses. CCRI’s Therapeutic Massage Program rigorously prepares students to be able to work in hospitals, medical environments and with clients who have compromised health or physical impairments.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

GENERAL POLICIES
See important general policies in the beginning of this section on the performance-based Health Sciences application process, academic progress, advanced placement, background check, CPR certification, health insurance, health records, reinstatement, transportation, uniforms, and equipment.

Minimum requirements to apply to the Therapeutic Massage program

1. **CCRI application** – Complete and submit a CCRI Application for Enrollment. General Studies should be the first choice; TMSG should be the second choice.

2. **High school transcript** – Send an official copy of the applicant’s high school or GED® transcript, including date of graduation. If the applicant holds a baccalaureate degree from an accredited college or university, the high school transcript may be waived; a college transcript must indicate completion and degree awarded.

3. **Placement testing**
   – Demonstrate competency at MATH 1025 level by placing into MATH 1420 through the standardized test or completion of MATH 099 with a C or better. The following courses will substitute for MATH 1025: MATH 1200, 1210, 1139, 1138, 1175, 1240, 1241, 2077, 2135, 1560, 1670, 1680, 2111, 2141, 2142, 2243, 1900, 1910, 1920, 2910. (Highest grade earned in any of these courses will be calculated in the point system.
   – Complete a standardized test (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling. Competency of 250 or above is required for reading comprehension or completion of ENGL 0890 - Critical Reading with a grade of B- or better.
   – Must earn English placement test results (ACCUPLACER NEXT GENERATION) issued by CCRI’s Department of Advising and Counseling, must show readiness to take ENGL 1010: Composition I or the applicant must have completed ENGL 1005: College Writing with a grade of “C” or better. ENGL 1300 will not substitute for ENGL 1010.
4. **Complete the following courses** with a grade of C or better:
   a. BIOL 2201 - Human Anatomy and Physiology
   b. TMSG 1000 - Introduction to Therapeutic Massage
   c. RHAB 1010 - Medical Terminology for Rehabilitation
   d. RHAB 1020 - Fundamentals of Palpation
   e. ENGL 1020 - Foundations of Palpation

5. **Age requirement** – Must be 18 years of age or older to register for TMSG 1000 - Introduction to Therapeutic Massage.

6. **GPA** – Earn a cumulative grade point average of 2.0 or better for all college courses taken.

7. **Health Sciences application** – Complete and submit performance-based Health Sciences application including a preadmission degree evaluation. The application and instructions can be found at [www.ccri.edu/oes/admissions/index.html](http://www.ccri.edu/oes/admissions/index.html).
   a. **IMPORTANT:** All the above requirements must be completed satisfactorily BEFORE submission of performance-based Health Sciences application and do not guarantee acceptance to the program. At the time of admission, the student must meet the current admission requirements of the program. Students declining acceptance into the program for the semester offered must resubmit a performance-based Health Sciences application for the program and meet the current admission requirements for the application period in which they reapply. Once accepted into the Therapeutic Massage degree program, the student must attend a mandatory orientation conducted by the Rehabilitative Health Department.

8. **Background check** – Students are required to submit a background check when directed by notification from Enrollment Services. Final acceptance to the program is dependent on the results of the background check.

Hospitality Programs

- Certificate Program Concentrations
  - Hospitality
  - Travel and Tourism

Hospitality Concentration (HOSP)

Certificate in Hospitality (CERT_HOSP)

Knight Campus, Warwick only

Tourism is currently Rhode Island’s second-largest and fastest-growing industry. CCRI’S Travel and Tourism and Hospitality concentrations provide students with the skills and knowledge necessary for successful careers in this growing industry. Graduates are prepared for entry-level positions with airlines, airport operations, car rental companies, conventions and meetings, corporate travel and the cruise and lodging industries. Students have a choice of either a travel and tourism or hospitality concentration. In their last semester, students are given the opportunity to work in a local travel or hospitality environment.

Transfer: All general education, travel, tourism and hospitality courses transfer to Johnson & Wales University for a Travel, Tourism and Hospitality degree.

Students who complete the Hospitality certificate program have two options:

- Enter the travel and tourism industry with marketable skills and training; or
- Continue their education in the CCRI General Studies associate degree program. The General Studies degree program requires 60 credits for completion, 28 of which are elective credits. The Travel, Tourism and Hospitality certificate program requires 33 credits, including three each in math and English, which are also part of the General Studies program. The remaining 28 credits from this program can be used to meet the 28 elective credits for the General Studies degree.

Note: Students may complete the Hospitality certificate program first and then apply all credits toward a General Studies degree or work concurrently in the two programs. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

Human Services

PROGRAMS

• Associate Degree Programs
  • Education Major Concentrations
    • Early Childhood Education and Child Development
    • Education and Special Education
  • Social Service Major Concentrations
    • Gerontology
    • Mental Health
    • Social Work
    • Substance Abuse

• Certificate Program Concentrations
  • Early Childhood Education
  • Gerontology
  • Social Services

The Human Services program prepares students for entry-level positions in a variety of educational and social service professions and for transfer to bachelor’s degree programs at institutions of higher education throughout the country.

The sequence of competency-based courses required for the associate degree combines classroom and fieldwork experience in the areas of child development and family relations, early childhood education, public school education, child and adult services for special needs populations, social work, gerontology, mental health and substance abuse. All students complete three internships in a school, agency or program setting in their chosen concentration. Each concentration provides 50 to 90 hours of field experience and a corresponding seminar for educational and clinical supervision. This provides students with a well-integrated balance of theory and practice for personal and professional development.

Graduates of the Human Services program perform a variety of educational, therapeutic, supportive and direct service functions for diverse individuals of all ages with educational, emotional, social, developmental and physical needs.

Graduate Options
Human Services program graduates have three options:

OPTION 1: Enter employment directly upon graduation. Students often are offered a position in the school or agency where they have completed their internship.

OPTION 2: Transfer to a four-year college. Human Services faculty are readily available to assist with CCRI course selection that will prepare students for transfer.

OPTION 3: Enter the workforce while working toward completion of a bachelor’s degree. This is one of the most common options selected by CCRI graduates.

Early Childhood Education Concentration

Certificate in Human Services (AA_HMNS)

The certificate in Early Childhood Education is for the working student who wishes to improve or upgrade his/her knowledge and skills in early childhood development and childcare. Courses are offered days and evenings and all courses directly apply toward the department’s A.A. degree.

The Early Childhood Certificate is not a teaching credential for the R.I. Department of Education.

Note: All courses must be completed with a C or better. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

• First semester: HMNS 1010, 1080, 2100, 2150
• Second semester: HMNS 1210, 2120, 2070, and one of the following three courses must be taken: HMNS 2030, 2140 OR 2190

Early Childhood Education and Child Development Concentration (CHLD)

Associate in Arts Degree in Education (AA_EDUC)

Child development and early childhood education majors are trained to work with families, parents, young children and those who impact the development and well being of children. Child development associates may be employed in a variety of educational and social settings including child care facilities, Head Start programs, preschools, public schools, group homes and residential care facilities. Child development associates are nationally recognized and have an ample number of bachelor’s degree programs within close proximity to further their education beyond the associate degree. Three field placements provide students with critical opportunities for competency-based professional development.

The Early Childhood Education and Child Development concentration is fully accredited through the National Association for the Education of Young Children.

Students who plan to transfer to a four-year college for early childhood education are required to meet with a Human Services faculty adviser during their first semester to map out their program of study. Students who have completed their CDA-Child Development Associate are required to meet with a Human Services faculty adviser to apply for prior learning assessment credits toward their degree.

**Note:** Students enrolled in the Human Services program must earn a grade of C or better in all Human Services courses. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Community College of Rhode Island

Education/Special Education Concentration (ESPE)

Associate in Arts Degree in Education (AA_EDUC)

Students training in the education and special needs concentrations are qualified for employment in a variety of education and social service settings. These may include teacher assistant positions in kindergarten, public and special education classrooms, early intervention centers, residential group homes, hospitals and community day programs. In all of these settings, teacher assistants and aides provide direct support to children and adults, helping them to reach their maximum physical, emotional, educational and vocational potential. Three internships provide students with critical opportunities for supervised guidance as to best practices for working with able-bodied, as well as special needs, individuals and groups.

Note: Students enrolled in the Human Services program must earn a grade of C or better in all Human Services courses. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Gerontology Concentration (GERN)

Certificate in Human Services (CERT_HMNS)

The certificate in Gerontology is for students who may be currently employed or interested in working with the aging or elderly populations. The program introduces students to the profession of Human Services with a focus in Gerontology. The Gerontology Certificate is designed to assist students in learning and improving skill sets in geriatric care services and developing an awareness of multidisciplinary supports necessary to care for aging and elderly individuals. Courses are offered days and evenings.

Note: All courses must be completed with a grade of C or better. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Social Service Majors

Gerontology (GERN), Mental Health (MNTL), Social Work (SOWK), and Substance Abuse (SUBS)

Associate in Arts Degree in Social Services (AA_SOSC)

Gerontology
Gerontology workers perform a wide variety of functions in the field of elder care. They are employed by nursing homes, adult day care centers, senior centers and some hospitals. Gerontology workers are trained to assist elder clients with daily living, physical care, recreation and supportive companionship.

Mental Health
Mental health workers are trained to assist people who have mild to severe emotional problems and mental illnesses. They may find employment in group homes, hospitals, mental health agencies, community centers and assisted living programs designed to help clients of all ages achieve functional independence to their maximum capacity. They may function as advocates, intake interviewers, case aides, home visitors, program coordinators and counselors to children. Three internships are an integral part of each student’s professional preparation program.

Social Work
Social work students are provided with foundation courses that prepare them to be social service providers in a wide variety of agency program and community settings with clients of all ages. From advocacy and social activism to therapeutic assistance to children and families, social workers impact all phases of a client’s life. Three internships are an integral part of each student’s program of study and there are a variety of B.S.W. and M.S.W. programs available in Rhode Island for advanced study.

Substance Abuse
Substance abuse workers are trained in clinical skills that prepare them for employment in prevention, early intervention and rehabilitative treatment programs with adolescents and adults at risk or suffering with addictive and compulsive disorders. Three internships are an integral part of each student’s professional preparation and CCRI courses are a firm foundation for Rhode Island’s licensure credential. Rhode Island College (RIC) offers a B.A. in Addiction Studies and the Drug and Alcohol Treatment Association of Rhode Island (DATA) provides training for the Certification of Chemical Dependency Prevention Professionals in Rhode Island.

Transfer Information
The Human Services program at CCRI has a solid articulation transfer agreement with the School of Social Work at RIC that provides full transfer of all courses completed for the social work major toward the B.S.W. Students must follow the new transfer guide or obtain copies from their Human Services faculty advisers.

Note: Students enrolled in the Human Services program must earn a grade of C or better in all Human Services courses. Students should consider transfer requirements when selecting math and science courses.

Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Social Services Concentration (CSOS)

Certificate in Human Services (CERT_HMNS)

The certificate in Social Services is for students who may either already be employed or interested in social services. It is a brief program (five courses) that introduces the field of social services and equips students with the necessary skills to enter the field. Courses are offered days and evenings and all courses directly apply toward the department’s A.A. degree.

Note: All courses must be completed with a C or better. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

RECOMMENDED COURSE SEQUENCE

- First semester: HMNS 1010, 2200
- Second semester: HMNS 1040, 1200, 2130

Law Enforcement and Legal Studies

PROGRAMS

- Associate Degree Program Concentrations
  - Law Enforcement
  - Paralegal Studies

CCRI’s Criminal Justice and Legal Studies Department offers the associate in science degree in Legal Studies with two concentrations – Law Enforcement and Paralegal Studies. Law Enforcement majors must take a capstone course to complete the requirements to graduate. Graduation requirements for students in the Paralegal Studies concentration include completing a portfolio of their classwork.

The Law classes are open to all students in the major and are available for students in Business Administration, Professional Studies and all Liberal Arts programs as well.

Law Enforcement Concentration (LENF)

Associate in Science Degree in Legal Studies (AS_LGAL)

The Community College of Rhode Island offers a degree program for individuals interested in a career in law enforcement and for those currently working in the field. The program is designed to provide students with a background in academic courses as well as specialized training.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for detail.

Paralegal Studies Concentration (PALG)

Associate in Science Degree in Legal Studies (AS_LGAL)

The Community College of Rhode Island offers a degree program for individuals interested in a career as a legal assistant. Graduates of the program have the option of entering the workforce as a trained paralegal or continuing their education by transferring to a college offering a bachelor’s degree program in paralegal studies.

**Paralegal portfolio requirement:** For students enrolling in the Paralegal major, the completion of a portfolio of their coursework will be required near the end of their course of study. Students will prepare the portfolio as part of either LAWS 2020 or 2090, whichever one of these two courses they take last.

Details on what must be included in the portfolio can be found on the department’s website.

**Note:** Many courses require prerequisites, corequisites and/or testing. See course descriptions at the back of the catalog for detail.

Total Major Education Requirements Credits 40

Total Program Credits 62
Liberal Arts (LIBA)

Associate in Arts Degree in Liberal Arts (AS_LIBA)

The Liberal Arts program provides the first two years of a traditional liberal arts curriculum. Most CCRI students who enroll in this program plan to transfer to a four-year college or university in pursuit of a bachelor’s degree.

The Liberal Arts program offers students the opportunity to acquire a perspective on world cultures and language while developing essential skills in critical reading, organization, effective writing, analysis and research. Students who successfully complete this program and/or a Liberal Arts concentration receive an Associate in Arts (A.A.) degree.

Students may concentrate in English, foreign languages, or liberal arts. All Liberal Arts students must complete six sequential credits of foreign language under the general education requirements. Liberal Arts students who wish to pursue a Liberal Arts degree with a concentration in foreign languages are required to take an additional six sequential credits of the same language at the Intermediate 1 and 2 levels (2010 and 2020) or Advanced 1 and 2 levels (2210 and 2220) as well as complete three credits in a second foreign language at the elementary level or above. See the following pages for concentration requirements.

Note: Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

<tbody>
<tr>
<td>ENGL 1010</td>
<td>Composition I</td>
<td>English – Placement test required. Those required to take ENGL 1005 will then have to take ENGL 1010. ENGL 1005 may be used as an elective credit.</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 2015</td>
<td>Advanced Writing for the Liberal Arts</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

### Literature

Recommended that Liberal Arts candidates take two literature courses. See this page for a complete list of courses that fulfill the LITR attribute.

### Math

Math requirements may be fulfilled by any sequence of math courses EXCEPT MATH 0099, 0100, 0101, 1025, 1005 and 1015 which CANNOT be used to fulfill math requirements.

| MATH 1139 1145 OR MATH 1139 1138 OR MATH 1139 1155 OR MATH 1139 1175 | | | 6 |

### Science

Take two courses from the following: ASTR 1010, 1020; BIOL 1001, 1002, 1005, 1010, 1020, 1060; CHEM 1000, 1010, 1030, 1100; GEOL 1010, 1020; OCEN 1010 1030 (both required); PHYS 1000, 1030, 1040

### HIST Social Science

Select six sequential credits in history (e.g. HIST 1010 and 1020 or HIST 1210 and 1220) three credits in: Sociology, Economics, Psychology, Political Science, History, Geography

### Foreign Language

Select two sequential foreign language courses at least one course from: Art, Music, Drama.

Foreign Language/Fine Arts – Basic spoken and specialized introductory foreign language courses do not fulfill or substitute for required foreign language credits at the elementary level as they fulfill elective credit. A student may begin a new language or continue a language started in secondary school. Students should consult the Foreign Language department chair to be sure they choose the correct course level. Intermediate foreign language courses 2010–2020 will normally satisfy the language requirements of transfer institutions that require six credits of language at the intermediate level.

### Electives

Electives vary based on concentration choice. Select courses from any instructional program.

### Total Major Requirements Credits

60

### Total Program Credits

60
**Liberal Arts Concentrations**

**English or Foreign Languages**

Students may complete the degree program as described previously or may select an area of study in which to concentrate. Concentrations require the study of five three-credit courses (15 credit hours) in the selected discipline. Additional required or recommended courses are selected from among the electives offered as part of the Liberal Arts program. These concentrations emphasize coursework typically required in the freshman and sophomore years of bachelor’s degree programs. Students interested in pursuing a Liberal Arts concentration should contact the appropriate academic department about transfer and career opportunities.

**RECOMMENDED COURSE SEQUENCE - English Concentration**

**RECOMMENDED COURSE SEQUENCE - World Languages Concentration**

**English Concentration (LAEN)**

Associate in Arts Degree in Liberal Arts (AS_LIBA)

The English concentration prepares a student for advanced study at the baccalaureate level as an English major or as a second major. It provides an exceptional foundation in the development of writing, critical thinking, critical reading, oral communication and literature analysis. This is an excellent program for those pursuing a career in educational institutions, writing, business and industry, film studies, art, communications, law, advertising, sports communications, journalism or library work.

To declare an English concentration, students should contact the English Department at 401-825-2262.

**Required Courses**

**Students concentrating in English should take the following courses:** Any pair of courses (6 credits) from below. Pairs of courses should be taken sequentially.

**English Concentration Requirements**

3 additional ENGL courses

**Three courses (9 credits):** Students must take three additional transferable courses selected from above

OR ENGL 1200, 1210, 1220, 1230, 1240, 1250, 1260, 1270, 1280, 1290, 1360, 1370, 1430, 2200, 2210, 2220, 2230, 2250, 2270.

Check with the English concentration coordinator in the English Department. Some courses transfer as electives while others transfer as English courses.

Total English Concentration Requirements Credits: 18

**World Languages Concentration (LAFL)**

Associate in Arts Degree in Liberal Arts (AS_LIBA)

The World Languages concentration prepares students for advanced study at the bachelor’s degree level and provides an excellent foundation in the foreign languages.
Community College of Rhode Island

Required Courses

All Liberal Arts students must complete six sequential credits of foreign language under the general education requirements. Liberal Arts students who wish to pursue a Liberal Arts degree with a concentration in foreign languages are required to take an additional six sequential credits of the same language at the Intermediate 1 and 2 levels (2010 and 2020) or Advanced 1 and 2 levels (2210 and 2220) as well as complete three credits in a second foreign language at the elementary level or above.

A student beginning language studies at CCRI or who has experience below the intermediate college level should select 1010 OR 1030, 1020 OR 1040, 2010, 2020 and an elementary level course (1010, 1030, 1020 or 1040) in a language different from the language of the student’s concentration.

Students who are continuing to study a language from high school should select 2010, 2020, 2210, 2220 and an elementary level course (1010, 1030, 1020 or 1040) in a language different from the language of the student’s concentration.

Additional courses recommended but not required as electives — HIST 1010, 1020; ARTS 1510, 1520
Science

Associate In Science Degree (AS_SCID)

This degree program is intended for individuals who wish to pursue a career in science or a related field. Such fields include, but are not limited to, astronomy, biochemistry, biology, biophysics, biotechnology, chemistry, environmental geology, environmental science, forensics, forestry, geochemistry, geology, geophysics, home economics, marine biology, meteorology, mortuary science, nutrition (or dietetics), oceanography, optometry, pharmacy, physical education, physics or plant science. This program also is intended for those who wish to pursue medical, dental or veterinary degrees.

Note: A minimum of a bachelor’s degree is usually required of individuals planning to work in science or a related area. Therefore, students should take the CCRI Associate in Science degree program with the expectation of transferring to a four-year college or university. The choice of which elective credits to select should be made in consultation with an advisor from one of the science departments in accordance with the transfer requirements of the four-year school. Many courses require prerequisites, corequisites and/or testing. See course descriptions for details.

Students should consult the transfer requirements of their intended school of transfer.

Admission Requirements
To be admitted to this program, applicants must have a minimum level of math preparation in order to take and successfully complete MATH 1200 (College Algebra) in the first semester.

RECOMMENDED COURSE SEQUENCE
- First semester: ENGL 1010; MATH 2111 OR above; Social Science Elective; 2 CHEM, BIOL AND/OR PHYS courses
- Second semester: Literature Elective; MATH 1220 OR MATH 1240; Humanities, Math/Science OR Social Science Elective; 2 CHEM, BIOL AND/OR PHYS courses
- Third semester: COMM 1100; Science courses
- Fourth semester: Science courses; BIOL, CHEM, PHYS OR MATH

<td></td>
<td>Take 9 to 13 credits. All students are encouraged to consult the requirements of the intended transfer school to find out which electives will best suit their transfer needs.</td>
<td>9</td>
</tr>
</tbody>
</table>

Total Electives Credits: **9**

Total Minimum Required Program Credits: **60**

**IMPORTANT:**

Select two pairs of sequential courses from the top three in the list above (BIOL, CHEM or PHYS) for a total of 16 to 18 credits. If you select CHEM 1030, contact the Chemistry Department for information regarding a placement exam (to be taken prior to enrolling).

**BIOTECHNOLOGY TRANSITION OPTION**

Biotechnology credits can be used toward the completion of the Science track leading to an Associate in Science (A.S.) degree. The four-credit Cell Biology for Technology (BIOL 1000) is one of the suggested science courses. Eight of the Biotechnology certificate program credits (BIOL 1300, 1310 and 2480) would count as science credits and the remaining six credits could be used as elective credits. See the Biotechnology certificate program for more information.
Technical Studies

Associate In Applied Science In Technical Studies (A.A.S.-T.S.) Degree

The Associate in Applied Science degree in Technical Studies (A.A.S.-T.S.) is designed for students who want to take technical and general courses for college credit to meet the training or retraining demands of current or prospective employers. This interdisciplinary degree program enables individual students or groups of employees associated with one employer to tailor technical programs to their own specific needs. Courses are selected on the basis of a student's interests, goals and abilities. Each student's program is individually designed. As the two examples on this page point out, the A.A.S.-T.S. degree is designed to be flexible and interdisciplinary. Because of the variety offered in this degree program, the number of credits required for graduation could vary from 60 to 66.

Anyone interested in earning an A.A.S.-T.S. degree should speak with an admissions officer. Qualified students are referred to the Dean of Business, Science, Technology, and Math to assess prior learning experiences. Procedures for the assessment of prior learning are outlined in the Academic Information section of this catalog and on www.ccri.edu/priorlearning/. If qualified, a learning contract outlining course requirements leading to the A.A.S.-T.S. degree is developed.

Note: The learning contract is an official document filed in the student's permanent record. It can be changed only with the written approval of the Dean of Business, Science, Technology, and Math. Any approved changes in a student's program become part of the learning contract.

In general, the program is divided into three parts.

Credit for Prior Learning (not more than 20 credits)

Any occupational or technical training for which prior learning credit is sought must be relevant to a student's education and career goals. This includes apprenticeship, union activities, military training, etc. Awarded credit is based on:

- Assessment of individual portfolios and records. See Credit for Prior Learning in the Academic Information section of this catalog.
- Work completed in evaluated apprenticeship programs and accepted by the appropriate academic teaching departments.
- Other sources, such as CLEP, military schools or industrial schools.

Technical and Related Courses

A student will take 20 credits in technical and related courses. If he or she has insufficient prior experience to receive an award of the full 20 credits of prior learning experience, the student will take additional technical and related courses so that the degree equals no less than 60 credits.

General Education

At least 20 general education credits must be taken. See this page for a complete listing of courses that meet these requirements.

Technical Studies EXAMPLES ONLY

See this page for specific requirements.

EXAMPLE 1

In this example, an individual completes an evaluated apprenticeship program to be an electrician, has an interest in system modeling, automation, digital systems or networking. This individual wants to stay local. A program that might give this individual mobility within the job market might look like the one below. This schedule is meant as an example only.

# Course Descriptions

## ACCT (Accounting)

### ACCT 1010 - Financial Accounting  
(4 Credits)
This course presents the objectives and basic procedures of accounting for a business organized as a corporation. Topics covered include the accounting cycle for service and merchandising firms, accounting for short-term liquid assets, inventories, long-term assets and current liabilities. Lecture: 5 hours.

### ACCT 1020 - Managerial Accounting  
(4 Credits)
This course covers the use of accounting data by an organization's management. Topics include the statement of cash flows, financial statement analysis, an introduction to manufacturing accounting concepts, cost-volume-profit analysis, budgeting, capital expenditure decisions, just-in-time and activity-based costing concepts. (Prerequisite: ACCT 1010) Lecture: 5 hours.

### ACCT 1030 - Computerized Accounting  
(3 Credits)
The course integrates the processing of accounting information with the use of a commercial general ledger software package. An initial presentation of the software is included to develop a specific understanding of menus and navigation techniques. Discussion focuses on setup, maintenance, information entry and report generation. Specific topics of the accounting cycle are presented including journal transactions, accounts receivable, accounts payable, inventory, payroll, financial statements and special projects. NOTE: May be taken concurrently with ACCT 1020. (Prerequisite: ACCT 1010) Lecture: 1.5 hours, Lab: 1.5 hours - Lab Fee: $20

### ACCT 1500 - Personal Income Taxes  
(3 Credits)
This course provides an overview of the tax problems confronting individuals on the federal level. Tax situations involving incomes, exemptions, deductions and capital gains and losses are undertaken and the pertinent tax forms are discussed. Lecture: 3 hours

### ACCT 2010 - Intermediate Accounting I  
(4 Credits)
This course involves advanced work on concepts and principles of accounting. Topics include financial statements, cash, temporary investments, receivables and inventories. (Prerequisite: ACCT 1020) Lecture: 5 hours.

### ACCT 2020 - Intermediate Accounting II  
(4 Credits)
A continuation of ACCT 2010, this course covers the study of the more advanced phases of analysis of financial statements, investments and fixed assets; depreciation and depletion; intangible assets; current and long-term liabilities and stockholders' equity. (Prerequisite: ACCT 2010) Lecture: 5 hours.

## ADAS (Administrative Assistant)

### ADAS 2510 - Microsoft Office Applications II  
(3 Credits)
This course will provide students with further training on Microsoft Office applications that include advanced Word and intermediate Excel using a hands-on approach. In addition, students will continue to develop their keyboarding skills and accuracy. A keyboarding speed range of 30 to 55 wpm is required for this course. Prerequisite: OFTD 1220 or permission of instructor Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

### ADAS 2520 - Office Transcription II  
(2 Credits)
This course continues to develop proficiency in transcribing from tapes to mailable copy. It is designed to further refine and integrate office skills and applications. Emphasis is on the advanced application of language art skills in the production of written communications. Prerequisite: OFTD 1170 and 1280 or permission of instructor Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20
ADAS 2530 - Office Technology & Procedures II
(3 Credits)
This capstone course enables students to integrate the skills previously learned in the program via a career-related office simulation. Students continue to learn Outlook as well as gaining knowledge of planning meetings and conferences. In addition, students research business data and learn about parliamentary procedures. Emphasis is placed on the development and exercise of decision-making ability and human relations skills. Prerequisite: OFTD 1140 Lecture: 3 hours

ADAS 2570 - Administrative Office Management
(3 Credits)
This course deals with the strategies and issues related to effective supervision of employees who work in an office environment. The relationship between office productivity and management activities such as planning, scheduling, organizing, implementing, evaluating and controlling is examined. Lecture: 3 hours

ADAS 2580 - Office Administration Cooperative Education I
(3 Credits)
This is a planned and supervised cooperative work experience that provides students with an opportunity to observe and participate in a work environment related to their academic interests. Students attend class on campus during weeks one through five then work approximately 13 hours a week in an approved Cooperative Work Experience Placement during weeks six through 15. (Prerequisites: Enrollment in Office Administration program and completion of 24 credits in that program, and 2.0 GPA or permission of instructor) Lecture 25 hours total, CO-OP: 130 hours total

ADAS 2610 - Microsoft Office Applications III
(3 Credits)
This course continues to develop Microsoft Office skills in the areas of Access, Excel and PowerPoint. Students will continue to develop their keyboarding speed and accuracy. A keyboarding range of 35 to 60 wpm is required for this course. (Prerequisite: OFTD 1220) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

ARAB (Arabic)

ARAB 1000 - Basic Spoken Arabic
(3 Credits)
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

ARTS (Art)

ARTS (ART)
This listing of Art courses includes new course numbers and descriptions. Students should review course listings carefully and consult with academic advisers or Art Department faculty to ensure proper course sequence and avoid duplication of course credits.

Art course numbers:
ARTS 1001 through ARTS 1009 are introductory level courses and are open to all students. These courses offer fine arts elective credit for non-art students and liberal arts elective credit for Art majors.

ARTS 1010 through ARTS 1599 are basic foundation level courses and are open to all students. These courses are either required or recommended for Art majors and are strongly recommended for Liberal Arts or General Studies program majors.

ARTS 1600 through ARTS 1999 are open to all students and provide basic study in a variety of art disciplines. Previous study in a foundation level course may be recommended but not required. Other prerequisites may apply.

Courses numbered ARTS 2000 and above are designed for continued work after basic studies have been completed. More than one prerequisite may be required.
### ARTS 1001 - Introduction to Visual Arts
(3 Credits)
This course is an introduction to the basic principles of analyzing and understanding the visual arts. Vocabulary, techniques and a brief history of art are covered with slide lectures, reading and discussion, studio art/design assignments and gallery visits. (Note: Visual Arts elective credit for non-art majors and liberal arts elective credit for art majors) Lecture/studio: 4 hours

### ARTS 1010 - Drawing I
(3 Credits)
This course covers basic drawing processes and techniques. Fundamental skills are developed through a variety of approaches from short exercises to longer compositional studies. Emphasis is on drawing from observation including the depiction of form, light, and space. Studio: 6 hours - Art Studio Fee: $50

### ARTS 1020 - Color
(3 Credits)
The course is an introduction to the basic principles and theories of color. Students develop an understanding of fundamental color concepts as they apply to all areas of the visual arts. Color properties and relationships are explored and utilized through studio projects. Classes include, lectures, demonstrations, studio assignments, and critiques. (Prerequisite: NONE although ARTS 1010 or ARTS 1310 is recommended). Studio: 6 hours - Art Studio Fee: $50

### ARTS 1030 - Introduction to Printmaking
(3 Credits)
Introduction to Printmaking is a studio course in basic printmaking skills with equal focus on concept and technique. Students experiment with a variety of printmaking processes including collagraph, intaglio, litho, transfer, and monotype, providing the opportunity to work with a range of printmaking methods and materials. This course will examine the language of printmaking as a unique art form and establish a basis for further work in the medium. Using a variety of approaches, in both black and white and color, students will explore ways they may develop their individual vision through the creation of original prints. (Prerequisite: NONE although ARTS 1010 or ARTS 1310 is recommended). Studio: 6 hours - Art Studio Fee: $50

### ARTS 1035 - Relief Printmaking/Graphic Illustration
(3 Credits)
This course introduces students to relief printing processes as used by a range of including printmakers, designers, illustrators and book artists. The course covers woodcut, linocut and photosensitive plates using hand drawn and digitally produced transparencies. Students learn to use hand tools, printmaking presses and exposure equipment to create, ink, and print their images. Through examples demonstrations and studio-based assignments, students are introduced to the history and vocabulary of relief printmaking. We will experiment with relief printmaking as a method of visual communication, including visual storytelling and narrative, addressing a broad range of ideas, issues and aesthetics to create a portfolio of printed work. No prior printing experience is necessary. Course Completes the Following Requirement(s): FINE: Fine Arts and HUMN: Humanities Requirement - Lab Fee: $20

### ARTS 1050 - Drawing II Life Drawing
(3 Credits)
This course offers an introduction to the study of the human figure and its relationship to the environment. Students draw from both nude models and skeletons. (Prerequisite: ARTS 1010). Studio: 6 hours - Art Studio Fee: $50

### ARTS 1310 - Two-Dimensional Design
(3 Credits)
This studio course introduces students to the elements, principles and construction methods used in making art and design in three dimensions. Using simple materials such as wire, cardboard, Foam-core and plaster, students learn to organize forms in space. The elements of three-dimensional design, including line, plane, volume and mass; and the principles of three-dimensional design, including repetition, variety, rhythm, balance,
emphasis and economy, will be studied and used in the making of studio projects. Classes include lectures, demonstrations, studio assignments and critiques. Studio: 6 hours - Art Studio Fee: $50

**ARTS 1420 - 4D Animation and Design**  
(3 Credits)  
This course examines the basic elements of art and design in space and time. Students are introduced to artists working with 4D and New Media Arts to explore their own ideas, spaces and time-based techniques while developing critical thinking in relation to subject, medium, form and content and how all of these can create or effect meaning in 4D art. Students will create works of art using time based techniques such as time lapse, basic cell animation, stop motion, go motion, basic green screen, and sound. Studio: 6 hours - Art Studio Fee: $50

**ARTS 1500 - Art Seminar**  
(3 Credits)  
Required of all AFA graduates, Fine Art Seminar is a keystone course which prepares students to set and pursue goals, such as: transfer to a four-year art program, or to explore careers in the fields of art and design. Seminar topics include: portfolio preparation, resume development, art school selection, photographing of artwork and exhibition construction. Students will participate in a professionally designed group exhibition which will be held at least once a year in the college’s galleries. (Prerequisites: at least 2 studio courses and 1 art history course or permission of the instructor. Recommended: This class should be taken during the 3rd semester of the student's program of studies.) Lecture/Studio: 3 hours

**ARTS 1510 - Art History: Ancient to Medieval**  
(3 Credits)  
This course is a survey of visual art from prehistory through Gothic Europe. Emphasis is placed on how art, architecture and functional objects provide evidence of the religious beliefs and cultural structures of early civilizations. Regions covered include Egypt, the Near East and Europe. Lecture: 3 hours

**ARTS 1520 - Art History: Renaissance to Modern**  
(3 Credits)  
This course is a survey of visual art and architecture from the Renaissance through the 20th century, focused primarily upon European and American study. The manner in which art both reflects and shapes history is a central means of exploration, leading to the complexities of art in the Post-Modern period. (Recommended: ARTS 1510 ) Lecture: 3 hours

**ARTS 1530 - Art History: Africa, Asia, Oceania and the Americas**  
(3 Credits)  
This course introduces artistic traditions of people in in Africa, Asia, Oceania, and the Americas and explores how examples drawn from historical and contemporary sources convey expressive meaning, relate to religion and philosophy, and reflect historical, political, and economic conditions. Rather than attempt to gain a comprehensive knowledge of a single region or culture, specific topics of inquiry provide insights about how material choices, forms and designs communicate knowledge related to spiritual beliefs and cultural traditions. Through readings and research, the course examines both Western and local/indigenous perspectives related to art around the globe. Lecture: 3 hours

**ARTS 1550 - Art History: Modern through Contemporary**  
(3 Credits)  
This course identifies and analyzes art after 1945 in the U.S. and prominent art centers internationally. Emphasis is placed on artists’ philosophies, art media and processes, and the role of art in society, politics and culture. Major movements in Modernism, Post-Modernism and Contemporary are addressed. Topics are presented through reading, lecture, discussion, writing, video, and museum/gallery visits. Lecture: 3 hours, Lab 1 hour

**ARTS 1610 - Textile Design/Fibers**  
(3 Credits)  
This course is designed to introduce students to a variety of dyeing and surface design techniques on fabric, with an emphasis on learning the elements and principles of two-dimensional design. Techniques may include shibori tie-dye, batik wax-resist, paste-resist, block printing and photo transfer. Traditional and contemporary examples of these processes are presented and good craftsmanship is emphasized. (Recommended: ARTS 1010 or 1020 or 1310). Studio: 6 hours - Art Studio Fee: $50

**ARTS 1630 - Introduction to Sculpture and Form**  
(3 Credits)  
Concept development and structural problem-solving are emphasized in this study of sculpture and three-dimensional form. Studio assignments evolve out of an examination of historical and contemporary examples of sculpture, architecture, design and engineering, as well as forms found in
the natural world. Classes include demonstrations, studio assignments, critiques and lectures. (Recommended: ARTS 1410). Studio: 6 hours - Art Studio Fee: $50

</thead>
<tbody>
<tr>
<td>ARTS 1650</td>
<td>Ceramics I</td>
<td>3</td>
<td>This course acts as an introduction to fine art ceramics. Coil, slab and other basic hand building methods as well as glazing and various kiln firing methods are covered. Kiln and basic glazes are provided; clay and tools must be purchased. (Recommended: ARTS 1410). Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1660</td>
<td>Ceramics II</td>
<td>3</td>
<td>This is a continuation of fine arts ceramics using advanced hand-building techniques. Wheel throwing, glaze formulation, kiln management and alternative firing methods are introduced. Kiln and basic glazes are provided; clay and tools must be purchased. (Prerequisite: ARTS 1650 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1710</td>
<td>Graphic Design I</td>
<td>3</td>
<td>This course provides an introduction to the basic principles of graphic design and visual communication. Graphic representation and typographic fundamentals are explored with electronic and traditional media, tools, skills and methodology. A history of graphic communication is presented through example and slide presentation. (Prerequisite: none, although ARTS 1310 is recommended). Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1720</td>
<td>Graphic Design II</td>
<td>3</td>
<td>This course continues coverage of concepts introduced in Graphic Design I. Focus is on creative image making and typographic development in a variety of visual formats. Projects provide experience with elements of print and/or digital publication design, logo design, poster design and the design of visual systems. (Prerequisite: ARTS 1710 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1810</td>
<td>Darkroom Photography I</td>
<td>3</td>
<td>This course emphasizes the creative and expressive aspects of form and content of traditional black and white photography using light sensitive materials. Course covers principles of exposure using cameras, film, and paper to make photographic images. Darkroom printing, alternative cameras and processes will also be included. Students provide or borrow a 35 mm SLR film camera with manual exposure controls. Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1820</td>
<td>Darkroom Photography II</td>
<td>3</td>
<td>Practice and refinement of basic black and white photographic techniques and introduction to advanced material. The history, styles and critical theory of photography are presented. Students create visually and conceptually unified portfolios focusing on presentation, sequencing and multiple images. (Prerequisite: ARTS 1810 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1840</td>
<td>Digital Art I</td>
<td>3</td>
<td>This course explores creative and technical issues related to computer-based image making as an effective means of artistic expression. While students apply the fundamentals using the latest industry-standard digital photo editing software, they also acquire both the manual and conceptual skills associated with creativity in the digital realm. Projects provide experience with image manipulation, montage, color corrections, retouching, and layout and design of individual artist's projects. Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ARTS 1845</td>
<td>Video Art</td>
<td>3</td>
<td>This course is an introduction to the use of video as a form of artistic expression and visual communication. Students learn about structure, form, rhythm and pace. Emphasis is placed on image and sound manipulation, editing and theory, as they relate to capturing video and audio, and finalizing content for DVD or web. Complete and short form projects are produced that explore the relationship of subject, form and content in the creation of meaning. Works by video artists are viewed and discussed. Studio: 6 hours - Art Studio Fee: $50</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ARTS 1850 - Digital Photography I  
(3 Credits)  
This course is an introduction to the technique of digital photography and its use as a form of artistic expression and visual communication. Course covers principles of image creation using digital cameras, image correction and manipulation with industry standard software, and inkjet printers to make photographic prints. Students provide or borrow a digital camera, which must have manual, program, aperture and shutter priority exposure modes. Studio: 6 hours - Art Studio Fee: $50

ARTS 2010 - Painting I  
(3 Credits)  
This course offers an introduction to the painting process through an investigation of theories, materials and techniques. Historical and contemporary aesthetic issues are explored through studio assignments, slide lectures, discussions, critiques, and museum and gallery visits. (Prerequisite: ARTS 1010 or ARTS 1020). Studio: 6 hours - Art Studio Fee: $50

ARTS 2020 - Painting II  
(3 Credits)  
A continuation of Painting I, this course encourages further development of personal artistic expression with emphasis on aesthetic and critical theory. Lectures, discussions, studio assignments, critiques, and museum and gallery visits are included. (Prerequisite: ARTS 2010 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50

ARTS 2050 - Drawing III - Life Drawing  
(3 Credits)  
A continuation of Drawing II, this course emphasizes excellence in drawing, design and color in exploring relationships between the human figure and the environment. Studio: 6 hours - Art Studio Fee: $50

ARTS 2130 - Art Studio Seminar  
(3 Credits)  
This seminar course is for any student who wants to do advanced work in any studio area. The most advanced course offered by that particular studio area must have been successfully completed or taken concurrently. Seminar work involves independent Projects and research done under the guidance of an Art Department faculty advisor. Before signing up for Seminar, students must choose a faculty advisor and submit to them a proposed program of study for approval. Studio Seminar may be elected for one to three credits. Lecture/Studio: 6 hours.

ARTS 2360 - Printmaking II  
(3 Credits)  
A continuation of the material covered in Introduction to Printmaking, this course allows students to further their skills in printmaking media. Students will learn to use color processes, the registration of unique and multiple impressions, and the integration of digital or photo-sensitive plates. This course will encourage students to explore both traditional and alternate approaches to create printed images that reflect their individual interests. (Prerequisite: ARTS 1030 or ARTS 1035, or permission of instructor) Studio: 6 hours - Art Studio Fee: $50

ARTS 2660 - Ceramics III  
(3 Credits)  
Students are required to develop a proposal for a project(s) they will develop and create by the conclusion of the semester. Exploration of alternate construction methods other than those covered in Ceramics I and II are encouraged as well as an investigation into a personal artistic voice in clay. Kiln and basic glazes are provided; clay and tools must be purchased. (Prerequisite: ARTS 1660 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50

ARTS 2820 - Photography Portfolio  
(3 Credits)  
A continuation of Darkroom Photography II, this course requires students to create a visually and thematically cohesive portfolio of exhibition quality photographs. Through research on photographic history, artists and styles, students identify influences and acquire historical perspective. (Prerequisite: ARTS 1820 or 2850 or permission of instructor). Studio: 6 hours - Art Studio Fee: $50

ARTS 2840 - Visual Web Design  
(3 Credits)  
The focus of this course is design of a visual experience for the World Wide Web and the making of Net Art. Students will develop interactive web publications and original web art experiences using the latest industry-standard imaging and graphical interface-based software. Students will learn to
ARTS 2850 - Digital Photography II  
(3 Credits)  
This course continues skill development in digital camera operation and image editing with the introduction of advanced techniques, including crafting inkjet prints. Students are encouraged to develop a personal, expressive style in addition to mastering a range of photographic techniques while they create a visually and conceptually cohesive, exhibition quality portfolio. DSLR or equivalent camera required. (Prerequisite: Undergraduate level ARTS 1850 Minimum Grade of D). Studio: 6 hours - Art Studio Fee: $50

ASLG (American Sign Language)  
Course Completes the LANG: Foreign Language Requirement.

ASLG 1010 - American Sign Language I  
(3 Credits)  
This is a beginner's course in the sign language of the deaf in the United States. The course equips students with skills that enable communication in American Sign Language, both expressively and receptively. Topics relevant to the use of sign language include: the role of signs in American education of the deaf, the oral vs. manual controversy, the philosophy of total communication and standards and ethics of sign language interpreting. Students are expected to attain competency with 600 common signs and to adhere to acceptable standards in utilizing this skill. *Elective for Liberal Arts. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

ASLG 1020 - American Sign Language II  
(3 Credits)  
This is an intermediate level course in the sign language of the deaf in the United States. This course concentrates on improving skills acquired in American Sign Language and focusing on effective conversational skills, both expressive and receptive. Students are expected to attain competency with 600 signs and a working knowledge of American Sign Language. Elective for Liberal Arts program. (Prerequisite: ASLG 1010) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

ASLG 2010 - American Sign Language III  
(3 Credits)  
This is an intermediate level sign language course that emphasizes further development of expressive and receptive skills appropriate for a broad range of conversational situations. Grammatical functions are stressed along with a more in-depth study of deaf history, deaf culture, linguistics and the use of classifiers. Note: Grade of C or better required for Human Services program students. (Prerequisite: ASLG 1010, 1020) Lecture: 3 hours

ASLG 2020 - American Sign Language IV  
(3 Credits)  
This course provides the second level of intermediate study in American Sign Language. Expressive and receptive skills are expanded and refined to advance students toward interpreter training in fields beyond human service settings. Proficiency in areas calling for in-depth dialogue with individuals and group members from the deaf community is stressed. Note: Grade of C or better required for Human Services program students. (Prerequisite: ASLG 1010, 1020, 2010) Lecture: 3 hours

ASTR (Astronomy)  

ASTR 1010 - The Solar System  
(4 Credits)  
Major topics covered in this course are the historical development of astronomical understanding, concepts of the celestial sphere, the technology of astronomical observations, modern planetary science derived from the space program, small bodies of the solar system and the origin and evolution of the solar system. Evening observing sessions are included as an optional part of the course (clear skies permitting). Note: This course fulfills one lab science requirement for the A.A. Degree. Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

ASTR 1020 - The Stellar System  
(4 Credits)  
This course includes the study of the science of analyzing radiation that reaches Earth from extraterrestrial objects; the sun; stellar properties; the life cycles of stars; systems containing more than one star including clusters and galaxies, extraordinary objects such as neutron stars, pulsars, black
holes and quasars; and the origin and evolution of the universe. Evening observing sessions are included as an optional part of the course (clear skies permitting). Note: This course fulfills one lab science requirement for A.A. Degree. Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**BIOL (Biology)**

**BIOL 0600 - Essentials of Anatomy and Physiology**
(1 Credit)
This five-week, modular, online course prepares students for success in Human Anatomy - BIOL 1010 and Human Physiology - BIOL 1020. The focus of this course is development of basic skills required for success in higher education: study skills, time management, basic math and language skills. Students learn the essential science background necessary to be successful in life science courses: basic concepts in Biology (biological terminology, cellular structure) and basic concepts in Chemistry (ions, chemical bonding, terminology and chemical notation). Lecture: 3 hours

**BIOL 1000 - Cell Biology for Technology**
(4 Credits)
This biology course is designed to introduce basic biological principles while specifically examining life processes at the cellular level. Topics include cell chemistry, the relationship between cell structure and function, metabolism, molecular genetics and cellular communication. Contemporary cell-related technology, as well as its impact and significance, is emphasized. (Prerequisites: ENGL 0890 with a grade of B or better or Accuplacer exemption from Reading AND Students must also demonstrate competency in mathematics through required math placement testing: a Math Accuplacer score equivalent to the successful completion of pre-algebra OR successful completion of any of the following courses or their equivalent: MATH 0101, 1200, 1025, 1179, 2111, 2141, 2142, 2243 or 2362) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

**BIOL 1001 - Introductory Biology: Organismal**
(4 Credits)
This course is one part of a two-semester introduction to the fundamentals of biology intended for science majors. However, BIOL 1001 may be taken independently of BIOL 1002. The course investigates the diversity in form and function of the major groups of organisms through the presentation and discussion of biological processes and systems including anatomy, physiology, genetics, evolution, and ecology. (Prerequisites: ENGL 0890 with a grade of B or better or Accuplacer exemption from Reading AND MATH 0099 with a grade of C or appropriate placement test score) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**BIOL 1002 - Introductory Biology: Cellular**
(4 Credits)
This course is one part of a two-semester introduction to the fundamentals of biology intended for science majors. It may be taken independently of BIOL 1001. The course investigates biology at the cellular level through the presentation of such topics as: the chemistry of the cell, the structure and function of macromolecules and organelles, energy and cell metabolism, photosynthesis, genetics, cell reproduction and differentiation, DNA structure and synthesis, and gene expression. (Prerequisites: ENGL 0890 with a grade of B or better or Accuplacer exemption from Reading AND MATH 0099 with a grade of C or appropriate placement test score) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**BIOL 1005 - Biology in the Modern World**
(4 Credits)
This course investigates the basic biological principals needed to understand and make informed decision regarding vital biological issues in today's world; for example, global warming, obesity, biodiversity, cancer, race, genetic engineering, and human population growth. Note: This course is designed for non-science majors; not open to science majors. This class fulfills four credits of Math/Science General Education requirements. (Prerequisites: ENGL 0700 and MATH 0099 with grade of C or appropriate placement test score.) Lecture: 3 hours, Lab: 2 hours

**BIOL 1007 - Explorations in Biology**
(4 Credits)
Targeted towards Non-Science majors, the course introduces students to core biological concepts and themes including: microorganisms, anatomy and physiology, cellular organization, evolution, and ecology. Using a broad, topical approach, students will gain a greater appreciation of the diversity in form and function of organisms. Linking lectures will tie major concepts together and enable students to apply this knowledge in a practical manner in regards to their health and the environment. Critical thinking in learning and application of principles acquired will be an integral part of this course. (Prerequisites: ENGL 0890 with grade of “C” or better or ACCUPLACER exemption from reading and MATH 0099 with grade of C or appropriate placement test score) Lecture: 3 hours, Lab: 2 hours
### BIOL 1010 - Human Anatomy
(4 Credits)
This course is a study of the human organism with respect to the gross and microscopic anatomy of the organ systems. Laboratory work includes dissection of the cat and appropriate isolated organs. (Prerequisites: ENGL 0890 with a grade of B or better or Accuplacer exemption from Reading AND MATH 0099 with a grade of C or appropriate test score. Recommended: take BIOL 1002 before taking BIOL 1010.) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

### BIOL 1020 - Human Physiology
(4 Credits)
This course presents a study of the human organism, including basic chemical composition and function of the cell. The course stresses homeostatic control systems and coordinated body functions. (Prerequisite: BIOL 1010) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

### BIOL 1050 - Humans and the Environment
(3 Credits)
A study of our relation to the ecosystem, this course focuses on environmental issues such as energy supplies, energy alternatives, forms of pollution, food production, population growth and resources management. (Prerequisite: ENGL 0700 with grade of C or appropriate placement test score) Lecture: 3 hours

### BIOL 1070 - Human Anatomy and Physiology
(3 Credits)
This course introduces students to the basic principles of anatomy and physiology necessary for a general understanding of the human body. The relationship between structure and function is emphasized. (Prerequisite: ENGL 0700 and MATH 0099 with grade of C or appropriate placement test score) Lecture: 3 hours

### BIOL 1080 - Introduction to Clinical Procedures
(3 Credits)
Lectures provide an understanding of the theoretical basis and physiological implications of clinical procedures in the medical office and prepare students for further professional training. Laboratory experiences in vital signs, asepsis, sterilization, blood studies and urine studies supplement the lecture material. (Prerequisites: BIOL 1070 and ENGL 0700 with grade of C or appropriate placement test score and enrollment in the Medical Secretary/Assistant program). Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

### BIOL 1110 - Introduction to Pharmacology
(1 Credit)
This course provides an introduction to basic pharmacology, terminology and mechanism of drug action. Use, adverse response, special cautions and interactions of drugs commonly used in dental and medical practices are emphasized. (Prerequisites: BIOL 1070 OR 1020 and ENGL 0700 with grade of C or appropriate placement test score and enrollment in Dental Assistant program, Medical Transcription or Medical Secretary/Assistant program) Lecture: 1 hour

### BIOL 1200 - The Human in Health & Disease
(3 Credits)
This course is designed to teach people more about themselves. Topics include cancers, birth defects, birth control organ transplants, cloning, infectious diseases, heart disease and diets. (Prerequisites: ENGL 0700 AND MATH 0099 with grade of C or appropriate placement test score) Lecture: 3 hours

### BIOL 1300 - Orientation to Biotechnology
(1 Credit)
This course provides an overview of the history and fundamental principles necessary to understand the role of biotechnology in our society. Specific topics are selected to provide examples of applications, ethical considerations and career paths in the field of biotechnology. Students are also introduced to the pathway leading from research and development, to production of a biopharmaceutical product, including the regulatory considerations that are involved. (Prerequisites: ENGL 0890 with grade of ‘B’ or better or ACCUPLACER exemption from reading and MATH 0099 with grade of C or appropriate placement test score) Lecture: 1 hour
### BIOL 1310 - Introduction to Biotechnology Laboratory Skills  
(3 Credits)

This course provides an opportunity for students to learn laboratory skills that are fundamental to successful, efficient and safe practices in a biotechnology research, quality control or production laboratory setting. Students are introduced to methods of measurement, data collection and analysis, solution and media preparation, safe laboratory practices and the practical application of mathematics to these processes. In addition, students are introduced to Good Laboratory Practices (GLP), Good Manufacturing Practices (GMP) and related topics that emphasize the significance of maintaining quality in a biological research or production setting. (Prerequisites: MATH 0101 AND CHEM 1030 OR CHMT 1120, CHMT 1121 OR CHMT 8000 OR equivalent OR permission of instructor. Required reading level: Completion of ENGL 0890 with grade of B or better or Accuplacer exemption from reading) Lecture: 1 hour, Lab: 3 hours - Lab Fee: $20

### BIOL 2040 - Human Sexuality  
(3 Credits)

This course offers an exploration of the physiological, psychological and cultural aspects of human sexuality. Topics include reproductive health, forms and evolution of sexual expression, psychosexual development and the role of sex in the individual's life as well as in society. (Prerequisite: ENGL 0700 with grade of C or appropriate placement test score) Lecture: 3 hours

### BIOL 2090 - Genetics  
(3 Credits)

This course covers basic concepts of inheritance, variation and evolution in plants and animals, including a survey of Mendelian, molecular, cellular and population genetics. (Prerequisite: MATH 1200 or 1179 AND ENGL 0890 with a grade of B or better or Accuplacer exemption from Reading) Lecture: 3 hours

### BIOL 2150 - Laboratory in Genetics  
(2 Credits)

Selected aspects of genetics are demonstrated using bacteria, fungi, fruit flies and other organisms. Each student must design, carry out and present the result of a project. (Prerequisites: One year of biology and concurrent registration in BIOL 2090 and Appropriate Math placement test score AND ENGL 0700 with grade of C or appropriate placement test score) Lab: 4 hours

### BIOL 2201 - Human Anatomy & Physiology I  
(4 Credits)

Human anatomy and physiology of the human body is taught in a two semester sequence, using a systems approach. The relationship between form and function is emphasized, both microscopically and gross, at each level of organization. This course provides basic anatomical terminology and homeostatic concepts beginning at the molecular level of organization and progressing through cell biology, histology, the integument, and skeletal, muscular and nervous systems. Prerequisites: (1) ENGL 0890 with grade of B or better or Accuplacer exemption from reading, (2) MATH 0099 with grade of C or appropriate test score. BIOL 1002 strongly recommended. Lecture: 3 hours, Lab: 3 hours

### BIOL 2202 - Human Anatomy & Physiology II  
(4 Credits)

This course continues basic anatomical and homeostatic concepts beginning with the endocrine system, progressing though the cardiovascular and lymphatic systems, including immunity, the respiratory system, the digestive system and metabolism, the urinary system including acid/base and fluid/electrolyte balance, and reproductive systems. Prerequisite: BIOL 2201 with a grade of C or better. Lecture: 3 hours, Lab: 3 hours

### BIOL 2210 - Introductory Microbiology  
(4 Credits)

This course involves the study of microorganisms that cause diseases in humans. Topics included are prokaryotic and eukaryotic cell types, growth, control of growth, microbial metabolism, genetics, immunology and microorganisms of medical importance. (Prerequisites: BIOL 1010 and 1020) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

### BIOL 2220 - Introduction to Pathophysiology  
(3 Credits)

The course begins by examining the disease process in general, from the etiology of disease at the cellular level to the physiologic changes that occur as the disease moves from incipient stage to full expression. The second half of the course examines the pathogenesis of specific diseases system by system. (Prerequisites: BIOL 1010 and 1020) Lecture: 3 hours
### BIOL 2480 - General Microbiology

(4 Credits)

This course offers a look at microbes and particularly bacteria from a biochemical and molecular perspective. Emphasis is placed on microbial physiology and genetics with applications to biotechnology. (Prerequisites: One year of chemistry and one semester of biology AND ENGL 0700 AND MATH 0101 with grade of C or appropriate placement test score. Biotechnology Certificate program students can fulfill the prerequisites with CHMT 1121, BIOL 1000 and permission of instructor) Lecture: 2 hours, Lab: 4 hours - Lab Fee: $20

### BIOL 2500 - Applications in Science and Math

(1 Credit)

This capstone course is intended for students in their final semester of the AS in Science program. It will allow students an opportunity to demonstrate an integration of knowledge and abilities acquired in previous science and mathematics courses with the added intent of having students develop new insights. Students will read selected articles, such as those that come from scientific journals, in a variety of fields and then have the opportunity to collaborate with their peers and hone writing, synthesis and presentation skills in a seminar setting. (Prerequisite: Successful completion of a minimum of 21 General Education credits and a minimum of 18 Science credits or permission of instructor - SEE DEPARTMENT CHAIRPERSON FOR PERMISSION OVERRIDE) Lecture: 2 hours

### BUSN (Business Administration)

**BUSN 1000 - Workplace Relationship Skills**

(3 Credits)

Critical to success in the workplace is the ability to develop and maintain effective working relationships with co-workers, supervisors, subordinates and both internal and external customers. This course guides students in developing interpersonal skills and strategies to manage their work lives. Lecture: 3 hours

**BUSN 1010 - Introduction to Business**

(3 Credits)

This course emphasizes both small and publicly traded businesses along with strategies for competing in modern economic conditions. Topics include: cultivating a business in a diverse global environment, developing and implementing customer-driven strategies, motivating and empowering employees to satisfy customers and financing a small business. This course serves as a prerequisite for several courses in the business curriculum. However, this prerequisite may be waived and credit received by examination or submission of a portfolio. Contact the department for details. Lecture: 3 hours

**BUSN 1040 - Personal Finance**

(3 Credits)

This course helps individuals manage their money and property. Financial planning, budgeting, consumer protection, consumer credit, investing, housing and insurance are discussed. Lecture: 3 hours

**BUSN 1050 - Small Business Administration**

(3 Credits)

This course covers the practical considerations involved in starting and operating a small business. Topics include what business to enter, success factors, financing, location, franchising, managing, record-keeping and small business computers. Lecture: 3 hours

**BUSN 1060 - Leadership Development**

(3 Credits)

This course provides emerging and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. The course integrates readings from the humanities, experiential exercises, films and contemporary readings on leadership. Lecture: 3 hours

**BUSN 1150 - Introduction to International Business**

(3 Credits)

This course introduces students to the importance and role of international business. Predominant themes include culture and business opportunities. Topics include international trade, balance of payments and multinational companies. Factors and entities that influence trade are considered. (Recommended: BUSN 1010) Lecture: 3 hours
BUSN 1220 - QuickBooks, Computer Application  
(1 Credit)  
QuickBooks is a widely used computerized accounting package for small businesses. Topics covered include writing checks and paying bills, creating reports, managing accounts receivable and accounts payable, invoicing, managing inventory and preparation of payroll. Concepts are presented through hands-on exercises using a case study approach. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

BUSN 2050 - Principles of Management  
(3 Credits)  
This course introduces students to the basic role of the manager in modern business. Among the topics discussed are: paradigm shifts; environmental factors affecting decision-making; ethics/social responsibility; and planning organizing, motivating and controlling organizational resources. (Prerequisite: BUSN 1010. May be waived. See course description for BUSN 1010) Lecture: 3 hours

BUSN 2060 - Principles of Marketing  
(3 Credits)  
This course offers an introduction to the basic concepts and operations involved in the marketing process. Among the topics covered are the basic marketing functions, identification and selection of target markets (including international), marketing research and technologies, pricing, products, promotion and channels of distribution. (Prerequisite: BUSN 1010. May be waived. See course description for BUSN 1010) Lecture: 3 hours

BUSN 2061 - Marketing Communications  
(3 Credits)  
This course provides an introduction to the basic promotional tools available to the person interested in marketing a business or service. Topics to be covered include: source credibility, message development, media selection and understanding audiences. Communication with audiences through advertising, public relations and printed materials are explored. Lecture: 3 hours

BUSN 2063 - Sales  
(3 Credits)  
This course introduces the fundamental skills required for work in a sales position. Topics include: the role and importance of selling, sales processes, personal qualities necessary for salesmanship and basic procedures for seeking a sales position. Lecture: 3 hours

BUSN 2065 - Advertising Principles  
(3 Credits)  
This survey course deals with the planning, creation and role of advertising in our society. Topics include: advertising strategy development, media planning and the function of ad agencies. All major media are covered. Lecture: 3 hours

BUSN 2070 - Management Strategy  
(3 Credits)  
This course is the capstone for the Management Concentration and the Management Certificate programs. Integration of key aspects covered in other management, business and communications courses are utilized. Emphasis is on the formulation, application and justification of managerial strategies through the use of cases and simulation. (Prerequisites: ACCT 1010, BUSN 2050, BUSN 2060. Note: ACCT 1020 strongly recommended) Lecture: 3 hours

BUSN 2100 - Entrepreneurship Capstone  
(3 Credits)  
THIS COURSE IS THE CAPSTONE FOR THE CERTIFICATE IN ENTREPRENEURSHIP AND IS OFFERED IN AN INDEPENDENT STUDY FORMAT. TO ENROLL IN THIS COURSE, CONTACT THE BUSINESS DEPARTMENT CHAIRPERSON FOR DETAILS. <hr> Students work with a member of the business faculty in developing a Business Plan, in conjunction with the Rhode Island Business Plan Competition. The completed plan is reviewed by the faculty member who will then determine your final grade. All work is done independently without the benefit of classroom instruction. (Prerequisites: ACCT 1010, BUSN 1010, BUSN 1050.)

BUSN 2110 - Money and Banking  
(3 Credits)  
This course is an analysis and description of the monetary and banking aspects of our present economic system. Introductory material on money, credit and monetary standards precedes a more intensive study of the nature and functions of commercial banking and the Federal Reserve System. Lecture: 3 hours
### BUSN 2120 - Investments
(3 Credits)
This course studies the scope and nature of investment from the viewpoint of the individual investor. The course includes discussions of investment objectives, types of securities, mechanics of investing, security market procedures, sources of information, security analysis and forecasting techniques. Lecture: 3 hours

### BUSN 2160 - Management and Labor Relations
(3 Credits)
This course is the study of the evolution of the labor relations concept in the public and private sectors. Emphasis is placed on techniques that have resulted in sound management-labor relations policies. (Lecture: 3 hours)

### BUSN 2350 - Human Resources Management
(3 Credits)
This course introduces the functions and management of human resources in the development of an effective work force. Topics include job descriptions, recruitment and hiring procedures, training, performance evaluation methods, motivation, incentive compensation, the grievance procedure, application of affirmative-action legislation and implementation of health and safety programs. (Prerequisites: BUSN 1010, 2050) Lecture: 3 hours

## CHEM (Chemistry)

### CHEM 1000 - Chemistry of Our Environment
(4 Credits)
This course is an introductory, entry-level course in chemistry for non-science majors, with emphasis on every day, practical applications. The course covers basic chemistry principles, which are then applied to contemporary issues. Use of mathematics is minimized as much as possible. The laboratory assignments demonstrate topics discussed in class. Note: This course is a prerequisite for CHEM-1060 and is recommended as a Science elective in the Liberal Arts or General Studies program. (Prerequisite: MATH 0101 or higher with grade of C or ACCUPLACER testing out of MATH 0101) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

### CHEM 1010 - Survey of Biomedical Chemistry
(5 Credits)
This is an introductory study of chemistry principles that form the foundation for understanding biomedical and dental sciences. Content includes atomic theory, chemical bonding, the nature and properties of matter and solutions, the colloidal state, crystallization and the chemical functioning of basic biological compounds. Laboratory exercises demonstrate concepts presented in lectures. (Prerequisite: MATH 0101 or higher with grade of C or better or ACCUPLACER testing out of MATH 0101 and Chemistry placement exam or CHEM 1020 with grade of C or better.) Lecture: 3 hours, Lab: 3 hours, Recitation: 1 hour - Lab Fee: $20

### CHEM 1020 - Basic Skills for Chemistry
(3 Credits)
This course is for students who are inadequately prepared to enter General Chemistry, Health Science Chemistry or Survey of Biomedical Chemistry. Topics stressed are physical measurements, problem-solving and chemical language. Students are given first-hand experience in data gathering, evaluation and presentation. Note: Not open to students who have already completed CHEM 1010, 1030 or 1180 without permission of department chairperson. (Prerequisite: MATH 0101 or higher with grade of C or better or ACCUPLACER testing out of MATH 0101 and Chemistry placement exam) Lab/ Recitation: 4 hours - Lab Fee: $20

### CHEM 1030 - General Chemistry I
(5 Credits)
Principles of chemistry dealing with the structure of matter, periodic system, chemical bonding, formulas and equations are studied in this course. Laboratory work provides an opportunity to see the applications of these chemical principles. Note: This course is for students who plan to pursue further studies in science, pharmacy or engineering. (Prerequisite: MATH 0101 or higher with grade of C or better or ACCUPLACER testing out of MATH 0101 and Chemistry placement exam or CHEM 1020 with grade of C or better) Lecture: 3 hours, Lab: 3 hours, Recitation: 1 hour - Lab Fee: $20
CHEM 1060 - Chemistry of Hazardous Materials  
(3 Credits)  
This course provides an insight into hazardous liquids, solids and gases. Students are exposed to basic chemistry, storage, handling laws, standards and firefighting practices pertaining to hazardous liquids, solids and gases. (Prerequisites: CHEM 1000). Lecture: 3 hours

CHEM 1100 - General Chemistry II  
(5 Credits)  
This course, together with CHEM 1030 satisfies the requirement for one year of science. Lectures are concerned with rates of reactions, equilibria, thermodynamics, electrochemistry, nuclear chemistry and complexation reactions. Laboratory involves further application of chemical principles and the separation and identification of inorganic ions. (Prerequisite: CHEM 1030 with a grade of C or better) Lecture: 3 hours, Recitation: 1 hour, Lab: 3 hours - Lab Fee: $20

CHEM 2250 - Organic Chemistry I Lecture  
(3 Credits)  
This course deals with chemical principles involved in organic reactions. Emphasis is placed on compounds in the aliphatic series. (Prerequisites: Enrollment in ENGN/ENBC or ENGN/ENCH programs and CHEM 1100 with a grade of C or better). Lecture: 3 hours

CHEM 2260 - Organic Chemistry II Lecture  
(3 Credits)  
A continuation of CHEM 2250, this course emphasizes the aromatic series of organic compounds and synthetic organic chemistry. (Prerequisite: Enrollment in ENGN/ENCH programs and CHEM 2250 with a grade of C or better) Lecture: 3 hours

CHEM 2270 - Organic Chemistry I  
(5 Credits)  
This course deals with the chemical principles involved in organic reactions. Emphasis is placed on compounds in the aliphatic series. The laboratory enhances lecture material by illustrating methods of preparation, purification and characterization of organic compounds using accepted techniques. (Prerequisite: CHEM 1100 with a grade of C or better) Lecture: 3 hours, Lab: 3 hours, Recitation: 1 hour

CHEM 2280 - Organic Chemistry II  
(5 Credits)  
A continuation of CHEM 2270, this course emphasizes the aromatic series of organic compounds and synthetic organic chemistry. The laboratory enhances lecture material by illustrating methods of preparation, purification and characterization of organic compounds using accepted techniques. (Prerequisite: CHEM 2270) Lecture: 3 hours, Lab: 3 hours, Recitation: 1 hour

CHEM 2500 - Applications in Science and Math  
(1 Credit)  
This capstone course is intended for students in their final semester of the Science program. It will allow students an opportunity to demonstrate an integration of knowledge and abilities acquired in previous science and mathematics courses with the added intent of having students develop new insights. Students will read selected articles, such as those that come from scientific journals, in a variety of fields and then have the opportunity to collaborate with their peers and hone writing, synthesis and presentation skills in a seminar setting. (Prerequisite: Successful completion of a minimum of 21 General Education credits and a minimum of 18 Science credits or permission of instructor - SEE DEPARTMENT CHAIRPERSON FOR PERMISSION OVERRIDE) Lecture: 2 hours

CHIN (Chinese)

CHIN 1000 - Basic Spoken Chinese  
(3 Credits)  
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

CHIN 1030 - Elementary Chinese I  
(3 Credits)  
This elementary Chinese language course provides beginning students with basic Mandarin language skills. Students will learn both the language and culture nuances through different contexts. By the end of the semester, students will be able to comprehend and engage in simple daily conversations,
accurately pronounce Chinese characters with the help of Han Yu Pin Yin (the Chinese pronunciation system), recognize nearly 200 Chinese characters, and understand the basic Chinese writing system. (Lecture: 3 hours)

CHIN 1040 - Elementary Chinese II
(3 Credits)
Elementary Chinese II is a follow-up course to Elementary Chinese I. This course will provide further comprehensive training in the four basic language skills: listening, speaking, reading, and writing through different contexts. Students will also have the opportunity to further expand their vocabulary (up to 500 basic characters) and learn more appropriate Chinese grammar and sentence structures to comprehend and engage in daily conversations. The aim of this course is to continue to build a solid foundation for those who would like to learn Chinese at a higher level. (Lecture: 3 hours)

CHMT (Chemical Technology)

CHMT 1120 - Chemical Technology I
(6 Credits)
This course is an introduction to basic concepts in chemistry. The course covers chemical properties, identification and separation of substances, atomic and molecular structure, elements and compounds, liquids and solutions; the periodic table and the naming of inorganic substances. Students will use a variety of instruments including the gas chromatograph, manometers, analytical balances and visible spectrophotometers. Lecture: 2 hours, Lab: 8 hours - Lab Fee: $20

CHMT 1121 - Chemistry for Biotechnology
(3 Credits)
This course provides an introduction to basic concepts in chemistry and instruction in the use of instruments, including gas and liquid chromatographs, electronic balance, visible spectrophotometers and pH meters. Topics covered include chemical properties, identification and separation of substances, atomic structure, elements and compounds, gases and solutions, acids and bases and amino acids and proteins. Lecture: 2 hours, Lab: 3 hours - Lab Fee: $20

CHMT 1220 - Chemical Technology II
(6 Credits)
This course is a continuation of Chemical Technology I and covers acid-base chemistry, equilibrium, qualitative and quantitative analysis. (Prerequisite: CHMT 1120 or its equivalent) Lecture: 2 hours, Lab: 8 hours - Lab Fee: $20

CHMT 2320 - Chemical Technology III
(10 Credits)
This course is a continuation of Chemical Technology II and covers an introduction to organic chemistry via a study of organic functional groups, classification of organic compounds using wet and instrumental methods and organic reactions. It will also focus on infrared spectrophotometry separation methods, including gas chromatography and high pressure liquid chromatography (Prerequisite: CHMT 1220 or its equivalent) Lecture: 4 hours, Lab: 12 hours - Lab Fee: $20

CHMT 2420 - Chemical Technology IV
(8 Credits)
This course is a continuation of Chemical Technology III and covers the nature of reversible processes, equilibrium constants, solute and solvent systems and the kinetics of chemical reactions. Instrumental methods used include atomic absorption, emission spectroscopy, ultraviolet and NMR spectroscopy. The course concludes with a variety of special methods and student projects. (Prerequisite: CHMT 2320 or its equivalent) Lecture: 4 hours, Lab: 8 hours - Lab Fee: $20

CNVT (CMP Networking Virtual Tech)

CNVT 1000 - Computer Repair A+ Hardware
(3 Credits)
This course covers the installation, configuration and troubleshooting of hardware components. The material is presented to prepare the student for the A+ Core Hardware examination. This course may not be used as an elective in the electronics or instrumentation programs. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20
**CNVT 1010 - Computer Repair A+ Software**  
(3 Credits)  
This course covers installation, configuration and troubleshooting of software/operating system components. The material is presented to prepare the student for the A+ OS Technologies examination. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 1200 - Introduction to Wireless**  
(3 Credits)  
This course introduces wireless networking over a range of applications, from cell phones to wireless local area networks (WLAN), to broadband wide area network links and satellite. Topics covered include an overview of wireless communication technology, protocol layers, local area network (LAN) hardware, IP addressing, 802.11 standards, MA (Media Access Control) standards, WLAN components, basic security, basic RF theory, antennas and troubleshooting. The student will have hands-on experience with various LAN and WLAN networking components, applications, tools and projects. (Prerequisite: CNVT 1000 or permission of department) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 1810 - Networking Technology**  
(3 Credits)  
This course provides students with a thorough understanding of how basic networking components work in a practical hands-on environment utilizing state-of-the-art telecommunications equipment. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 1820 - Intermediate Networking**  
(3 Credits)  
This course focuses on networking terminology and protocols, networking standards, LAN, WAN, OSI modules, Ethernet, token ring, FDDI, TCP/IP addressing protocol, dynamic routing and the network administrator's role and function. (Prerequisite or corequisite: CNVT 1810) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 1830 - LAN Design and Management**  
(3 Credits)  
This course focuses on advanced networking concepts that enable students to design and implement local area networks and virtual local area networks. (Prerequisite: CNVT 1820) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 1840 - WAN Design and Management**  
(3 Credits)  
This course focuses on advanced networking concepts that enable students to design and implement wide area networks. (Prerequisite or corequisite: CNVT 1830) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**CNVT 2010 - Cisco CCNP Route**  
(5 Credits)  
Cisco ROUTE covers specialized routing concepts including advanced IP addressing techniques, CIDR, NAT, DHCP, IP helper addresses, dynamic routing, static routing, default routing, single area OSPF, multi-area OSPF, point-to-multipoint OSPF, multi-area OSPF, EIGRP route summarization, route redistribution, route filters, route maps, policy routing, BGP, IPv6 and network security. (Recommended: Successful completion of CCNA exam and Cisco Certified Academy attendance or demonstrated proficiency using laboratory equipment.) Spring only. Lecture: 3 hours, Lab: 5 hours - Lab Fee: $20

**CNVT 2030 - Cisco CCNP Switch**  
(5 Credits)  
Cisco SWITCH concentrates on advanced concepts of multi-layer switching in a network environment. Topics include switching technologies, LAN Media, Gigabit Ethernet, switch configuration, VLANs, VLAN Trunking Protocol (VTP), Spanning Tree Protocol, multi-layer switching, redundant routing protocols, multicasting, and restricting network access. (Recommended: Successful completion of CCNA exam and Cisco Certified Academy attendance or demonstrated proficiency using laboratory equipment.) Fall only. Lecture: 3 hours, Lab: 5 hours - Lab Fee: $20

**CNVT 2060 - CCNP TSHOOT: Cisco IP Network**  
(5 Credits)  
This course concentrates on advanced concepts of internetwork troubleshooting. Topics include network maintenance and methodologies, troubleshooting processes, troubleshooting tools, maintaining switched and routed solutions, addressing services, performance issues, and network security implementations. (Prerequisites: CNVT 2010, 2030 or equivalent. Recommended: Successful completion of CCNA exam and Cisco Certified Academy attendance or demonstrated proficiency using laboratory equipment.) Lecture: 3 hours, Lab: 5 hours - Lab Fee: $20
CNVT 2100 - Basic Voice Over Internet Protocol (VoIP)
(3 Credits)
This course concentrates on the transmission of voice over the Internet using Internet Protocol (VoIP). Focus is on the transmission of voice over high speed network connections and quality of service issues and solutions associated with this transmission. VoIP technology, signaling standards, network configuration and queuing are addressed. (Prerequisite: CNVT 1830, equivalent experience, or permission of department) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

CNVT 2200 - Network Security Hardware
(4 Credits)
This course concentrates on network security procedures and practices as they apply to routed networks. Security threats and their management; intrusion detection; securing networks through hardware devices; Authentication, Authorization and Accounting (AAA); firewall technologies; cryptographic systems and virtual private networks (VPNs) are included. (Prerequisite: CNVT 1840, equivalent experience, or permission of department. Recommended: Successful completion of CCENT exam and Cisco Certified Academy attendance or demonstrated proficiency using laboratory equipment.) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

CNVT 2300 - Desktop Technician-Consumer
(3 Credits)
In this course, students learn how to install and support users running the Microsoft Windows operating system. Topics include installing operating systems and service packs, managing access to files and folders, configuring hardware devices and drivers, setting up network protocols, configuring security options and troubleshooting associated problems. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

CNVT 2310 - Desktop Technician-Business
(3 Credits)
In this course, students learn how to install and support desktop applications running under the Microsoft Windows operating system. Applications include the complete Office Suite, Outlook and Internet Explorer. Students learn how to set up standard and custom configurations for these applications. They also learn how to manage security issues and respond to breaches. Troubleshooting problems associated with these applications, including connectivity issues, also are explored. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMI (Computer Studies & Info. Proc.)

COMI
(computer studies and information processing)

COMI 1000 - Computer Basics
(1 Credit)
This course is designed for students with no familiarity with computers. It covers topics such as working with Windows and the Windows desktop, file handling, email and the Internet (browsing and searching). Lab: 4 hours - Lab Fee: $10

COMI 1100 - Introduction to Computers
(3 Credits)
This computer literacy course provides a comprehensive introduction to the principles of computers and information processing. Students are introduced to the operation and terminology of computer systems as well as certain selected application software packages such as word processing, spreadsheets and presentation software. Note: Lecture and lab hours vary by instructor but total four hours per week. - Lab Fee: $20

COMI 1150 - Programming Concepts
(3 Credits)
This course introduces important concepts and skills necessary for computer programming. Emphasis is on structured programming techniques and top-down design. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1215 - Programming in C++
(3 Credits)
This is a comprehensive course in programming in C++. Topics include types, operators, expressions, control flow, functions, arrays, pointers, and file handling. (Recommended: COMI 1150) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20
COMM C 1225 - Programming in C#  
(3 Credits)  
This course covers the fundamentals of software development using Microsoft’s Visual Studio C# object-orientated programming language. Data Structures, Methods, Classes, Decision Making, Iteration and Arrays are covered. (Recommended prerequisite: COMI 1150) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMM C 1240 - Object-Oriented Programming  
(3 Credits)  
This course introduces students to the fundamentals of designing and coding object-oriented programs. Basic topics such as objects, classes and class inheritance are discussed. Students write programs using one of the object-oriented languages. (Recommended: COMI 1150) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMM C 1260 - Introduction to SQL  
(3 Credits)  
This course offers a foundation in the fundamentals of fourth generation language programming. Particular attention is devoted to the use of ANSI-Standard SQL to construct and manipulate database objects. Students create database tables and generate SQL scripts to extract and manipulate data from the database. (Recommended: COMI 1150) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMM C 1410 - Personal Computer Software  
(3 Credits)  
This course introduces operational procedures for several standard data management software packages that utilize computer systems. Students construct and manipulate data files to produce clear, concise reports. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMM C 1415 - Personal Computer Operating System  
(1 Credit)  
This module familiarizes students with operating system commands for the personal computer. Students are exposed to statements to enhance their computer operation abilities. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMM C 1420 - Introduction to Spreadsheets  
(1 Credit)  
The purpose of this module is to introduce the operational procedures for a spreadsheet software package. Students construct and manipulate data files to produce clear and concise reports. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMM C 1422 - Intermediate Spreadsheets  
(1 Credit)  
This module presents topics and functions, advanced database techniques and additional add-in topics. It focuses on conceptual features beyond the scope of beginning spreadsheet uses. Topics include utilizing additional spreadsheet features and macro planning and development. (Recommended: COMI 1420) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMM C 1425 - Advanced Spreadsheets  
(1 Credit)  
This module covers advanced topics using integrated spreadsheet software including macros, application design and menu building. (Recommended: COMI 1422) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMM C 1430 - Introduction to Database Software  
(1 Credit)  
This module introduces students to different methods of organizing and accessing computer files. Fundamentals of database design and management are covered. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMM C 1432 - Intermediate Database Software  
(1 Credit)  
This module focuses on the creation and manipulation of data files to produce meaningful output using database software. Emphasis is on the presentation of queries, forms and reports. (Recommended: COMI 1430) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10
COMI 1440 - Presentation Software (PowerPoint)  
(1 Credit)  
This module focuses on the use of computer software that incorporates presentation as well as analytical graphics. Students create informative report documents and visual presentations using charts, graphs and/or pictures. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMI 1450 - WINDOWS Operating System  
(3 Credits)  
This course familiarizes students with the Windows operating system. Basic and advanced features of Windows are demonstrated. Students explore topics in system diagnostics and troubleshooting, networking, configuration, customization, and commonly used software tools as well as learning about new developments in Windows. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1451 - Introduction to WINDOWS  
(1 Credit)  
This module familiarizes students with the graphical-user operating environment. Basic functions of Windows are demonstrated. Students do laboratory assignments to utilize the basic operating functions of Windows such as file handling, fonts, graphics, icons and screen control. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10

COMI 1460 - Unix Operating System  
(3 Credits)  
This course covers basic command structures and syntax of the UNIX operating system and includes file and directory manipulation and shell scripts. Essential system administration topics and system administration shell scripts also are discussed as well as system startup/shutdown, account management and system backup of the UNIX operating system. This class covers advanced system administration topics including networking, security, printing systems and graphical-user interface of the UNIX operating system. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1461 - Introduction to UNIX  
(1 Credit)  
This module exposes students to the basic command structures and syntax of the UNIX operating system. Content includes file and directory manipulation as well as use of shell scripts. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10

COMI 1470 - Windows Programming Using C++  
(3 Credits)  
This course focuses on using C++ to design programs that run under the Windows operating system. It includes an overview of object-oriented concepts, creating Windows applications, capturing the mouse and keyboard, creating menus, dialog boxes and toolbars and single and multiple document interfaces. (Recommended: COMI 1150 and 1215) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1475 - Introduction to VISIO  
(1 Credit)  
This module introduces basic Visio tools. Students create and manipulate drawings and shapes, including flow charts, diagrams and organizational charts. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10

COMI 1510 - Java Programming  
(3 Credits)  
This course introduces students to topics in programming and software design using the Java programming language. Specific topics reflect current technologies and might include an introduction to object-oriented program design, data analysis, and search and sort algorithms. (Recommended: COMI 1150 and one other programming language course) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1640 - Introduction to Word Processing  
(1 Credit)  
This module introduces introductory word processing features such as creating, printing and editing a document. This course covers formatting documents including text and paragraphs. Students use spelling, grammar and auto-correct features and are introduced to headers, footers and tables in basic word processing documents. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10
COMI 1750 - HTML (5)  
(3 Credits)  
This course provides an in-depth introduction to HTML 5 and CSS 3 emphasizing conformance to W3C specifications. Students begin by creating simple web pages and progress to include images, hyperlinks, tables, web forms, animations and transitions. A portfolio website will be created, including examples of attempts at cloning existing websites. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1751 - Introduction to HTML  
(1 Credit)  
This module introduces students to the use of the HTML language and the basic features of HTML scripting. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10

COMI 1755 - Fundamentals XML eXtensible Markup Language  
(3 Credits)  
This course introduces fundamentals of XML languages to define and validate data, use schemas, transformations, linking, VML, SMIL and CSS. XML files are used with different editing software. Assignments are used to demonstrate XML activity at students’ websites. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1770 - Fundamentals of Website Development  
(3 Credits)  
This course provides an in-depth introduction to a variety of technologies used in modern web development. Building on a base of HTML 5 and CSS 3, students will explore JavaScript, JQuery and related technologies for building dynamic web sites. Students will also be introduced to server-side scripting and best practices for web hosting. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1800 - Computer Networking Software Linux  
(3 Credits)  
This course presents the administration of a LINUX network. Topics include installing, using, administering and maintaining a LINUX network. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 1840 - Microsoft Windows Server  
(3 Credits)  
This course presents the terminology and operating principles of Microsoft Windows server software. Students learn how to use, install and maintain Microsoft Windows networking software. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2010 - Client-Side Scripting Languages  
(3 Credits)  
This course will introduce scripting languages and their use in programming for the World Wide Web with a focus on client-side scripting. It will include fundamental programming topics such as memory concepts, control structures and writing functions. It also will include an introduction to both client-side and server-side scripts. (Recommended prerequisites: COMI 1150 and 1770) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2015 - Introduction to Microsoft Project  
(1 Credit)  
This module introduces students to project management software, an essential tool used by most information technology environments. Upon completion of this course, students are able to create and analyze projects using Microsoft Project Manager. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $10

COMI 2020 - Network Security Software Fundamentals  
(3 Credits)  
This course introduces students to networking security, a critical knowledge point for technology professionals. This course provides students with introductory concepts and technical skills needed to create and maintain a secure network environment. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2031 - Computer Support: Concepts  
(3 Credits)  
This course introduces students to basic technical concepts, functions and support systems. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20
COMI 2033 - Computer Support: Tools and Techniques  
(3 Credits)  
This course focuses on software support tools and how to determine which tools are best suited for particular environments as well as methods to assess the success and effectiveness of these tools. (Prerequisite: COMI 2031) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMI 2035 - Introduction to Computer Forensics  
(3 Credits)  
This course starts with the basics of computer technology to build a foundation for understanding where evidence can be found. It introduces students to the technology and procedures of acquiring and analyzing digital evidence taken from computers. This course also exposes students to the software being used in the industry. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMI 2036 - Introduction to Computer Ethics  
(3 Credits)  
This course explores the ethical impact of computer technology on the world, as well as the rules and regulations that ensure the proper use of technology. Internet crime, privacy protection and first amendment rights that protect our freedoms in cyberspace are closely examined. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2037 - Introduction to Cybersecurity  
(3 Credits)  
This course introduces students to the opportunity that exists in the cybersecurity field. Topics such as certified ethical hacking, cyber threats and vulnerabilities and cryptography are introduced. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMI 2040 - Beginning Game Programming  
(3 Credits)  
This course will introduce the student to game development and the beginning principles of game programming. (Required: COMI 1150) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

COMI 2055 - Introduction to Virtual Computing  
(1 Credit)  
This five-week class provides an introduction to computer virtualization concepts which include hands-on activities of installing, configuring and using virtualization products. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10

COMI 2225 - Advanced Programming in C#  
(3 Credits)  
This course introduces the student to advanced topics in programming and software design using Microsoft’s C# programming language. Topics covered include classes, abstract classes, inheritance, ADO.Net data driven applications using a database, ASP.Net for Web applications, collections and file streams. (Prerequisites: COMI 1215, 1225, or permission of instructor) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2510 - Advanced Java Programming  
(3 Credits)  
This course introduces students to advanced topics in programming and software design such as graphical modeling techniques and algorithms and analysis as well as current techniques in interface design and user interaction. Specific topics reflect current technologies and might include inheritance and polymorphism in object-oriented design and graphical user interfaces and the event loop. (Required: COMI 1510) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMI 2520 - Data Structures and Algorithms  
(3 Credits)  
This course introduces the student to data structures, algorithm design, and space and time complexity analysis. Topics include common data structures such as linked lists, stacks, queues, binary trees, searching and sorting algorithms, maps, and hash tables, and techniques of run-time complexity analysis such as Big O notation. (Prerequisite: COMI 2510) Lecture: 3 hours, Lab 1 hour. - Lab Fee: $20
## COMM (Communication)

### COMM 1000 - Foundations in Video and Audio Production
(4 Credits)
This introductory hands-on course is designed for students who have little or no experience in video/sound production. They learn the basics of image and sound creation necessary for subsequent courses. Topics include camera and microphone operation, video and audio capture, camera supports, editing, adding foley and sound tracks, titling, effects, and color correction. Students will also learn how to compress and encode video so that it is optimized for current platforms. (Prerequisite: Eligible for ENGL 1005 or higher and ENGL 0850 or higher or permission of instructor). Lecture: 4 hours - Lab Fee: $20

### COMM 1005 - Careers in Communication & Film
(1 Credit)
This course is designed to give students an overview of the Communication and Film industries and related careers. Students will explore personal values and academic goals through individual projects, class exercises and group interaction as they learn the educational requirements of specific career degrees and develop the baseline skill necessary for working in Communication or Film, including ethical reasoning, effective communication and self-directed lifelong learning. This course is required for all students in the Communication and Film degree and should be taken during the student’s first semester in the program. Lecture: 1 hour

### COMM 1010 - Communication Fundamentals
(3 Credits)
This course examines fundamental concepts related to communicating across a variety of contexts and cultures while emphasizing practical application to everyday life. Through multiple methods (readings, lectures, discussions, activities, research, written and speaking assignments), this course presents predominant theories of and guided experiences with interpersonal, group, and public communication. Focus is on analyzing audiences, identifying/evaluating communication styles, researching effective/ethically, and presenting sound arguments. The real-world skills that students develop help them maintain healthy relationships, increase understanding of others, and voice ideas and concerns in public forums. (Prerequisites: Eligible for ENGL 1005 or higher and ENGL 0850 or higher or permission of instructor). Lecture: 3 hours

### COMM 1050 - Mass Media Foundations
(3 Credits)
This introductory course surveys how media influences individuals, cultures, and societies. Topics include entertainment media, digital media, the Internet, books, newspapers, magazines, recordings, advertising, and other relevant issues. In addition, media ethics and responsibility, government regulation, legal issues, politics, and corporate media will be examined. Lecture: 3 hours

### COMM 1100 - Public Speaking
(3 Credits)
This one-semester basic course in speech is designed to develop each student's ability to communicate effectively in his or her academic, business and social life. The major emphasis is on the preparation and delivery of formal speeches, but many areas of the communication process are explored. (Prerequisites: Eligible for ENGL 1005 or higher and ENGL 0850 or higher or permission of instructor). Lecture: 3 hours

### COMM 1110 - Voice and Articulation
(3 Credits)
Designed for those people with speech habits resulting in problems of being heard and understood, this course emphasizes voice development and improvement in articulation for clearer and more effective speech. Lecture: 3 hours

### COMM 1180 - Oral Interpretation
(3 Credits)
This course is designed for students with experience in speaking who are planning careers that require them to read aloud, to be dramatic and to tell stories, possibly to children. The student will learn to interpret prose and poetry orally for the entertainment and edification of small or large audiences. Lecture: 3 hours

### COMM 1400 - Social Media Communication
(3 Credits)
This course will explore the history, rise, and growth of social media as a 21st century communication practice. Students will study the advances that led to the creation of social media and just as importantly examine how the use of social media fed its growth. Students will develop social media
communication plans and practice digital communication using online tools, such as Facebook, Twitter, LinkedIn, Kickstarter, YouTube, Flickr, Digg, and Tumblr. Lecture: 3 hours

**COMM 2000 - Media Writing**  
(3 Credits)  
This course provides instruction in writing for print, broadcast, video, and new media. Students will practice skills including form and content required for various media. Writing objectively, considering legal and ethical issues, developing ideas and stories, gathering information, and interviewing are some concepts covered by this course. (Prerequisite: Placement in ENGL 1010 or completion of ENGL 1005 with a grade of C or better). Lecture: 3 hours

**COMM 2025 - Interpersonal Communication**  
(3 Credits)  
This course surveys theories and concepts related to communication between individuals. Through participation in course activities and assignments, students will analyze interpersonal interactions in the world around them and apply strategies to improve their own communication style to meet personal, social, and professional goals. Topics include self-concept, perception, effective listening, types of relationships/stages of development, nonverbal communication, and conflict resolution. Emphasis is placed on examining interpersonal communication from diverse perspectives, including age, gender, race, and culture. (Prerequisites: Eligible for ENGL 1005 or higher and ENGL 0850 or permission of instructor). Lecture: 3 hours

**COMM 2050 - Media and Broadcast History**  
(3 Credits)  
Media and Broadcast History is an overview of the institutional, technological, and social history of media and broadcasting. Starting with media of early civilization, students will study developments and trends throughout history that will culminate with media of the present. This course will reveal the major models of print, radio, television and the Web that have provided the foundation for communication in industry and society. The historical roles of content producers, broadcasters, and government regulators will be explored to provide students with a greater understanding of media today. Lecture: 3 hours

**COMM 2100 - Studio Production**  
(3 Credits)  
This introductory course familiarizes students with video production in a studio environment, including the use of studio cameras, studio lighting and sound and control room functions. Students will acquire the necessary skills to produce basic video productions for television and the Web. Students will learn to communicate effectively by making class presentations, writing production proposals and completing video productions. (Prerequisite: COMM 1000) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

**COMM 2200 - Documentary Production**  
(3 Credits)  
This course builds on basic video production principles learned in COMM 1000 and COMM 2100 and incorporates field production techniques. Students will use both analog and digital technology. Lectures, screenings, and hands-on labs provide an in-depth understanding of video production and related business topics. Also included are technical aspects of scripting, lighting, camera operation, continuity, post-production editing, logistics, and preparing a production budget. (Prerequisite: COMM 1000) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

**COMM 2221 - Multimedia Reporting**  
(3 Credits)  
In this course, students will learn the latest technologies to write, produce, and distribute media stories for a variety of formats. Building on writing skills, students will become proficient in using still cameras, video cameras, and audio-recording devices to support a news story. Students will use cameras and audio-recording devices to deliver a news story. In essence, this course exposes students to skills needed by contemporary media journalists. (Prerequisite: COMM 2000). Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

**COMM 2300 - Video & Media Editing**  
(3 Credits)  
This course provides the student with an in-depth study of the history, techniques and technology of video and media editing. Students will study the principles and practices of editing by analyzing examples from classic and contemporary film and video as they learn how to build and strengthen a story and engage an audience. Using the latest industry non-linear software tools, students will work on advanced editing exercises that provide opportunities to master the editing process. An overview of the editing process, techniques, in-depth procedures, and skills will be reviewed. At the end of the course, the student will have learned the skills necessary to prepare for professional certification. (Pre-requisite: COMM 1000) Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20
COMM 2310 - Sound Design and Production
(3 Credits)
This course examines the techniques and production of audio communication. Students will explore elements of audio for media, including video, radio, web, commercials, news reporting, sports commentary, monologues, narration, voice-over, podcasting, ADR, Foley, film scoring and mixing. (Prerequisite: COMM 1000). Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMM 2350 - Motion Graphics for Media Communication
(3 Credits)
This course teaches students the syntax of motion graphics so that they understand the how and why of incorporating effects in a video sequence. Students become familiar with industry standard tools to make video productions communicate more effectively, much like writers use parts of speech and punctuation to craft their messages. (Prerequisite: COMM 1000). Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMM 2400 - Production and Distribution Fundamentals
(3 Credits)
Students in this course gain a practical understanding of the planning and distribution of media productions and film projects. This course incorporates budget; recruitment of crew and talent; preparation of sets, props, and costumes; and marketing media strategies. In addition to learning through lectures, screenings, and labs to gain an in-depth understanding and working knowledge of the business side of media, students will use digital technology to optimize media for broadcast, web, commercial and social media outlets across various devices. Digital methods will include media streaming, DVD authoring, and television and podcasting. Special attention will be given to providing students with practical experience in preparing their own media portfolio for presentation to prospective employers, clients, and college or university admission. (Prerequisite: COMM 1000). Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMM 2490 - Field Experience
(2 Credits)
In this course, students will work off-site at a company and interest area that they are studying. Students will be matched with an opportunity that allows them to apply their skills learned in the classroom and that provides a real-world experience in Communication and Film/Media. (Prerequisite: Last semester and/or permission of instructor). Lecture: 2 hours, Site hours: 6 hours

COMM 2500 - Capstone Portfolio
(2 Credits)
In this course, students will create a professional portfolio of representative work that demonstrates their skills and ability in media creation. Through a series of short exercises and assignments, students will assemble a body of work from their course assignments and independent projects to create this comprehensive online portfolio. The course is taken in the last semester of the program sequence. (Prerequisite: Last semester and/or permission of instructor). Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

COMP (Computer Science)

COMP 1170 - Computer Application Systems
(3 Credits)
This course covers processes followed in designing computer systems, characteristics of key business computer applications and inter-relationships between computer applications. Exercises and case problems are used to provide a thorough understanding of flowcharting techniques and application development. Lecture: 3 hours

COMP 1200 - Database Design & Management
(3 Credits)
This course provides a foundation in database theory. Students learn database design principles utilizing ERD and Normalization techniques. Database implementation and management utilizing SQL basics and transactions are also discussed. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

COMP 1210 - Database Implementation and Administration
(3 Credits)
This course focuses on the significant aspects of implementing, utilizing and maintaining a database using a relational DBMS. Students learn the basics of database implementation including installing and configuring a DBMS, creating and populating database tables, managing database tables using constraints and indexes, and extracting data using SQL. (Recommended: COMP 1200) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20
### COMP 1230 - Systems Analysis and Design
(4 Credits)
This course serves as a capstone course and offers an introduction to concepts, methodology and techniques used in business-systems analysis and the design of computerized business systems. A project-team approach is used to solve a case study. (Recommended: Take in final semester or with permission of instructor.) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

### COMP 2430 - Operating Systems
(4 Credits)
This course covers the structure and components of operating systems. Topics include controlling system resources, interface concepts, multiprogramming, networks and command language techniques of current operating systems. Laboratory assignments provide application of these principles. Lecture: 3 hours, Lab: 1 hour - Lab Fee: $20

### COMP 2500 - Cybersecurity Practicum/Capstone Course
(3 Credits)
The Cybersecurity Practicum/Capstone course provides “hands on” experience to promote development of important skills. Weekly meetings with the course instructor will review key program topics. To complete the course, the student is required to spend an average of 10 hours per week of field work under the guidance of industry professionals in order to apply the accumulation of program knowledge in a real world setting. The student will be required to produce a report relating to the work experience and how it is connected to the content of this program. This class also has an on-campus meeting requirement which will be used to develop a portfolio identifying the experiences the student has been exposed to in the field. Students will keep a working journal during the semester to help assess the progress of their experience. (Prerequisite: Final semester standing and permission of instructor) Lecture: 1 hour, Clinical: 10 hours per week for 13 weeks - Lab Fee: $20

### CTIC (Computerized Tomography Imaging)

#### CTIC 1010 - Fundamentals of CT
(1 Credit)
This hybrid interactive, web-based course is designed to provide students with an overview of CT instrumentation, imaging applications, physics, data acquisition and history. Students will learn to apply theory to different types of CT equipment. Module 1 describes the history and evolution of computed tomography and the most common uses of CT scanning in medical imaging. You will learn the location and function of major CT equipment components and the basic digital imaging process. Module 2 provides an in-depth description of major CT equipment components and the sequence of events from the application of electrical current to the radiographic tube to the image. You will learn how adjusting the operator console parameters can affect CT image data and the elements of a digital image. Module 3 describes the methods of acquiring computerized topography images, the process of data acquisition and the factors that influence that process. You will learn the functions of the data acquisition system and the selectable scan factors used to acquire an image. Prerequisite: Acceptance into CT Certificate program with Credentials in Radiology, Nuclear Medicine or Radiation Therapy. 1 credit. (5 weeks, 4 hours/week)

#### CTIC 1020 - Procedures and Protocols in CT Imaging
(2 Credits)
This hybrid interactive, web-based course is designed to provide students with an overview of CT procedures. Students will match pathologic processes with the appropriate procedures; choose scan parameters; perform patient history assessments, preparation, filming, and archiving; review CT images for anatomy, quality, and pathology and common diseases diagnosed via CT. Module 4 describes the steps for computed tomography image reconstruction and the post-processing techniques needed for image enhancement. Students will learn how certain tools are used to view a CT image and the methods used for recording and archiving CT data. Workstation applications for specialized CT scanning are also described in this module. Module 7 explains how to properly position a patient and select appropriate scan parameters for common CT examinations. Students will learn why different window widths and levels are selected and the imaging planes required for each procedure. Module 6 explain the methods used to determine image quality in computed tomography and factors that affect image quality. You will learn how to identify CT image artifacts and the factors that influence artifacts. The tests associated with quality control programs are also discussed in this module. Prerequisite: Acceptance into CT Certificate program with Credentials in Radiology, Nuclear Medicine or Radiation Therapy. 2 credits. 10 weeks, 4 hours/week

#### CTIC 1030 - Cross-sectional Anatomy I
(6 Credits)
This hybrid interactive, web-based course will focus on anatomy of the human body as it is viewed in the various axial, coronal, and sagittal planes. Radiologic anatomy will be viewed in the context of illustrations and pictures of gross anatomical sections. Module 8 identifies and describes the anatomical planes and structures of the head and neck. You will also learn how to describe the stages of human embryo development as it relates to this region of the body. Module 9 describes the major structures of the chest, abdomen and pelvis and how these structures function. You will learn how to identify abdominal quadrants and how to locate origins or structures on a diagram or CT image. CT Clinical Practicum I course is designed...
to allow qualified technologists to complete the number of clinical procedures mandated by the American Registry of Radiographic Technologist (ARRT) to be considered eligible to apply to sit for certification in CT, while emphasizing the importance of patient care, radiation safety and the principles of radiation protection in the CT department. The course is designated to allow students hands-on experience documenting and performing CT exams within the clinical setting under the direct supervision of a registered technologist. This course is competency based, and students will be assessed through competency exams to document the achievement of clinical objectives. Prerequisite: Acceptance into CT Certificate Program with Credentials in Radiology, Nuclear medicine or Radiation Therapy. 6 credits. Lecture 10 weeks, 3.5 hours/week. Clinical 10 weeks, 16 hours/week.

CTIC 2010 - Patient Care for CT
(1 Credit)
This hybrid interactive, web-based course is designed to provide basic concepts of patient care as they relate to CT. Topics include emergency procedures, sterile and aseptic techniques, phlebotomy, body mechanics, infection control and standard precautions, patient assessment, cultural competence, contrast media, and basic pharmacology in imaging. Introduces Radiation Safety. Module 5 describe the methods used to measure patient dose and the role of the computed tomography technologist in reducing radiation exposure. You will learn shielding and positioning techniques designed to keep both you and the patient safe. Special considerations for pediatric patients are detailed in this module as well. Module 5a presents the basic principles, concepts, and procedures of radiation protection and radiobiology. Topics include radiation units; principles of radiation protection; absorbed dose calculations; health physics procedures; radiation exposure regulations; and reduction of radiation exposure to patients, personnel, and the environment. Prerequisite: Acceptance into CT Certificate Program with Credentials in Radiology, Nuclear medicine or Radiation Therapy; Fundamentals of CT; Procedures & Protocols in CT Imaging; Cross-sectional anatomy I 1 credit. 5 weeks, 4 hours/week

CTIC 2020 - Advanced applications and Pathology for CT
(3 Credits)
This hybrid interactive, web-based course is designed to provide students with advanced applications involving other modalities such as Interventional Radiology. Students will be introduced to common pathology imaged using CT with its advantages. Module 10 describes the current trends and basic procedures in computed tomography and how modifications are used for trauma and pathology. You will learn the uses of virtual CT in medical imaging and how CT is used in radiation therapy treatment planning, nuclear medicine and mobile imaging. Module 11 explains how to identify selected pathology on CT images and how to distinguish between the CT appearance of normal organ tissues and tissues with pathological changes. You will also learn the causes for common pathologies and their processes. This is part one of a two-part series. Module 12 is a continuation of Module 11 and is part two of a two-part series. This module explains how to identify selected pathology on CT images and how to distinguish between the CT appearance of normal organ tissues and tissues with pathological changes. You will also learn the causes for common pathologies and their processes. Prerequisite: Acceptance into CT Certificate Program with Credentials in Radiology, Nuclear medicine or Radiation Therapy; Fundamentals of CT; Procedures & Protocols in CT Imaging; Cross-sectional anatomy I 3 credits. Lecture 5 weeks, 3.5 hours/week. Clinical 5 weeks, 16 hours/week

CTIC 2030 - Cross-sectional Anatomy II
(6 Credits)
This hybrid interactive, web-based course will focus on anatomy of the human body as it is viewed in the various axial, coronal, and sagittal planes. Radiologic anatomy will be viewed in the context of illustrations and pictures of gross anatomical sections. Module 2 presents sectional anatomy of the cranium and facial bones. This module is designed to enhance your study of your sectional anatomy course textbook. Sections 2 through 6 provide a detailed study of the anatomy of the cranium and facial bones divided into portions. Module 4 presents sectional anatomy of the vertebral column and the spinal cord. This module is designed to enhance your study of your sectional anatomy course textbook. Sections 2 through 6 provide a detailed study of the spine. Module 6 presents sectional anatomy of the thorax. This module is designed to enhance your study of your sectional anatomy course textbook. Sections 2 through 8 provide a detailed study of thoracic anatomy. Module 9 presents sectional anatomy of the upper extremity, including the shoulder joint. This module is designed to enhance your study of your sectional anatomy course textbook. Sections 2 through 6 provide a detailed study of the anatomy of the upper extremity. Module 10 presents sectional anatomy of the lower extremity, including the hip joint. This module is designed to enhance your study of your sectional anatomy course textbook. Sections 2 through 5 provide a detailed study of the anatomy of the lower extremity, divided into portions. CT Clinical Practicum I course designed to allow qualified technologists to complete the number of clinical procedures mandated by the American Registry of Radiographic Technologist (ARRT) to be considered eligible to apply to sit for certification in CT, while emphasizing the importance of patient care, radiation safety and the principles of radiation protection in the CT department. The course is designated to allow students hands-on experience documenting and performing CT exams within the clinical setting under the direct supervision of a registered technologist. This course is competency based, and students will be assessed through competency exams to document the achievement of clinical objectives. Prerequisite: Acceptance into CT Certificate Program with Credentials in Radiology, Nuclear medicine or Radiation Therapy; Fundamentals of CT; Procedures & Protocols in CT Imaging; Cross-sectional anatomy I 6 credits. Lecture 10 weeks, 3.5 hours/week. Clinical 10 weeks, 16 hours/week
### CYBR (Cybersecurity)

**CYBR 1100 - Introductory Cyber Range Tools and Techniques**  
(3 Credits)  
This course focuses on techniques, considered preventative in nature, which are used to manage and protect networking devices from external attacks. This course utilizes hands-on virtual labs which allow students to examine sophisticated devices such as ASA firewalls and to explore how these devices may be used to control access to resources. We will also explore methods to test, audit, and analyze the outcomes of a cyber-attack. Lecture: 3 hours, Lab 1 hour. - Lab Fee: $20

**CYBR 1200 - Defending Internal Threats using the Cyber Range**  
(3 Credits)  
This course focuses on techniques, considered preventative in nature, which are used to manage and protect networking devices from internal attacks. This course utilizes hands-on virtual labs which allow students to examine sophisticated devices such as ASA firewalls and to explore how these devices may be used to control access to resources. We will also explore methods to test, audit, and analyze the outcomes of a cyber-attack. Lecture: 3 hours, Lab 1 hour. - Lab Fee: $20

### DAST (Dental Assisting)

**DAST 1010 - Oral Biology I**  
(2 Credits)  
This is an introductory course in head and neck anatomy and physiology for the dental assistant. Particular attention is devoted to the oral cavity. Topics include the terminology and function of the teeth, occlusion, skull, nerve innervation and blood flow. (Prerequisite: Enrollment in Dental Assisting Program) Lecture: 2 hours

**DAST 1020 - Preventive Dentistry**  
(2 Credits)  
This course offers students an introduction to the prevention and management of oral diseases. (Prerequisite: Enrollment in Dental Assisting Program) Lecture: 2 hours

**DAST 1030 - Chairside Dental Assisting I**  
(4 Credits)  
This course introduces students to procedures and practices involved in assisting the dentist. Content includes the preparation, use and care of dental instruments and equipment; patient management; basic microbiology and infection control procedures. (Prerequisite: Enrollment in Dental Assisting Program) Lecture: 3 hours, Lab: 4 hours - Lab Fee: $20

**DAST 1040 - Oral Biology II**  
(3 Credits)  
This course covers patient evaluation with medical histories, medical emergencies and oral conditions. Students are introduced to the fundamental concepts involving the development of oral tissues. (Prerequisite: DAST 1010) Lecture: 2.5 hours

**DAST 1050 - Chairside Dental Assisting II**  
(5 Credits)  
This course is a continuation of DAST 1030. Students develop basic skills for assisting the dentist with dental specialties, such as endodontics and oral and maxillofacial surgery. Students are assigned to dental treatment facilities for supervised practice of clinical skills. Includes a one-week intercession. (Prerequisites: BIOL 1020 or 1070) Lecture: 2 hours, Lab: 4 hours, Clinical: 320 hours over 16 weeks - Lab Fee: $20

**DAST 1060 - Dental Office Procedures**  
(2 Credits)  
This course covers principles and practices of the dental office. Topics include telephone, patient and appointment management; the preparation, use and care of office and treatment records; third party payment; supply and inventory control; use of computers to perform basic dental office procedures; and the legal and ethical standards required of professional dental personnel. Lecture: 2 hours
DAST 1225 - Dental Materials Lecture
(1 Credit)
This course introduces students to the materials used in dental practice, including their physical properties and uses and considerations for their selection. (Prerequisite: Enrollment in Dental Assisting Program) Lecture: 1 hour

DENT (Dental Assisting/Hygiene)

DENT 1000 - Introduction to Dental Health Careers
(2 Credits)
This course provides an introduction to dental assisting and dental hygiene fields. Students gain an understanding of both professions, how to achieve success in dental assisting and dental hygiene programs and basic dental terminology. This course is a prerequisite for entering the dental hygiene program and optional for the dental assisting program. Lecture: 2 hours - Lab Fee: $20

DENT 2010 - Oral Radiography
(4 Credits)
This is a foundation course for dental radiographers. Topics include fundamentals of radiation physics, generation and control of the radiation beam, basic radiation biology and methods of population protection, films and film processing, radiographic projection and basic radiographic anatomy and pathology. Supervised laboratory practice includes exposure, evaluation and interpretation of intraoral and panoramic radiographs. (Prerequisite: Enrollment in Dental Assisting or Dental Hygiene Program) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

DENT 2220 - Dental Materials Lab for Dental Hygienists
(1 Credit)
This hybrid course has an outline component with hands-on experience for the dental hygiene student to learn about and practice with materials and techniques used in dental hygiene practice. (Prerequisite: Acceptance into the Dental Hygiene program). Lab: 4 hours - Lab Fee: $10

DENT 2225 - Dental Materials Lab for Dental Assistants
(1 Credit)
This lab provides hands-on experience for dental assisting students to develop skills in the preparation and manipulation of materials commonly used in dental practice. (Prerequisite: Enrollment in Dental Assisting Program) Lab: 4 hours - Lab Fee: $10

DHYG (Dental Hygiene)

DHYG 1010 - Dental and Oral Anatomy
(3 Credits)
This course is a study of the structure and function of the mouth, teeth, head and neck. (Prerequisite: Acceptance into the Dental Hygiene Program) Lecture: 3 hours. - Lab Fee: $20

DHYG 1020 - Dental Hygiene I
(3 Credits)
This course introduces students to the fundamental skills and procedures in dental hygiene practice. (Prerequisite: Acceptance into the Dental Hygiene Program) Lecture: 3 hours - Dental Hygiene Fee: $100

DHYG 1030 - Clinical Dental Hygiene I
(2 Credits)
This course provides an opportunity for students to apply the principles studied in DHYG 1020 in the pre-clinical setting. Students work with mannequins and laboratory partners. (Prerequisite: Acceptance into the Dental Hygiene Program) Lab: 6 hours - Lab Fee: $20

DHYG 1040 - Oral Embryology and Histology
(2 Credits)
This course involves the study of the development, microscopic structure and function of oral and facial tissues. Lecture: 2 hours
### DHYG 1050 - Dental Hygiene II
(3 Credits)
A continuation of the principles of DENT 1020, this course covers the philosophy of prevention, concepts of health and wellness, the dental hygiene treatment plan oral infection control, sealants and fluorides. Emphasis is on communication skills, patient management and development and implementation of educational strategies. (Prerequisites: DHYG 1020, 1030) Lecture: 3 hours

### DHYG 1060 - Clinical Dental Hygiene II
(3 Credits)
This course continues application of the principles and skills learned in DHYG 1020 and DHYG 1030 as well as new material learned in DHYG 1050 including patient education and management. (Prerequisites: DHYG 1030) Clinic: 8 hours - Lab Fee: $20

### DHYG 2010 - Pathology
(2 Credits)
This course is an examination of general and oral diseases. Content includes etiologic agents, tissue response to injury, immunopathology, neoplasia, cardiovascular disease, general diseases with oral manifestations and oral pathology. Consideration is given to specific conditions of importance to oral assessment and care. (Prerequisite: BIOL 1020, DHYG 1040) Lecture: 2 hours

### DHYG 2020 - Dental Hygiene III
(3 Credits)
This course continues to expand on the principles of dental hygiene practice. Topics include service to patients with special needs and nutrition, including nutritional counseling. (Prerequisites: DHYG 1050, 1060) Lecture: 3 hours - Dental Hygiene Fee: $100

### DHYG 2030 - Clinical Dental Hygiene III
(4 Credits)
This course continues application of the principles and skills practiced in DHYG 1050, 1060 and 2020. (Prerequisites: DHYG 1050 and 1060) Clinic: 12 hours - Lab Fee: $20

### DHYG 2040 - Community Dental Health I
(2 Credits)
This course introduces students to the principles of dental hygiene practice in the community setting. Content includes financing and delivery of care, cultural diversity, education of groups, program planning and evaluation and management of the evidence base for dental hygiene practice. (Prerequisite: PSYC 2010, DHYG 1060) Lecture: 2 hours

### DHYG 2045 - Community Dental Health II
(1 Credit)
This course allows students to apply principles of dental hygiene practice through a supervised externship in a community dental health facility. (Prerequisite: DHYG 1010, 2020 and 2030) Clinic: 3 hours - Lab Fee: $10

### DHYG 2050 - Periodontics
(3 Credits)
This course involves an intensive study of the periodontium as it relates to dental hygiene practice. Content includes epidemiology and pathogens of periodontal disease, assessment of periodontal status, current therapeutic intervention and strategies for maintenance of the periodontal patient. (Prerequisites: BIOL 1020 and 2210) Lecture: 3 hours

### DHYG 2060 - Dental Hygiene IV
(2 Credits)
This course continues to expand on principles of dental hygiene practice. Content includes legal and ethical issues, dental specialties and entering the professional work force. (Prerequisite: DHYG 2020, 2030) Lecture: 2 hours

### DHYG 2070 - Clinical Dental Hygiene IV
(5 Credits)
This course allows students to continue to apply the principles and skills practiced in DHYG 2020, 2030 and 2060. Integration of dental hygiene procedures into a complete dental hygiene service is covered. (Prerequisite: DHYG 2030) Clinic: 15 hours - Lab Fee: $20
DHYG 2090 - Pharmacology for the Dental Hygienist
(3 Credits)
This course is a study of the principles of pharmacology as they relate to oral health care. Content includes indications and contraindications for use, pharmacological effects, adverse reactions and interaction of drugs. Special consideration is given to drugs commonly used in dentistry, as well as oral implications of drugs. (Prerequisites: BIOL 1020, DHYG 1020) Lecture: 3 hours

DHYG 2200 - Local Anesthesia for the Registered Dental Hygienist
(2 Credits)
This course is designed to enable practicing dental hygienists to gain the knowledge and skill needed to earn a permit to administer local anesthesia in Rhode Island. Topics include oral anatomy, neurophysiology, the pharmacology and pharmacokinetics of local anesthetic agents, legal issues related to local anesthesia and basic injection techniques. Students will serve as patients for each other. (Prerequisites: Active licensure as a dental hygienist in Rhode Island or another state with substantially similar licensure requirements, current CPR certification (American Heart Association, Health Care Provider level); Completed hepatitis B vaccination series) Lecture: 2 hours, Lab: 2 hours - Local Anesthesia Course Fee-DH: $750

DHYG 2201 - Administration of Nitrous Oxide for the Registered Dental Hygienist
(1 Credit)
This course is designed to enable licensed dental hygienists to gain the knowledge and the skill indicated to earn a permit to administer nitrous oxide in Rhode Island. Topics will include: History of Nitrous Oxide, review of oral anatomy, the circulatory and respiratory system in pediatrics and adults, review of physiology and psychology of pain and anxiety, pain control modalities, pharmacology of Nitrous oxide and drug interactions, patient assessment and monitoring, preventing and managing complications, description and use of inhalation equipment, sedation and general anesthesia techniques and ethical and legal considerations. Students participating in the class will serve as patients for each other. Pre-requisite Information: Active licensure as a dental hygienist in Rhode Island or another state with substantially similar licensure requirements, current CPR certification at the American Heart Association, Health Care Provider level: Completed Hepatitis B vaccination series. - Lab Fee: $20

DHYG 2202 - Management of Medical Emergencies for the Public Health Dental Hygienist
(1 Credit)
This course prepares Registered Dental Hygienists to meet the educational requirements to manage medical emergencies as a licensed Public Health Dental hygienist. Topics will include: Risk assessment through evaluation of clinical implications for potential emergencies related to specific items on a health history form. Recognition and management based on clinical signs and symptoms for emergency related medical conditions. Implementation of an emergency plan through simulation exercises. (Prerequisites: Registered Dental Hygienist who holds a valid license to practice in the State of Rhode Island or another state with substantially similar licensure requirements, current CPR certification at the American Heart Association, Health Care Provider level and has fulfilled a minimum of three (3) years of full-time or an equivalent of 4500 hours of clinical dental hygiene experience.)

DHYG 2203 - Infection Control for the Public Health Dental Hygienist
(1 Credit)
This course is designed to prepare the Registered Dental Hygienist to meet the educational requirements for infection control in the dental setting alternative public health dental environments such as schools, mobile dental vans and long term care facilities. (Prerequisites: Registered Dental Hygienist who holds a valid license to practice in the State of Rhode Island who has fulfilled a minimum of three (3) years of full-time or an equivalent of 4500 hours of clinical experiences.)

DHYG 2204 - Risk and Practice Management for the Public Health Dental Hygienist
(1 Credit)
This course will prepare Registered Dental Hygienists to meet the educational requirements on risk management as a licensed public health dental hygienist. Topics will include Risk management as a public health dental hygienist, practice management, dental billing and coding, dental equipment vendors, grant writing and resources. A dental externship at a community health center will be required. Guidelines for treating geriatric and pediatric patients will be discussed. Tool kit links through the Rhode Island Department of Health for public health dental hygiene practice will be addressed. (Prerequisites: Registered Dental Hygienist who holds a valid license to practice in the State of Rhode Island or another state with substantially similar licensure requirements, current CPR certification at the American Heart Association, Health Care Provider level and has fulfilled a minimum of three (3) years of full-time or an equivalent of 4500 hours of clinical dental hygiene experience.)
# DMSD (Diagnostic Medical Sonography)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DMSD 2100</td>
<td>Patient Care in Sonography</td>
<td>3</td>
<td>This course is designed to develop the knowledge and skills necessary to address the needs of the patient in the diagnostic imaging department. The success of the students in the clinical setting requires the ability to conduct themselves in a professional and ethical manner. The safety of the patient requires the student to have knowledge of the patient assessment, basic nursing skills and the ability to react to medical emergencies. Lecture: 3 hours</td>
</tr>
<tr>
<td>DMSD 2210</td>
<td>Sonographic Physics</td>
<td>4</td>
<td>This course provides students with theoretical and practical aspects of ultrasound physics and instrumentation. Wave form, propagation, velocity, wave length, acoustic impedance, reflection and rarefaction are discussed. Components of the ultrasound imager are examined as well as recording devices and basic Doppler principles. (Prerequisite: MATH 1200 or MATH 1900 or MATH 1910 or equivalent) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>DMSD 2220</td>
<td>Sonographic Imaging</td>
<td>3</td>
<td>This course provides students with general information that has application in all the ultrasonic imaging concentrations. It addresses standard protocols for patient care, as well as the management of data from other imaging modalities, laboratory findings and patient history. Pertinent legal principles are also covered. An overview of the categories in which disease occurs is included. The biological effects of ultrasound is discussed along with quality control procedures and their importance. Lecture: 3 hours</td>
</tr>
<tr>
<td>DMSD 2230</td>
<td>Abdominal Ultrasound</td>
<td>4</td>
<td>This course provides a foundation of physiology, pathology and pathophysiology as it related to the human abdomen specific to the performance of abdominal Sonography. Students begin to recognize normal and abnormal imaging as it relates to anatomy, pathology and pathophysiology of the abdomen. Bioeffects, ALARA principle, pertinent in-vitro and in-vivo studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will include development of entry level scanning techniques and protocols on the human abdomen. Students will demonstrate the ability to perform entry level abdominal sonographic examinations using real-time sonographic equipment, Doppler and color Doppler equipment with various transducers. (Prerequisites: DMSD 2100) Lecture: 3 hours, Lab 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>DMSD 2235</td>
<td>Ultrasound for Small Parts, Gynecology and Male Pelvis</td>
<td>4</td>
<td>This course provides a foundation of physiology, pathology and pathophysiology as they relate to the male and female pelvis, thyroid, breast and scrotum. The student will begin to recognize normal and abnormal imaging as they relate to anatomy, pathology and pathophysiology of these structures. Scanning techniques and protocols are discussed in normal and abnormal conditions. Bio-effects, ALARA principle, pertinent in-vitro and in-vivo studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will include further development of entry to mid-level scanning techniques and protocol on the human male and female pelvis, thyroid, breast, and scrotum. Students will demonstrate the ability to perform entry to mid-level sonographic examinations using real-time sonographic equipment, Doppler and color Doppler equipment with various transducers. (Prerequisites: DMSD 2230) Lecture 3 hours, Lab 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>DMSD 2236</td>
<td>Musculoskeletal Sonographic Imaging</td>
<td>3</td>
<td>This course provides a foundation of anatomy and pathology as they relate to the human musculoskeletal system specific to the performance of sonography. Students will recognize normal and abnormal sonographic imaging related to the shoulder, elbow, hand and wrist, hip, knee, and foot and ankle. Bioeffects, LARA, principles of sonography will be incorporated in the didactic and laboratory classes. Laboratory experience will include development of entry-level sonographic scanning techniques of the musculoskeletal system. Student will demonstrate the ability to perform entry-level musculoskeletal sonographic examinations using real-time sonographic equipment, Doppler, and color Doppler with appropriate transducers. (Prerequisite DMSD 2210 or any Registered Sonographer with ARDMS or CCI. Lecture: 2 hours, Lab: 2 hours)</td>
</tr>
<tr>
<td>DMSD 2240</td>
<td>Obstetrical Ultrasound</td>
<td>4</td>
<td>This course will focus on the embryology and fetal development in the first, second and third trimester. Recognition of normal and abnormal anatomy will be addressed in the obstetrical, embryonic and fetal patient. Abnormal patterns of pathology and pathophysiology including genetic malformations are discussed. Scanning techniques, protocols and sonographic findings are discussed in the normal and abnormal conditions. Bio-</td>

2019-2020 | CCRI Catalog
Community College of Rhode Island

effects, ALARA principle, pertinent in-vitro and in-vivo studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will include further development of entry to mid-level scanning techniques and protocol on the human female obstetrical, embryonic, and fetal patient. Students will demonstrate the ability to perform entry to midlevel level sonographic examinations using real-time sonographic equipment, Doppler and color Doppler equipment with various transducers. (Prerequisites: DMSD 2235) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

DMSD 2241 - General Ultrasound Practicum I
(3 Credits)
Initial clinical scanning experience of the abdomen is covered. This course focuses on clinical application of standard protocols of the abdomen. Normal and abnormal anatomy are emphasized. Students begin to develop the critical thinking skills needed to correlate the examination with clinical history. Students must be competent in aortic and renal examinations at the completion of this class. Clinical education and competency occurs under the supervision of a Registered Sonographer. (Prerequisite: DMSD 2230) Clinical: 32 hours per week

DMSD 2242 - General Ultrasound Practicum II
(3 Credits)
This practicum involves ongoing assessment of advanced clinical skills of the abdomen incorporating advanced identification of pathology and pathophysiology. Age specific scanning protocol are covered (infant to adult). Basic scanning protocol on male and female pelvis, thyroid, breast and scrotum is covered. Students must be competent on the complete scan of the abdomen at the completion of this class. Clinical education and student competency is under the supervision of a Registered Sonographer. (Prerequisite: DMSD 2241) Clinical: 32 hours per week

DMSD 2243 - General Ultrasound Practicum III
(3 Credits)
This practicum involves ongoing assessment of advanced clinical skills of the male and female pelvis, thyroid, breast and scrotum incorporating advanced identification of pathology and pathophysiology. Basic obstetrical scanning protocol begins with a focus on normal anatomy of the maternal, embryonic and fetus. Students must demonstrate critical thinking and competency in all areas of abdominal ultrasound, male and female pelvis and small parts and basic obstetrical examinations. Students must be competent on the complete scan of the female and male pelvis, small parts and basic obstetrical scanning at the completion of this class. Clinical education and student competency and verification is under the supervision of a Registered Sonographer. (Prerequisite: DMSD 2242) Clinical: 32 hours per week

DMSD 2245 - Sonographic Anatomy
(3 Credits)
This course provides comprehensive coverage of the abdomen and superficial structures (small parts) and their sonographic appearance. Pertinent gross anatomy, sectional anatomy, physiology, pathology and pathophysiology are examined. Students relate specific anatomy to scanning plane and preferred scanning protocols. Lecture: 3 hours

DMSD 2250 - Vascular Ultrasound I
(4 Credits)
This course provides students with the basic information specific to the performance of vascular Sonography. Anatomy, pathology and pathophysiology of the vascular system including arterial, cerebrovascular and venous systems are included. Scanning protocols for the upper and lower extremity are addressed. Bioeffects, ALARA principle, pertinent in-vitro and in-vivo studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will include the use of plethysmography and real-time Sonography to evaluate and record the hemodynamics of arterial flow. The recognition of normal anatomy, basic pathology and pathophysiology are addressed. Students will demonstrate the use of plethysmography and real-time Sonography equipment with vascular transducers, Doppler and color Doppler to perform entry level vascular Sonography examinations. (Prerequisites: DMSD 2100) Lecture: 3 hours, Laboratory: 2 hours - Lab Fee: $20

DMSD 2251 - Vascular Ultrasound II
(4 Credits)
This course provides an in-depth of vascular ultrasound including pathophysiology, etiology of disease clinical findings and related symptoms. Age-specific testing is discussed. Related testing for cerebrovascular, upper and lower extremity venous circulation is covered. Scanning techniques and protocols are discussed in normal and abnormal conditions. Bio-effects, ALARA principle, pertinent in-vitro studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will included further development of entry to mid-level scanning techniques and protocol on the cerebrovascular, upper and lower extremity venous circulation. Students will demonstrate the ability to perform entry to mid-level sonographic examinations using real-time sonographic equipment, Doppler and color Doppler equipment with various transducers. (Prerequisites: DMSD 2250) Lecture 3 hours, Lab 2 hours - Lab Fee: $20
DMSD 2252 - Advanced Vascular Ultrasound
(4 Credits)
This course will focus on the application of vascular ultrasound relating to abdominal vasculature and other specialty examinations such as aorta, renal transplant, TIPS procedure, transcranial Doppler, pseudoaneurysm, mapping and the use of ultrasound contrast agents. Interpretation skills on all testing in all disease states will be further developed. Scanning techniques, protocols and sonographic findings are discussed in the normal and abnormal conditions. Bioeffects, ALARA principle, pertinent in-vitro studies, exposure display indices, and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Laboratory experience will include advanced scanning techniques and protocol on aorta, renal transplant, TIPS procedure, transcranial Doppler, pseudoaneurysm and fistula. Students will demonstrate the ability to perform advanced level sonographic examinations using real-time sonographic equipment, Doppler and color Doppler equipment with various transducers. (Prerequisite: DMSD 2251) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

DMSD 2253 - Vascular Practicum I
(3 Credits)
This course provides students with initial clinical scanning experience for upper and lower extremity arterial examinations. Clinical application of standard protocols focuses on recognition of normal plethysmographic tracings, normal ultrasound vascular imaging and Doppler patterns. Students begin to develop the critical thinking skills required to correlate clinical history with exam requirements. Clinical education and clinical competency occurs under the supervision of a registered Vascular Sonographer. (Prerequisite: DMSD 2250) Clinical: 32 hours per week

DMSD 2254 - Vascular Practicum II
(3 Credits)
This course provides students with initial clinical scanning experience for cerebrovascular and venous examinations. Clinical application of standard protocols focuses on normal vascular ultrasound imaging for cerebrovascular and venous examinations. Recognition of normal and abnormal images and Doppler patterns are included. Students use critical thinking skills to integrate clinical history with abnormal findings. Clinical education and clinical competency occurs under the supervision of a registered Vascular Sonographer. (Prerequisite: DMSD 2251) Clinical: 32 hours per week

DMSD 2255 - Vascular Practicum III
(3 Credits)
This course provides students with advanced clinical scanning experience for upper and lower extremity arterial, venous, and cerebrovascular examinations. Final competency evaluation will occur along with the opportunity to perform abdominal vasculature and rare specialty examinations. Students use critical thinking skills to integrate clinical history to abnormal findings. Clinical education and clinical competency occurs under the supervision of a registered Vascular Sonographer. (Prerequisite: DMSD 2252) Clinical: 32 hours per week

DMSD 2260 - Echocardiography I
(4 Credits)
This course provides students with a basic information specific to the performance of echocardiography. An overview of basic normal and abnormal anatomy, cardiac measurements, pathology and pathophysiology will be covered. Bioeffects, ALARA principle, pertinent in-vitro and in-vivo studies, exposure display indices, and maximum safe exposure levels will be incorporated into didactic and laboratory classes. Laboratory will utilize sonographic equipment using two dimensional, M-Mode, Doppler and color Doppler for recognition of normal and abnormal anatomy, pathology and pathophysiology with basic scanning techniques, and specific protocols in echocardiography with related findings. Cardiac windows will include parasternal and apical views, recognizing cardiac chambers, valves, walls and other structures. (Prerequisites: DMSD 2100) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

DMSD 2261 - Echocardiography II
(4 Credits)
This course expands on the material presented in Echocardiography I and continues to provide students with the knowledge necessary to capably perform a complete and diagnostic echocardiographic examinations using M-mode, 2-dimensional Doppler and color Doppler modalities. More complex anatomy and abnormal pathology will be addressed. Scanning techniques, specific protocols and echocardiographic findings will be discussed in relation to these more complex abnormalities including PLAX, RVIT, RVOT, PSAX views. The development of the ability to perform examinations in these areas will occur with classroom experience. using real-time equipment with transthoracic transducers and Doppler and color Doppler display modes. Bioeffects, ALARA principle, pertinent in-vitro studies, exposure display indices and maximum safe levels will be incorporated into the didactic and laboratory classes. (Prerequisite: DMSD 2260) Lecture: 3 hours, Lab: 2 hours. - Lab Fee: $20

DMSD 2262 - Advanced Echocardiography
(4 Credits)
This course expands on the material presented in Echocardiography I and II, and continues to provide students with the knowledge necessary to capably perform a complete and diagnostic echocardiographic examination using M-mode, 2-dimensional Doppler and color Doppler
modalities. More complex anatomy and abnormal pathology will be addressed including equation for aortic stenosis, mitral stenosis, pericardial effusion, hypertrophic cardiomyopathy, ischemic heart disease. Bioeffects, ALARA principle, pertinent in-vitro studies, exposure display indices and maximum safe exposure levels will be incorporated into the didactic and laboratory classes. Scanning techniques, specific protocols and echocardiographic findings will be discussed in relation to these more complex abnormalities. The development of the ability to perform examinations in these areas will occur with classroom experience using real-time equipment with transthoracic transducers and Doppler and color Doppler display modes. (Prerequisite: DMSD 2261) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

DMSD 2263 - Echocardiography Practicum I
(3 Credits)
This practicum involves the observation and initial scanning experience of transthoracic adult cardiac sonographic examinations with emphasis on normal Two-dimensional, M-Mode and Doppler pattern recognition. Students are under the supervision of a Registered Echocardiographer. (Prerequisite: DMSD 2260) Clinical: 32 hours per week

DMSD 2264 - Echocardiography Practicum II
(3 Credits)
This practicum involves the clinical performance of transthoracic adult cardiac sonographic examinations with emphasis on normal Two-dimensional, M-Mode and Doppler pattern recognition. Students are under the supervision of a Registered Echocardiographer. (Prerequisite: DMSD 2263) Clinical: 32 hours per week

DMSD 2265 - Echocardiography Practicum III
(3 Credits)
This practicum involves the clinical performance of transthoracic adult cardiac sonographic examinations with emphasis on normal Two-dimensional, M-Mode and Doppler pattern recognition. Focus is on performing complete exams on patients with complex disease states. Students are under the supervision of a Registered Echocardiographer. (Prerequisite: DMSD 2264) Clinical: 32 hours per week

DMSD 2500 - Diagnostic Medical Sonography Seminar
(3 Credits)
This is an interactive course combining General Abdominal Students, Echocardiography students and Vascular Students. This provides students with an opportunity to discuss their scanning experience and review skills necessary for professional practice. Students prepare a research project on a topic in their area of specialty. This includes patient history, clinical findings, anatomy, pathology, scanning protocols, image interpretation, differential diagnosis and patient care. Students prepare and deliver an oral presentation to the class based on their research using power point or other appropriate methods. (Prerequisite: DMSD 2240 or DMSD 2262 or DMSD 2252) Lecture: 3 hours

ECON (Economics)

ECON 2030 - Principles of Microeconomics
(3 Credits)
(formerly ECON 2020) This course studies economic principles with emphasis on the price system, resource allocation, industrial organization, international trade and comparative economic systems. (Prerequisite: MATH at the 0101 level required, MATH 1200 recommended.) Lecture: 3 hours

ECON 2040 - Principles of Macroeconomics
(3 Credits)
(formerly ECON 2010) This course studies the fundamental principles, problems and policies of the American economic system. Major emphasis is placed on the institutions of the economy, supply-demand analysis, national income theory, monetary and fiscal policy and growth analysis. (Prerequisite: MATH at the 0101 level required, MATH 1200 recommended.) Lecture: 3 hours

EMER (Emergency Management)

EMER 1000 - Fundamentals of Emergency Management
(3 Credits)
This course provides information that enables persons entering the profession or expanding their roles to function effectively with a broad array of emergency management issues. The primary purpose is to provide an overview of the characteristics, functions, resources and capabilities of an integrated system and various emergency management services (EMA, fire, police / security, EMS, health care providers, etc.) work together effectively. Emphasis is placed on how this system is applied to all government levels, across the four phases and all functions of emergency
management. It includes the role of national, regional and local services in a variety of disasters. This course is intended for a broad audience including personnel in public safety, emergency management, health care facilities, and others having an interest in gaining a working knowledge of preparedness. Lecture: 3 hours

**EMER 1010 - Understanding and Responding to Terrorism**  
(3 Credits)  
This course provides the students with an understanding of defining terrorism. Students will learn about its origins and the development of using terror to influence public policy decisions. The history and changing nature of terrorist organizations will also be presented. Terrorist groups and structure will be discussed. Individual and community awareness of, preparing and responding to terrorist acts are presented. This course is intended for anyone interested in learning more about terrorism. Lecture: 3 hours

**EMER 1020 - Bioterrorism and Public Health Emergencies**  
(3 Credits)  
This course will focus on both naturally occurring disease outbreak and bioterrorist events of the past and the implications of these events for the future. Key elements of emergency disaster planning will include surveillance, mass immunization and public information campaigns. This course could be beneficial to any student in the health science programs. Lecture: 3 hours

**EMER 1030 - Disaster Response Operations and Management**  
(3 Credits)  
This course focuses on the principles that promote effective disaster response operations and management. The nature of disasters, the context of U.S. response operations and the roles and responsibilities of various emergency management related organizations are examined. Myths and realities of human behavior in catastrophic events as well as divergent approaches to disaster response operations (e.g. command and control vs. networking / problem solving) are reviewed. The importance of providing an effective response for the affected population is discussed. This course also examines specific functions relating to flood, hazardous materials and terrorist incidents. Various problems associated with response operations are identified. Incident Command Systems and their interaction with emergency operations center are emphasized. The role of technology and mutual aid agreements are discussed (Prerequisite: EMER 1000) Lecture: 3 hours

**EMER 1040 - Managing the Psychological Impact of Terrorism and Disasters**  
(3 Credits)  
This course provides a broad overview of the causes, interventions and treatments of psychological trauma in the civilian and emergency response population. The causes looked at include, natural disasters, terrorist attacks and mass casualty or mass fatality incidents. The interventions and treatments are illustrated for the student, for both the short and long-term recovery of the victims of this trauma, using real life incidents. Lecture: 3 hours

**EMER 1050 - Disaster Training and Exercise Management**  
(3 Credits)  
This course is designed to provide the student with the understanding of the training and exercise requirements of Emergency Management. It will include how training and exercising plays a critical role in preparing a community or company for a disaster. Students will develop an Exercise Program and test part of that program with an actual exercise. The students will then develop an improvement plan from the lessons learned from that exercises. This course is intended for a person who would have an active role in emergency preparedness for an organization. Lecture: 3 hours

**EMER 2010 - Disaster Resource Management**  
(3 Credits)  
This course is designed to provide the student with an understanding of resource management in the context of emergency management. Coordinating of resources before, during and after a disaster is critical to alleviate pain and suffering of the victims of disaster. This course will provide the student with the skills needed to identify and manage those resources effectively. Students will examine the elements comprising incident logistics and how those elements integrate into the overall incident response and recovery process. Lecture: 3 hours

**EMER 2020 - Emergency Planning**  
(3 Credits)  
This course is designed to provide the student with an understanding of emergency planning in the world of emergency management. The Emergency Manager is tasked with the responsibility of developing Emergency Plans for the community or organization they represent. These plans may make the difference in saving lives and alleviate pain and suffering from a disaster. This course will provide the student with the skills needed to develop those plans effectively. This course is intended for a student who may become actively involved in emergency planning or work within a plan in the emergency management setting. Lecture: 3 hours
EMER 2030 - Professional Development in Emergency Management  
(3 Credits)  
This course is designed to allow the student in the emergency management program to take the skills that they have acquired in the program and mesh them with the skills they learn in this course; Emergency Communication, Problem Solving, Decision Making and Leadership. This course will prepare the student to enter into the emergency management field or pursue a higher degree. Lecture: 3 hours.

EMER 2500 - Practicum in Emergency Management  
(3 Credits)  
The practicum in Emergency Management provides the student with an opportunity to use the knowledge they have learned in the program and put it into practical use in the field of emergency management. By placing the student at an internship site that works in the various types of disaster preparedness and response, the student will be provided with real life experience. (Prerequisite: EMER 1000, EMER 1030, EMER 2010, EMER 2020 or permission of the instructor) Lecture: 1 hour, Lab: 6 hours

ENGL (English)

ENGL 0250 - Compensatory Writing Skills  
(3 Credits)  
This writing course is for students who need to learn and/or review paragraph form and basic sentence skills: parts of speech, punctuation, capitalization and sentence formation. By writing paragraphs, students will demonstrate their ability to plan organize and express ideas effectively and in grammatically correct sentences. (Prerequisite: English Placement Exam) Lecture: 3 hours

ENGL 0305 - Basic ESL Reading  
(3 Credits)  
This course is for students who need to strengthen foundational reading skills in English. Interacting with various text styles, students develop fluency, vocabulary and comprehension strategies. (Prerequisite: Appropriate ESL reading score placement.) Lecture: 3 hours - Lab Fee: $20

ENGL 0312 - English as a Second Language: Reading I  
(3 Credits)  
ENGL 0312 - English as a Second Language: Reading I (3 In-house Credits*) This course is designed to improve the vocabulary knowledge and reading comprehension of students speaking English as a second language. The content includes such college reading skills as developing word knowledge, identifying main ideas, locating important details and applying basic study strategies. Prerequisite: Appropriate ESL reading score placement or successful completion of ENGL 0305 AND successful completion of ENGL 1070 or placement into ENGL 1080.

ENGL 0500 - Basics of Composition  
(3 Credits)  
This course provides a comprehensive review of skills required in college-level writing courses including grammar usage, sentence variety, paragraph development, critical reading and thinking, brief essays, and research-paper elements. Prerequisite: ENGL 0250 with grade of C or better, appropriate placement score, or permission of instructor. Lecture: 3 hours

ENGL 0700 - Essential Reading Skills  
(3 Credits)  
This course is for students who need to build a foundation for college reading by mastering the skills that underlie successful reading. Instruction focuses on vocabulary development, word analysis, reading rate and accuracy, as well as literal reading comprehension. (Prerequisite: Appropriate test score or permission of instructor) Lecture: 2 hours; Lab: 1 hour - Lab Fee: $20

<tbody>
<tr>
<td>ENGL 0850</td>
<td>Basic College Reading</td>
<td>(3 Credits)</td>
<td>This course teaches the reading skills essential for success in college and everyday life. It focuses on the strategies needed for developing vocabulary, as well as strategies for improving comprehension and retention of college textbook material. In addition, a novel is required reading. (Prerequisite: Successful completion of ENGL 0700, appropriate test score or permission of instructor) Lecture: 2 hours; Lab: 1 hour - Lab Fee: $20</td>
</tr>
<tr>
<td>ENGL 0890</td>
<td>Critical Reading for College Success</td>
<td>(3 Credits)</td>
<td>In this course the student develops critical reading and thinking skills that are essential for college and workplace success. Focus is on building an enhanced vocabulary, as well as examining author's purpose and point of view, drawing inferences and applying advanced comprehension strategies. In addition, a work of nonfiction is required reading. (Prerequisite: Successful completion of ENGL 0850, appropriate test score or permission of instructor.) Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20</td>
</tr>
<tr>
<td>ENGL 1005</td>
<td>College Writing</td>
<td>(3 Credits)</td>
<td>This course focuses on the writing process: planning, organizing, developing, drafting, and revising. Course activities begin with paragraphs and progress to essays and include research documentation assignments. (Prerequisite: English placement exam, or completion of ENGL 0500 with a C or higher, or permission of instructor) Lecture: 3 hours. Completes the following requirement(s): humanities requirement (HUMN)</td>
</tr>
<tr>
<td>ENGL 1010</td>
<td>Composition I</td>
<td>(3 Credits)</td>
<td>Note: Composition I is recommended for all first-year students and required for many, depending on curriculum. The purpose of this course is to enable students to write fluent, accurate and effective essays, including research and documentation assignments. (Prerequisite: English placement exam or at least a C in ENGL 1005.) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1020</td>
<td>19th Century American Literature</td>
<td>(3 Credits)</td>
<td>This survey course examines American literature of the 19th century, including consideration of its cultural and historical contexts. (Meets Literature elective and English concentration requirements.) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1030</td>
<td>British Literature I</td>
<td>(3 Credits)</td>
<td>This survey course in British literature from the early Anglo-Saxon period to the eighteenth century examines selected works in various genres in light of their historical and cultural contexts. (Meets Literature elective and English concentration requirements.) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1040</td>
<td>World Literature to 16th Century</td>
<td>(3 Credits)</td>
<td>This course examines literature in translation of the Ancient World, Middle Ages, and Renaissance as a basis for understanding literature as an art and a reflection of its times, the humanities, and the modern world. (Meets Literature elective and English concentration requirements.) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1070</td>
<td>English as a Second Language I</td>
<td>(6 Credits)</td>
<td>This course is the first in the sequence of academic English-as-a-Second Language offerings at the college. It is designed for students who are pursuing academic studies at the college level. Prior knowledge of the English language is necessary. Grammar and sentence building in English are studied with sequential emphasis placed on listening, speaking, reading and writing. Outcomes of this course include ability to form several complete sentences regarding one topic. Students who have successfully completed this course will then take ENGL 1080. (Prerequisite: Recommendation following ESL placement testing) Lecture: 6 hours</td>
</tr>
<tr>
<td>ENGL 1080</td>
<td>English as a Second Language II</td>
<td>(6 Credits)</td>
<td>This course is a continuation of ENGL 1070 and is also designed for students pursuing academic studies at the college level. Listening and speaking continue to be areas of second language practice, with more emphasis on reading and writing skills. As an outcome, students will be able to form a coherent paragraph of eight to ten sentences. Students who have successfully completed this course will then take ENGL 1090. (Prerequisite: Successful completion of ENGL 1070 or recommendation following ESL placement testing) Lecture: 6 hours</td>
</tr>

<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>ENGL 1090</td>
<td>Paragraph Writing in English as a Second Language</td>
<td>6</td>
<td>This course is designed to increase the writing performance of students of English as a Second Language. It will emphasize the writing process and advanced grammar as students progress from generating acceptable sentences to combining sentences to form paragraphs. In addition, students will be able to form a multiple-paragraph essay as an outcome of the course. Students who have successfully completed this course will then take ENGL 1300. (Prerequisite: Successful completion of ENGL 1080 or recommendation following ESL placement testing) Lecture: 6 hours</td>
</tr>
<tr>
<td>ENGL 1120</td>
<td>Speech and Articulation for Speakers of English as a Second Language</td>
<td>3</td>
<td>This course emphasizes correct pronunciation of the English language, particularly through practice of the International Phonetic Alphabet. In addition, course content includes syllable stress and intonation. Perhaps equally important, ESL students will refine their listening skills in rapid American English speech. (Prerequisite: Successful completion of ENGL 1070 or placement into ENGL 1080). Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1130</td>
<td>English as a Second Language: College Speaking &amp; Listening</td>
<td>3</td>
<td>This English for Academic Purposes class is designed to begin to prepare students who are not native speakers of English for academic success in U.S. college programs. It focuses specifically on speaking and listening skills for college study. Topics reflect those in typical introductory college courses. Prerequisite: Successful completion of ENGL 1080 or placement into ENGL 1090. Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1200</td>
<td>Introduction to Literature</td>
<td>3</td>
<td>This course examines a variety of literary genres (fiction, nonfiction, poetry and drama) as expressions of the human desire to communicate philosophy, experience, and attitudes. Examples found in diverse literary cultures from ancient times to the present are the basis for reading, analyzing, and evaluating these forms of verbal expression. (Meets Literature elective and English concentration requirements) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1210</td>
<td>Introduction to Film</td>
<td>3</td>
<td>This course provides an introduction to the tools of film analysis by examining how narrative, mise-en-scène, cinematography, editing, and sound create meaning in film. Film is also examined for its social, cultural, and ideological significance. Introduction to Film provides students with the background for further film studies. (Meets literature and English concentration requirements; Prerequisite: None is required, though a general introductory literature course, such as Introduction to Literature [ENGL 1200] or World Literature [ENGL 1040 and ENGL 2040] is recommended.) - Lab Fee: $20</td>
</tr>
<tr>
<td>ENGL 1220</td>
<td>Introduction to Poetry</td>
<td>3</td>
<td>The purpose of this course is to deepen the students' engagement with the metaphorical nature of language through understanding and enjoyment of poetry. The selection of poems focuses on what poetry means and does, what needs and desires poetry fulfills in its writers and readers, and the cultural contexts and conditioning that define poetry and place value on its existence. (Meets Literature and English Concentration requirement.) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1230</td>
<td>Modern Literature</td>
<td>3</td>
<td>This one-semester survey course considers significant literature of the world from the turn of the twentieth century to the present. It examines many literary movements, including Modernism and Postmodernism, with emphasis on broadness of understanding and ability to interpret and evaluate texts. (Meets Literature elective and English Concentration requirements) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGL 1240</td>
<td>Readings in the Novel</td>
<td>3</td>
<td>Several novels, significant in the time of their appearance as well as in retrospect, are read to develop a student’s understanding of their place in the genre, not only as the diverse expressions of their authors and mirrors of their particular historical contexts but as social, cultural, and political forces. (Meets Literature and English Concentration requirements.) Lecture: 3 hours</td>
</tr>
</tbody>
</table>
ENGL 1250 - Readings in the Short Story
(3 Credits)
This course considers the development and themes of the short story. Significant examples from diverse cultures and historical eras are analyzed and discussed. (Meets Literature elective and English Concentration requirements.) Lecture: 3 hours

ENGL 1260 - Readings in Shakespeare
(3 Credits)
A number of major plays and sonnets by Shakespeare are analyzed in order to develop students' understanding of the works' dramatic, cultural and historical content, as well as various critical viewpoints. The plays are selected from the comedies, tragedies, and histories. (Meets Literature and English concentration requirement.) Lecture: 3 hours

ENGL 1270 - Contemporary Drama
(3 Credits)
This course includes plays from Ibsen to the present. Emphasis is on changing approaches to theater as well as the social, cultural and philosophical implications in the representative plays. (Meets Literature and English concentration requirements.) Lecture: 3 hours

ENGL 1280 - Dramatic Literature
(3 Credits)
This is a course in which historic and dramatic trends are viewed, including literary forms, the most important playwrights and socio-political effects on the dramatic literature of differing periods. (Meets Literature and English concentration requirements.) Lecture: 3 hours

ENGL 1290 - African American Literature
(3 Credits)
This course traces the development and impact of African American writers from the era of slavery to the present by examining the unique experiences and challenges presented in their works. Representative poetry, fiction, nonfiction and drama of major writers are studied for their literary, sociological and historical significance. (Meets Literature and English Concentration requirements) Lecture: 3 hours

ENGL 1300 - Composition I for Speakers of English as a Second Language
(6 Credits)
Students perfect their academic writing skills through a sequence of essay assignments, including a research project, with emphasis on rhetorical and grammatical issues particular to ESL. Students completing this course may take ENGL 1005 or 1010 as a follow-up course for elective credit as recommended by the instructor. (Prerequisite: ENGL 1090 or recommendation following ESL placement testing.) Lecture: 6 hours

ENGL 1360 - Science Fiction
(3 Credits)
This course involves reading and analyzing various science fiction novels, short stories and occasionally films produced since the late 19th century. Emphasis is placed on understanding the influence science and technology have had on modern life and how that influence has been shown in literature. (Meets Literature and English concentration requirements.) Lecture: 3 hours

ENGL 1370 - Literature of Imagination and Fantasy
(3 Credits)
This course examines fantasy as an enduring and ongoing part of humanity's literary heritage as seen through such examples as myth, fairy tale, gothic horror, and magical realism. As a literary form, fantasy not only broadens the reader's understanding of what literature is and what it does, but it explores the fundamentals of literature to suggest unusual and innovative ways of looking at the world. (Meets Literature and English concentration requirements.) Lecture: 3 hours

ENGL 1400 - Business Writing for Office Professionals
(3 Credits)
Note: This course is for Administrative Office Technology program students ONLY. This one-semester course includes a concentrated review of grammar and punctuation; correspondence (letters and memos); philosophy, psychology and standards in business communication; and brief exposure to informal and formal reports. Lecture: 3 hours
ENGL 1410 - Business Writing
(3 Credits)
This one-semester course includes philosophy, psychology, and standards in business communication; written and digital correspondence (letters, memos, and e-mails); and informal and formal report writing. Basic knowledge of Microsoft Word is strongly recommended. Meets general education requirements. Prerequisite: None, although ENGL 1005 and ENGL 1010 is strongly recommended.)

ENGL 1430 - Creative Writing
(3 Credits)
This course is an introduction to the craft of writing in its various forms including the personal essay, fiction, poetry and drama. Students produce work in these genres and develop critical objectivity through analysis of their creations as well as those of their classmates and published writers. (Meets English concentration requirement.) (Prerequisite: ENGL 1010. However, ENGL 2010 or ENGL 2015, is also recommended) Lecture: 3 hours

ENGL 2010 - Composition II
(3 Credits)
This course is an extension of Composition I (ENGL 1010). While in Composition I the emphasis is upon short expositional pieces, students of Composition II concentrate on development of the central idea in writing essays and, wherever appropriate, in descriptive and narrative prose. Course work includes writing at least one paper based on reading and research. Literature of an appropriate type is read and analyzed in terms of rhetorical statement, structure and device. (Meets English concentration requirements.) (Prerequisite: ENGL 1010 with a grade of C or better or a comparable basic level college course in rhetoric.) Lecture: 3 hours

ENGL 2015 - Advanced Writing for the Liberal Arts
(3 Credits)
Continuing Composition I (ENGL 1010) for students of liberal arts, this course is concerned with writing about ideas generated by books and articles. The aim of Composition II for Liberal Arts is to produce fully developed essays based on reading and research such as would be assigned in liberal arts courses in any college. A research paper or a series of short source papers, some on the same subject, is the major requirement of the course. (Prerequisite: ENGL 1010 with a grade of C or better or a comparable basic level college course in rhetoric.) Lecture: 3 hours

ENGL 2020 - 20th-Century American Literature
(3 Credits)
This survey course examines American literature of the twentieth century, including consideration of its cultural and historical contexts. (Meets Literature elective and English Concentration requirements.) Lecture: 3 hours

ENGL 2030 - British Literature II
(3 Credits)
This survey course in British literature from William Blake to the present examines selected works in various genres as representative of their historical and cultural contexts. (Meets Literature elective and English Concentration requirements.) Lecture: 3 hours

ENGL 2040 - World Literature from 16th Century
(3 Credits)
This course examines literature of the world in translation from the Enlightenment to the present in order to understand literature as a reflection and expression of its times, the humanities, and the modern world. (Meets Literature elective and English Concentration requirements.) Lecture: 3 hours

ENGL 2050 - Introduction to Literary Theory and Criticism
(3 Credits)
Although open to all, this course is particularly designed for English concentration students to deepen skills in critical thinking and writing about all genres of literature. Focus is placed on close textual reading, using appropriate literary terminology and applying various methodologies to analyze literature. In addition to class discussion and collaborative activities, students will engage in literary research and MLA style documentation. (Meets Literature and English concentration requirements.) (Prerequisites: ENGL 1010 and any 1000-level literature course.) Lecture: 3 hours

ENGL 2100 - Technical Writing
(3 Credits)
This course focuses on producing concise, clear, credible and objective reports, letters, memoranda and related workplace writing, including appropriately documented research. The course promotes writing that demonstrates and awareness of the reader. Basic knowledge of Microsoft Word is strongly recommended. (Prerequisite: Placement in Composition I or completion of College Writing with a grade of C or better.) Lecture: 3 hours
ENGL 2200 - Children's Literature
(3 Credits)
This one-semester course introduces the student to the range of children's literature from early folklore to current selections. Students read widely to develop discrimination in the selection of books for children of pre-kindergarten through eighth grade school levels, as well as develop the ability to interpret criteria and evaluate the different genres of literature suited for children. (Meets Literature and English concentration requirements.) Lecture: 3 hours

ENGL 2210 - Special Topics in Film
(3 Credits)
This course is meant to enable students who have achieved the basic understandings of film study and interpretation in Film as Literature I to continue their examination of the medium. They will pay special attention to various film genres, to the work of particular directors and to aspects of film theory. (Prerequisite: ENGL 1210 or permission of instructor, Lecture: 3 hours)

ENGL 2230 - Contemporary Literature
(3 Credits)
This course examines significant works of the last decade chosen from a rich variety of authors, topics, and cultures. Selected genres may include, but are not limited to, poetry, fiction, nonfiction, film, and literature of the performing arts. (Meets Literature and English Concentration requirements.) Lecture: 3 hours

ENGL 2250 - Adolescent Literature
(3 Credits)
Students read widely from a variety of literary genres and texts that are aimed at an adolescent audience. Focus is on methods for interpreting and evaluating adolescent literature. (Meets literature and English Concentration Requirements.) Lecture: 3 hours

ENGL 2270 - Multicultural American Literature
(3 Credits)
This course examines issues of race, ethnicity, and cultural identity in literature by writers of diverse backgrounds, including—but not limited to—African American, Asian American, Hispanic American, and Native American. Representative pieces of multicultural poetry, fiction, nonfiction, and drama are studied for their literary, sociological, and historical significance. (Meets literature and English concentration requirements.) Lecture: 3 hours

ENGL 2310 - Introduction to Screenwriting
(3 Credits)
This course introduces students to techniques that the screenwriter uses to develop characters, construct scenes, structure plot, and follow screenplay format. Students will analyze films and screenplays, write original scenes, and work on an original screenplay. Lecture: 3 hours

ENGR (Engineering (ENGR))

ENGR 1020 - Introduction to Engineering & Technology
(3 Credits)
This course introduces students to various tools and problem solving skills common to most fields of engineering and technology. The course will emphasize developing both individual critical thinking, and collaborative problem solving skills, essential in today's world of technology. Students will learn the basics of the engineering design process of product design, testing and evaluation. As teams, students will apply this process to complete a semester-long project that will involve practical problem solving, computer simulation and physical product fabrication. To assist in the project analysis, documentation and presentation, students will develop skills with spreadsheets, word processing and presentation software. (Prerequisite: MATH 0100 or higher or permission of instructor) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ENGR 1030 - Engineering Graphics
(3 Credits)
This course studies the theory of orthographic projection and the principles of descriptive geometry. Students construct exact drawings of three-dimensional objects including auxiliary views, cross-sections, dimensioning, pictorial drawings and free-hand sketching. Lecture: 2 hours, Lab: 3 hours

<tbody>
<tr>
<td>ENGR 2050</td>
<td>Engineering Mechanics Statics</td>
<td>3</td>
<td>This is a basic course built around solutions and applications of Newton's laws of forces in equilibrium. Systems of particles and rigid bodies are studied using standard scalar and vector methods. (Prerequisite: MATH 2141 or equivalent) Lecture: 4 hours</td>
</tr>
<tr>
<td>ENGR 2060</td>
<td>Engineering Mechanics Dynamics</td>
<td>3</td>
<td>This course covers the application of Newton's law of motion, to include kinematic and kinetic studies of the motion of systems of particles and rigid bodies, acted upon by unbalanced forces. (Prerequisites: ENGR 2050 and MATH 2142) Lecture: 4 hours</td>
</tr>
<tr>
<td>ENGR 2150</td>
<td>Introduction to Electrical Engineering</td>
<td>3</td>
<td>This basic course in electrical engineering includes a study of static, electric and magnetic fields, Coulomb's laws, capacitance and inductance, Gauss' Law, Ampere's Law, electrical current and voltage. (Prerequisites: MATH 2141 and PHYS 1100 or equivalent) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGR 2151</td>
<td>Introduction to Electrical Engineering Lab</td>
<td>1</td>
<td>Laboratory exercises reinforce the theory learned in the Introduction to Electrical Engineering course. Use of various electronic instruments to make measurements is an important part of the lab. (Prerequisite or Corequisite: ENGR 2150) Lab: 3 hours</td>
</tr>
<tr>
<td>ENGR 2160</td>
<td>Introduction to Engineering Analysis</td>
<td>2</td>
<td>This course introduces students to analytical methods employed in engineering problem solving using computer software. (Prerequisite: MATH 2141) Lecture: 1 hour, Lab: 2 hours</td>
</tr>
<tr>
<td>ENGR 2320</td>
<td>Digital Electronics</td>
<td>4</td>
<td>This course studies logical building blocks and functional building blocks such as OR gates, AND gates, inventors, XOR gates, registers, counters, adders, D/A converters, A/D converters, decoders, encoders and binary multiplexers. Number systems and codes, arithmetic processes and memory devices are also covered. Input, output, memory, control and arithmetic functional units are developed using functional building-blocks. Note: Engineering students should consult department chair or academic advisor before enrolling. (Prerequisite or corequisite: MATH 2141) Lecture: 3 hours, Lab: 3 hours</td>
</tr>
<tr>
<td>ENGR 2520</td>
<td>Microprocessor &amp; Microcomputers</td>
<td>4</td>
<td>This hands-on course familiarizes students with computer and microprocessor software and hardware. Computer architecture and interfacing with input and output devices is studied. Students develop an understanding of how the computer is used to control electronic and mechanical devices. (Prerequisite or corequisite: MATH 2141) Lecture: 3 hours, Lab: 3 hours</td>
</tr>
<tr>
<td>ENGR 2540</td>
<td>Mechanics of Materials for Engineering</td>
<td>3</td>
<td>This is a basic study of the theory of stresses and strains in beams, columns and thin-walled cylinders including combined bending and direct stresses. (Prerequisite: ENGR 2050) Lecture: 3 hours</td>
</tr>
<tr>
<td>ENGR 2620</td>
<td>Linear Electrical Systems and Circuit Theory for Engineers</td>
<td>3</td>
<td>This course offers a study of electrical linear circuit theorems, Kirchhoff's Laws, DC resistive networks, dependent sources, natural and forced response of first and second order circuits, sinusoidal steady-state response and AC power. (Recommended: Calculus background; Prerequisite: ENGR 2150; Prerequisite or Corequisite: MATH 2990) Lecture: 4 hours</td>
</tr>
<tr>
<td>ENGR 2621</td>
<td>Linear Circuits Lab</td>
<td>2</td>
<td>Topics covered in this lab include: DC measurements, natural and step response of first and second order circuits, AC measurements, impulse and frequency response and operational amplifiers. (Prerequisite or Corequisite: ENGR 2620) Lecture: 1 hour, Lab: 3 hours - Lab Fee: $20</td>
</tr>
</tbody>
</table>
ENGT (Engineering Technology (ENGT))

ENGT 1060 - AutoCAD (Basic)
(2 Credits)
This course develops the fundamental skills in drawing, presenting and interpreting ideas, shapes, and concepts using the graphic language of AutoCAD. This course provides practice in the use of Computer Aided Drafting, a technology that has impacted the way many products are designed and produced. Students will explore all the necessary commands needed to produce orthographic drawings and construction type drawings using micro-computers. Lecture: 1 hour, Lab: 2 hours - Lab Fee: $10

ENGT 1090 - Solid Modeling (Solid Works)
(2 Credits)
This course teaches students the fundamentals of "solid works" and the technique of three-dimensional design. Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

ENGT 2090 - Advanced Solid Modeling
(3 Credits)
Advanced Solid Modeling will enable the student to work with advanced designs and assemblies. This will include mold design, sheet metal design, weldments, and industry specific design tools. The students will learn to use COSMOSWorks to study deflections and load stress on their designs. Other applications would include rendering in PhotoWorks and animation techniques. (Prerequisite: ENGR 1030) Lecture: 2 hours, Lab: 2 hours

ETCN (Engineering Tech.-CNC)

ETCN 1000 - Mechanical Industrial Design
(3 Credits)
This course is designed to familiarize the student with components used in mechanical systems. The student will learn how to select components based on system requirements and how to implement the component into the system. Attention is given to currently manufactured components and the use of the manufacturers sizing and mounting procedures. More specifically the sizing and fitting of these elements based on function, power requirements, life and cost. (Prerequisite: ENGR-1030 AND Prerequisite or corequisite: ETCN-1100) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETCN 1100 - Blueprint Reading and the Machinery's Handbook
(3 Credits)
Detailed manufacturing part prints are the graphical representation of what the finished product should look like and the specifications required to make it. The Machinery’s Handbook is the encyclopedia used in the manufacturing environment; a storehouse of practical information used to assist not only CNC machinists, but also quality control personnel, tool or mold makers, machine designers and mechanical engineers to solve a list of manufacturing problems. This course uses these two resources to teach students how to interpret the language of blueprints and find the required information regarding machining processes such as speeds, feeds, cutting tool specifications and limits. The focus is on problem-solving skills and strategies. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETCN 1200 - Precision Measurement and Geometric Dimensioning and Tolerance
(3 Credits)
This course is designed to develop the student's ability to interpret Geometric Dimensioning and Tolerancing (GD&T) language and accurately and precisely measure manufactured parts and assemblies using micrometers, digital calipers and dial indicators. Language and systems of measurement and GD&T are studied and discussed. Basic handheld comparison tools, precision gages, scaled and precision measuring tools are used to accurately measure parts for both size and geometric form. Students also learn about sine bar use and setup, gage blocks care, surface plate preparation and part fixtureing. The feature control frame the geometric symbols in the application of the tolerances are also studied. (Prerequisite or corequisite: ETCN 1100.) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETCN 1300 - CNC Machining I
(3 Credits)
This course introduces students to CNC programming using flow charts and process operations planning. Fundamental word address (G and M code) industrial standards, practices and terms used in industry are covered. Machine tool axis motion, methods of work piece setup cutting tool, selection cutting tool compensation and canned cycles are reviewed. Students produce manually written part programs for three axis-milling machines and router, and two axis lathes. Review of blueprints, Geometric Dimensioning and Tolerancing (GD&T) terminology, and right angle trigonometry are covered. Students will set-up and operate CNC milling machines and lathes to make assigned parts. (Prerequisite: ENGR 1030; ETCN 1100; ETME 1020) Lecture: 1 hour, Lab: 4 hours - Lab Fee: $20
ETCN 2000 - Advanced Machining Skills  
(3 Credits)  
This course is designed to expose the manufacturing technology certificate and degree students to many different computer-controlled machining 
processes: machine tool set up, methods, and machining operations. This course will introduce additional machining processes and enhance the 
technical skills and theories learned in all the other manufacturing certificate courses. The students will acquire the fundamental knowledge and the 
technical skills needed to become technically proficient. Machining processes include electrical discharge machining, plasma cutting and computer-
controlled welding. (Prerequisites: ENGR 1030; ETME 1020; ETCN 1100, 1200, 1300, 2100 and 2200) Lecture: 2 hours, Lab: 3 hours - Lab Fee: $20

ETCN 2100 - Computer Aided Manufacturing  
(3 Credits)  
In this seven-and-a-half week course, students study the essentials of a computer-aided manufacturing system (CAM). This course uses MasterCam, 
which is an industrial software application, used to draw and create a tool path for CNC machining applications such as milling and turning. Students 
use CAM software in conjunction with computer-aided drawing files (CAD) to create machined features from a piece of stock material. Topics 
include using MasterCam to select the correct CNC machine tool, draw solid models, organize and optimize machining operations and time. Lecture: 1 hour, Lab: 4 hours - Lab Fee: $20

ETCN 2200 - CNC Machining II  
(3 Credits)  
This course is a continuation of the CNC Machining I and Computer-Aided Manufacturing courses. In this course, students will use MasterCam to 
create toolpaths and code for 3 and 4 axis CNC milling machines and 2 axis CNC lathes. ISO codes will also be written for the 5 axis wire EDM 
using MasterCam as well as imported files from SolidWorks and AutoCAD. Additionally, students will set up and machine assigned parts on 3 and 4 
axis CNC mills, 2 axis CNC lathes and the 5 axis wire EDM. (Prerequisites: ETCN 1300 and 2100) Lecture: 1 hour, Lab: 4 hours - Lab Fee: $20

ETCN 2250 - Lean Manufacturing  
(2 Credits)  
This course is designed to examine Lean Manufacturing and its strategies, using case studies and specified designed Lean labs. Lean tools such as 
Kaizen events and Value Stream Mapping (VSM) are the ideal tools to achieve breakthrough results. This course will focus on preparatory steps that 
must be taken to ensure achievable, measurable goals and team success. Students will learn how to identify and eliminate non-value-added steps, 
and will learn how performing small incremental steps will improve the company’s quality, productivity, and most importantly the bottom line. The 
class will focus on how to sustain the results attained during Kaizen events over the long-term. The value of the 5s Systems, Set-Reduction and Total 
Productive Maintenance will be studied. (Prerequisite: ETME 1020) Lecture: 1 hour, Lab: 2 hours

ETCN 2300 - 3D-Modeling and Prototyping  
(3 Credits)  
This course will study the types of Additive Fabrication (AS) or Additive Freeform Fabrication, as it is called in the industry. Topics include the 
history of Additive Manufacturing, the types of new generation machines used for A.M., and the types of materials, binders, and substrates used with 
this technology. Other topics include the size constraints, design constraints, and advantages and applications of this technology. The student will use 
SolidWorks and MasterCam as the manufacturing software to design and produce parts in the manufacturing lab using the Dimension SST 1200es 
CNC machine tool. (Prerequisites: ENGR 1030; ENGT 2090; ETCN 1300) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETCN 2350 - Automated Machining Technology  
(3 Credits)  
Key skills are needed for the growing 21st century advanced manufacturing workplace: wire EDM machining, 4 Axis milling, metal selection and 
heat treatment, plasma-torch technology, and robot integration. This course emphasizes set-up and safety in the work environment. This course will 
expand upon skills learned in CNC Machining I (ETCN 1300), Computer-Aided Manufacturing (MasterCam) (ETCN 2100), and Engineering 
Graphics (ENGR 1030). Students will use blueprint reading skills, machine processes skills and information from Machinery’s Handbook to properly 
set up and operate advanced-level machines with confidence. (Prerequisite: ENGR 1030; ETME 1020; ETCN 1300.) Lecture: 1 hours, Lab: 3 hours - Lab Fee: $20

ETCN 2360 - Manufacturing Quality Control  
(3 Credits)  
This course will give an elementary approach to the statistical techniques used in the quality control of manufactured parts. Topics covered include 
an introduction to quality concepts and statistical process control (SPC); variation and statistics; the organization of data; variables control charts; 
metrology; probability and the normal distribution; attribute (go/no go) charts; control chart interpretation, and gage capability. This course will
also include a lab component using software along with actual machined parts to develop the proper control charts and perform other quality control functions. Lecture: 2 hours, Lab: 2 hours

ETCN 2400 - Industry and OSHA-10 Seminars
(1 Credit)
Working safely and a safe working environment are the highest priorities. Students will gain an understanding of OSHA and important details concerning a safe workplace, and will earn the OSHA 10-hour card. The OSHA 10-hour card shows employers the student has had a good introduction to the safety concerns foremost in today’s general industry workplace. This course will also provide networking opportunities with advanced manufacturing companies using the skills learned and developed in the certificate and A.S. degree programs. Industry leaders visit students in the classroom, describing the growing advanced manufacturing market, and how their skills can be integrated. Lab: 2 hours - Lab Fee: $10

ETCN 2500 - Computer Numerical Control (CNC) Practicum/Capstone
(4 Credits)
This course gives students an opportunity to apply knowledge and skills learned in the CNC certificate program in an industrial setting. Students spend 140 hours in a manufacturing environment setting up and operating CNC machine tools under the guidance of full-time employees. This class also has a two-hour meeting requirement which is used to develop a portfolio outlining the types of working experiences acquired in the practicum. Students keep a working journal during the semester which will be used to assist in building their portfolio to chronicle their experience in order to address any problems or concerns that may arise. The Engineering Department provides assistance in matching students in practicum settings.
(Prerequisite: Completion of ETCI - Introduction to CNC Manufacturing Certificate; ETEE 1800 or ETCN 2100 and ETCN 2200; ETCN 2300) Lecture: 2 hours, Practicum: 140 hours - Lab Fee: $20

ETEE (Engin. Tech.-Electrical (ETEE))

ETEE 1050 - Introduction to Electromechanical Systems
(3 Credits)
The course will introduce the student to the nature of electricity and magnetism, and applications of practical electrical and electromechanical devices and systems. Students will study electrical laws in basic DC and AC circuits, and the behavior of passive and active circuits and components. Students will also be introduced to basic electromechanical components such as relays, switches, motors and generators. The course will emphasize a systems approach to utilizing and testing electromagnetic technology. Both hands-on labs and software simulation will be used to develop an understanding of combining components to form complex systems and the techniques to evaluate the performance of electromechanical systems.
(Prerequisite: MATH 0100) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETEE 1100 - Engineering Applications of Computers (Formerly ENGT 1100)
(3 Credits)
Students will be introduced to microprocessor and microcontroller architectures. Machine, assembly, and high-level languages will be examined. A combination of assembly and a high-level language will be applied to solving problems using a popular microcontroller development environment and target hardware system. Data and graphic information types and formats will be described and used in programs. Acquiring data from internal and external sources, communicating across networks, and directing output to displays and other external interfaces will also be explored. Student lab activities include developing and debugging programs used to control electromechanical devices, measuring operating parameters, collecting data, and displaying information.
(Prerequisites: MATH 1179; ETEE 1800) Lecture: 2 hours, Lab: 2 hours.

ETEE 1120 - Electronic Devices & Circuits (Formerly ETEK 1120)
(3 Credits)
This course is a study of the basic laws of electronic circuit theory applied to electronic devices with emphasis on solid state devices, including the theory and operation of semi-conductor diodes and transistors. Operational amplifiers, oscillators, active filters and switching circuits are emphasized and analyzed in laboratory experiments. Analysis techniques include the use of Bode plots and computerized experiments using circuit simulation software in addition to bench work wiring up circuits that are analyzed and then tested.
(Prerequisite: ETEE 1500) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETEE 1500 - Electrical Systems I (Formerly ETEK 1060)
(3 Credits)
This course covers AC and DC circuits. Analysis techniques are taught and implemented in laboratory experiments using physical components, instruments, and computer analysis. Power transformers and single phase/three phase power distribution is introduced.
(Prerequisite: ETEE 1050) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20
ETEE 1800 - Introduction to Digital Systems  
(3 Credits)  
The student will learn about digital logic as implemented with hardware, ROM logic/look up tables, and programmable devices. The basic format and architecture will be introduced with an analysis of several representative products including specifications. Basic programming techniques using Hardware Description Languages will be introduced to allow a student to create simple circuits for evaluation. Instruction sets, programming languages and basic programming techniques will be reviewed. Parallel buses, common parallel buses, serial interfaces and Ethernet interfaces will be covered. The data conversion process covering sampling theory and analog-to-digital methods will be examined. Instrumentation will include the use of oscilloscopes, logic analyzers, and pulse generators. The course will also include a brief introduction to programming languages such as assembly, Visual BASIC and C. (Prerequisite: MATH 0100 with a grade of "C" or better) Lecture: 2 hours, Lab: 2 hours

ETEE 2390 - Electrical Power Systems (Formerly ETEK 2390)  
(3 Credits)  
Three phase delta/wye and single phase power circuits are analyzed. Measurement with instrument transformers and two/three wattmeters are emphasized and used in laboratory experiments. AC and DC motors and generators, stepper motors and universal motors are studied, with related laboratory experiments. Emphasis is on operation, measurement of characteristics and control. Transformers, circuit breakers, relays and programmable control devices are covered, and also the basics of power transmission lines. Technology associated with smart-grid systems will be introduced. (Prerequisite: ETEE 1500) Spring only. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETEE 2500 - Electrical Systems II (Formerly ETEK 2370-Technical Capstone Project)  
(3 Credits)  
Switching devices including SCRs, TRIACS, DIACS, UJT, and their application in power and motor control circuits are covered in this course. The application of transducers as sensors in industrial control systems is also covered. Use of programmable controllers in industrial control of processes and power circuits is emphasized. The laboratory experiments include SCR and switching devices in the control of power circuits; application of sensors for measurement of heat, position, stress, light and pressure; operation and programming of programmable controllers; measurements in single phase and three phase -Y power circuits, and the operation of motors. Students will apply material learned in this course and in previous courses to a capstone project. (Prerequisite: ETEE 1500) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETME (Engin. Tech.-Mechanical (ETME))

ETME 1010 - Robotics and Control  
(3 Credits)  
This course provides an introduction to the field of robotics and automation. Topics include the different robot classification systems and robot arm configurations; robot end effectors, robot operating systems and kinematics. This course also introduces basic concepts of automation and artificial intelligence. Various concepts of control are introduced such as programmable logic controllers. Equipment justification is also introduced. Students will program and operate two types of robots using the robots' programming languages. Lecture: 2 hours, Lab: 2 hours

ETME 1020 - Introduction to Manufacturing Processes  
(3 Credits)  
This course provides students with insight and practical experiences in the set-up and operation of basic machines and measuring tools used in manufacturing processes. Significant emphasis is placed on dealing safely with high power machinery, materials, laboratory clothing and machine maintenance. Turning, milling, grinding, drilling and precision measurement are covered, developing students’ ability to fabricate mechanical components using traditional machining. Students learn the limitations of traditional machining and prepare for understanding advanced manufacturing technology. Lecture: 1 hour, Lab: 4 hours - Lab Fee: $20

ETME 1500 - Mechanical Systems I (Formerly MEET 2830)  
(3 Credits)  
This course is designed to familiarize the student with components used in mechanical systems. The student will learn how to select components based on system requirements and how to implement the component into the system. Attention is given to currently manufactured components and the use of the manufacturer's sizing and mounting procedures. More specifically, the sizing and fitting of these elements based on function, power requirements, life and cost. (Prerequisites: MATH 1179; ENGR 1020 and 1030; ETEE 1050) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

ETME 1510 - Engineering Mechanics Technology (Formerly MEET 1510)  
(3 Credits)  
This course is for students in the Engineering Technology Systems programs. Students are introduced to basic concepts in engineering mechanics: statics, dynamics, and the strength of materials, with a focus on technical application of the fundamentals to mechanical design. Newton’s Laws are studied with emphasis on equilibrium and motion. Realistic problems are analyzed through the use of vector mechanics. Kinematic and kinetics are
investigated to a level sufficient enough for students to follow and develop basic analysis of mechanisms and machines. Stress levels and strain are covered allowing for determination of acceptable analysis and design of mechanical systems. (Prerequisites: MATH 1179 and 1181; ENGR 1020 and 1030) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**ETME 2310 - Automation Systems**
(3 Credits)
This course addresses fundamental issues of automation. Topics covered include the types of automation, designing for automation, automatic assembly transfer systems, automatic feeding and orienting, and automated material handling systems. Quality and cost analysis as they relate to automation, the design and analysis of lean systems, as well as advanced topics in robotics such as vision systems technology are also discussed. (Prerequisites: ETEE 1800; ETME 1010) Lecture 2 hours, Lab 2 hours

**ETME 2500 - Mechanical Systems II (Capstone)**
(3 Credits)
The purpose of this course is to teach the student how mechanical components (studied in the prerequisites INST 1010 – Introduction to Instrumentation, ETME 1010 – Robotics and Control, ETEE 1050 – Introduction to Electromechanical Systems, and ETME 1500 – Mechanical Systems I) are combined and intergraded into complex working systems. The course will stress building assemblies and harnessing electrical controls to the assemblies. This course is designed to cement together the knowledge learned in previous courses within the program. Students will learn to create operational sequences, build systems from standard components, write programs to control them, apply necessary sensors and actuators, and operate and debug their assemblies. (Prerequisites: MATH 1179 and 1181; ENGR 1020 and 1030; ETEE 1050; ETME 1010 and 1510). Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**ETME 2930 - Industrial Materials (Formerly ENGT 2930)**
(3 Credits)
This course is an introduction to the different material systems in material science. This course includes an introduction to the structure and properties (such as mechanical, chemical, and physical properties) of materials, specifically metals. Equilibrium phase diagrams and isothermal diagrams are also introduced. This course also introduces various techniques of materials testing such as tensile, creep, bend, hardness, impact, and fatigue testing. Also covered are various techniques of heat treatment such as annealing. This course examines the factors that influence the production and modification of materials into useful forms. Students learn about the various manufacturing processes and machinery used to convert raw materials into finished products. The course gives the student "hands on" experience with materials and processes used in industry. A lab is also utilized to demonstrate various techniques. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**ETUT (Energy Utility Technology)**

**ETUT 1060 - Energy Industry Safety**
(3 Credits)
This course provides an introduction to the principles of safety and guidelines for the design and maintenance of energy equipment. Students will learn the skills necessary for safe power generation, transmission and distribution. The course will cover industry safety practices and human reactions in normal and abnormal conditions. Safe working conditions will be compared to industry standards and OSHA regulations. From a safety perspective, the course will provide an overview of the electric generation process, power plant systems and functions, typical power industry philosophy, departmental responsibilities and practices, industrial health issues, and environmental safety. (Prerequisite: MATH 0099 with a grade of "C" or better) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**ETUT 1160 - Introduction to Energy Utility Industry**
(3 Credits)
This course provides the student with an overview of the energy utility industry and its occupational opportunities. This includes the history of providing reliable energy service, regulatory influences, and electric/gas energy flow. The course will also cover basic terminology, typical conditions for employment, and career opportunities. Current technology for energy generation, transmission and distribution will be discussed and demonstrated. This course will integrate an overall understanding of the energy utility industry, its functions, business issues, procedures and practices. (Prerequisite: MATH 0099 with a grade of "C" or better) Lecture: 2 hours, Lab: 2 hours. - Lab Fee: $20

**ETUT 2500 - Energy Industry Practicum and Capstone**
(3 Credits)
As part of a practicum this course will introduce the student to the practical skills and procedures of a major power generation company (National Grid). The practicum will allow students to learning how to splice wires, connect fuses and transformers. Students will become familiar with the tools and equipment used in the power industry. The course will also function as a program capstone, providing the student an opportunity to integrate all energy utility industry knowledge obtained to date and to complete their program portfolio. The practicum is one eight-hour day per week for
eight consecutive weeks at the National Grid Millbury Massachusetts Training Center. (Prerequisite: ETEE 1500) Spring Only. Lecture: 2 hours, Practicum: 8 hours per week - Lab Fee: $20

**FILM (Film/Media)**

**FILM 2204 - History of Film I**  
(3 Credits)  
This course studies the history of motion pictures, beginning with the invention of the moving image in the 1880s through the middle of the twentieth century. The industrial and social history of cinema in the United States, including the studio system, the star system, and content regulation, are explored. The international cinema of Germany, France, Soviet Union, and other countries are also studied. Historical events and their influences are investigated, including world wars, cultural transformations, racial diversity and global influences. Technical invention of key visual and audio recording devices is reviewed, as well as key narrative developments in structure, genre, pacing and editing. Significant films will be screened for analysis and discussion. Lecture: 3 hours, Screening: 1 hour

**FILM 2205 - History of Film II**  
(3 Credits)  
This course is designed as an overview of the significant national and international trends in the history of film, from approximately 1950 until the present day. The emphasis will be on significant cinematic movements, the key players and films within those environments, and the larger social and historical context in which these movements occurred. Through screenings, readings, and class discussions, students will develop an appreciation for the critical insight into the history, politics, aesthetics, and philosophical debates that shaped these cinematic traditions. Lecture: 3 hours, Screening: 1 hour

**FIRE (Fire Science)**

**FIRE 1010 - Principles of Fire and Emergency Services Safety & Survival**  
(3 Credits)  
This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral change throughout the emergency services. Lecture: 3 hours

**FIRE 1020 - Fundamentals of Fire Prevention**  
(3 Credits)  
This course provides personnel in the fire service with a basic knowledge of the field of fire prevention. (Prerequisite: FIRE 1030) Lecture: 3 hours

**FIRE 1030 - Introduction to Fire Science and Officership**  
(3 Credits)  
This course provides an introduction to fire science and covers, in detail, the fire officer and his/her relationship with the fire organization. The fire officer's responsibilities and duties, related to fire fighting and non-firefighting activities, are also covered in detail. Lecture: 3 hours

**FIRE 1040 - Fire Fighting Tactics and Strategy**  
(3 Credits)  
The essential elements in analyzing the nature of fires and methods of control are discussed in detail in this course. A segment of this course includes field projects with practical experience, building inspection and problems relative to major conflagrations. (Prerequisite: FIRE 1030) Lecture: 3 hours

**FIRE 1050 - Building Construction and Fire Codes**  
(3 Credits)  
The elements of fundamental building construction, design and fire protection features are covered in this course. Attention is also given to special considerations related to national, state and local laws and ordinances directly related to the field of fire prevention. (Prerequisite: FIRE 1020) Lecture: 3 hours

**FIRE 1070 - Fire Protection Systems and Equipment**  
(3 Credits)  
This course provides students with technical knowledge in the use of fire protection systems and equipment. Portable fire extinguishing equipment, sprinkler systems, protection systems for special hazards, and fire alarm and detection systems are covered. (Prerequisite: FIRE 1020) Lecture: 3 hours
FIRE 1090 - Fire Hydraulics and Equipment
(3 Credits)
This course provides a review of basic mathematics and hydraulic laws and formulas as applied to the fire service. Time is allotted for practical application of formulas and mental calculation to hydraulic problems as well as for consideration of the water supply problem and underwriters’ requirements for pumps. A segment of this course includes practical field experience. (Prerequisite: MATH 1025) Lecture: 3 hours

FIRE 1100 - Municipal Fire Administration
(3 Credits)
This course provides an overview of the technical and administrative tasks associated with maintenance, custody and operation of a fire department. (Prerequisite: FIRE 1030) Lecture: 3 hours

FIRE 1120 - Investigations, Fire and Explosions
(3 Credits)
This course covers the history, development and philosophy of fire investigation and detection. Topics include inspection techniques, gathering evidence for the development of technical reports, fundamentals of arson investigations, processing of criminal evidence and criminal procedures related to the various states and local statutes. Considerable time is spent on examination of explosive and incendiary devices, methods of search and bomb-threat procedures. Lecture: 3 hours

FIRE 1130 - Emergency Medical Technician Basic
(8 Credits)
This course trains emergency medical technicians and other allied health and safety personnel for emergency care of the sick and injured at the scene and during transport. Classroom experience and practical demonstration are used to familiarize students with the use of rescue equipment. Students are assigned 10 hours of clinical experience in the emergency room of an affiliated hospital. Lecture: 8 hours, Lab: 2 hours - Lab Fee: $20

FREN (French)

FREN 1000 - Basic Spoken French I
(3 Credits)
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

FREN 1010 - Elementary French I
(3 Credits)
This course is for students with little or no preparation and covers elements of the language including: conversation, pronunciation, reading, writing and grammar. Aspects of French-speaking cultures are also included. Lecture: 5 hours

FREN 1020 - Elementary French II
(3 Credits)
This is a continuation of Elementary French I (FREN 1010). (Prerequisite: FREN 1010, FREN 1030 or its equivalent) Lecture: 5 hours

FREN 1030 - Elementary French I
(3 Credits)
French 1030 is a faster paced version of French 1010. This course is suitable for students with previous experience i.e. Basic spoken French and/or other prior formal study of the language, prior formal study of another foreign language, or informal experience with a foreign language. The course covers elements of the language including: conversation, pronunciation, reading, writing, and grammar. Aspects of French-speaking cultures are also included. Note: Course content is the same as French 1010 with two fewer hours per week. (Prerequisite: Prior preparation as noted above or permission of instructor) Lecture: 3 hours

FREN 1040 - Elementary French II
(3 Credits)
This course is a continuation of FREN 1030. Note: Course content is the same as FREN 1020 with 2 less classroom hours per week. (Prerequisite: FREN 1030, FREN 1010 or its equivalent) Lecture: 3 hours
**Community College of Rhode Island**

**FREN 2010 - Intermediate French I**  
(3 Credits)  
This course helps students develop skill in reading and discussing French texts related to culture and literature. Course work is supplemented by further work in grammar, conversation and composition. (Prerequisite: FREN 1020 or 1040 or its equivalent) Lecture: 3 hours

**FREN 2020 - Intermediate French II**  
(3 Credits)  
This course is a continuation of Intermediate French I (FREN 2010). (Prerequisite: FREN 2010 or its equivalent) Lecture: 3 hours

**GEOG (Geography)**

**GEOG 1010 - Introduction to Geography**  
(3 Credits)  
Physical and cultural elements of geography are considered as they relate to each other in the economic, political, cultural and historical aspects of human civilization. Map study is a major focus of this course as we examine all major regions of the world. Lecture: 3 hours

**GEOL (Geology)**

**GEOL 1010 - Gen Geology I-Physical Geology**  
(4 Credits)  
This course investigates the planet Earth, explaining the geologic events and features through plate tectonics. Major topics included are the study of minerals and rocks; volcanoes; earthquakes; weathering and erosion; streams and floods; and groundwater. In addition, a field trip to localities in Rhode Island and the vicinity is taken. Course fulfills one lab science requirement for A.A. degree. Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**GEOL 1020 - The Earth Through Time**  
(4 Credits)  
This course investigates the geological history of the Earth. Topics include plate tectonics; climate change, such as the Ice Age; and the evolution of life (e.g. dinosaurs). A key goal is to learn how these topics have interacted through time resulting in the present location of our continents, oceans, and present day life. Off-campus field trips to Rhode Island locations are usually scheduled. - Lab Fee: $20

**GEOL 1030 - Natural Disasters**  
(3 Credits)  
This course studies the earth by focusing on natural disasters. The causes and consequences of such events are examined within the framework of earth sciences. Major topics covered include earthquakes, volcanoes, tsunami, landslides, climate change, hurricanes, floods and meteorite impacts. Lecture: 3 hours

**GEOL 1040 - Introduction to Geographic Information Systems (GIS)**  
(3 Credits)  
This course is an introduction to using ArcGIS 9.3 to create and analyze digital maps. Students learn how to use the software to create maps, graphs, and reports. Basic cartography, coordinate systems, geodesy, map projections, and map design are also covered. Students complete and present a final mapping project on a topic of their choosing. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**GEOL 1050 - Urban Geology**  
(4 Credits)  
This course explores the relationship of cities to their natural settings. The Earth’s surface features, geological processes, and internal structure are explored, including plate tectonics, earthquakes, volcanoes, the rock cycle, rivers, and mass wasting. These and more are investigated in terms of their effect on urban areas. Topics include building stone, water supply, sanitation, population growth, and megacities in the developing world. There will be a field trip to look at stone buildings in Providence or Newport. Lecture: 3 hours, Lab: 2 hours

**GEOL 2010 - Introduction to Geoscience Research Methods**  
(4 Credits)  
Course introduces students to geoscience research methods, which include hypothesis development, field practices, data analysis and interpretation, and scientific communication within the various areas of geosciences. Students will collect, analyze, interpret and present within an initially guided
and student directed, independent projects. This course will focus on building transferable skills, independent thinking, and improving knowledge applications. - Lab Fee: $20

GERM (German)

GERM 1000 - Basic Spoken German I
(3 Credits)
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

GERM 1010 - Elementary German I
(3 Credits)
This course is for students with little or no preparation and covers elements of the language including: conversation, pronunciation, reading, writing and grammar. Aspects of German culture are also included. Lecture: 5 hours

GERM 1020 - Elementary German II
(3 Credits)
This is a continuation of Elementary German I (GERM 1010). (Prerequisite: GERM 1010, 1030 or equivalent) Lecture: 5 hours

GERM 1030 - Elementary German I
(3 Credits)
German 1030 is a faster paced version of German 1010. This course is suitable for students with previous experience i.e. Basic spoken German and / or other prior formal study of the language, prior formal study of another foreign language, or informal experience with a foreign language. The course covers elements of the language including: conversation, pronunciation, reading, writing, and grammar. Aspects of German-speaking cultures are also included. Note: Course content is the same as German 1010 with two fewer hours per week. (Prerequisite: Prior preparation as noted above or permission of instructor). Lecture: 3 hours

GERM 1040 - Elementary German II
(3 Credits)
This course is a continuation of GERM 1030. Note: Course content is the same as GERM 1020 with 2 less classroom hours per week. (Prerequisite: GERM 1030, GERM 1010 or its equivalent) Lecture: 3 hours

GERM 2010 - Intermediate German I
(3 Credits)
This course helps students develop skill in reading and discussing German texts related to culture and literature. Course work is supplemented by further work in grammar, conversation and composition. (Prerequisite: GERM 1020, 1040 or its equivalent) Lecture: 3 hours

GERM 2020 - Intermediate German II
(3 Credits)
This is a continuation of Intermediate German I (GERM 2010) (Prerequisite: GERM 2010 or its equivalent) Lecture: 3 hours

HEAL (Health)

HEAL 0200 - CPR-Healthcare Providers
(0 Credits)
This course provides training in CPR skills and use of the automated external defibrillator (AED). It is a five-hour, noncredit course in which an American Heart Association course completion card is issued after satisfactory demonstration of CPR skills and a satisfactory score on a multiple-choice test. Course content includes risk factors, signs and symptoms of heart disease and stroke, and actions to take with an individual experiencing symptoms. CPR skills taught and practiced include relief of foreign body airway obstruction, rescue breathing, and cardiopulmonary resuscitation for infants, children and adults. Note: Health care provider card is a requirement for all Health and Rehabilitative Sciences programs. - CPR Fee: $45
**HEAL 1000 - Introduction to Health Careers**  
(3 Credits)  
This course provides an overview of the health field including the characteristics of health care workers, ethical and legal considerations in health care and selected content common to all health programs. (Prerequisite: Accuplacer reading score of 75 or higher.) Lecture: 3 hours

**HEAL 1015 - Health Issues in Aging**  
(3 Credits)  
This three-credit course is designed for individuals who work in health care and other professions that deal with an aged population. It examines the unique issues related to the elderly with a particular emphasis on healthy aging in our society. An overview of the aging process will include specific aspects such as physiological and psychological changes, socialization, and chronic illness. The management of chronic health problems, disease prevention, and health promotion will be discussed. Attention to social, political, and cultural issues will be discussed including family, community, and health services resources. Discussions will focus on the interdisciplinary approach to elder care, emphasizing healthy aging and optimal wellness. Lecture: 3 hours

**HEAL 1055 - Focus on Nursing Pharmacology**  
(3 Credits)  
The student nurse is in a unique position regarding drug therapy. Nursing responsibilities include administration of drugs, assessing drug side effects and adverse reactions, interventions to make the drug regimen more tolerable, providing patient teaching and monitoring the patient’s care plan to prevent medication errors. This presents pharmacology as an understandable and learnable subject through the utilization of the nursing process. The course involves the study of drug classes, pharmacokinetics, pharmacodynamics, pathophysiological changes related to drug classes, and application of nursing fundamentals. Lecture: 3 hours

**HEAL 1060 - Dosage Calculations for Medication Administration**  
(3 Credits)  
This course is designed to meet the needs of any current or potential practitioners of nursing whose responsibilities include the safe administration of medications to clients within diverse clinical settings. A working knowledge of dosage calculations is necessary within any given medication administration system today. Information related to systems of measurements and conversions within these systems is presented. This course helps health care professionals calculate dosages accurately, with increased confidence and decreased math anxiety to ensure the safe administration of medications, which is the primary responsibility of nurses. (Prerequisite: MATH 0500 or appropriate placement test score) Lecture: 3 hours

**HEAL 1070 - Physical Assessment for Nurses**  
(4 Credits)  
This course introduces students to examination techniques for adult physical assessment. Anatomy and physiology are reviewed to reinforce understanding of bodily processes necessary to understand the physical exam. Focus is on normal and abnormal findings. Consideration is also given to cultural, ethnic, and special populations. (Prerequisite: BIOL 1010, 1020) Lecture: 3 hours

**HEAL 1080 - Nursing Documentation**  
(3 Credits)  
This BlackBoard course is designed to help nursing students or practicing nurses develop documentation skills within a variety of systems and methods. Legal and ethical implications of documentation are described. Strong emphasis is placed on documentation systems utilizing the nursing process framework. Students are encouraged to analyze and apply what they have learned through the use of case studies. (Prerequisite: Nursing student/practicing nurse) Lecture: 3 hours

**HEAL 1085 - Nursing Informatics**  
(3 Credits)  
This course is designed for individuals who work in health care and other professions that deal with informatics. It will examine the theory and applications of nursing, computer and information science to enhance decision making in health care settings. An overview of nursing informatics will include computer, networking, databases, research, legal and ethical issues. This course will involve theory and application to practice. Lecture: 3 hours, Lab: 1 hour
## HIST (History)

**HIST 1010 - Survey of Western Civilization I**  
(3 Credits)  
This course is a survey of Western cultural development from its inception in the Near East, through Greece and Rome, the Middle Ages, the Renaissance and the Reformation of the 16th century. Lecture: 3 hours

**HIST 1020 - Survey of Western Civilization II**  
(3 Credits)  
This survey course examines the dominant influences in Western culture from the 16th to the 20th century. Lecture: 3 hours

**HIST 1210 - History of the United States to 1877**  
(3 Credits)  
This is a survey course of American history beginning with European backgrounds and discovery and continuing through the period of reconstruction. Lecture: 3 hours

**HIST 1220 - History of the United States from 1877**  
(3 Credits)  
This survey course covers American history from the rise of industrialism to the present. Lecture: 3 hours

**HIST 2010 - Women in North American History, 1600-1900**  
(3 Credits)  
This is a survey course in the history of American women in North America that begins with pre-contact societies of native Americans and concludes with the Progressive Era at the turn of the twentieth century. Students will examine the experiences of native American women, European colonial women, African slave women and their mistresses, middle-class women of the Northeast, pioneering women, working girls, female reformers and radicals, women in the Civil War, and in Progressivism. Prerequisite: HIST 1210 and reading level 0700. Lecture: 3 hours

**HIST 2015 - Women in North American History, 1900 - Present**  
(3 Credits)  
This is a survey course in the history of American women in North America from the turn of the twentieth century to the present. Students will examine women's culture and society in a maturing urban industrial order in the late nineteenth century Gilded Age; analyze women's political activism in the Progressive Era, and explore the changing notions of sexuality that influenced gender roles for both women and men in the early twentieth century. Also included are topics concerning women's roles in the Great Depression and World War II, the re-emergence of the Cult of Domesticity in the postwar era, the civil rights movement, and feminism's second wave in the 1960s and 1970s. Prerequisite: HIST 1220 and reading level 0700. Lecture: 3 hours

**HIST 2020 - Civil War and Reconstruction**  
(3 Credits)  
This course is a blend of both traditional Civil War history and the latest developments in the field, especially in social history. Political and military matters are analyzed, as well as the lives of slaves, soldiers and women. The topic of slavery will be thoroughly explored, as well as the effort to rehabilitate the lives of former slaves during Reconstruction. (Prerequisite: HIST 1210 or by faculty referral). Lecture: 3 hours

**HIST 2035 - American Society and Culture in the Cold War, 1945-1991**  
(3 Credits)  
This course examines U.S. foreign policy in the Cold War era and its impact domestically and globally. Lecture: 3 hours

**HIST 2241 - America's Experience in Vietnam**  
(3 Credits)  
This course examines, in-depth, America’s involvement in Vietnam from World War II to 1975. Military, political, social and cultural reasons for, as well as consequences of, the American commitment are studied. (Recommended: HIST 1220 prior to this course) Lecture: 3 hours
HIST 2245 - History of Asian-Americans
(3 Credits)
This course surveys Asian-American history from the 1840s to the present. The first half of the course focuses on the experiences of Chinese, Japanese and Filipino immigrants in the U.S. from the Gold Rush (late 1840s) to World War II. The main emphases are on immigration, communities, race relations, exclusion and incarceration. The second half of the course moves on to the great changes within the Asian-American community since the 1960s: new immigration from Korea, South Asia and the refugee communities of Vietnamese-Cambodian-, and Laotian/Hmong-Americans. Lecture: 3 hours

HIST 2250 - History of Black America
(3 Credits)
This course focuses on the history of black Americans from African origins to the present. Consideration is given to slavery, Reconstruction and ethnic relations from Colonial times to the present. (Recommended: HIST 1210 and/or 1220 prior to this course) Lecture: 3 hours

HIST 2260 - A Survey of East Asian Civilization
(3 Credits)
This is a survey of East Asian civilization from ancient times to the modern period. The course also will treat the region as part of world history with discussions and comparisons of East Asia and other world economies and cultures. Lecture: 3 hours

HIST 2330 - War and Society
(3 Credits)
In this course, we will explore the ways that war and violence were central to the formation, consolidation and expansion of European nation-states from the French Revolution to the collapse of empires in Europe. We will begin by reading works on the nature and origins of violence in modern society. We will then examine the rise of mass politics and the ideologies that produced widespread destruction in the wake of the French and Industrial Revolutions. When we move to the 20th century, we will focus significant attention on the history of the two World Wars, but we will be equally concerned with identifying the changing notions of legitimate state and interpersonal violence. Course readings will include primary and secondary sources, but films and music also will be important. Prerequisite: HIST 1020. Lecture: 3 hours

HMLS (Homeland Security)

HMLS 1000 - Introduction to Homeland Security
(3 Credits)
This course is designed to provide the student with an understanding of the definition, origins, and development of Homeland Security in the United States. The terminology of the Department of Homeland Security will be discussed as well as the presidential directives that created this new department. This course will explore state, national, and international laws impacting homeland security. The course will examine the most critical threats and challenges confronting homeland security. This course will also discuss how DHS has changed over the past several years in reaction to different terrorist events and the future of protecting the homeland. Lecture: 3 hours

HMLS 1010 - Intelligence Analysis and Risk Management
(3 Credits)
This course examines intelligence analysis and its indispensable relationship to the security management of terrorist attacks, man-made disasters and natural disasters. It also explores vulnerabilities of our national defense and private sectors, as well as the threats posed to these institutions by terrorists, man-made disasters, and natural disasters. Students will discuss substantive issues regarding intelligence support of homeland security measures implemented by the United States and explore how the intelligence community operates. Lecture: 3 hours

HMLS 1020 - Border and Transportation Security
(3 Credits)
Provides an in-depth view of modern border and transportation security. Specific topics include security for seaports, ships, aircraft, trains, trucks, pipelines, buses, etc. Focuses on the technology needed to detect terrorists and their weapons as well as includes discussion on legal, economic, political, and cultural aspects of the problem. Lecture: 3 hours

HMNS (Human Services)

LEVEL I FIELD and PRACTICUM EXPERIENCES
HMNS 1200, 1201, 1210 and 1220
All field and practicum courses are competency-based internships designed to train students in basic human service skills through a combination of field placement and seminar activities. Field placements range from 50 to 90 hours per semester and require a one- to three-hour campus-based seminar. (Prerequisite: Grades of C or better in HMNS 1010 and the required Human Services courses for each concentration) Note: Eligibility for field placement at all levels is subject to academic standing and instructor recommendations regarding readiness. Seminar 1–3 hours, Fieldwork: 4–8 hours

LEVEL II FIELD EXPERIENCES
HMNS 2310, 2320, 2340 and 2360

Level II internships are designed to develop intermediate skills in various disciplines. Students are assigned to cooperating agencies and schools for 75 to 90 hours per semester and also are required to attend a one- to two-hour seminar each week. (Prerequisites: Grade of C or better in Field I and required Human Services courses) Seminar: 1–2 hours, Fieldwork: 6–8 hours

LEVEL III FIELD EXPERIENCES
HMNS 2410, 2420, 2440 and 2460

Level III internships combine field experience and seminar to further develop advanced intervention and implementation skills in all Human Services concentrations. Students are assigned to a cooperating agency or school for 75 to 90 hours per semester and are required to attend a one- to two-hour seminar each week. (Prerequisites: Grades of “C” or better in Field Experiences I and II and required Human Services courses) Seminar: 1–2 hours, Fieldwork: 6–8 hours

HMNS 1010 - Introduction to Helping and Human Services
(3 Credits)
This is the first in a sequence of required courses for internship placement in all Human Services Concentrations. This course provides a working familiarity with theories of human development and will explore values and helping skills that are generic to the fields of teaching and human services. Students examine personal and professional attitudes, values and beliefs that correlate with high effectiveness and will review current research for an understanding of social and behavioral issues critical to effective teaching and helping. Tools to assist students in self-assessment, use of a sequential model for helping and the development of critical reading and reflective writing skills are provided. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

HMNS 1040 - Drugs and Human Behavior
(4 Credits)
This course provides general and specialized knowledge concerning the bio-psycho-social antecedents and consequences of drug taking behaviors. Additionally, it carefully examines the nature of compulsion as it relates to the activity addictions. The use of medical, behavioral and psychodynamic models promote an understanding of addiction as a process, not an event, and students are exposed to current research documenting the connections between addictive behavior activities and brain chemistry. Students will gain knowledge and skills in the areas of assessment, intervention, treatment, relapse prevention and health promotion for working with individuals, groups and families affected by addictive and compulsive disorders. This course is required for placement in a substance abuse internship. Note: Grade of C or better required for Human Services program students. Lecture: 4 hours

HMNS 1080 - Health, Nutrition and the Young Child
(3 Credits)
This course provides students with basic concepts of health, nutrition and food science as they apply to the care and education of young children. Students acquire those skills necessary for incorporating critical concepts into programming and curriculum in a wide variety of early childhood settings. Students will be required to spend 4-6 hours over the course of the semester participating in experiences and researching application of course content in a public school, licensed educational setting or licensed child care. Note: This course is approved by the Department of Education for RI Early Childhood Teacher Certification. Grade of C or better required for Human Services program students. Lecture: 3 hours

HMNS 1090 - Foundations of Gerontology and Elder Care
(3 Credits)
Using a competency-based approach, this course provides students with specialized skills needed to plan and implement the professional delivery of direct services to senior adults, nursing home residents, the frail and elderly and the chronic or disabled senior patient. Students become familiar with the construction and interpretation of diagnostic assessments as part of senior activity planning that addresses the physical, social and emotional needs of the nursing home client. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours
Community College of Rhode Island

**HMNS 1130 - Introduction to Interpersonal Violence**  
*(3 Credits)*  
This course is designed to introduce students to current research and theories of interpersonal violence. Students acquire knowledge about developmental approaches as well as psychological and sociological theories as they relate to the effects of interpersonal violence on individuals and society. A systems perspective is used to examine both victim and perpetrator profiles in the areas of child abuse and neglect, attachment abuse, elder abuse, partner abuse, hate crimes and youth violence. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

**HMNS 1140 - Interventions in Interpersonal Violence**  
*(3 Credits)*  
This course is designed as an extension of HMNS 1130 and will explore the continuum of prevention, intervention and treatment in interpersonal violence. Students will learn about treatment and intervention models as well as current research describing advocacy, psychological, sociological and systems approaches. The specific strategies suggested by each are reviewed toward providing students with skills for appropriate interventions. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

**HMNS 1200 - Practicum I: Service Learning**  
*(3 Credits)*  
The purpose of this course is to develop and refine observation, communication, presentation, writing and service skills appropriate for entry level placement in a social service environment. It is designed to assist students in clarifying their concentration by providing a skill-specific seminar and a 50 hour Service Learning Practicum. Locations are sought for students to develop entry level helping skills while engaged in activities that support community service, civic commitment and the development of social consciousness. (Prerequisites: HMNS 1010, 2200) Grades of C or better required. Note: Eligibility is subject to placement approval and instructor assessment of student readiness. Students are required to have a BCI (Bureau of Criminal Investigation) background check and complete a placement contract. Grade of C or better is required for Human Service program students.

**HMNS 1210 - Field Experience and Seminar I - Child Development**  
*(3 Credits)*  
This course provides a school or community-based placement (as arranged by the instructor) and seminar to assist students in gaining entry-level skills for working with children from birth to age eight. Students will learn practical and professional skills for establishing positive relationships with young children and how to select age-appropriate materials that promote the cognitive, social-emotional and physical development of young children. Students begin the development of their professional portfolio in their Field I Seminar. Students are expected to complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. Students are required to complete a BCI (Bureau of Criminal Identification) background check and should be up to date with immunizations. (Prerequisites: HMNS 1010, 2100 with grades of C or better required for Human Services program students)

**HMNS 1220 - Field Experience and Seminar I - Education/Special Needs**  
*(3 Credits)*  
This course places students in a school or community-based placement (as arranged by the instructor) that provides hands-on training with typical and/or special needs students. Students gain entry level skills in instructional work, developing rapport, behavior management, student assessment and materials presentation and utilize their Seminar to address issues relating to their field placement. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisite: HMNS 1010 and either 2060 or 2070 with grades of C or better required for Human Services program students)

**HMNS 2030 - Emergent Literacy: Reading Readiness in ECE**  
*(3 Credits)*  
This course introduces students to the theoretical and practical foundations of emergent literacy. Students will develop teacher competencies in areas of developmental assessment, teaching methodology, curriculum planning and implementation. This course is required for RI Certification in Early Childhood Education. Note: Grade of C or better required for Human Services program students. (Prerequisite: HMNS 2100, 2120, 1210, 2310) Lecture: 3 hours

**HMNS 2060 - Foundations of Teaching and Learning**  
*(3 Credits)*  
This course provides a theoretical and practical foundation for understanding the evolution and current state of American schooling. Students will examine critical issues related to classroom environment, learning styles and appropriate instruction, curriculum development, standards and diversity. Students will gain a practical understanding of those ethics and indices of professional development that correlate with effective teaching. This is a required course for teacher associates, education and special education majors. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

</thead>
<tbody>
<tr>
<td>HMNS 2070</td>
<td>Characteristics and Needs of Special Populations</td>
<td>3</td>
<td>This course examines origins, indicators and issues related to children and adults who have significant differences mentally, physically, socially, behaviorally or in the area of communicative skills. Students gain a working knowledge for recognizing and responding appropriately to the needs of children and adults in a variety of educational and caregiving environments. Educational modifications and placement alternatives are discussed. This is a required course for Special Education, Education and Child Development majors. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2080</td>
<td>Case Study Development for Special Needs Educators</td>
<td>3</td>
<td>This course is an applied learning experience that links and illuminates theoretical and academic information discussed in class with a student currently enrolled in an actual school-based program, in order to promote an understanding of differences in learning and development. Students will complete a minimum of 30 contact hours in an educational setting that includes children with disabilities. Students will select a child to study, review the student's assessment and IEP for the purpose of presenting it as a formal case study. Note: Grade of C or better required for Human Services program students. Lecture: 2 hours, Lab: 2 hours</td>
</tr>
<tr>
<td>HMNS 2100</td>
<td>Child Growth and Development Skills</td>
<td>3</td>
<td>This course is the first in a sequence for Child Development majors and provides the foundation for understanding major theories in the physical, social, intellectual and emotional needs of children. Students will explore various teaching styles for observing, assessing and guiding the growth and development of young children. Students are required to observe children from birth to age eight in a public school, licensed educational setting for a total of 4-6 hours over the course of the semester. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2110</td>
<td>Introduction to Social Work and Social Welfare</td>
<td>4</td>
<td>This course provides an overview of social work as a profession, including its history, values, practices, methods and settings. Students will gain a working knowledge of the structure and organization of public, private and voluntary social services, welfare programs and their interconnection in the human service delivery network. Students will understand the code of ethics, skills and competencies that guide effective practitioners in the social work profession. Note: Grade of C or better required for Human Services program students. Lecture: 4 hours</td>
</tr>
<tr>
<td>HMNS 2120</td>
<td>Curriculum for Young Children</td>
<td>3</td>
<td>This course is designed so students can develop the skills necessary to plan developmentally appropriate curriculum and environments for children from birth to age eight in a variety of early childhood settings. Students will gain an understanding of how children learn and how to assess developmental readiness for creating and implementing developmentally appropriate. Students will be required to spend 3-4 hours over the course of the semester observing environments and implementing learning opportunities in a public school, licensed educational or child care setting. (Prerequisite: HMNS 2100 or equivalent experience approved by instructor) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2130</td>
<td>Therapeutic Interventions I: Working with Individuals</td>
<td>3</td>
<td>This course provides a comprehensive overview of major therapeutic models including psychoanalytic, Adlerian person-centered reality, Gestalt, transactional, rational-emotive and behavioral. Students will acquire related intervention skills and techniques for meeting the needs of individual clients of all ages served in social work, mental health and substance abuse settings. Emphasis is also placed on ethical standards and the development of skills needed for formulation of bio-psycho-social case/treatment plans. (Prerequisite: HMNS 2200) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2135</td>
<td>Therapeutic Interventions II: Group Process and Practice</td>
<td>3</td>
<td>This course provides a comprehensive overview of major therapeutic models and related intervention methods for use with families and small groups. Students will learn skills appropriate for constructing and facilitating groups in social service and mental health settings. (Prerequisites: HMNS 1010, 2200; HMNS 2130 also recommended with grades of C or better required for Human Services program students) Lecture: 3 hours</td>

<tr>
<td>HMNS 2140</td>
<td>Guiding Children's Behavior</td>
<td>3</td>
<td>This course examines positive strategies in supporting and guiding the emotional self-regulation and social competence in early childhood development. Emphasis is placed on intervention strategies to critical issues common to young children. Student will learn skills related to shaping the ways young children think, learn, react to challenges and develop relationships. Students will practice positive guidance strategies and learn about classroom design as a focus of prevention of behavior problems. Students may be required to spend 4-6 hours over the course of the semester conducting observations in an educational or licensed childcare setting. Note: Grade of C or better is required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2150</td>
<td>Parent and Child Relations</td>
<td>3</td>
<td>This course explores the parent-child relationship as it develops and evolves within diverse family systems and reviews strategies for working with parents. Special attention is placed upon the various developmental stages that both children and parents pass through and, in turn, how children and parents influence and challenge each other's development. Selected topics may include the impact that various parenting and behavioral control styles can have on children, how such issues as culture, social class, children's temperament, divorce, abuse, special needs and parental mental health can impact parenting and child well-being. Students develop an understanding of how to assess parent-child relations and review behavioral strategies for working with parents in educational and social settings. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2170</td>
<td>Learning Disabilities</td>
<td>3</td>
<td>This course provides students with an understanding of learning disabilities as they manifest in children and as they impact learning and development. Students are able to recognize the characteristics; impact on self-concept; various auditory, visual, perceptual and motor challenges; language delay and hyperactivity and become familiar with diagnostic tests and the appropriate remediation techniques most often prescribed. The Individuals with Disabilities Education Act, along with current changes in research and social policy, frame discussions around eligibility for special services, the referral process and parental rights. (Completion of HMNS 2070 strongly recommended.) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2180</td>
<td>Significant Developmental Disabilities</td>
<td>3</td>
<td>The course provides a specialized understanding of individuals with significant developmental disabilities that includes a focus on multi-sensory impairment, severe intellectual disabilities and profound multiple disability. Students will learn strategies through hands-on activities for developing appropriate intervention and remedial skills. Use of technology, supportive equipment and environmental modifications are included. (Completion of HMNS 2070 recommended.) Lecture: Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2190</td>
<td>Infant/Toddler Care: Methods and Materials</td>
<td>3</td>
<td>This course is designed to assist in the planning of curriculum and caregiving for infants and toddlers in home family child care and center-based settings. Students develop skills for planning, selecting developmentally appropriate materials and designing the physical and social environments related to the promotion of infant and toddler development. Students will be required to spend 4-6 hours over the course of the semester conducting observations in a licensed infant-toddler educational setting or a licensed family child care setting. (Completion of HMNS 2100 recommended.) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
<tr>
<td>HMNS 2200</td>
<td>Assessment Interviewing for Treatment Planning</td>
<td>3</td>
<td>This course provides an in-depth study of the interviewing process, including methods for creating client safety and rapport and most importantly how to obtain and assess client information. Data collection and client assessment are the initial steps in the social service process, therefore this is the first course in the social work, mental health, gerontology and substance abuse concentrations for teaching appropriate intervention skills. Students are taught how to use the interviewing process to initiate helping strategies for use in a variety of mental health and social service settings. This course is a prerequisite for HMNS-1200. Note: Grade of C or better required for Human Services program students. Lecture: 3 hours</td>
</tr>
</tbody>
</table>
| HMNS 2220  | Social Work Program and Policy Analysis          | 3       | This course critically analyzes the values, theories, history, economics and politics associated with the development, implementation and evaluation of social policies and programs. Special attention is given to policies in the areas of poverty, education, health, race and sex. In addition to understanding the forces and processes that establish or change social policies, emphasis is placed on the systematic analysis of both existing and proposed social policy. Students will review current trends in national social policies and their effect on state/federal programs with particular
attention to oppressed populations. This course places heavy emphasis on critical analysis. Students will learn to build on their skills in analyzing and critiquing various social policies. (Prerequisite: SOCS 1010, HMNS 1010, 1200, 2110, 2200) Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

**HMNS 2230 - Individuals, Families and Small Groups**  
(3 Credits)  
This course examines how biological, psychological, social and cultural influences affect the behavior of individuals and families. Emphasis is placed on how human behavior is affected by social context and the forces of oppression as well as the impact of oppression on women, lesbians and gay men, persons with physical disabilities and the aged. Skills required to work with these populations, using an ecological/generalist person in environment approach, are discussed. (Recommended prerequisites: HMNS 1010, HMNS 1200, HMNS 2110, PSYC 2020, PSYC 2030, BIOL 1010 recommended). Note: Grade of C or better required for Human Services program students. Lecture: 3 hours

**HMNS 2290 - Driver and Traffic Safety Education**  
(3 Credits)  
This course will prepare Certified Teachers to deliver the RI Driver and Traffic Safety Education Curriculum in compliance with those requirements set forth by the RI Department of Motor Vehicles and the Office of Higher Education. Completion will carry Lifetime Certification. In order to be eligible for certification in this new area, students must already be BA/BS Certified Teachers.

**HMNS 2310 - Field Experience Seminar II-Child Development**  
(3 Credits)  
This course provides a school or community based placement (as arranged by the instructor) to assist students in refining caregiving and teaching skills developing competencies related to assessing the needs of children from birth to age eight. Students advance their skills for developing appropriate curriculum and activities for young children and continue the development of their professional portfolio. Students are expected to complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. Students are required to complete a BCI (Bureau of Criminal Identification) background check and should be up to date with immunizations. (Prerequisites: HMNS 1010, 2100, 1210. Corequisite: HMNS 2120) Grades of C or better required for Human Services program students.

**HMNS 2320 - Field Experience Seminar II-Education/Special Needs**  
(3 Credits)  
This course places students in a school or community-based placement (as arranged by the instructor). Students refine skills of behavior management, assessment, instructional methodology and lesson development in settings for typical and special needs children and adults. Students learn how to work with individuals and small groups while initiating larger group control. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisites: HMNS 1010, 2060 or 2070, 1220) Grades of C or better required for Human Services program students.

**HMNS 2340 - Field Experience Seminar II-Social Work and Gerontology**  
(3 Credits)  
This course involves students in a setting and seminar to refine their intake and communication skills (both written and verbal) and to develop basic tools for client advocacy, assessment and intervention. Students learn intermediate level strategies for meeting physical, social-emotional and cognitive needs of clients in agency and community settings. Students demonstrate an increasing awareness of ethical issues including confidentiality, dual relationships and countertransference. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisites: HMNS 1010, 2200, 1200) Grades of C or better required for Human Services program students.)

**HMNS 2360 - Field Experience Seminar II-Mental Health/Substance Abuse**  
(3 Credits)  
This course places student in a mental health or substance abuse setting. Through a combination of field experience and seminar, students refine their intake assessment, prevention and intervention skills in ways that allow them to begin taking a more active role in meeting the needs of clients in mental health and substance abuse settings. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisites: HMNS 1010, 2200, 1200) Grades of C or better required for Human Services program students.

**HMNS 2410 - Field Experience Seminar III-Child Development**  
(3 Credits)  
This course provides a school or community based-placement (as arranged by the instructor) and seminar to assist students in advanced refinement of caregiving and teaching skills and for the delivery of developmentally appropriate curriculum and assessment that meets the individual and group needs of children from birth to age eight. This competency-based progression culminates in students' taking an active role within their placement site
as they prepare to enter the workforce. Students complete their professional portfolio. (Prerequisites: HMNS 1010, 1210, 2100, 2120, 2310) Grades of C or better required for Human Services program students.

HMNS 2420 - Field Experience Seminar III-Education/Special Needs

(3 Credits)

This course places students in a school or community-based placement (as arranged by the instructor) and a field setting and seminar to assist students in further developing and refining instructional techniques, behavioral strategies and lesson development and implementation for individual, small and large groups of typical and special needs students of all ages. The construction and presentation of lesson plans that include instructional objectives and learning outcomes are achieved in accordance with the RI Teacher Preparation Standards. Students should be able to demonstrate a teaching style that promotes the physical, intellectual, language, social and emotional development of students. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisites: HMNS 1010, 2060 or 2070, 1220, 2320) Grades of C or better required for Human Services program students.

HMNS 2440 - Field Experience Seminar III-Social Work and Gerontology

(3 Credits)

This course provides a field location and seminar where students are expected to utilize advanced skills and clinical supervision acquired thus far to demonstrate increased ability to assess, plan and perform independently in response to clients serviced in social work and gerontology settings. Students will complete 78-90 hours of supervised placement on the designated days and times as noted upon course registration. (Prerequisites: HMNS 1010, 1200, 2200, 2340) Grades of C or better required for Human Services program students.

HMNS 2460 - Field Experience Seminar III-Mental Health and Substance Abuse

(3 Credits)

This course provides a field location where students are expected to demonstrate refined skills and an increased ability to operationalize knowledge gained thus far in their program to meet the physical, emotional, cognitive and clinical needs of clients served by mental health and substance abuse service providers. Students demonstrate an increased ability to assess, plan and perform independently in mental health and substance abuse settings. (Prerequisites: HMNS 1010, 1200, 2200, 2360) Grades of C or better required for Human Services program students.

HMNS 2515 - Major Health Issues for the Elderly: Implications for Human Services

(3 Credits)

Major Health Issues for the Elderly: Implications for Human Services is a course that provides general information regarding health issues surrounding the aging and elderly to include Alzheimer’s and Dementia related diseases, Parkinson’s disease, incontinence, cancer, heart disease, arthritis, vision and eye diseases, diabetes, sleep disorders, depression, hearing loss, osteoporosis and lung disease. Students will explore, discuss and reflect on the most common health concerns affecting the aging and elderly as it relates and affects the human service worker as the helping professional. Implications will be examined and discussed for supporting health, safety, wellbeing, independent living, caregiver support and the role of the human service worker as part of a multidisciplinary collaborative approach in preparation for working with this population.

HMNS 2520 - Social and Psychosocial Characteristics of Aging

(3 Credits)

Social and Psychosocial Characteristics of Aging provides competency-based approach to understanding the social and psychological characteristics and effects of aging. Students will examine theorist perspectives on aging and gain insight into the implications of living longer as myths of aging are dispelled and realities are discussed. Special emphasis is placed on social and political issues, global trends, cross-cultural view of Elder’s roles, and quality of life experiences. Additional focus will be paid to special populations to include grandparents as second time parents, women, and veterans. Students will demonstrate competencies in understanding ethical human services approaches regarding critical and relevant issues such as how aging and older adults are studied, social and psychological challenges with aging, independent living and social interactions, death and dying, and social supports. Note Grade of “C” or better is required for Human Service program students (Prerequisites: HMNS 1010). Lecture: 3 Hours

HMNS 2530 - Legal & Financial Literacy Human Service Resource

(3 Credits)

Legal and Financial Literacy: Human Service Resource is designed to introduce students to legal and financial literacy supports that are in place to strengthen advocacy practices. Students will explore common concerns, discuss and dispel myths, while examining best practices for identifying and accessing legal and financial services in support of the elderly client. Relevant discussions surrounding healthcare expenditures for older adults, Medicare, Medicaid, Certified Elder Law Attorney (CELA), durable power of attorney, assets, trusts, guardianship, timing and satisfaction of retirement, the older employed economic status and asset awareness. Note Grade of “C” or better is required for Human Service program students (Prerequisite: HMNS 1010) Lecture: 3 Hours
HMNS 2540 - Human Services Advocacy for Aging and Elderly  
(3 Credits)  
Human Services Advocacy for Aging and Elderly focuses on the role of the human service worker in coordinating and collaborating multidisciplinary and interdisciplinary approaches to advocating best ethical practices for the aging and elderly client. Students will examine case studies to identify and discuss challenges and barriers often experienced by the older adult. Note Grade of “C” or better is required for Human Services program students.

HMNS 2590 - Service Practicum in Gerontology  
(3 Credits)  
Students will develop and refine observation, communication, working relations, presentation, writing, and service skills appropriate for entry-level placement in a gerontology service agency. Students will complete a minimum of 50 hours of volunteer service 25 hours in direct care, 25 in non-direct care within the gerontology community of agencies. Students are required to have a BCI (Bureau of Criminal Investigation) background check and should be up to date with immunizations. Note: Grade of “C” or better is required for Human Service program students (Prerequisite: HMNS 1010, HMNS 2200) Lecture: 3 Hours

HMNS 2710 - Diversity and Cultural Competency Skills  
(3 Credits)  
This course provides students with an awareness of the historical, cultural, socio-economic, biological and psychosocial influences that define diversity. Students learn skills critical to becoming culturally competent and sensitive to diversity. Students develop core competencies to communicate more effectively with diverse populations, to foster inclusive attitudes in the classroom and to work more effectively toward the elimination of racism and other forms of discrimination in public education and social service delivery systems. A 12 hour practicum is required to meet the artifact requirement for education majors planning to transfer. (Corequisite: HMNS 2060 or 2070 or permission of instructor) Grade of C or better is required for Human Services program students. Lecture: 3 hours

HMNS 2900 - Human Services Capstone  
(3 Credits)  
The Human Services Capstone course is designed to integrate the student's comprehensive knowledge gained through the learning experiences involved in the pursuit of the Human Services program curriculum. Students will draw upon knowledge and skill gained in their Human Services and General Education requirements to prepare comprehensive and integrated solutions to case study problems presented in class. A large part of learning will come from students' small group work, taking advantage of each others' collective knowledge and skill, integrating both educational and social services curricula. Grade of C or better is required for Human Services program students.

HOSP (Hospitality)

HOSP 1010 - Lodging Management I  
(3 Credits)  
This course introduces the student to an overview of the lodging management industry, including the organization of guest services and hospitality careers, as well as front office cycle and housekeeping operations. Lecture: 3 hours

HOSP 1020 - Lodging Management II  
(3 Credits)  
This course builds on the concepts and principles presented in the Level 1 course and includes the areas of leadership/management, hospitality marketing and sales and the food and beverage service industry. (Prerequisite: HOSP 1010) Lecture: 3 hours

HSTO (Histotechnician)

HSTO 1310 - Introduction to Histology  
(3 Credits)  
Students are introduced to the procedures involved in the initial accessioning, evaluation, processing and slide preparation of various surgical and autopsy specimens. Additional topics such as safety/infection control and instrumentation are included. (Prerequisite: Enrollment in Histotechnology Program)
HSTO 1320 - Histotechnology II
(6 Credits)
This course explores the principles and techniques associated with routine histological procedures as well as laboratory mathematics. The histology laboratory prepares tissues from surgical procedures and autopsies for microscopic examination by a pathologist. This course provides students with an opportunity to develop entry-level skills under the supervision of a licensed histotechnician, in a clinical setting. Skills are obtained through observation and performance of basic histological procedures. Students will also attend lecture to provide the opportunity to integrate theory and practice to various clinical scenarios. Lecture: 3 hours, Clinical: 120 hours

HSTO 2310 - Histotechnology III
(9 Credits)
This course provides practical application of principles and techniques of histological practice. The clinical setting provides realistic conditions under which a histotechnician functions and allows students to refine those skills acquired in Histology II. Students are introduced to the procedures involved in the embedding, cutting H&E staining and evaluation of various surgical and autopsy specimens. Students will also experience special stains for various tissue components including connective tissues, Amyloid and Carbohydrates. (Prerequisite: HSTO 1320)

HSTO 2320 - Histotechnology IV
(12 Credits)
This course provides practical application of principles and techniques of advanced histological procedures. The clinical setting provides realistic conditions under which a histotechnician functions and allows students to refine skills acquired in Histology III. Students will refine skills in embedding, cutting tissue sections, H&E staining and evaluation of various surgical and autopsy specimens. Students experience special stains for pigments, minerals, microorganisms and Neuropathology. Students are introduced to the special procedures such as Immunohistochemistry, Enzyme Histochemistry and Electron Microscopy. (Prerequisite: HSTO 2310)

HSTO 2330 - Histology Seminar
(2 Credits)
This course provides students with an extensive review, as well as assistance in the preparation of a portfolio. Guest lecturers discuss advanced topics in histology and professional issues. (Corequisite: HSTO 2320)

INST (INST - Process Control Tech.)

INST 1010 - Introduction to Instrumentation Technology
(3 Credits)
This course stresses the theory and practical application of mechanical and electrical sensing devices and control systems. Topics covered include sensing and control devices for temperature, humidity, pressure, level and flow. In addition, calibration procedures are covered. Lecture: 2 hours, Lab: 2 hours

INTC (INTC - Health Care Interpreter)

INTC 1300 - Health Care Interpreter I
(7 Credits)
This course prepares students who are bilingual to develop awareness, knowledge, and skills necessary for effective language interpretation in health care settings. Emphasis includes the roles and responsibilities of a health care interpreter, basic knowledge of common medical conditions, treatments and procedures, insight in language and cultural nuances for specific communities necessary in the art of interpretation. Field work experiences will provide opportunities for students to observe a competent health care interpreter. Lecture: 6 hours, Clinical: 3 hours

INTC 1310 - Interpreting in Health Care II
(8 Credits)
This course prepares individuals who are bilingual to become integral members of the health care team by bridging the language and cultural gap between clients and providers; this is a critical aspect of health care. Interpreting skills learned in INTC 1300 are further enhanced, covering specialized health care service areas such as genetics, mental health, and death and dying. Emphasis is also placed on the development of cultural competency in the community and workplace, and careers in interpretation. Field work experience is included to enable students the opportunity to demonstrate application of knowledge and technical interpreting skills to facilitate linguistic and cultural communication between client and health care providers. (Prerequisite: INTC 1300). Lecture: 6 hours, Clinical: 6 hours
ITAL (Italian)

ITAL 1000 - Basic Spoken Italian I
(3 Credits)
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

ITAL 1010 - Elementary Italian I
(3 Credits)
This course covers elements of the Italian language for beginning students who have had little or no preparation. Conversation, pronunciation, reading, writing and grammar are covered. Aspects of Italian culture are included in the course. Lecture: 5 hours

ITAL 1020 - Elementary Italian II
(3 Credits)
This is a continuation of Elementary Italian I (ITAL 1010). (Prerequisite: ITAL 1010, ITAL 1030 or its equivalent) Lecture: 5 hours

ITAL 1030 - Elementary Italian I
(3 Credits)
Italian 1030 is a faster paced version of Italian 1010. This course is suitable for students with previous experience i.e. Basic spoken Italian and/or other prior formal study of the language, prior formal study of another foreign language, or informal experience with a foreign language. The course covers elements of the language including: conversation, pronunciation, reading, writing, and grammar. Aspects of Italian-speaking cultures are also included. Note: Course content is the same as Italian 1010 with two fewer hours per week. (Prerequisite: Prior preparation as noted above or permission of instructor). Lecture: 3 hours

ITAL 1040 - Elementary Italian II
(3 Credits)
This is a continuation of Elementary Italian I (ITAL 1030). (Prerequisite: ITAL 1030, ITAL 1010 or its equivalent) Lecture: 3 hours

ITAL 1510 - Conversational Italian I
(3 Credits)
This course further develops students' fluency in speaking Italian. Oral practice includes active use of the language in short dialogues stressing basic communication and correct pronunciation. Reading of easy cultural texts also provides material for conversation and discussion. (Prerequisite: Two years of high school Italian or one year of college Italian or the equivalent). Lecture: 3 hours

ITAL 1900 - The Italian Heritage
(3 Credits)
This course introduces students to the cultural development of the Italian people through the centuries. Guest lecturers and class discussion center on significant aspects of Italian literary, social and artistic life as they have contributed to Western Civilization. Audio-visual aids present the lives and works of great figures and are used for appreciation of Italian art, music, food and wine. Italian films viewed in class are a backdrop for discussing the Italian cinema. The history and cultural contributions of Italian-Americans are also included from the discovery of America to mass immigration to present times. Note: The course is conducted in English. Lecture: 3 hours

ITAL 1910 - Italian Culture-Cuisine
(1 Credit)
The Italian Culture-Cuisine course offers students the opportunity to participate in the CCRI Summer Travel/Study Program in Italy; to enhance their educational, professional and personal growth through a multidisciplinary approach to learning and a complete immersion in the Italian language and culture. The course combines linguistic, artistic, historical, and literary traditions and hands-on workshops of the rich culinary traditions of Central Italy and other regions of Italy. Lecture: 6 hours, Lab: 9 hours (2 weeks)

ITAL 1950 - Italian for Business and Travel
(1 Credit)
This course is designed particularly for employees of travel agencies, those in wholesale/retail or import/export businesses and those individuals who are planning a cultural trip to Italy. The course is tailored to the needs of the individual who wants to gain knowledge and appreciation of the Italian
Community College of Rhode Island

language and culture expediently. Emphasis is placed on common verbal expressions for basic communication, such as greetings, lodging, shopping, food, transportation and cultural information about Italian customs and traditions. (Lecture: 1 hour)

<td></td>
</tr>
</tbody>
</table>
LAWS 2060 - The Law of Property, Estates and Trusts  
(3 Credits)  
This course studies the laws of real property, personal property and decedent's estates. Topics to be covered include definitions of real and personal property; the ownership and transfer of real estate (concurrent ownership, deeds, mortgages and leases); and the areas of gifts, wills, inheritance laws, probate and trusts. Lecture: 3 hours

LAWS 2070 - Law of Business Organization  
(3 Credits)  
This course covers the law of agency (principal-agent relationships and independent contractors), federal and state employment law and the law regarding legal forms of business (sole proprietorships, partnerships of various kinds, corporations and limited liability companies). Lecture: 3 hours

LAWS 2090 - Legal Research and Writing  
(4 Credits)  
This course for Paralegal Studies majors covers legal research using primary sources (statutes, court decisions, and regulations); case digests and finding aids; secondary legal sources (encyclopedias, treatises and annotations); and citators (Shepard's Citations and WestLaw's KeyCite). Emphasis is on legal research using computer-assisted legal research (CALR) tools. Students are expected to complete a full legal research project and write a legal memorandum. (Prerequisites: Laws 1080 and 24 credit hours earned or permission of instructor) Lecture: 4 hours - Lab Fee: $20

LAWS 2100 - Law of Torts  
(3 Credits)  
Law of Torts involves the study of civil wrongs that result in personal injury, property damage or economic injuries. This course deals with areas of negligence, intentional torts and strict liability torts. It will also cover topics of professional malpractice, products liability and premises liability. (Prerequisite: LAWS 1020 or LAWS 1080 or permission of instructor) Lecture 3 hours

LAWS 2500 - Case Studies in Criminal Law  
(3 Credits)  
This capstone course in the Law Enforcement program will integrate the material covered in prior classes in the areas of substantive criminal law, criminal procedural law, crime scene investigation, evidentiary law and constitutional law related to law enforcement. Students will work on and write reports on two case studies based upon comprehensive case files. These case files will include documents that would be involved in an actual criminal case such as bills of indictment, police reports, witness statements, forensic reports, search warrant affidavits and inventories, transcripts of court hearings involving the case and the substantive criminal laws that may apply to the facts of the case. Lecture: 3 hours

LEGL (Legal Office Administration)  
LEGL 2310 - Legal Forms and Terminology  
(2 Credits)  
This course studies forms used by attorneys in legal and business transactions. An explanation of the origin and use of the forms introduces terminology in which the legal assistant should be versed. Discussions and simulations revolve around legal terms in the context of a variety of legal documents such as complaints, motions, stipulations and contracts. Lecture: 2 hours - Lab Fee: $20

LEGL 2420 - Legal Office Administration  
(2 Credits)  
This course prepares students to work as legal administrative assistants in a variety of law office environments. Procedures followed by attorneys in various specialties of the law are covered including litigation, real estate law, criminal law, wills and estates and many other areas of the law. Students also become familiar with the court system. Lecture: 2 hours - Lab Fee: $20

LIBA (Liberal Arts)  
LIBA 1000 - The Learner's Journey: Critical Thinking and Learning Strategies for College  
(3 Credits)  
This fully transferable, seminar-style course has been designed to help students maximize their effectiveness in the classroom, and, in turn, enhance their entire college experience. In The Learner's Journey, students develop their critical thinking, reading and writing skills; acquire valuable strategies for analyzing course content and for expressing themselves more confidently and effectively; improve their writing, presentation, collaboration and research skills; and learn to make connections between courses in different disciplines. Through readings, discussions and active participation, students take ownership of their education and find their voices as learners in a higher education environment.
LIBA 1010 - Cooperative Work Experience I  
(4 Credits)  
Cooperative work experience provides students with an opportunity to observe and participate in a work environment related to their academic interests or explore advancement in their current career. Students work approximately 15-20 hours a week at an approved site and participate in an on-line seminar or a one-hour and 40-minute weekly seminar on campus. (Note: LIBA 1010 for Allied Health, Chemical Technology, Computer Science, Engineering, Fine Arts, Fire Science, General Studies, Human Service, Liberal Arts, Paralegal Studies and Law Enforcement) (195 hours work placement / 25 hours seminar)  

LIBA 1020 - Cooperative Work Experience II  
(4 Credits)  
This is an extension of LIBA 1010 in which students develop an in-depth knowledge of specific content areas and demonstrate increased levels of expertise. Students work approximately 15 to 20 hours a week at an approved site and participate in a one-hour and 40-minute weekly seminar on campus or online. For information regarding prerequisites, please contact the Career and Internship Office at 401-825-2327 or 401-333-7326. Note: LIBA 1020 is for students in Allied Health, Chemical Technology, Computer Science, Engineering, Fine Arts, Fire Science, General Studies, Human Service, Industrial Technology, Liberal Arts, Nursing, Paralegal Studies and Law Enforcement. Work placement: 195 hours; Seminar: 25 hours.

LIBA 2030 - Honors Colloquium  
(3 Credits)  
This Honors Colloquium is a discussion-based, research-oriented, multidisciplinary course in which students pursue individual topics of relevance to today’s society under the guidance of faculty. The curriculum, which follows the Phi Theta Kappa Honors Program, includes guest speakers and multimedia presentation in addition to lecture and discussion. The study topic will change every two years. Prerequisite: ENGL 1010 with a grade of C or better. Lecture: 3 hours

LRCT (Library)

LRCT 1010 - Introduction to College Research  
(1 Credit)  
This course will introduce students to online strategies for locating and evaluating articles, books, and Web resources. Students will learn to cite their sources according to standard scholarly formats.

LRCT 1015 - College Research  
(3 Credits)  
College Research will expand the student’s knowledge of various types and formats of information resources. Students will learn information literacy skills including advanced search techniques and evaluation of resources. Students will also gain a greater understanding of issues associated with the ethical use of information. Students will demonstrate the application of learned skills in research for class assignments, as well as for personal and professional research needs. Lecture: 3 hours

LRCT 1020 - College Success  
(3 Credits)  
This course will give new students practical tips and strategies that will help them succeed in college. Emphasis is on attitude, study habits, time and stress management. In a setting of active and collaborative learning, students are engaged in a variety of instructional experiences, including discussions with reading, speaking, writing and listening assignments. The course will require the creation of a personal success plan that will include educational and career goals and will introduce and make use of the college's resources and personnel.

MATH (Mathematics)

MATH (MATHEMATICS)  

Math Placement Test  
Math placement tests are required of all students who wish to enroll in their first math course at CCRI. Students are required to take the placement test either before or at the beginning of the semester in which they wish to take their first math course. Students who are not enrolled in a math course but want to plan for the future are encouraged to take the placement test during the semester prior to enrolling in a math course.

Placement test preparation assistance is available here.
Community College of Rhode Island

**Note:** Developmental math courses are designed to build/refresh basic mathematical skills which provide the necessary background for college-level mathematics courses. All students must demonstrate mental calculation skills and mastery of course content to complete the courses successfully.

College-level math courses require the use of mental calculation skills since each course builds upon the material learned in the prerequisite courses.

Students with a documented disability should meet with a representative from the Office of Disability Services for Students. CCRI will make modifications to academic requirements where appropriate and provide the necessary accommodations to ensure accessibility. The institution cannot, however, make modifications that would substantially change the essential elements of the curriculum. While striving to meet the individual needs of all students, CCRI reserves the right to set and maintain academic standards for performance and personal conduct.

**SEQUENCES OF CCRI MATH COURSES**

Math Pathways

**Here are links to grids of our math courses for Fall 2018:**

**Math Course Flow Chart**

**Math Course Flow Chart for STEM**

Picking the right math courses to start your academic career at CCRI can help you move more quickly towards graduating, transferring, or moving into a career.

If you’re interested in a career or transfer program use this page to help choose your path.

In-house Credit

In-house credits are counted for full- and part-time status and for reasons of financial aid and academic progress. They are not counted in overall GPA, do not count toward any degree or certificate and will appear on student transcripts as “exclude credit.”

**IMPORTANT INFORMATION**

Preparation

Prerequisites for each course are fulfilled only by a grade of C or better or by a sufficient placement test score. The Math Department strongly recommends courses and their prerequisites be taken sequentially in consecutive sessions.

</tbody>
</table>
### MATH 1175C - Statistics for the Health and Social Sciences
(3 Credits)
Statistical procedures required for the analysis of data are explored using data acquired from such fields as medicine, social work, biology, education and business and employing statistical packages as a tool. Prerequisite: Placement in ACCUPLACER Grid 2 or MATH 0099 with a grade of C. Corequisite: MATH 0275.

### MATH 1200C - College Algebra
(3 Credits)
Designed for students who eventually plan to study quantitative business analysis or calculus, this course covers functions and graphs, systems of equations and inequalities, quadratic equations, polynomial and rational expressions, radical, exponential and logarithmic forms. Prerequisite: Placement in ACCUPLACER Grid 3 or MATH 0100, with a grade of C or better. Prerequisite: MATH 0200. Lecture: 4 hours.

### MATH 0095 - Developmental Math Emporium
(4 Credits)
Math 0095 is the course students enroll in if they wish to complete their developmental mathematics requirements in the emporium. Students will progress through course modules under the supervision of a faculty member. Students will be awarded credit for MATH 0099, MATH 0100 or MATH 0101 depending on how much progress the students makes in the emporium. Prerequisites: Completion of, or concurrent enrollment in, ENGL 0850 earning a C or better; or, placement into ENGL 0890 or higher.

### MATH 0099 - Early Foundations of College Mathematics
(4 Credits)
Early Foundations of College Mathematics (4 In-house Credits). This course provides a thorough foundation in the topics of whole numbers, fractions, decimals, ratios and proportions, percentages, and measurement. This course also introduces the real number system, and the properties for solving linear equations and inequalities. Emporium students who complete the modules for Math 0099 may complete additional modules to earn credit for MATH 0100 or MATH 0101. Students who complete MATH 0099 are eligible to take Math 0100, Math 1005, 1025, 1139/0239 and 1175/0275. (Prerequisite: Placement in ACCUPLACER Grid 0 and Completion of, or concurrent enrollment in, ENGL 0850 earning a C or better; or, placement into ENGL 0890 or higher). Lecture or Emporium: 4 hours.

### MATH 0100 - Foundations of College Math
(4 Credits)
This course provides a thorough foundation in the topics of whole numbers, fractions, decimals, ratios and proportions, percentages, and measurement. This course also introduces the real number system, the properties for solving linear equations and inequalities, the rearrangement of formulas, the rectangular coordinate system, and the graphs of linear equations in two variables as well as an introduction to basic probability and statistics. Non-STEM students who master this course are encouraged to enroll in MATH 1139 or MATH 1175. STEM students who master this course are encouraged to enroll in MATH 1200 / 0200. (Prerequisite: Placement in ACCUPLACER Grid 1 or MATH 0099 with a grade of C or better and Completion of, or concurrent enrollment in, ENGL 0850 earning a C or better; or, placement into ENGL 0890 or higher). Lecture or Emporium: 4 hours.

### MATH 0101 - Foundations of College Algebra
(4 Credits)
This modular emporium course contains additional modules beyond those required for Math 0099 and Math 0100. This course serves as a remedial prerequisite to Math 1200 and Math 1179. Topics include the properties of exponents, and an introduction to polynomials, factoring, quadratic equations, rational expressions, rational equations, and application problems.

### MATH 0200 - Support for College Algebra
(2 Credits)
This course provides active support for students taking Math 1200 through the use of a just in time remediation approach. Students in this class will also be taking Math 1200 with the same instructor concurrently. The additional two hours per week allows for time to practice what has been learned in Math 1200 and it allows for more question and answer sessions. Instructors may use class time for supplementary instruction, group work or one on one support.

### MATH 0239 - Support for Liberal Arts Math
(2 Credits)
This course provides active support for students taking Math 1139 through the use of a just in time remediation approach. Students in this class will also be taking Math 1139 with the same instructor concurrently. The additional two hours per week is used to review and develop key mathematical skill necessary to fully succeed in Math 1139.
## Community College of Rhode Island

### MATH 0275 - Support for Statistics for the Health and Social Sciences

(2 Credits)

This course provides active support for students taking Math 1175 through the use of a just in time remediation approach. Students in this class will also be taking Math 1175 with the same instructor concurrently. The additional two hours per week is used to review and develop key mathematical skill necessary to fully succeed in Math 1175.

### MATH 1005 - Business Mathematics

(3 Credits)

The application of elementary mathematics to business and retail situations is discussed. Topics include bank services, taxes, simple interest, commercial discounts, markup and markdown. Lecture: 3 hours.

### MATH 1015 - Mathematics of Finance

(3 Credits)

This course studies in depth the topics of simple interest, bank discount, compound interest and annuities, including amortization and sinking funds.

### MATH 1025 - Introduction to College Mathematics

(3 Credits)

Covering the development of the real number system and the fundamental concepts of algebra and geometry, this course is suitable for prospective elementary school teachers or anyone desiring an introduction to college mathematics.

### MATH 1138 - Topics in Mathematics

(3 Credits)

This course is designed primarily for the liberal arts student who does not plan to pursue any continuing mathematics program. Each semester, different sections focus on different topics and are announced in the online course listing published each semester. The depth of the material is similar to that of MATH 1450.

### MATH 1139 - Mathematics for Liberal Arts Students

(3 Credits)

This course deals with the fundamentals of logic, set theory, probability and statistics. Prerequisite: Math 0100 with a grade of C or better or placement into Grid 3.

### MATH 1145 - Development of the Number System

(3 Credits)

Topics covered in this course include ancient numeration systems; bases; modulo arithmetic; set theoretical and historical development of our number system including natural numbers; integers; rational, irrational, imaginary and complex numbers (with operations and computation within each system); groups and fields; and elementary number theory (basic proofs, divisibility rules, Pythagorean studies, Fermat and Mersenne numbers).

### MATH 1155 - History of Mathematics

(3 Credits)

This course traces the development of mathematical thought through history. Topics include mathematicians, primitive number systems and algorithms, early formulas for area and volume, proofs of theorems, pi, the golden ratio, the development of advanced mathematics, the computer, calculus, network theory and non-Euclidean geometries.

### MATH 1175 - Statistics for the Health and Social Sciences

(3 Credits)

Statistical procedures required for the analysis of data are explored using data acquired from such fields as medicine, social work, biology, education and business and employing statistical packages as a tool. Prerequisite: Placement in ACCUPLACER Grid 3 or MATH 0100 with a grade of C or better or MATH 1025 with a grade of C or better.

### MATH 1179 - Applied Technical Mathematics I

(3 Credits)

This course is the first semester of a two semester sequence covering the essentials of applied technical mathematics. Topics include the basics of working with numerical data, plane and solid geometric shapes, an introduction to functions and their graphs, factoring, operations with algebraic fractions, quadratic equations with real roots, an introduction to the trigonometric functions of acute angles, solving problems involving right triangles, expressions involving rational exponents and base ten logarithms.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1181</td>
<td>Applied Technical Mathematics II</td>
<td>3</td>
<td>This course is the second semester of a two-semester sequence covering the essentials of applied technical mathematics. Topics include graphing linear equations, solving systems of linear equations, using trigonometry to solve problems involving vectors, graphical analysis of waveforms, working with radical expressions, the complex numbers and their application to AC circuits, an introduction to statistics and some miscellaneous topics involving nonlinear equations.</td>
</tr>
<tr>
<td>MATH 1200</td>
<td>College Algebra</td>
<td>3</td>
<td>Designed for students who eventually plan to study quantitative business analysis or calculus, this course covers functions and graphs, systems of equations and inequalities, quadratic equations, polynomial and rational expressions, radical, exponential and logarithmic forms. (Prerequisite: Placement in ACCUPLACER Grid 4 or MATH 0101 with a grade of C or better). Lecture: 4 hours.</td>
</tr>
<tr>
<td>MATH 1220</td>
<td>Scientific Programming</td>
<td>3</td>
<td>This course offers instruction in scientific programming using a current programming language. problems, both numerical and non-numerical, are programmed and solved by use of a mainframe and/or personal computers.</td>
</tr>
<tr>
<td>MATH 1240</td>
<td>Statistical Analysis I</td>
<td>3</td>
<td>An introduction to elementary statistics, this course covers methods used in the collection, presentation, analysis and interpretation of data. Topics include frequency distributions, measures of central tendency and dispersion and sampling, with emphasis on estimation and hypothesis testing.</td>
</tr>
<tr>
<td>MATH 1241</td>
<td>Statistical Analysis II</td>
<td>3</td>
<td>This course includes a study of simple and multiple linear regression, curvilinear regression, correlation analysis, basic designs of experiments, analysis of variance and an introduction to the concepts of time series and index numbers. A statistical package is used in the development and application of topics.</td>
</tr>
<tr>
<td>MATH 2077</td>
<td>Quantitative Business Analysis I</td>
<td>3</td>
<td>The purpose of this course is to develop the quantitative methods needed to solve various problems in business and economics. Topics include functions and graphs, systems of linear equations, linear programming, matrices and determinants, logarithmic and exponential functions and the mathematics of finance.</td>
</tr>
<tr>
<td>MATH 2103</td>
<td>Applied Precalculus</td>
<td>3</td>
<td>Math 2103 is intended for students in the life and social sciences, and any other areas where the application of mathematics is important. Students in this course will develop an understanding of functions and how they are used to model real world phenomena, including but not limited change, motion and growth. The linear, quadratic, power, polynomial, rational, exponential, logarithmic, and period functions are studied in this course. Students will become familiar with algebraic, numerical and graphical properties of these functions. This course is not intended for students planning to study mathematics, statists, computer science, physical sciences, engineering or any other discipline requiring the complete calculus sequence. Math 2103 is not an alternative to Math 2111 (Precalculus) and does not satisfy the requirement for Math 2141 (Calculus I). (Prerequisite: Math 1200, Math 1201 or placement test) Lecture: 4 hours</td>
</tr>
<tr>
<td>MATH 2110</td>
<td>College Trigonometry</td>
<td>3</td>
<td>Designed for students who plan to study calculus eventually, this course deals with trigonometry from an analytical approach. Topics include relations and functions in general, the trigonometric functions and their inverses, graphs, solutions of triangles, vectors, trigonometric identities and equations and applied problems.</td>
</tr>
<tr>
<td>MATH 2111</td>
<td>Pre-Calculus Mathematics</td>
<td>4</td>
<td>Functions and their graphs are discussed with particular attention paid to polynomial, rational, trigonometric, exponential and logarithmic functions. Determinants, matrices, complex numbers and analytic geometry are also studied.</td>
</tr>
</tbody>
</table>
MATH 2131 - Applied Calculus  
(3 Credits)  
This course is intended for students in the life and social sciences who have taken Math 2013. The differential and integral calculus are developed with an emphasis on solving real world problems in the science. Limits, derivatives and integrals of algebraic, logarithmic, exponential and trigonometric functions are studied. Applications will include analyzing graphs, finding maximum and minimum values of functions, calculating rates of change and computing area and cumulative change. This course is not intended for students planning to study mathematics, statists, computer science, physical sciences, engineering or any other discipline requiring the complete calculus sequence. Math 2131 is not an alternative to Math 2141 (Calculus I) and does not satisfy the requirement for Math 2142 (Calculus II). (Prerequisite: Math 2103, Math 2111 or placement test) Lecture: 4 hours

MATH 2138 - Quantitative Business Analysis II  
(3 Credits)  
Differential and integral calculus are developed with special emphasis on practical applications to business and economics

MATH 2141 - Calculus I  
(4 Credits)  
Topics considered in this first course of differential and integral calculus include limits and continuity, first and higher-order derivatives with applications (including curve sketching), the differential and definite and indefinite integrals with applications (including areas and volume).

MATH 2142 - Calculus II  
(4 Credits)  
This course covers the calculus of logarithmic, exponential, trigonometric, inverse trigonometric and hyperbolic functions. Some methods of integration are covered, including integration by parts and numerical methods. L'Hospital's rule, improper integrals, infinite series and the calculus in polar coordinates also are introduced.

MATH 2243 - Calculus III  
(4 Credits)  
This course covers the calculus of three-dimensional space, including partial derivatives, multiple integrals and the calculus of vector-valued functions.

MATH 2362 - Advanced Engineering Mathematics  
(4 Credits)  
This course covers first-order ordinary differential equations, second-order linear differential equations, Laplace transforms and power series solutions. A unit on applied linear algebra is also included.

MATH 2500 - Applications in Science & Math  
(1 Credit)  
This capstone course is intended for students in their final semester of the Science program. It allows students an opportunity to demonstrate and integration of knowledge and abilities acquired in previous science and mathematics courses with added intent of developing new insights. Students read selected articles, such as those that come from scientific journals, in a variety of fields and then have the opportunity to collaborate with their peers honing writing, synthesis and presentation skills (Pre-requisites: Successful completion of a minimum of 21 general education credits and a minimum of 18 Science credits or permission of the instructor). - Lab Fee: $20

MEDL (Medical Office Administration)

MEDL 2350 - Medical Terminology  
(2 Credits)  
This course introduces medical, diagnostic, symptomatic and surgical terms. Literal definitions and spelling are stressed. Lecture: 2 hours

MEDL 2360 - Medical Document Processing  
(2 Credits)  
This course acquaints the medical administrative secretaries/assistants with formatting and editing skills needed for processing medical documents that are commonly part of their work environment. A job simulation project is the basis for these applications and is completed using Microsoft Word. Students continue to develop their keyboarding speed and accuracy. The keyboarding speed needed to pass this course is 30-55 wpm. (Prerequisite or corequisite: OFTD 1220 or permission of instructor) Lecture: 2 hours, Lab: 1 hour, Fall only - Lab Fee: $20
<table>

</thead>
<tbody>
<tr>
<td>MEDL 2380</td>
<td>Medical Office Transcription I</td>
<td>3</td>
<td>This course focuses on the skills a medical transcriptionist must possess in preparing for eventual employment in a private physician's office, clinic or hospital. Emphasis is placed on the efficient production of case histories and physical examinations, radiological reports, X-rays, operative reports, pathology reports, discharge summaries and autopsy reports from pre-recorded dictation material. (Corequisite: OFTD 1220 or permission of instructor) Lecture: 2 hours, Lab: 2 hours Fall only - Lab Fee: $20</td>
</tr>
<tr>
<td>MEDL 2390</td>
<td>CPT Medical Insurance Coding</td>
<td>3</td>
<td>This course familiarizes students with Current Procedural Terminology (CPT) codes and modifiers along with their corresponding unique descriptions. Topics include use of guidelines, notes, index, appendices and modifiers and AMA documentation guidelines to ensure correct coding. OIG (Office of Inspector General) compliance for individual and small group physicians' practice is also included. (Corequisite: MEDL 2400, 2350). Lecture: 3 hours</td>
</tr>
<tr>
<td>MEDL 2400</td>
<td>ICD-CM Medical Insurance Coding</td>
<td>2</td>
<td>This course familiarizes students with International Classification of Diseases and Clinical Modification codes (ICD-CM). An overview of the Tabular List (Volume I) and the Alpha Index (Volume II) will include coding fundamentals and conventions. Various coding scenarios challenge small student groups to apply techniques learned to code claims. (Corequisite: MEDL 2350 or permission of instructor) Lecture: 2 hours</td>
</tr>
<tr>
<td>MEDL 2410</td>
<td>Medical Insurance Billing</td>
<td>3</td>
<td>This course prepares students for employment as medical insurance specialists in physicians' offices and clinics. Topics include the claim process, inpatient and outpatient billing, procedural coding and billing requirements of various health care providers. Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20</td>
</tr>
<tr>
<td>MEDL 2420</td>
<td>Practical Applications in Professional Medical Coding</td>
<td>4</td>
<td>This course advances the student’s knowledge of the Current Procedural Terminology (CPT), International Classification of Diseases (ICD), and Healthcare Common Procedure Coding (HCPC) code sets and outlines the application of the fundamentals of coding and documentation in the physician’s practice. This course prepares students for the American Academy of Professional Coders CPC Certification Examination. (Prerequisite MEDL 2390 and 2400) Lecture: 4 hours</td>
</tr>
<tr>
<td>MEDL 2430</td>
<td>Electronic Medical Records and Practice Management</td>
<td>3</td>
<td>This course prepares students for employment within health care facilities. Topics include fundamentals of electronic medical records (EMR) management, integration of patient and provider information, clinical documentation, and effective office communication via an EMR system. This course will also prepare students to take the National Health Care Association’s Certified Electronic Health Records (CEHRS) Assessment to become CEHRS certified. Lecture: 3 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MEDL 2480</td>
<td>Medical Office Transcription II</td>
<td>2</td>
<td>This is a continuation of the applications of medical transcribing skills learned in MEDL 2380 and provides a more in-depth understanding of medical terminology pertaining to the body systems. Medical reports are transcribed for individual case studies in patients with specific medical problems. In addition, outpatient medical reports are transcribed using the HPI (history, physical, impression and plan) and SOAP (subjective, objective, assessment and plan) formats. (Prerequisite: MEDL 2380) Lecture: 2 hours, Lab: 1 hour, Spring only - Lab Fee: $20</td>
</tr>
<tr>
<td>MEDL 2910</td>
<td>Medical Cooperative Work Experience</td>
<td>3</td>
<td>This is a planned and supervised cooperative work experience. Students are placed in a medical office during their last semester for the purpose of observing the operations and routines of that office. The opportunity to perform tasks required in a medical office is provided. Students attend class on campus during weeks one through five then work approximately 13 hours a week in an approved cooperative work experience placement during weeks six through 15. (Prerequisites: MEDL 2360 and 2380; enrollment in Administrative Office Technology program, completion of 24 credits in that program and 2.0 GPA or permission of instructor) Lecture: 1 hour per week for five weeks, CO-OP: 13 hours per week for 10 weeks</td>

</thead>
<tbody>
<tr>
<td>MLTC 1110</td>
<td>Bacteriology</td>
<td>4</td>
<td>The biological aspects of microbial structure, metabolism and growth are presented. Emphasis is on classification of microorganisms, mostly bacteria and identification of disease-producing organisms. (Prerequisite: Enrollment in Clinical Lab Tech program or department permission) Lecture: 2 hours, Lab: 4 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1120</td>
<td>Clinical Immunology</td>
<td>3</td>
<td>This course covers basic theories of immunology, laboratory diagnosis of infectious diseases and diseases of the immune system. Students learn to perform basic serological techniques. Note: This course is a prerequisite for MLTC 1160. (Prerequisite: Enrollment in Clinical Lab Tech program or department permission) Lecture: 2 hours, Lab: 3 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1130</td>
<td>Phlebotomy for Medical Laboratory Technicians I</td>
<td>1</td>
<td>This course covers principles of phlebotomy and specimen handling. Students perform venipuncture on training arms, venipuncture on adults, capillary punctures, isolation techniques, blood culture site preparation and specimen processing. Note: This course is a prerequisite for MLTC 1930. (Prerequisite: Enrollment in Clinical Lab Tech program or department permission) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10</td>
</tr>
<tr>
<td>MLTC 1150</td>
<td>Urinalysis</td>
<td>3</td>
<td>The formation of urine and the principles of the laboratory procedures used in the physical, chemical and microscopic examination of urines are discussed. Normal values are presented and the significance of abnormal results explained. Complete urinalysis is performed in the training laboratory. Quality control in the urinalysis laboratory is performed and stressed. (Prerequisite: Enrollment in Clinical Lab Tech program or department permission) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1160</td>
<td>Immunohematology</td>
<td>3</td>
<td>This course covers red cell antigens and antibodies, antibody identification, crossmatching, donor processing and component therapy. Theory is presented in lecture and a laboratory experience enables students to apply these theories to routine laboratory procedures. (Prerequisite: MLTC 1120 or equivalent or permission of department) - Lab Fee: $20</td>

<td>Fundamentals of Clinical Chemistry</td>
<td>3</td>
<td>This course introduces the analytical skills needed to correctly perform analytic procedures that yield accurate and precise information. Basic principles and practices of clinical chemistry are emphasized. Laboratory safety, quality control and statistics, analytical techniques and instrumentation are stressed. (Prerequisite: Enrollment in Clinical Lab Tech program or department permission) Lecture: 3 hours</td>
</tr>
<tr>
<td>MLTC 1210</td>
<td>Introduction to Clinical Laboratory Science</td>
<td>3</td>
<td>This course offers a basic introduction to the clinical laboratory. Current concepts and general principles of all areas connected with the medical laboratory field are explored. Students are introduced to selected basic techniques used in the clinical laboratory. (Note: This course is open to any student interested in the field of clinical laboratory technology or can be used as a general studies elective). Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1930</td>
<td>Phlebotomy for Medical Laboratory Technicians II</td>
<td>1</td>
<td>This course provides clinical laboratory technology students with the opportunity to become proficient in phlebotomy in a clinical laboratory setting. In addition, use of laboratory information systems, accessioning and proper record-keeping are demonstrated. (Prerequisite: MLTC 1130 or permission of department) Clinical: 40 hours/week</td>
</tr>
<tr>
<td>MLTC 1940</td>
<td>Clinical Immunohematology</td>
<td>3</td>
<td>This clinical internship provides the student with opportunity to implement skills learned in MLTC 1160 and MLTC 1161 in a clinical laboratory environment. Students attend for 40 hours per week for 2.5 weeks. There is ample opportunity for additional practice of blood bank principles and procedures and to gain experience with automated instruments. (Prerequisite: MLTC 1160, MLTC 1161 and MLTC 1120). Clinical: 40 hours/week/2.5 weeks - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1950</td>
<td>Clinical Urinalysis</td>
<td>1</td>
<td>This clinical experience will provide the student with theory and practice in performing urinalysis, with the examination of the physical, chemical and microscopic components of urine. Analysis of other body fluid, including serous, amniotic, synovial, seminal and vaginal are included. Students attend for 40 hours per week for 1.5 weeks. (Prerequisite: MLTC 1150). Clinical: 40 hours/week/1.5 weeks - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 1960</td>
<td>Clinical Laboratory Information Systems</td>
<td>1</td>
<td>Workflow in the laboratory has been adjusted due to the introduction of the computer. This course is an introduction to data entry processing and retrieval of laboratory information. Specimen tracking is emphasized in this hands-on environment. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $10</td>
</tr>
<tr>
<td>MLTC 1970</td>
<td>Information Technology for Clinical Lab Technicians</td>
<td>2</td>
<td>This course provides students with the knowledge to perform laboratory procedures that require the use of a computer. Students learn to understand the basics of a system that delivers rapid and accurate reporting to caregivers and to understand the role that the regulatory agencies play in the laboratory information system. (Prerequisite: COMI 1100) Lecture: 2 hours, Lab: 2 hours</td>
</tr>
<tr>
<td>MLTC 2110</td>
<td>Clinical Microbiology I</td>
<td>4</td>
<td>Procedures for cultivation and identification of pathogenic microorganisms from clinical material are covered in this course. Additional topics such as antimicrobial susceptibility tests, quality control and automation in microbiology are also included. (Prerequisite: MLTC 1110 or equivalent) Lecture: 2 hours, Lab: 4 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>MLTC 2120</td>
<td>Hematology</td>
<td>4</td>
<td>The study of the structure and function of blood and its role in health and disease is presented. Red blood cells, white blood cells and coagulation factors including platelets are observed and discussed. The classification of leukemias, anemias and other hematological disorders is studied. Development of skills in manual and automated laboratory procedures is stressed. Laboratory procedures include coagulation studies, manual and</td>
</tr>
</tbody>
</table>
automated red blood cell, white blood cell and platelet counting and enumeration of special cells. Films of normal and abnormal peripheral blood are
examined. Lecture: 2 hours, Lab: 6 hours - Lab Fee: $20

MLTC 2190 - Clinical Chemistry I
(5 Credits)
The basic principles of spectrophotometry and the diagnostic methods of analysis are presented. The study of protein, fat and carbohydrate
metabolism, electrolyte and acid-base balance PCR, molecular methods enzymes and renal function procedures as they relate to diagnostic testing
is stressed. Laboratory mathematics and quality control are discussed. Selected laboratory procedures including manual and automated quantitative
analysis of serum, plasma and urine are performed. (Prerequisite: MLTC 1190 or permission of department) Lecture: 3 hours, Lab: 6 hours - Lab Fee:
$20

MLTC 2910 - Clinical Microbiology II
(4 Credits)
This course provides practical application of principles and techniques that have been previously learned. Students learn by doing actual testing
at the bench with the same exposure to realistic conditions under which a technician works. Coursework involves skill development of clinical
bacteriology, mycology and parasitology. (Prerequisite: MLTC 2110) Clinical: 32 hours/week

MLTC 2920 - Clinical Hematology II
(4 Credits)
This course provides practical application of principles and techniques that have been previously learned. Students learn by doing actual testing at the
bench with the same exposure to realistic conditions under which a technician works. (Prerequisite: MLTC 2120) Clinical: 32 hours/week

MLTC 2930 - Clinical Laboratory Science Seminar
(2 Credits)
The course examines case studies as they relate to hematology, clinical chemistry, microbiology, urinalysis, immunohematology and immunology.
Self-Assessments are used as a review to enhance the students' knowledge base. A capstone presentation is required as a culmination of the students'
understanding of clinical laboratory diseases and disorders. (Corequisite: MLTC 2910 or 2920 or 2990 or permission of department) Lecture: 3 hours

MLTC 2990 - Clinical Chemistry II
(4 Credits)
This course provides practical application of principles and techniques that have been previously learned. Students learn by doing actual testing at the
bench with the same exposure to realistic conditions under which a technician works. (Prerequisite: MLTC 2190) Clinical: 32 hours/week

MRIC (Magnetic Resonance Imaging)

MRIC 2260 - Introduction to MRI
(6 Credits)
This course provides students with a knowledge of MRI image production, including image acquisition and recon-struction. The selection of
scan protocols will be related to anatomical region, patient history and physical condition. Attention is given to patient education, screening and
care. Clinical application is part of this course. Anatomical regions of the head and neck, spine, thorax and abdomen are considered. Prerequisite:
Registered radiographer, Lecture: 3 hours, Clinical: 16 hours

MRIC 2270 - MRI Physics and Instrumentation
(3 Credits)
This course provides students with a basic understanding of the physics of magnetic resonance imaging and the instrumentation used to acquire MRI
images. The basic principles of electricity and magnetism are addressed, as well as the characteristics of radio frequencies and the phenomenon of
resonance. Application of these principles to data acquisition is discussed. Hazards associated with strong magnetic fields and radio frequencies is
addressed, as well as the actual components of magnetic resonance equipment. Prerequisite: Registered radiographer, Lecture: 3 hours

MRIC 2280 - Procedures and Methods for MRI Imaging
(6 Credits)
This course addresses advanced imaging techniques, including MR angiography, cardiac imaging and spectroscopy. The nature and use of contrast
agents is discussed. Factors related to image quality, artifacts and quality assurance is considered. Imaging of the pelvis, musculoskeletal and
vascular system are discussed. Supervised clinical practice is included. Lecture: 3 hours; Clinical 16 hours
### MRIC 2290 - MRI Safety and Quality Assurance
(3 Credits)
This course addresses safety practices and quality assurance as they relate to magnetic resonance imaging. Factors related to image quality and optimal operation of imaging equipment are considered. Students evaluate MRI images for quality and learn to manipulate parameters when necessary. MRI screening procedures and safety considerations for all patients are addressed as well as special concerns for patients with biomedical implants and devices. Students apply knowledge from classroom instruction and activities as part of a supervised clinical experience. Lecture: 3 hours

#### MUSC (Music)

### MUSC 1010 - Foundations in Music
(3 Credits)
This is a beginning study of music reading and writing including notation, terminology, major and minor keys, interval recognition, triad identification, rhythmic perception, melodic dictation and sight singing. This course can be used as an elective for non-majors. Music majors may enroll in the course as a review if necessary, but this course does not count toward music degree requirements. (See MUSC 1700) Lecture: 3 hours

### MUSC 1030 - Voice Class
(3 Credits)
This course is designed to develop basic vocal technique in terms of breath control, tone production, tone placement, articulation and diction through appropriate exercises, as well as to develop basic musicianship through careful study and singing of a diversified vocal repertoire. Both ensemble and solo pieces are assigned. Lecture: 3 hours

### MUSC 1050 - Music Before 1750
(3 Credits)
The history of music of the early Christian, Medieval, Renaissance and Baroque periods is examined in reference to the culture in which each was created. Special emphasis is placed on intensive listening. Lecture: 3 hours, Spring semester

### MUSC 1060 - Music After 1750
(3 Credits)
This course covers the history of music of the Rococo, Classical, Romantic and early 20th century periods with cultural correlations to the periods. Special emphasis is placed on intensive listening. Lecture: 3 hours, Fall semester

### MUSC 1091 - Opera Workshop I
(1 Credit)
This course is a workshop designed to explore the basics of integrating singing, movement and dramatization into opera performance. Emphasis is placed on character development, score study and stage movement in two consecutive semesters. Each student in the class will be assigned a role in the spring opera production. During the first semester, the roles are musically prepared and memorized. Detailed musical coaching including stylistic study, diction, and period performance practice. Opera Workshop I may be repeated four times. (Prerequisite: College freshman ability in singing, as demonstrated in an informal audition at the first class meeting; recommended: Enrollment in sequential course, MUSC 1092- Opera Workshop II in Spring semester) Rehearsal: 2.5 hours, Fall semester

### MUSC 1092 - Opera Workshop II
(1 Credit)
This course is the second semester of a workshop designed to explore the integration of singing, movement and dramatization into operatic performance. Performance by the performance date, students will display a comprehensive knowledge of the opera roles assigned, including the acting, stage movement and overall dramatic presentation by participating in a fully staged performance of the chosen opera. Opera Workshop II may be repeated four times. (Prerequisite: Completion of MUSC 1091 in the same academic year) Rehearsal: 2.5 hours, Spring semester

### MUSC 1110 - Jazz History
(3 Credits)
This course is designed to familiarize students with literature and techniques employed in jazz from the 1890s to the present. The course begins with a study of the elements of music, and major jazz styles are considered in historic context. Significant jazz artists studied include Louis Armstrong, Duke Ellington, Charlie Parker and Miles Davis. Lecture: 3 hours
MUSC 1112 - Introduction to Digital Recording Technology  
(3 Credits)  
This is an introductory course in recording technology and music production using Pro Tools software. The course assumes no prior music production experience or music theory background. The fundamental concepts of sound, digital audio workstations (DAW), recording studio equipment and techniques, audio and MIDI recording, editing, mixing and mastering will be introduced. Students will finish the course with the basic knowledge of how to set up a home studio and begin producing their own music. Lecture/Studio: 3 hours - Lab Fee: $20

MUSC 1113 - Audio Recording  
(3 Credits)  
This course is an in-depth study of digital signal processing within a multimedia, sound design, or music production process. It includes techniques such as spectrum, dynamic, time, and mastering configurations. Students will explore the modern concepts of personal computer processing, as well as analyze the recording, mixing and mastering of professional mixes. (Prerequisite: MUSC 1112 or permission of instructor). Lecture/studio: 3 hours - Lab Fee: $20

MUSC 1120 - The American Musical  
(3 Credits)  
This course is a study of the American Broadway musical from 1870 through the present, including works by Kern, Rodgers/ Hammerstein, Sondheim and Webber. Lecture: 3 hours

MUSC 1130 - String Class I  
(3 Credits)  
This course is designed to develop the basic skills of playing the violin, viola, cello or double bass, including tone quality, intonation, technical facility, sight reading and basic performance. A limited number of instruments are provided by the department. No prior playing experience is necessary, but students must read music. (Prerequisite: MUSC 1010 or 1700 or permission of instructor) Spring only. Lecture: 3 hours

MUSC 1135 - String Class II  
(3 Credits)  
This is a sequel to MUSC 1130 to improve basic playing skills and to acquaint students with a string instrument not studied in String Class I. (Prerequisite: MUSC 1130 or permission of instructor) Lecture: 3 hours, Spring semester

MUSC 1137 - Beginning Guitar Class  
(3 Credits)  
This elective course is designed to introduce students to the fundamentals of music through a study of the guitar. Students with little or no experience on the instrument will learn the basics of rhythm, melody and harmony as well as learn to perform solo, duet and ensemble pieces in a class setting. The course will develop technical skills through scales and exercises, which are essential for performing chords, song accompaniments and folk melodies. In addition, basic music reading and writing will be learned throughout the semester. Also, students must supply their own nonelectric instruments. No previous musical experience is required for this class. This beginning guitar course is not for the experienced guitarist. Lecture: 3 hours

MUSC 1140 - Piano Class I  
(2 Credits)  
This course develops basic keyboard skills, including two-octave scales and chord progressions, improvisation of simple accompaniments and sight reading of easier selected pieces. (Prerequisite: MUSC 1010 or 1700 or permission of instructor) Lecture: 4 hours

MUSC 1145 - Piano Class II  
(2 Credits)  
A sequel to MUSC 1140, this course places emphasis on improving finger dexterity, hand coordination, pedalling techniques, sight-reading, articulation and interpretive skills. (Prerequisite: MUSC 1140 or permission of instructor) Lecture: 4 hours

MUSC 1160 - Introduction to Music  
(3 Credits)  
This course is designed to foster better understanding and appreciation of great music of the Western world. European and American musical styles, techniques and forms are presented from the listener's standpoint. Lecture: 3 hours
### MUSC 1165 - History of Rock
(3 Credits)
This course covers the history of rock music, its diverse American influences, its emergence as a recognizable style in the 1950s and its symbiotic relationship with 20th century and contemporary society. Students will learn to become active listeners and to articulate the ways in which various compositional techniques and performance practices in rock music express aspects of the human condition. Lecture: 3 hours

### MUSC 1175 - Music Therapy and Geriatrics
(3 Credits)
This is an introductory course on the field of Music Therapy and the benefits of using music as an intervention with a geriatric population. Students will learn how music and music-related activities can be utilized to connect with people who are living with age-related disorders. Topics will include the history of Music Therapy, the function of music, and how music is used by trained Music Therapists when working with an elderly population. Students will learn activities and strategies that can be used by health and human services professionals when working with an elderly population when a Music Therapist is not available. Lecture: 3 hours

### MUSC 1180 - Jazz Ensemble
(1 Credit)
This is a course designed to provide students with opportunities to participate in a musical ensemble, perform various styles of jazz and develop their improvisational ability. Note: Instrumentation and stylistic direction of the ensemble may vary from semester to semester. Four credits of this ensemble may be counted toward the A.F.A. degree ensemble requirement. Additional credits are counted as electives. Prerequisite: Technical proficiency on an instrument and audition during the first week of classes. Rehearsal: 2.5 hours

### MUSC 1200 - Chamber Ensemble (Band)
(1 Credit)
The course provides an opportunity for students to develop ensemble skills in a small group setting. Various combinations of winds, strings, piano and percussion are utilized. Note: Four credits of this ensemble are counted toward the A.F.A. degree requirement. Further ensemble credits are counted as electives. (Prerequisite: Moderate technical proficiency on an instrument and/or permission of instructor) Rehearsal: 2.5 hours

### MUSC 1210 - Chorus
(1 Credit)
This course is designed to provide singers an opportunity to perform in an ensemble while developing vocal technique proper breath support, tone production, tone placement, etc. Note: Four credits of this ensemble are counted toward the A.F.A. degree requirement. Further ensemble credits are counted as electives. (Prerequisite: Audition at first class meeting) Rehearsal: 2.5 hours

### MUSC 1220 - Chamber Singers
(1 Credit)
This course is for a select group of singers who perform a variety of choral repertoire, including a cappella polyphonic compositions and 20th century styles. Note: Four credits of this ensemble are counted toward the A.F.A. degree requirement. Further ensemble credits are counted as electives. (Prerequisite: Audition at the first class meeting) Rehearsal: 2.5 hours

### MUSC 1231 - Orchestra
(1 Credit)
Study and performance of standard and modern repertoire for the orchestra. Open to qualified instrumentalists by audition. Course meets at Rhode Island College Nazarian Center. In addition to weekly rehearsals, attendance at dress rehearsal and performance dates are required. Offered Fall and Spring. (Prerequisite: Audition is required) Rehearsal: 2.5 hours

### MUSC 1240 - Applied Music Violin I
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378
MUSC 1242 - Applied Music Violin-Secondary  
(1 Credit)  
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1250 - Applied Music Violin 2  
(2 Credits)  
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1252 - Applied Music Violin-Secondary  
(1 Credit)  
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1260 - Applied Music Viola I  
(2 Credits)  
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1262 - Applied Music Viola-Secondary  
(1 Credit)  
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1270 - Applied Music Viola 2  
(2 Credits)  
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378
MUSC 1272 - Applied Music Viola-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1280 - Applied Music Violoncello
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1282 - Applied Music Violoncello-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1290 - Applied Music Violoncello
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1292 - Applied Music Violoncello-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1300 - Applied Music String/Electric Bass
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378
MUSC 1302 - Applied Music String/Electric Bass-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1310 - Applied Music String/Electric Bass
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1312 - Applied Music String/Electric Bass-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

MUSC 1320 - Applied Music Flute 1
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378

MUSC 1322 - Applied Music Flute-Secondary
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. MUSC 2040 - Applied Music: Jazz-Rock Arranging
(2 Credits)
This course is designed to introduce students to the skills required for arranging in the jazz and jazz-rock idioms. Topics include instrumental characteristics, writing for winds and rhythm sections, multi-part writing and analysis of works by significant arrangers. Student projects include the preparation of two arrangements for jazz ensemble. (Prerequisites: Music 1800 and 1810) Private lesson: 1 hour per week by appointment. Applied Music Fee to be paid to the bursar after registering for the course. See page 12 Explanation of Fees for more information. Contact the Performing Arts Department for information and to apply. - Applied Music: $378

MUSC 2070 - Jazz Harmony I
(2 Credits)
This course is designed to introduce students to theoretical analysis and aural recognition in the jazz idiom. Topics include chord construction and identification, sight singing and ear training. (Prerequisites: MUSC 1800 and 1810) Lecture: 2 hours, Fall semester

MUSC 2080 - Jazz Harmony II
(2 Credits)
This course is designed to develop further understanding of theoretical analysis and aural recognition in the jazz idiom. Topics include modal harmony, re-harmonization, sight singing and ear training. (Prerequisite: MUSC 2070) Lecture: 2 hours, Spring semester

MUSC 2090 - Jazz Improvisation I
(3 Credits)
This course introduces students to the skills required for jazz improvisation. Topics include chord progressions, scales, modes and the analysis and creation of melodic lines. Musical performance is emphasized. (Prerequisite: MUSC 1800 and 1810) Lecture: 3 hours, Fall semester

MUSC 2100 - Jazz Improvisation II
(3 Credits)
This course is designed to further develop students' improvisational skills. Topics include complex chords, modes of the melodic minor scale and performing standard works in all keys. (Prerequisite: MUSC 2090) Lecture: 3 hours, Spring semester

MUSC 2240 - Applied Music Violin
(2 Credits)
The course provides private music instruction on a principal instrument or in principal voice for music majors. Instruction is offered in classical music or jazz (one hour lesson per week) for students already proficient in playing an instrument or singing. Ability to read music is required. All students registered for principal applied music will be required to perform in a student recital at least once per semester. Admission to any of the applied music courses is by audition only. Students will be assigned to CCRI Music faculty. (Prerequisite: College freshman ability in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $378
MUSC 2242 - Applied Music Violin-Secondary  
(1 Credit)
Private music instruction on a second instrument or in voice for music majors, or private music instruction for non-majors wishing to study an instrument or voice for credit. Instruction is offered in classical music or jazz (one half-hour lesson per week) for students with basic proficiency in playing an instrument or singing. Elementary ability to read music is necessary. All students are required to perform in a student recital at least once per semester. Admission is by audition only. Students are assigned to CCRI Music faculty. (Prerequisite: Basic proficiency in playing an instrument or singing, as demonstrated in an audition.) Applied Music fee to be paid to the bursar after registering for the course. Contact the Performing Arts Department for detailed audition information and dates, and to apply. - Applied Music: $189

<td>NURP 1015P</td>
<td>Gerontology</td>
<td>2</td>
<td>This course introduces the student to the social, psychological, and physiological changes associated with the aging process with the intent of promoting safety and maintaining optimal levels of health. Nursing management of common health care issues that often affect older adults will be addressed. Lecture: 2 hours</td>
</tr>
<tr>
<td>NURP 1010</td>
<td>Practical Nursing I</td>
<td>7</td>
<td>This course introduces the nursing student to the role of the licensed practical nurse, including legal and ethical standards. Nursing concepts are examined along with evidence-based interventions to meet basic patient needs. This conceptually organized content provides opportunity to achieve a broad understanding of individuals and their health issues that impact the health care system, both institutionally and in the community. Students apply theory in clinical practice, a major focus of which is care of the elderly in subacute care facilities. (Prerequisites: ENGL 1010, HESI Entrance Exam) Lecture: 3 hours per week; Clinical: 12 hours per week. - Lab Fee: $20</td>
</tr>
<tr>
<td>NURP 1020</td>
<td>Practical Nursing 2</td>
<td>9</td>
<td>Building upon the basic concepts and skills taught in NURP 1010, this course expands that conceptual foundation for the student caring for adult patients with common, less complex medical and surgical disorders. Physiological, psychosocial, spiritual, cultural, legal, and ethical aspects of routine patient care are addressed. Attention is also directed toward the practical nurse's role in all phases of health promotion. A variety of medical-surgical facilities are utilized for clinical learning experiences. (Prerequisites: NURP 1010, NURS 1015P, NURS1061P, BIOL 1070). Lecture: 5 hours per week; Clinical: 12 hours per week. - Lab Fee: $20</td>

</tbody>
</table>
| NURP 1030   | Practical Nursing 3                  | 10      | Building upon the concepts, skills, and routine patient care taught in NURP 1010 and NURP 1020, this course rounds out the practical nursing student’s education with an introduction to issues related to care of maternity, pediatric, and mental health patients. Content includes care of the
mother during a normal pregnancy, care of the normal newborn, care of the developing child, and care to persons with mental health disorders. Basic knowledge of the leadership role for the practical nurse is presented. Conceptual foundations for the care of patients with routine medical issues is continued. Students have clinical experience with maternity, pediatric, psychiatric, and adult/geriatric patients. This is the completion course for students who wish to graduate as practical nurse candidates. (Prerequisites: NURP 1020, NURP 1062, PSYC 2010). Lecture: 4 hours per week; Clinical: 12 hours per week. - Lab Fee: $20

NURS 2500 - Nursing Capstone
(3 Credits)
In this course, students synthesize acquired knowledge and apply that knowledge in a clinical immersion experience. Students examine and apply an understanding of professional nursing standards, ethical problem-solving, evidence-based practice, and a commitment to lifelong learning. The clinical experience provides opportunities for teamwork and collaboration in managing care for groups of patients, development of leadership skills, and participation in quality improvement activities. (Prerequisite: NURS 2060; Corequisite or prerequisite: BIOL 2210) Lecture: 2 hours per week, Clinical: 12 hours per week over 7.5 weeks. - NCLEX Review Course: $300

OCEN (Oceanography)

OCEN 1010 - Introduction to Oceanography
(3 Credits)
This course is a study of the marine environment describing principles of physical, chemical, biological and geological oceanography. Topics include the origin of oceans; the composition and history of seawater; oceanic currents, tides, waves and beaches; the sea floor; plant and animal life in the sea; oceanic resources and food; and marine pollution. Note: Completion of both OCEN 1010 and OCEN 1030 will satisfy one laboratory science requirement in the liberal arts and general studies programs. Lecture: 3 hours

OCEN 1030 - Oceanography Laboratory
(1 Credit)
This lab course emphasizes topics covered in OCEN 1010 (Introduction to Oceanography) such as ocean life, sediments, salinity, currents and plate tectonics. It allows a more hands-on approach to learning. Note: Completion of both OCEN 1010 AND OCEN 1030 will satisfy one laboratory science requirement in the Liberal Arts and General Studies programs. Lab: 2 hours - Lab Fee: $10

OCTA (Occupational Therapy Assistant)

OCTA 1000 - Introduction to Occupational Therapy
(2 Credits)
This course provides an overview of occupational therapy that includes the history, philosophy and theoretical foundations of the profession, as well as current issues in the field. Topics include: treatment models; factors contributing to health, wellness and dysfunction; and the impact of multicultural factors in treatment. The relationship of the certified occupational therapy assistant to other health professionals is explored. Professional standards and ethics are addressed, including state regulations, credentialing requirements and membership in professional organizations. Lecture: 2 hours

OCTA 1010 - Fundamentals of Treatment I
(4 Credits)
This course covers collaboration with the occupational therapist in data gathering, evaluation, treatment planning and treatment implementation designed to improve occupational performance. It offers experiential learning in the analysis, selection, use, adjustment, adaptation and fabrication of assistive devices, as well as appropriate documentation of all aspects of the therapy process. (Corequisite: RHAB 1030 & OCTA 1070) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

OCTA 1030 - Fundamentals of Treatment II
(4 Credits)
This course approaches the concept of activity analysis through the definition of occupational performance areas, task components and occupational challenges. Individual and group activities are analyzed and graded in the context of relevant occupational environments. (Prerequisite: OCTA 1010, 1070, RHAB 1030 and 1110; Corequisite: OCTA 1040, 1050, 1060 and 1080) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

OCTA 1040 - Gerontologic Occupational Therapy
(3 Credits)
This course examines the aging process and offers an overview of medical conditions and precautions associated with treatment of the elderly client. Therapeutic modalities of treatment are practiced in the laboratory setting. (Prerequisite: OCTA 1010, 1070, RHAB 1030 and 1110; Corequisite: OCTA 1030, 1050, 1060 and 1080) Lecture: 2 hours, Lab: 2.5 hours - Lab Fee: $20

</thead>
<tbody>
<tr>
<td>OCTA 1050</td>
<td>Pediatric Occupational Therapy</td>
<td>4</td>
<td>This course examines the physical and social needs of the growing child and explores their impact on the learning and adaptation processes that accompany the development of performance skills. It includes an overview of diseases and disabilities that may affect children seen in school-based occupational therapy, accompanied by theory and practice as it relates to this population. (Prerequisite: OCTA 1010, 1070, RHAB 1030 and 1110; Corequisite: OCTA 1030, 1040, 1060 and 1080) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>OCTA 1060</td>
<td>Level I Fieldwork</td>
<td>1</td>
<td>This is the first clinical experience in which students participate. It consists of a combination of 40 hours of fieldwork in a variety of practice settings located within the Lifespan Health Care System. (Prerequisite: OCTA 1010, 1070, RHAB 1030 and 1110; Corequisite: OCTA 1030, 1040, 1050 and 1080) Clinical: 35 hours</td>
</tr>
<tr>
<td>OCTA 1070</td>
<td>Tests and Measurements for Occupational Therapy Assistants</td>
<td>2</td>
<td>This course focuses on the methodology for joint measurement and manual muscle testing. Emphasis is placed on the study of the upper extremities. (Corequisite: RHAB 1030 and OCTA 1010) Lecture: 1 hour, Lab: 2 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>OCTA 1080</td>
<td>Therapeutic Activity Group Skills</td>
<td>2</td>
<td>Therapeutic activity groups are frequently used in physical rehabilitation facilities, nursing homes, mental health programs and wellness programs. This course provides students with an opportunity to explore the use of group activity for therapeutic effect. Students design their own group and conduct it in a community setting. There is an emphasis on occupational therapy framework and theory in designing groups. (Prerequisite: OCTA 1010, 1070, RHAB 1030 and 1110; Corequisite: OCTA 1030, 1040, 1050 and 1060) Lecture: 1 hour, Lab: 1 hour</td>
</tr>
<tr>
<td>OCTA 2010</td>
<td>Psychosocial Occupational Therapy</td>
<td>4</td>
<td>This course reviews psychiatric disorders and the interdisciplinary approach to the treatment of conditions commonly exhibited in clients referred to occupational therapy in a mental health setting. Topics of discussion include: clinical description and etiology of mental health diagnoses; use of the clinical team; legal issues; nomenclature; and alternatives to hospitalization, including outpatient programs; supervised living apartments; group homes and case management. Use of therapeutic groups and 1:1 interventions and treatment are practiced in lab. (Prerequisites: OCTA 1030, 1040, 1050, 1060, 1080; Corequisite: OCTA 2020) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>OCTA 2020</td>
<td>Physical Rehabilitation and Health</td>
<td>4</td>
<td>This course teaches techniques for management of physical dysfunction cases typically referred to occupational therapy. Topics include screening, evaluation, treatment planning and implementation, interventions and prevention techniques as utilized by occupational therapy assistants in a variety of clinical settings. Supervision concepts and reimbursement systems are discussed. Therapeutic intervention and treatment modalities are practiced in the laboratory setting. (Prerequisites: OCTA 1030, 1040, 1050, 1060, 1080; Corequisite: OCTA 2010) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20</td>
</tr>
<tr>
<td>OCTA 2030</td>
<td>Occupational Therapy Assistant Fieldwork IIA</td>
<td>4</td>
<td>This course is an eight week placement in a clinical site. Under the supervision of licensed occupational therapists, students apply clinical reasoning skills which they have learned in the Occupational Therapy Assistant Program to individuals and groups. This fulfills one half of the requirement for level II fieldwork as required for graduation from the Occupational Therapy Assistant Program and meets the accreditation standards set by the Accreditation Council for Occupational Therapy Education. (Prerequisite: OCTA 2010 and 2020; Co-requisites: OCTA 2035 and 2040) - Lab Fee: $20</td>
</tr>
<tr>
<td>OCTA 2035</td>
<td>Occupational Therapy Assistant Fieldwork IIB</td>
<td>4</td>
<td>This course is an eight-week placement in a clinical site. Under the supervision of licensed occupational therapists, students apply clinical reasoning skills which they have learned in the Occupational Therapy Assistant Program to individuals and groups. This fulfills one half of the requirement for level II fieldwork as required for graduation from the Occupational Therapy Assistant Program and meets the accreditation standards set by the Accreditation Council for Occupational Therapy Education. (Pre-requisite: OCTA 2010 and 2020; Co-requisites: OCTA 2030 and 2040)</td>
</tr>
</tbody>
</table>
**OCTA 2040 - Occupational Therapy Assistant Fieldwork Seminar**
(2 Credits)
This course consists of lecture, demonstration, group discussion, student presentation and fieldwork assignments that are designed to assist students with transitioning from the classroom to the clinic setting. It allows students to share their fieldwork experiences with peers, expanding the knowledge base that each student will take into employment. (Pre-requisite: OCTA 2010 and 2020; Co-requisites: OCTA 2030 and 2035) Lecture: 2 hours

**OFTD (Administrative Office Tech.)**

**OFTD 1105 - Essential Note Taking Skills**
(1 Credit)
Note taking is a one-semester course designed to improve writing speed; take fast and accurate notes at meetings, on the phone, and/or at school; and enhance your professional productivity and academic success. It is an efficient, rapid writing skill designed to capture key points from spoken word or written text. Lecture: 1 hour

**OFTD 1120 - Microcomputer Keyboarding**
(3 Credits)
This course is designed for business use. It emphasizes proficiency in touch-typing keyboard mastery, proper typing techniques and the development of speed and accuracy. It also provides practice in applying these skills to document formatting such as centering and business letters. Individualized instruction units are given throughout the course. A minimum typing speed of 15 wpm is required to pass this course. Lecture: 4 hours, Lab: 1 hour - Lab Fee: $20

**OFTD 1130 - Editing Skills for Office Communications I**
(2 Credits)
This course emphasizes the elements of style applied in written business communications. It is for the student who is developing editing skills in order to transcribe accurately. There is particular concentration on spelling, proofreading, word division, capitalization, expression of numbers and abbreviations in dictated material. Lecture: 2 hours

**OFTD 1140 - Office Technology & Procedures I**
(3 Credits)
This course is designed to provide students with a basic background in the rapidly expanding applications of office technology, including an introduction to telework telecommunications, Web research, online projects, PowerPoint presentations and Outlook. In addition, students develop their communication skills and learn about proper business attitudes with an emphasis on developing soft skills (people skills), critical thinking and problem-solving skills. Lecture: 3 hours

**OFTD 1160 - Basic Keyboarding Mastery**
(2 Credits)
This course is designed for the personal development of keyboarding skill. It is intended for the beginning student and those who have had a minimum of keyboarding instruction. The major objectives are to develop touch control of the keyboard and proper typing techniques, build basic speed and accuracy skills and provide practice in applying these beginning skills to basic document formatting. Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

**OFTD 1170 - Office Transcription I**
(2 Credits)
This course develops entry-level proficiency in transcribing dictation from tapes to final copy. It is designed to refine and integrate office skills and applications. Emphasis is on the application of language arts skills in the production of written communications. (Prerequisites: OFTD 1120 and 1130) Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

**OFTD 1180 - Speech Recognition Software Applications I**
(1 Credit)
This course assists students in increasing their computer-use productivity. Topics include enunciation, correcting speech errors and navigating and formatting documents. Students should be able to attain speeds of about 130 wpm or more with 95-98 percent accuracy. Lecture: 1 hour - Lab Fee: $10
**OFTD 1190 - Speech Recognition Software Applications II**  
(1 Credit)  
The purpose of this course is to gain further expertise in the creation of voice-typed documents by building on the skills attained in OFTD 1180. In addition, students are trained in the use of career-specific terminology and applications. (Prerequisite: OFTD 1180) Lecture: 1 hour - Lab Fee: $10

**OFTD 1220 - Microsoft Office Applications I**  
(4 Credits)  
This course further refines students' keyboarding speed and accuracy. In addition, the beginning and intermediate levels of MS Word skills are covered, as well as the beginning level of MS Excel. The keyboarding speed needed to pass this course is 25-50 wpm. (Prerequisite: OFTD 1120) Lecture: 4 hours, Lab: 1 hour - Lab Fee: $20

**OFTD 1250 - Office Accounting**  
(2 Credits)  
This course develops the office worker's understanding of the basic procedures used in keeping a set of accounting records in a service business. Basic accounting principles are covered along with their implementation in an electronic office system. Lecture: 2 hours, Lab: 1 hour - Lab Fee: $10

**OFTD 1280 - Editing Skills for Office Communications II**  
(3 Credits)  
This course continues with the mechanics of the transcription process in business correspondence. It includes sentence structure as a foundation for an intense study of punctuation rules required for business communication. Students are trained to consult a reference manual for variations in usage. Lecture: 3 hours

**OFTD 1370 - Business File Management**  
(2 Credits)  
This course provides a foundation in business information maintenance. It covers life cycle concepts of document control, creation, filing, storage and retrieval procedures using a manual method and introduces electronic filing. Students are also introduced to the basics of Access and Excel. Lecture: 2 hours - Lab Fee: $20

**OFTD 1380 - Customer Service Essentials**  
(5 Credits)  
This course will equip students with the knowledge and skills that will enable them to be a successful and proactive part of a customer service team. It focuses on strategies for effective customer service, troubleshooting skills, call-handling procedures, call center metrics, incident management, communications skills, and call center processes. This course prepares students to take the HDI Customer Service Representative Exam. Lecture: 5 hours

**OPTI (Opticianry)**

**OPTI 1010 - Optical Theory I**  
(3 Credits)  
This course examines the nature of light and details the behavior of light when it encounters various refractive surfaces. In addition, the course examines lens power, indices, and prisms. This course establishes the foundation for advanced ophthalmic applications. (Co-requisites: OPTI 1020, 1030, 1040) Lecture: 3 hours

**OPTI 1020 - Ophthalmic Laboratory I**  
(3 Credits)  
This course introduces students to terms, instruments, calculations, lenses, frames, materials, and processes to be used in the surfacing and finishing of ophthalmic prescription eyewear. (Co-requisites: OPTI 1010, 1030, 1040) Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

**OPTI 1030 - Ophthalmic Dispensing I**  
(3 Credits)  
This course introduces students to Opticianry and the procedures necessary for becoming a dispensing optician. Topics include the history of the profession, patient/client measurements, prescription analysis, ophthalmic frame and lens materials, and selection and adjustment techniques. (Co-requisites: OPTI 1010, 1020, 1040) Lecture: 3 hours
OPTI 1040 - Anatomy and Physiology of the Eye
(3 Credits)
This course gives opticianry students an insight into the anatomical structure of the eye and its adnexa. Students learn the function of the parts of the eye as they relate to vision and fitting of contact lenses. Learners are presented with common pathologies of the eye and ocular pharmacology. (Co-requisites: OPTI 1010, 1020, 1030) Lecture: 3 hours

OPTI 1050 - Optical Theory II
(3 Credits)
This continues the study of optical theory. Topics include: prism notation, and vertical imbalance. It also presents methods of correction such as vertex power, illuminance, reflection and absorption, diffraction, third order aberrations, lens tilt, anisometropia, and spectacle magnification. (Prerequisites: OPTI 1010, 1020, 1030, 1040; Co-requisites: OPTI 1060, 1070, 1080) Lecture: 3 hours

OPTI 1060 - Ophthalmic Laboratory II
(3 Credits)
This course continues the study of prescription eyewear fabrication processes. Students learn to calibrate and maintain equipment, layout and edge multi-focal lenses, tint and coat lenses, perform advanced neutralization of lenses for verification or duplication purposes. Instruction is provided in techniques for special surfacing processes such as bicentric grinding and prism thinning. (Prerequisites: OPTI 1010, 1020, 1030, 1040; Co-requisites: OPTI 1050, 1070, 1080) Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

OPTI 1070 - Ophthalmic Dispensing II
(3 Credits)
This course continues an examination of lens materials, types, and fitting with a particular focus on multi-focals, progressive addition lenses, absorptive lenses, and special lens designs. Focus is on understanding and using ophthalmic instruments and devices to take patient measurements, read prescriptions, and perform frame adjustments. Governing agencies of the optical profession and legal and ethical issues are introduced. (Prerequisites: OPTI 1010, 1020, 1030, 1040; Co-requisites: OPTI 1050, 1060, 1080) Lecture: 3 hours

OPTI 1080 - Ophthalmic Dispensing Clinical I
(3 Credits)
This course is part of a three semester Dispensing Laboratory. During the three semesters, the student should learn and demonstrate competencies from the competency lists. By the end of the three experiences, students must demonstrate all listed competencies. Students may be required to demonstrate some competencies in more than one course. (Prerequisites: OPTI 1010, 1020, 1030, 1040; Co-requisites: OPTI 1050, 1060, 1070) Clinical: 90 hours

OPTI 2010 - Ophthalmic Dispensing Clinical II
(3 Credits)
This course is part of a three (3) semester Dispensing Laboratory. During the three semesters, students should learn and demonstrate competencies from the competency lists. By the end of the three experiences, students must demonstrate all listed competencies. Students may be required to demonstrate some competencies in more than one course. (Prerequisites: OPTI 1050, 1060, 1070, 1080, 2020; Co-requisites: OPTI 2040, 2060) Clinical: 90 hours

OPTI 2020 - Ophthalmic Laboratory Skills I
(3 Credits)
This course is the skills component of OPTI 1020: Ophthalmic Laboratory I. Students will develop competencies in performing clinical laboratory skills at the introductory level under the direction and supervision of the faculty. Emphasis is placed on accuracy and attaining skills that meet acceptable professional level. (Prerequisite: OPTI 1010, 1020, 1030, 1040, 1050, 1060, 1080) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

OPTI 2030 - Optical Business Management
(3 Credits)
This course presents basic management and leadership skills necessary for a successful eye care office. The course teaches analysis, creative thinking, judgment, planning strategy, and implementation skills necessary for optical business challenges. (Prerequisites: OPTI 2010, 2020, 2040, 2060; Co-requisites: OPTI 2050, 2070) Lecture: 3 hours
OPTI 2040 - Introduction to Contact Lenses
(3 Credits)
This course includes a historical review of contact lenses as well as theory; design and optical principles. Indications and contraindications for contact lenses wear, patient evaluation, lens types and availability, and fundamental techniques and fitting philosophies are covered. The uses of the biomicroscope, keratometer, and radioscope are presented as well as patient education on care, cleaning, insertion, and removal of contact lenses. (Prerequisites: OPTI 1050, 1060, 1070, 1080, 2020; Co-requisites: OPTI 2040, 2060) Lecture: 3 hours

OPTI 2050 - Ophthalmic Dispensing Clinical III
(3 Credits)
This course is part of a three (3) semester Dispensing Laboratory. During the three semesters, students should learn and demonstrate listed competencies. By the end of the three experiences, students must demonstrate all competencies listed. Students may be required to demonstrate some competencies in more than one course. (Prerequisites: OPTI 2010, 2020, 2040, 2060; Co-requisites: OPTI 2030, 2050) Clinical: 90 hours

OPTI 2060 - Ophthalmic Laboratory Skills II
(3 Credits)
This course is the clinical component of OPTI 1060: Ophthalmic Laboratory II. Students will develop competencies in performing clinical laboratory skills at the advanced level under the direction and supervision of the faculty. Emphasis is placed on accuracy and attaining skills that meet acceptable professional level. (Prerequisite: OPTI 1010, 1020, 1030, 1040, 1050, 1060, 1070, 1080, 2020; Co-requisites: OPTI 2010, 2040) Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

OPTI 2070 - Contact Lens Clinical I
(3 Credits)
This course includes a historical review of contact lenses as well as theory; design and optical principles. Indications and contraindications for contact lens wear, patient evaluation, lens types and availability, and fundamental techniques and fitting philosophies are covered. The uses of the biomicroscope, keratometer, and radioscope are presented as well as patient education on care, cleaning, insertion, and removal of contact lenses. (Prerequisites: OPTI 2010, 2020, 2040, 2060; Co-requisites: OPTI 2030, 2050) Clinical: 90 hours

PHED (Physical Education)

PHED 1210 - Team Sports
(1 Credit)
This course introduces students to the basic skills for team oriented sports, including the rules and strategy of the games. Special emphasis is placed on the enjoyment of these team sport activities in a recreational environment.

PHED 1400 - Swimming I-Primary Skills
(1 Credit)
This course focuses on helping students feel comfortable in the water in order to enjoy the water safely. For students who have little or no experience. - Lab Fee: $10

PHED 1410 - Swimming II-Stroke Development
(1 Credit)
This course is designed for those who have experience in the water and would like to work on development of the key strokes. Additional water safety skills are presented. - Lab Fee: $10

PHED 1430 - Water Safety Instructor
(3 Credits)
This course will teach American Red Cross candidates to teach the infant and preschool aquatics program and the seven levels of the Learn-to-Swim Program. (Prerequisite: permission of instructor) - Lab Fee: $20

PHED 1440 - Lifeguard Training
(2 Credits)
This course is designed to teach lifeguards the skills and knowledge needed to prevent and respond to aquatic emergencies. Lifesaving materials of the American Red Cross are included to meet requirements for the state of Rhode Island. - Lab Fee: $20
PHED 1610 - Essentials of Physical Fitness  
(3 Credits)  
This course focuses on the components of physical fitness. Lectures are focused on nutrition, cardiorespiratory endurance, muscular strength, muscular endurance, and flexibility. Students will be active participants in the development of individualized fitness programs.

PHED 1620 - Advanced Physical Fitness and Wellness  
(3 Credits)  
A continuation of PHED 1610, this course provides more comprehensive and advanced techniques of fitness. Emphasis is placed upon personal responsibility for lifestyle changes to foster wellness. (Prerequisite: PHED 1610) - Lab Fee: $20

PHED 1630 - Weight Training and Sports Conditioning I  
(2 Credits)  
This introductory course provides a foundation of knowledge, skills and techniques in resistance training as well as an opportunity for the creation of an individualized training program. - Lab Fee: $20

PHED 1645 - Kettles and Ropes  
(2 Credits)  
This course incorporates kettlebells, suspension bodyweight training and wave velocity training in an overall cardiorespiratory and strength training program. Students are responsible for creating a training program to meet their functional strength, endurance and cardiorespiratory needs.

PHED 1665 - Advanced Weight Training  
(3 Credits)  
This course will provide an opportunity for the development and achievement of performance goals attained by the application of advanced lifting techniques. Olympic lifts, functional fitness, agility training and sprinting will be incorporated into the periodized training plan. Lecture: 2 hours, Lab: 2 hours

PHED 1670 - Athletic Performance Enhancement  
(3 Credits)  
The purpose of this course is to introduce basic psychological concepts and principles with special reference to motor performance, learning motor skills, perception and emotion in sport situations. The study of numerous psychological parameters pertinent to the prospective athletic coach, teacher, parent and student-athlete are investigated. - Lab Fee: $20

PHED 1700 - Prevention and Care of Athletic Injuries and First Aid  
(3 Credits)  
This course will introduce techniques for conditioning, taping and bandaging as they relate to the prevention and care of athletic injuries. The latest Red Cross procedure is reviewed with the opportunity to receive standard Red Cross certification. Lecture: 2 hours, Lab: 1 hour - Lab Fee: $20

PHED 1720 - Real Coaching  
(3 Credits)  
Designed for teachers who coach, coaches who teach and others who lead sports, this courses provides an analysis of the operational, managerial, physiological, social, ethical and moral aspects of coaching. Those currently coaching or with aspirations of coaching at the secondary level or intercollegiate level will find this course particularly useful. The Rhode Island Interscholastic League recognizes the content of this course satisfies the Rhode Island Interscholastic League requirement for coaching eligibility. Lecture: 3 hours - Lab Fee: $20

PHED 1730 - Sport & Recreation Operations  
(3 Credits)  
This course is designed to introduce students to the broad range of administrative responsibilities involved in conducting sports and recreation programs. Those with aspirations of pursuing a career in sport administration should find this course particularly useful. Lecture: 3 hours
PHIL (Philosophy)

PHIL 1010 - Introduction to Philosophy
(3 Credits)
This course is a systemic study of basic philosophical questions, including: Is there a God? How is knowledge acquired? Does life have meaning? These questions are examined by reading major Western philosophers such as Plato, Aristotle, Descartes and others. Students learn and practice several critical reasoning skills applicable to academic, professional and personal areas of life. Lecture: 3 hours

PHIL 2020 - Philosophy of Religion
(3 Credits)
A systemic study of basic issues in the philosophy of religion, this course covers the concepts of God, traditional arguments for the existence of God, the problem of evil, mysticism and philosophical atheism. Students engage in theoretical discussions, develop critical reasoning skills and gain practical insight into their personal philosophy of religion. Lecture: 3 hours

PHIL 2030 - Ethics
(3 Credits)
This course is a critical analysis of main theories of moral conduct. In the areas of personal and social morality (e.g., citizenship, employment, student life, family life, etc.), some major moral problems are discussed such as capital punishment, abortion, race relations, social justice, war, sex and marriage, and ecology. When student curriculum needs in a given program, such as Law Enforcement, Nursing, etc., require a special focus, the instructor can provide special assignments to meet those needs. Note: Meets ethics requirement. Lecture: 3 hours

PHIL 2040 - Logic
(3 Credits)
This course studies the basic principles of correct thinking in semantics and in deductive and inductive reasoning. It introduces beginning students to the logical techniques of thought and argument. Exercises incorporate various current issues and topics. Clear and adequate thinking is the goal of the course. Lecture: 3 hours

PHLE (Phlebotomy)

PHLE 1010 - Phlebotomy I
(6 Credits)
This course presents the theory and practice of phlebotomy, that includes such topics as: phlebotomists in health care delivery systems; medical terminology; infection control and safety; anatomy and physiology of body systems; collection equipment, reagents and interfering factors in blood collection; venipuncture and capillary puncture blood collection procedures and requisitioning. Laboratory experiences include venipuncture practice by vacutainer, syringe and winged collection set on adult and pediatric training arms. Skin puncture collection procedures using a variety of lancets to collect unopettes and microtainers, are performed. Blood smear preparation, bleeding time and quality control are also practiced. Lecture: 5 hours, Lab: 2 hours - Lab Fee: $20

PHLE 1020 - Phlebotomy II
(6 Credits)
This course includes collection and handling of non-blood specimens, quality assurance, specimen handling, specimen processing, communications techniques, legal issues, professionalism and arterial puncture. A review of CLSI Standards for skin puncture and venipuncture is included. In the college laboratory, students perform specimen processing, blood smear preparation, blood culture collection, skin puncture and venipuncture collection. Students spend a total of 120 hours of clinical training in phlebotomy techniques at an affiliated site. Note: students must be available to train weekdays (8 hrs x 5 days/week) for three (3) consecutive weeks. Lecture: 5 hours, Lab: 2 hours, Clinical: 120 hours - Lab Fee: $20

PHTA (Physical Therapist Assistant)

PHTA 1000 - Introduction to the Physical Therapist Assistant
(2 Credits)
This course is open to students who are considering admission into the Physical Therapist Assistant Program. An overview of the field of physical therapy and the roles of the physical therapist and physical therapist assistant within the health care delivery system are presented. Topics such as licensure, reimbursement, education and employment opportunities and professional organizations are covered. Ethical issues facing health care
workers, the Code of Ethics for the Physical Therapist Assistant and the attitudes of health care workers toward illness and injury are discussed. Lecture: 2 hours

**PHTA 1010 - Physical Therapist Assistant I**  
*(6 Credits)*
This course will introduce students to fundamental patient care procedures used in physical therapy. Students become proficient in instructing and assisting patients to perform functional mobility activities in a manner that is safe for the patient and practitioner. They learn to perform techniques for wound and edema management while avoiding transmission of infection. Techniques for ambulation training including the measurement and use of assistive devices (crutches, canes, walkers) and wheelchair measurement and mobility are taught and practiced in class and lab settings. Students are introduced to basic principles and learn to perform simple therapeutic exercises. Lecture: 4 hours, Lab: 4 hours, Clinic: 16 hours - Lab Fee: $20

**PHTA 1020 - Physical Therapist Assistant II**  
*(4 Credits)*
This course includes an introduction to physical agents and modalities used for pain relief and improvement of tissue healing and function. Content includes the theory and utilization of massage and the theory and application of physical agents as they reduce inflammation and pain and aid metabolic processes. Direct treatment includes mechanical traction, thermo-, hydro-, photo, sound and electrotherapies. These techniques are taught as they relate to practice in a problem-solving, case study format. Students learn to document treatment parameters and patient responses to treatment. (Prerequisite: RHAB 1110, PHTA 1120, 1010) Lecture: 2 hours, Lab: 4 hours - Lab Fee: $20

**PHTA 1120 - Tests and Measurements for Physical Therapist Assistants**  
*(2 Credits)*
This course instructs PTA students in testing and measurement techniques, specifically manual muscle testing and goniometry for the head, spine and extremities. Lecture: 1 hour, Lab: 2 hours - Lab Fee: $20

**PHTA 1220 - Basic Therapeutic Exercise**  
*(1 Credit)*
This is an optional course to instruct PTA students to correctly perform therapeutic exercises for musculoskeletal conditions of the upper extremity, lower extremity, and trunk. This course will prepare students to instruct and perform basic exercise in preparation for their first clinical experience. This course will have 5 sessions that are 3 hours each.

**PHTA 2010 - Physical Therapist Assistant III**  
*(7 Credits)*
This course focuses on interventions for the pulmonary, cardiovascular and musculoskeletal systems with a broad overview of the other body systems. Lecture and laboratory presentations instruct cardiovascular training for risk assessment and rehabilitation; chest physical therapy procedures; therapeutic exercise, particularly as it pertains to orthopedic physical therapy and movement dysfunction; and the management of lower extremity prosthetics. Techniques and concepts from the previous semester courses are integrated with the more advanced treatment interventions. This course runs the first 10 weeks of the semester. (Prerequisite: RHAB 1110, 1030, PHTA 1120, 1010, 1020) Lecture: 9 hours, Lab: 6 hours - Lab Fee: $20

**PHTA 2020 - Physical Therapist Assistant IV**  
*(7 Credits)*
This course includes a review of neuroanatomy, the study of pathologies and physical therapy intervention for conditions of the central and peripheral nervous systems. Treatment approaches such as PNF, NDT, Bobath, Rood and Brunnstrom, together with training techniques for balance and coordination are included. The role of the physical therapist assistant in discharge planning is also covered. Emphasis is on application of therapy in the rehabilitation units. Students are exposed to specialty areas of physical therapy practice such as geriatrics and pediatrics. Techniques and concepts from previous semester courses are integrated with the more advanced treatment interventions. This course runs for the first 10 weeks of the semester. (Prerequisite: RHAB 1110, 1030, PHTA 1120, 1010, 1020, 2010, 2910) Lecture: 9 hours, Lab: 6 hours - Lab Fee: $20

**PHTA 2030 - Physical Therapy for Impaired Neuro Function**  
*(1 Credit)*
This course is designed to support PHTA 2020 Physical Therapist Assistant IV. This course reviews the structure and function of the nervous system and neuropathology as it affects structures of the nervous system. The course offers additional laboratory time for students to practice treatment interventions as they relate to abnormal movement and function caused by neuropathology. The course runs concurrently with PHTA 2020 and is scheduled at intervals that will help students with theoretical information and practical skills presented in PHTA 2020. (Prerequisite: PHTA 2010; Corequisite: PHTA 2020) Lecture: 9 hours, Lab: 6 hours - Lab Fee: $10
**PHTA 2040 - Career Development Seminar**  
(1 Credit)  
This course is designed to support the students as they prepare for graduation, licensure and employment. Topics such as resume development, interviewing skills, preparation for licensure, negotiation, and professionalism will be presented. Appropriate resources for professionalism will be referenced, including the RI Rules and Regulations for Physical Therapists and Physical Therapist Assistants, Physical Therapy Code of Ethics and Professionalism in PT: Core Values document. (Prerequisite: PHTA 2020, Corequisite: PHTA 2930) Lecture: 1 hour

**PHTA 2910 - Clinical Education I**  
(3 Credits)  
This course is the first of three full time clinical experiences in the PTA program, and runs for a period of six weeks during the summer semester. Students are assigned to clinical sites for 35-40 hours per week of supervised clinical practice. Students observe and assist with Physical Therapy treatment under direct supervision and guidance of Physical Therapists and Physical Therapist Assistants. Students will participate in an online seminar in which relevant clinical issues will be discussed. (Prerequisite: PHTA 1020, RHAB 1030 and Reading Level 250) Lecture: 1 hour, Clinical: 40 hours

**PHTA 2920 - Clinical Education II**  
(3 Credits)  
This course is the second of three full time clinical experiences in the PTA program, and runs for the last six weeks of the fall semester. Students are assigned to clinical sites for 35-40 hours per week of supervised clinical practice. Students will have the opportunity to grow more independent in performing physical therapy treatment under the supervision and guidance of Physical Therapists and Physical Therapist Assistants. Participation in ancillary components of Physical Therapy practice will foster the development of a responsible professional identity. Students will participate in an online seminar in which relevant clinical issues will be discussed. (Prerequisite: PHTA 2010, RHAB 1030 and Reading Level 250). Lecture: 1 hour, Clinical: 40 hours

**PHTA 2930 - Clinical Education III**  
(3 Credits)  
This course is the final of three full time clinical experiences in the PTA program, and runs for the last six weeks of the spring semester. Students are assigned to clinical sites for 35-40 hours per week of clinical practice under the supervision of a licensed Physical Therapist or Physical Therapist Assistant. Students will be exposed to more complex patients, and will be allowed to partake in fulfilling a broad array of practice responsibilities, with increasing degrees of independence. This clinical experience should maximize the integration of all aspects of practice and will render the student prepared to function as a responsible entry level Physical Therapist Assistant. Students will participate in an online seminar in which relevant clinical issues will be discussed. (Prerequisite: PHTA 2020 and Reading Level 250). Lecture: 1 hour, Clinical: 40 hours. Clinical: 240 hours

**PHYS (Physics)**

**PHYS 1000 - Conceptual Physics/Physical Science**  
(4 Credits)  
This course is for students not majoring in science. Physical principles are presented with emphasis on non-quantitative, practical applications of these concepts. Note: This course satisfies one semester of the science requirement for the Associate in Arts degree. (Prerequisite: Basic knowledge of algebra) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**PHYS 1030 - General Physics I**  
(4 Credits)  
Mechanics and heat are studied as the basic topics of this course. One lecture hour is used as a help session. (Prerequisite: High school algebra AND trigonometry) Lecture: 4 hours, Lab: 3 hours

**PHYS 1040 - General Physics II**  
(4 Credits)  
Sound, electricity and magnetism, light, atomic and nuclear theories and their applications are studied in this course. (Prerequisite: PHYS 1030 with a grade of "C" or better) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

**PHYS 1050 - Physics for Technology I**  
(4 Credits)  
This course is for students in the Engineering Systems Technology programs. Mechanics, sound, temperature and heat are studied. Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20
**Community College of Rhode Island**

**PHYS 1070 - Introduction to Renewable Energy**  
*(3 Credits)*  
This course will introduce renewable energy resources and their applied technologies to the student. Students will learn the physics of energy, as well as, the geology of energy. Topics covered will include, solar, geothermal, tidal, and wave energy, as well as, hydro-electric energy. Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

**PHYS 1100 - Engineering Physics**  
*(4 Credits)*  
This course is a study of the basic equations of mechanics, heat and thermodynamics. Note: It is usually taken by engineering students in the second semester of the first year. (Pre- or corequisite: Enrollment in MATH 2141 or equivalent or permission of instructor) Lecture: 4 hours, Lab: 3 hours - Lab Fee: $20

**PHYS 1110 - Radiographic Physics**  
*(4 Credits)*  
This course covers the fundamentals of electrical and radiation physics. Student gain an understanding of the basic principles underlying the operation of X-ray equipment and auxiliary devices. Note: Open only to students currently enrolled in Radiography program (Prerequisite: MATH 1179 or its equivalent) Lecture: 3 hours, Lab: 2 hours - Lab Fee: $20

**PHYS 2110 - Topics in Acoustics, Optics and Thermodynamics**  
*(3 Credits)*  
This course deals in the fundamentals of acoustics and optical phenomena and introduces topics of thermodynamics, kinetic theory and wave motion. Calculus is used. Note: Usually taken by engineering students in the first semester of the second year. Calculus is used. (Prerequisite: PHYS 1100 or equivalent AND MATH 2141, 2142 or equivalent or instructor's permission) Lecture: 3 hours

**PHYS 2111 - Introduction to Acoustics and Optics Laboratory**  
*(1 Credit)*  
This course deals with laboratory experiments in simple harmonic motion sound waves, reflection and refraction of light, lenses, prisms, diffraction of light, holography and some fiber optic systems. (Prerequisite or corequisite: PHYS 2110 or equivalent) Lab: 3 hours - Lab Fee: $20

**PHYS 2500 - Applications in Science and Math**  
*(1 Credit)*  
This capstone course is intended for students in their final semester of the Science program. It allows students an opportunity to demonstrate and integration of knowledge and abilities acquired in previous science and mathematics courses with added intent of developing new insights. Students read selected articles, such as those that come from scientific journals, in a variety of fields and then have the opportunity to collaborate with their peers honing writing, synthesis and presentation skills (Prerequisites: Successful completion of a minimum of 21 general education credits and a minimum of 18 Science credits or permission of the instructor - SEE DEPARTMENT CHAIRPERSON FOR PERMISSION OVERRIDE) - Lab Fee: $20

**POLLS (Political Science)**

**POLLS 1000 - Introduction to Government and Politics**  
*(3 Credits)*  
An introduction to the field of political science, covering each area of the discipline, including comparative government and political systems, political economy, political ideology, international and global politics and methods of political analysis. Recommended as a first course for those pursuing further study in political science. Also recommended as a single course for those not taking other political science courses. Lecture: 3 hours

**POLLS 1010 - American National Government**  
*(3 Credits)*  
This course is a study of the American political system at the national level. It covers the structure of the U.S. government and its powers and limitations. It also covers policymaking, the governing and electoral processes, the roles of the people, the media, special interests and political parties. Areas of national concern such as economic and foreign policy and national security also are covered. Lecture: 3 hours
POLS 1030 - State and Local Government
(3 Credits)
This course is a study of politics and government at the state and local level, including governmental structures, powers and limitations and governing and electoral processes. Areas of state and local concern such as urban and regional planning, most of the legal system and everyday matters ranging from public works to education are covered. Lecture: 3 hours

POLS 2010 - International Relations
(3 Credits)
This course studies international and global politics. It includes study of diplomatic history, theoretical approaches, global political economy, international law and organization issues of war, peace and political stability. (Recommended: POLS 1000 or 1010 or HIST 1210 or 1220 prior to taking this course) Lecture: 3 hours

POLS 2040 - American Political Parties
(3 Credits)
This course studies political parties, politics and elections in the United States. It covers the political history of elections, voting patterns and party alignments, as well as the roles of special interests and the media in the electoral process. (Recommended: POLS 1000 or 1010 or HIST 1210 or 1220 prior to taking this course) Lecture: 3 hours

POLS 2045 - American Politics & Government: Critique & Analysis
(3 Credits)
This course is a critical and analytical study of the various theories which interpret the American political system, their historical applications and relationship to current policy areas. (Prerequisite: POLS 1010) Lecture: 3 hours

POLS 2110 - Modern Political Ideologies
(3 Credits)
In this course, students study modern and contemporary political ideologies in terms of their development and applications. This course involves intensive reading and interpretation of original works. (Recommended: POLS 1000 or 1010 or HIST 1020 prior to this course) Lecture: 3 hours

PORT (Portuguese)

PORT 1000 - Basic Spoken Portuguese I
(3 Credits)
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

PORT 1010 - Elementary Portuguese I
(3 Credits)
This course is for students with little or no preparation and covers elements of the language including: conversation, pronunciation, reading, writing and grammar. Aspects of Portuguese culture are also included. Lecture: 5 hours

PORT 1020 - Elementary Portuguese II
(3 Credits)
This is a continuation of PORT 1010. (Prerequisite: PORT 1010, PORT 1030 or its equivalent) Lecture: 5 hours

PORT 1030 - Elementary Portuguese I
(3 Credits)
Portuguese 1030 is a faster paced version of Portuguese 1010. This course is suitable for students with previous experience i.e. Basic spoken Portuguese and/or other prior formal study of the language, prior formal study of another foreign language, or informal experience with a foreign language. The course covers elements of the language including: conversation, pronunciation, reading, writing, and grammar. Aspects of Portuguese-speaking cultures are also included. Note: Course content is the same as Portuguese 1010 with two fewer hours per week. (Prerequisite: Prior preparation as noted above or permission of instructor). Lecture: 3 hours

Community College of Rhode Island
behavior, personality, health psychology, and behavior disorders. Contemporary controversial issues are also addressed and critically examined. Lecture: 3 hours; On-line: 1 hour

**PSYC 2020 - Social Psychology**  
(3 Credits)  
The emphasis of this course is the experimental approach to the study of social influence. The behavior of individuals in relation to their social-cultural environment is considered in light of special topics such as conformity, attitudes, aggression, cognitive organization, group dynamics, prejudice and interpersonal attraction. (Prerequisite: PSYC 2010) Lecture: 3 hours

**PSYC 2030 - Developmental Psychology**  
(3 Credits)  
This course offers students an understanding of the significant dynamics of human development, with emphasis on the normal rather than abnormal. Levels or stages of development covered include prenatal, infancy, childhood, adolescence, adulthood and old age. The earlier, more formative years receive special consideration because of their importance to later development. (Prerequisite: PSYC 2010) Lecture: 3 hours

**PSYC 2050 - Behavior Modification**  
(3 Credits)  
This course reviews in detail basic research and data on learning, focusing primarily on operant and classical conditioning. Basic principles and theories of behavior modification are emphasized, including reinforcement, punishment and methods of collecting data in both laboratory and natural settings. Students are required to design and conduct a behavioral change project under the supervision of the instructor. (Prerequisite: PSYC 2010) Lecture: 3 hours, Lab: As required

**PSYC 2070 - Educational Psychology**  
(3 Credits)  
This course deals with the application of psychological principles to preschool, elementary, special needs and secondary level classroom situations. Focus is on four topics essential to effective teaching: human development, learning and instruction, motivation and evaluation. Lecture: 3 hours

**PSYC 2090 - Adolescent Psychology**  
(3 Credits)  
This is an in-depth study of the adolescent period, including significant theories of physical, cognitive and psychosocial development. The course surveys past and present sociocultural, economic and educational issues affecting the behavior of individuals from puberty into adulthood. (Prerequisite: PSYC 2010 and 2030) Lecture: 3 hours

**PSYC 2100 - Theories of Personality**  
(3 Credits)  
This course provides a detailed review and formal representation of the major theories of personality. The role of personality theory in the development of psychology, along with the location of the major viewpoints in the contemporary scene, is emphasized. (Prerequisite: PSYC 2010) Lecture: 3 hours

**PSYC 2110 - Abnormal Psychology**  
(3 Credits)  
This course examines a wide range of psychological and behavioral problems including theories of their causation. Emphasis is placed on evidence and problems in connection with theories of treatment ranging from Freudian analysis to learning theory. (Prerequisite: PSYC 2010) Lecture: 3 hours

**PSYC 2120 - Foundations of Psychological Research**  
(3 Credits)  
This course surveys the basic principles of scientific inquiry followed by an intensive development of the techniques involved in conducting and reporting behavioral research. Methods of experimental control and design, use of descriptive statistics and the appropriate form and style of written research reports are covered. (Prerequisite: PSYC 2010) Lecture: 3 hours
## RENL (Renal Dialysis)

**RENL 1010 - Renal Dialysis Technology I**  
(4 Credits)  
This course is designed to provide students with information concerning the principles of renal dialysis; the normal operation of dialysis equipment and the procedure for performance of renal dialysis. Emphasis is placed on the procedure for the performance of renal dialysis. Content includes the technical aspects of preparing, operating, monitoring and maintaining dialysis equipment. Attention is given to medications routinely used in renal dialysis and the role of the dialysis technician. Patients' needs and safety are addressed throughout. Theoretical information is supplemented with clinical observation. Privacy issues, HIPAA requirements, standard precautions for protection of patients and personnel are emphasized. Lecture: 3 hours, Clinical: 4 hours

**RENL 1020 - Patient Care and Assessment for Renal Dialysis Technicians**  
(3 Credits)  
This course is designed to provide students with the information necessary to provide care appropriate to the renal dialysis patient. End-stage renal disease is discussed as well as methods of treatment and associated conditions. Psychosocial and dietary needs specific to patients with renal disease are discussed as is methods for patient assessment and documentation. The control of infection and measures for patient comfort and transfer are also considered. Lecture: 3 hours

**RENL 1030 - Renal Dialysis Technology II**  
(6 Credits)  
This course is designed to provide students with information concerning the principles of renal dialysis. The skills critical to the recognition of complications or abnormal situations as well as the appropriate responses are stressed. An examination of previously discussed patient care skills and monitoring procedures relative to emergency situation is reviewed. Emphasis is placed on standards and regulations pertinent to water treatment, quality control issues and workplace safety. Theoretical information is supplemented with clinical observation. Written case presentations, as they relate to the dialysis patient, is required. (Prerequisite: RENL 1010) Lecture: 2 hours, Lab: 4 hours, Clinical: 24 hours

## RESP (Respiratory Therapy)

**RESP 1000 - Introduction to Respiratory Therapy**  
(3 Credits)  
In this course, students explore current concepts in health care including patient/client care issues such as effective communication, cultural and age-specific concerns and disease management models. Health care provider topics such as professionalism, ethical and legal considerations, including credentialing and licensure are addressed. A brief overview of the U.S. health care system is discussed, addressing past and present payment structure, care settings and delivery models. An introduction to medical terminology is also included. Lecture: 3 hours

**RESP 1010 - Respiratory Care I**  
(4 Credits)  
This course introduces students to the hospital and patient environment in the classroom and the laboratory. Students learn an array of respiratory therapy procedures. An overview of the structure and function of the cardio-respiratory system is examined as well as physical principles of gas flow and lung mechanics. Principles of breathing and gas exchange, including oxygen and carbon dioxide transport and arterial blood gas values and interpretation are addressed. Laboratory practice is included. (Admission to the Respiratory Therapy program) Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

**RESP 1012 - Pre-Clinical Practice**  
(2 Credits)  
This course is designed to prepare students for the initial clinical experience in the program. It will emphasize students' ability to identify and follow protocols in order to carry out commonly ordered respiratory therapy procedures. Students will recognize and interpret basic findings in patient assessment, including vital signs, chest assessment, and values for blood chemistry testing. Students will be introduced to the electronic medical record and tracking system, and will participate in case simulations. (Prerequisite: Admission to the Respiratory Therapy program. Lecture: 2 hours

**RESP 1100 - Respiratory Care II**  
(4 Credits)  
This course offers a detailed review of therapeutic and diagnostic techniques in respiratory care. It includes the study of both invasive and noninvasive diagnostic techniques for assessing oxygenation, ventilation, pulmonary function and electrocardiography. Students interpret graphics
from these techniques, and are able to classify specific findings. Management of airway emergencies and artificial airways is included. Laboratory practice is provided. (Prerequisite: RESP 1010) Lecture: 3 hours, Lab: 3 hours. - Lab Fee: $20

RESP 1800 - Clinical Practicum I
(1 Credit)
This clinical experience introduces students to the hospital environment. Emphasis is on orientation, becoming familiar with respiratory therapy department structure and procedures and use of the medical record. Medical gas therapy and incentive spirometry are applied with direct bedside teaching. (Prerequisite: Successful completion of preclinical competency testing) Clinical: 120 hours

RESP 2020 - Cardiopulmonary Diseases I
(3 Credits)
This course emphasizes the study of microorganisms and control of pathogens related to cardiopulmonary disorders, the study of common cardiopulmonary disorders with emphasis on characteristics, application of diagnostics and determining appropriate therapeutic regimens. Lecture: 3 hours

RESP 2030 - Cardiopulmonary Diseases II
(3 Credits)
This course continues the study of the pathophysiology of cardiopulmonary disorders and their treatment. A portion of this course emphasizes the study of cardiopulmonary disorders in pediatric patients and in the neonate. Lecture: 3 hours

RESP 2110 - Respiratory Critical Care
(3 Credits)
This course offers an introduction to critical care concepts and application of physiologic measures to patient care in the acute care setting. Lecture: 3 hours

RESP 2120 - Respiratory Care III
(4 Credits)
Students continue their study of critical care modalities including the principles of positive pressure breathing devices, their clinical applications and alternatives with emphasis on artificial airway management, ACLS protocols, mechanical ventilation principles of operation, management and terminology. Critical care monitoring, including hemodynamic monitoring and pharmacological control, are discussed. Laboratory practice is part of this course. Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

RESP 2130 - Respiratory Care IV
(4 Credits)
Specialized respiratory therapy is studied in-depth with emphasis on nonconventional mechanical ventilation including indications, equipment, procedures and precautions. A portion of this course focuses on pediatric and neonatal critical care modalities. Advanced cardiopulmonary diagnostics, including arrhythmia interpretation and ACLS support, rehabilitation practices, medical ethics and laws pertaining to the care of patients with cardiopulmonary disorders, are discussed. Laboratory practice is included. Lecture: 3 hours, Lab: 3 hours - Lab Fee: $20

RESP 2140 - Basics of Electrocardiography
(1 Credit)
This course is designed to provide the health care practitioner with the knowledge and skills needed to accurately identify basic cardiac arrhythmias. A review of cardiac terminology, cardiac physiology and patient interaction before, during and after testing is included. Laboratory instruction provides hands-on practice of electrode placement, equipment set-up and troubleshooting of the electrocardiograph and practice reading ECG rhythm strips for arrhythmias. (Prerequisite: Open to individuals employed in the health care field. Knowledge of cardiac physiology required or permission of department. Recommended: Employment in health care field, knowledge of cardiac physiology or permission of instructor) Note: Phlebotomy students - see prerequisites under program requirements Lecture: 2 hours, Lab: 2 hours - Lab Fee: $20

RESP 2800 - Clinical Practicum II
(2 Credits)
This clinical experience allows students to apply knowledge developed through previous and current study. Students are guided and evaluated through bedside teaching. They are exposed to the diagnostic procedure of respiratory therapy and perform specific diagnostic procedures under direct supervision by the clinical director and affiliate staff. Experience in all areas of the hospital with emphasis on respiratory therapeutics, as well as home care are provided. Interpersonal skills are practiced and assessed. (Prerequisite: Successful completion of preclinical competency testing) Clinical: 144 hours
RESP 2810 - Clinical Practicum III  
(4 Credits)  
This clinical experience allows students to apply the techniques and skills of previous and current study to hospitalized patients under direct supervision. Students are introduced to the clinical application of mechanical ventilation as well as to specialized areas of patient care through bedside teaching. In addition, students prepare a case presentation of patients in these areas. Pulmonary function training is also provided. (Prerequisite: Successful completion of preclinical competency testing) Clinical: 322 hours

RESP 2820 - Clinical Practicum IV  
(3 Credits)  
In this clinical experience, students will apply all the techniques and skills of the respiratory therapist to hospitalized patients under direct and indirect supervision by the clinical director and affiliate staff. Clinical study of mechanical ventilation is completed. Students also examine neonatal and pediatric procedures. (Prerequisite: Successful completion of preclinical competency testing) Clinical: 224 hours

RHAB (Rehabilitative Health)

RHAB 1010 - Medical Terminology for Rehabilitative Health  
(1 Credit)  
This course includes an introduction to word parts building medical terms, instruction in organization of the body, directional terms, abbreviations and an overview of the different systems in the body. Students are expected to complete the course via progression through course modules. The course is offered both on-site and on the Web. Lecture: 1 hour

RHAB 1020 - Fundamentals of Palpation and Body Movement Skills  
(3 Credits)  
This course is designed to focus on the concepts and principles of palpatory anatomy and kinesiology. The purpose of this course is to emphasize the development of skilled palpation as a fundamental component of effective manual therapy technique. A solid knowledge base and understanding of how muscles and joints interact based upon their structure and function will be created and enhanced through a Functional Skills Model. This Functional Skills Model combines palpatory anatomy and kinesiology, which help ingrain the accurate location of various anatomical structures through kinesthetic experience, quality of touch, and effective client communication. This model incorporates a unique, experimental, online activities, and participatory class environment, where students are able to retain information while learning to use critical and creative-thinking processes. In the Functional Skills model students will palpate the targeted muscle, which will help students gain a better understanding of the designated muscle’s location, size, texture, role in posture, and dynamic movement.

RHAB 1030 - Pathophysiology for Rehabilitative Health Practitioners  
(3 Credits)  
This course includes a systems study of pathological conditions. The structure and function of each organ system is presented. Discussion will involve the etiology, signs, symptoms, diagnostic procedures, common medical/surgical management and the prevention of pathological processes as they affect each system. Students will understand the implications of pathological processes on physical function and contraindications and precautions for treatment. (Prerequisite: BIOL 1020 or 1070) Lecture: 3 hours

RHAB 1100 - Foundational Kinesiology  
(3 Credits)  
This online course uses a regional approach to studying the anatomical structures that create both stability and movement in the human body. With a strong focus on musculoskeletal anatomy, the student will be guided through a basic analysis of how functional movement occurs and how the body interacts functionally with the environment. Each student will complete a muscle mapping project where the attachment points of the skeletal muscles are drawn on a real miniature skeletal model.

RHAB 1110 - Kinesiology  
(4 Credits)  
This course covers the study of human movement and locomotion by combining human anatomy with aspects of biomechanics, muscle physiology, physical laws of gravity, leverage, and motion. This course deals with specific kinesiological functions of the musculoskeletal system with application to patient-related activities for the physical therapist assistant and the occupational therapy assistant. (Note: Restricted to OCTA, PHTA, TMSG and TMSC students. Prerequisite: BIOL 1010 or 1070) Lecture: 2 hours, Lab: 3 hours
RHAB 2010 - Nutrition Basics  
(3 Credits)  
This is an online interactive course designed to prepare students to understand how carbohydrates, fats and proteins function in the body; how each macronutrient, alone and when combined, undergoes integrated metabolism within tissues; and how the macronutrients integrate to affect overall metabolism, disease risk and recovery. Additionally, this course will prepare students to understand how micronutrients (vitamins and minerals) play a significant regulatory role as well as the interaction between nutrients. Students will explore the variability in micronutrient requirements between individuals, outline the signs and symptoms associated with both nutrient deficiency and excess. Other topics presented within this course are the functions of nutrients in the production, quality and consumption of foods and how they are to be prepared consistent with food safety precautions, budgeting for nutritious foods, nutrition across the lifespan, and current topics in nutrition.

ROTC (Reserve Officer Training Corps)

ROTC 1010 - Introduction to Leadership and Military Skills  
(3 Credits)  
Under auspices of Providence College Military Science Department

ROTC 1020 - Leadership Skills  
(3 Credits)  
Under auspices of Providence College Military Science Department

ROTC 2050 - Leadership and Decision Making w/Lab  
(3 Credits)  
Under auspices of Providence College Military Science Department

ROTC 2070 - Sophomore Military Science and Lab  
(3 Credits)  
Under auspices of Providence College Military Science Department. Prerequisite: ROTC 2050. Spring semesters only.

RUSN (Russian)

RUSN 1000 - Basic Spoken Russian I  
(3 Credits)  
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

RUSN 1050 - Elementary Russian I  
(3 Credits)  
For students with some previous experience in the language. This course covers elements of the language including conversation, pronunciation, reading, writing and grammar. Aspects of Russian culture also are included. Lecture: 3 hours

SOCS (Sociology)

SOCS 1010 - General Sociology  
(3 Credits)  
This is an introductory course presenting a description and analysis of the structure and dynamics of human society. It focuses on social norms, groups, intergroup relations, social change, stratification and institutions. Social interaction and the values that orient behavior in groups are examined. Contemporary society and its problems are discussed. Lecture: 3 hours
Community College of Rhode Island

**SOCS 2020 - Marriage and Family**  
(3 Credits)  
This is a survey of the basic factors of courtship, mate selection, engagement, marriage and rearing children in preparation for successful marriage and parenthood. Marital values and problems are discussed. The course studies the family as the basic unit in society and its relationship to society as a whole. Current changes in family life and their causes are examined. Lecture: 3 hours

**SOCS 2030 - Urban Sociology**  
(3 Credits)  
This course analyzes the influences of urban interaction on group relationships. Consideration is given to multi-factors inherent in problems pertaining to urban population movements, economic dislocations, minority-majority cultural conflicts and pluralistic power patterns. The role of public media and pressure groups also is studied as integral to contemporary urban group relationships. Lecture: 3 hours

**SOCS 2040 - Sociological Perspectives of Race and Ethnic Relations**  
(3 Credits)  
This is a survey of the sociological aspects of intergroup relations as they pertain to race and ethnicity. Emphasis is placed on the socio-historical conceptualization of race and ethnicity, classical and contemporary sociological theories (e.g. assimilation, theories of immigration, racialization, and typologies of racism) regarding race and ethnicity. Majority-minority relations in the U.S. are also examined. SOCS 1010 is highly recommended as a prerequisite. Note: May be taken as an alternative to SOCS 1010 in Human Services. Lecture: 3 hours

**SOCS 2050 - Social Problems**  
(3 Credits)  
This is a survey of the sociological aspects of major contemporary social problems in the United States. Emphasis is placed on personal pathologies (e.g., alcoholism, drug addiction, sexual pathology, suicide) population problems, educational problems, racism, sexism, ethnic problems, family problems and crime. (Prerequisite: SOCS 1010) Lecture: 3 hours

**SOCS 2110 - Introduction to Anthropology**  
(3 Credits)  
This course is an introduction to the basic principles and methods of cultural anthropology. Emphasis is placed on the concept of culture as a way of explaining human behavior, with illustrations from selected preliterate societies. The biocultural evolution of mankind is covered. Lecture: 3 hours

**SOCS 2120 - Sociology of Work in Formal Organizations**  
(3 Credits)  
Students learn to think critically and develop skills for teamwork in the context of large organizations, based on sociological principles of bureaucracy, group dynamics, leadership and authority. A solid grasp of the concepts in this course enables students to analyze and articulate the basic components of large organizations, the purpose of teamwork, and the kind of skills needed to succeed as a member of a team. Lecture: 3 hours

**SOCS 2300 - Criminology**  
(3 Credits)  
This course considers the nature of crime and the criminal who commits social infractions. Emphasis focuses equally on theoretical and applied criminology. Lecture: 3 hours

**SPAN (Spanish)**

**SPAN 1000 - Basic Spoken Spanish I**  
(3 Credits)  
This is an introductory elective course for beginners emphasizing correct pronunciation and basic vocabulary for practical use in everyday conversational situations and travel dialogues. Students with no previous study of the language are prepared to use and understand it within a limited context and basic structure. Lecture: 3 hours

**SPAN 1010 - Elementary Spanish I**  
(3 Credits)  
This course is for students with little or no preparation and covers elements of the language including: conversation, pronunciation, reading, writing and grammar. Aspects of Spanish and Hispanic American culture are also included. Lecture: 5 hours
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 1020</td>
<td>Elementary Spanish II</td>
<td>3</td>
<td>This is a continuation of Elementary Spanish I (SPAN 1010). (Prerequisite: SPAN 1010, 1030 or equivalent) Lecture: 5 hours</td>
</tr>
<tr>
<td>SPAN 1030</td>
<td>Elementary Spanish I</td>
<td>3</td>
<td>Spanish 1030 is a faster paced version of Spanish 1010. This course is suitable for students with previous experience i.e. Basic spoken Spanish and/or other prior formal study of the language, prior formal study of another foreign language, or informal experience with a foreign language. The course covers elements of the language including: conversation, pronunciation, reading, writing, and grammar. Aspects of Spanish-speaking cultures are also included. Note: Course content is the same as Spanish 1010 with two fewer hours per week. (Prerequisite: Prior preparation as noted above or permission of instructor). Lecture: 3 hours</td>
</tr>
<tr>
<td>SPAN 1040</td>
<td>Elementary Spanish II</td>
<td>3</td>
<td>This course is a continuation of SPAN 1030. Note: Course content is the same as SPAN 1020 with 2 less classroom hours per week. (Prerequisite: SPAN 1030, SPAN 1010 or its equivalent) Lecture: 3 hours</td>
</tr>
<tr>
<td>SPAN 1230</td>
<td>Spanish for Law Enforcement Personnel I</td>
<td>3</td>
<td>This is an elective course designed for the student seeking a position in the Law Enforcement field and/or the professional already working in the career. (Language elective for Law Enforcement students) The course focuses on common situations encountered by Law Enforcement professionals providing practical communication skills development and information needed for daily work routines. Correct pronunciation and basic grammar are addressed. Lecture: 3 hours</td>
</tr>
<tr>
<td>SPAN 1710</td>
<td>Spanish for Medical Service Personnel I</td>
<td>3</td>
<td>This course provides students an opportunity to master enough oral Spanish to deal directly with Spanish-speaking patients and family from hospital admission through discharge. Day-to-day dramatic re-creations of hospital experiences from the points of view of both nurse and patient help students improve proficiency in the use of spoken Spanish. Note: Elective credit for students in Nursing and Allied Heath fields. Lecture: 3 hours</td>
</tr>
<tr>
<td>SPAN 2010</td>
<td>Intermediate Spanish I</td>
<td>3</td>
<td>This course helps students develop skill in reading and discussing texts related to Spanish and Hispanic-American culture and literature. </table>
**THEA (Theatre)**

**THEA 1080 - Introduction to Costuming**  
(3 Credits)  
This is a basic course in costume design, including theory and practice, with units on costume history, sewing and construction. Two hours of lecture and one hour of lab weekly. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours (plus 25 hours practical costume work within the semester.)

**THEA 1090 - Introduction to Theatre**  
(3 Credits)  
This course introduces students to the various aspects of theatre, focusing on the ways in which a play script is translated into a full production. Functions of the playwright, actor, director and designer are covered. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours

**THEA 1120 - Stagecraft**  
(3 Credits)  
This course is a survey of various aspects of technical theatre with emphasis on set design, scenic construction, scenic painting and properties. An artistic approach to a unified production concept is stressed. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours (plus 25 lab hours within the semester)

**THEA 1125 - Play Analysis for Production**  
(3 Credits)  
This course is designed to equip students with skills necessary to use a script as a “blueprint” for production, including research, analysis and interpretation. It gives an overview of different historical eras, elements of script analysis and utilization of these elements by directors, designers and actors. Lecture: 3 hours

**THEA 1126 - Diverse Voices in Contemporary Theatre**  
(3 Credits)  
This course is intended to engage students in discovering the significant ideas, vibrant characters and universal themes of multiculturalism through the lens of theatre. Plays to be studied will include, but will not limited to, the works of Wilson, Nottage, Diamond, Norris, Hwang, Hudes, Lopez, Cruz and Rivera. Emphasis is on the social, cultural and philosophical implications in the representative plays. Lecture: 3 hours

**THEA 1130 - Origins of Theatre**  
(3 Credits)  
This is a lecture course emphasizing the development of theatre in Western and Eastern civilization. Included are various theatrical forms and styles as reflections of the historical periods in which they grew. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours

**THEA 1140 - Acting I**  
(3 Credits)  
This is a beginning course in acting techniques. Students participate in a variety of theatre exercises, improvisations and scenes with the purpose of self-discovery leading to character development and interpretation. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours

**THEA 1150 - Theatre for Children**  
(3 Credits)  
This course acquaints students with theory and basic practices in working with children as participants in dramatic activities and with preparing theatrical productions for the child audience. Topics include creative dramatics, improvisational games, story dramatization, puppetry, script selection and analysis and play production. Students apply principles discussed to the preparation of a children's theatre production for public performance. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours

**THEA 1160 - Movement for Actors**  
(3 Credits)  
This is a lecture-performance course in theatre considering body movement as a fundamental instrument of the actor. It deals with the basic principles, techniques and styles of movement for the actor. Major emphasis is on the various forms movement can take in creating a role
(characterization) and on translating emotions into movement and dance. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Studio: 3 hours

**THEA 1170 - Theatrical Make-up**  
(3 Credits)  
This course explores the use of makeup as a tool for expressing dramatic characters, as well as the history of makeup styles as they relate to character development. Students design and implement the makeup for several different characters types including basic beauty, old age and fantasy. There may be opportunities for practical hands-on implementation of makeup designs for one of the semester's theatre productions. Lecture: 3 hours

**THEA 1180 - Stage Lighting and Sound Production**  
(3 Credits)  
A survey of various aspects of technical theatre, with emphasis on light and sound design and execution and stage management. The course stresses an artistic approach to a unified production concept. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) Lecture: 3 hours (plus 25 lab hours within the semester)

**THEA 1470 - Dance 2 Jazz and Tap**  
(1 Credit)  
Introduction to the fundamental techniques of jazz and tap dance. Emphasis is placed on class participation so that students may develop their knowledge and understanding of the basic principles of jazz and tap dance, including warm-up, isolations and choreography. Jazz and tap dance history and historical jazz and tap dance figures will be explored and discussed. (repeatable to 2 credits) Studio: 2 hours

**THEA 1480 - Dance I**  
(1 Credit)  
This course explores dance as an art form through familiarizing the student with various forms such as ballet, jazz and modern dance. Intensive studio experience emphasizes the acquisition of basic dance skills, kinesthetic perception, rhythmic awareness and development of strong fundamental technique. Repeatable up to 2 credits. Studio work: 2 hours

**THEA 2140 - Acting II**  
(3 Credits)  
Continuing the work begun in Acting I, this course emphasizes increased depth in performance and further practical work in characterization, text analysis and scene preparation. (May be counted toward the Fine Arts requirement in the Liberal Arts program.) (Prerequisite: THEA 1140 or consent of instructor.) Lecture: 3 hours

**THEA 2145 - Acting for the Camera**  
(3 Credits)  
This course will expand skills introduced in Acting I to acting for the camera. Through exercises and scene study, we will develop the performer's range of emotional, intellectual, physical, and vocal expressiveness for the camera. Students will act in on-camera exercises, television scenes, and film scenes. Lecture: 3 hours

**THEA 2200 - Theatre Graphics**  
(3 Credits)  
This course offers a survey of U.S.I.T.T. standard graphics, drafting, rendering techniques and model construction for theatrical designs (settings, lighting and costuming). It prepares students for a major in design or theatre technology at a four-year college or university. This is a capstone course for students in the Technical Theatre track at CCRI. (Prerequisites: ENGT 1060, ARTS 1010, THEA 1120, 1180 and 1090). Lecture: 3 hours

**TMSG (Therapeutic Massage)**

**TMSG 1000 - Introduction to Therapeutic Massage**  
(2 Credits)  
This course presents an overview of the field of massage therapy and the evolving roles and opportunities of the massage therapist within the health care delivery system is presented. Topics such as history, licensure requirements, education, employment opportunities, professional organizations and the benefits of massage are covered. Ethical issues for the massage therapist are discussed. The student will learn basic techniques for hand and foot massage. The student is required to receive one full body massage from a licensed massage therapist during the semester. Lecture: 2 hours (2.5 hours in summer due to condensed time frame)
Community College of Rhode Island

TMSG 1020 - Swedish Massage  
(5 Credits)  
Students will learn the five standard Swedish massage strokes, as well as complementary strokes commonly used in Swedish massage. Through demonstration and practice, the students are able to perform a full-body Swedish massage in one hour. The theoretical principles of research including scientific study of professional touch is discussed. The indications, contraindications, limitations and physiological effects of these techniques are described. Introduction to documentation is provided. Students are instructed in the scope of practice, creating professional boundaries, the therapeutic relationship, approaches to care, working with hospital based clients, proper draping methods, personal and client hygiene, obtaining a medical history, proper body mechanics, basic exercises for personal care, basic first aid, and OSHA regulations to provide a safe and nurturing practice environment. - Lab Fee: $20

TMSG 1030 - Deep Tissue Massage  
(5 Credits)  
This course presents student with a wider and deeper understanding of soft tissue techniques and their effects on the human body. Students are instructed in specific patterns for common pathological condition, the use of trigger point therapy, deep tissue manipulation, fascial restrictions to abnormalities and postural analysis. Origin, insertion, and action of major muscles will be reviewed. The indications, contraindications, limitations and physiological effects of these techniques will be described discussion along with the effects of stress and disease. Students will focus on determining and applying the appropriate modality to achieve the goals. Students will learn an introduction to the lymphatic system and how it works. Students will learn about the flow of lymphatic fluid, lymph nodes, and basic protocols along with contraindications. The course applies concepts from, anatomy, kinesiology, neuromuscular assessment and evaluation. Laboratory experience will provide students with the opportunity to become comfortable with the techniques, proper body mechanics, obtaining medical history and therapeutic relationships. Through demonstration and practice, the student will be able to complete a treatment plan and be able to perform a full body massage and receive a full body massage, using a variety of deep tissue techniques. Professional behaviors in the classroom setting are expected at all times and are evaluated each class. - Lab Fee: $20

TMSG 1040 - Introduction to Eastern Modalities  
(2 Credits)  
Students explore eastern modalities in health and wellness care. Primary focus is an introduction to the history, theory and basic practice of shiatsu therapy and acupressure. This includes a study of selected meridians, acupoints and other aspects of traditional Chinese medicine. The indications, contraindications, limitations and effects of shiatsu and acupressure are described. Students learn methods and terminology for documentation. Laboratory experience provides students with the opportunity to become comfortable with shiatsu and acupressure techniques, and to learn proper mind-body mechanics for providing safe and effective treatment on the shiatsu mat and on a massage chair. Students also learn techniques for integrating shiatsu and acupressure into their Swedish massage, and explore how to practice massage in a more embodied, mindful, compassionate, and ecologically attuned way. Students encounter a range of additional modalities including qi gong, yoga, t’ai chi, meditation, and feng shui. Participation in all aspects of this course is required.

TMSG 1140 - Integrating Eastern and Western Techniques  
(2 Credits)  
Students will learn clinical applications of eastern modalities in the integrative clinical practice of massage therapy. Specifically, they learn how to integrate eastern body mechanics, mind-body techniques, and meridian/acupoint work into Swedish and/or deep tissue massage treatments. Students will explore integrative massage strategies for addressing chronic low back pain with a goal of preventing or reducing a client’s use of prescription opioid medication. Students will also explore contemporary clinical acupuncture and acupressure research in the development of an integrative massage treatment protocol for a particular client population. Participation in all aspects of this course, which includes regular qi development exercises, mind-body cultivation, and integrative massage practice outside of class hours, is required.

TMSG 2010 - Introduction to Sports Massage  
(2 Credits)  
This course serves as a basic introduction to the role of the Sports Massage Therapist; the course applies concepts from anatomy, orthopedic massage and will focus on the uses of massage in sports activities. Students will understand the benefits and learn techniques for pre-event, inter- event, post-event and maintenance massage. Students will gain skill in treatment session planning, palpation assessment and documentation. An overview of common sports injuries and conditions will be presented. Musculoskeletal concerns will be examined. Hydrotherapy as an adjunct to tissue and muscle healing will be addressed. Specific hydrotherapeutic methods will be reviewed and presented in laboratory sessions. - Lab Fee: $20

TMSG 2020 - Student Massage Clinic  
(3 Credits)  
This course marks the first part of the student’s clinical education, it focuses on integrating skills learned in previous courses; community outreach and educating the public to the benefits of clinical massage therapy. The course is conducted at the college providing massage services to clients within the community. Students will set up and run the in-house clinic under the supervision licensed program faculty, with the emphasis on clinic
policies and procedures, clinical behavior, professionalism, interview skills and develop treatment plans, ethics and proper client care. Students will gain experience relative to a massage office practice, marketing, record keeping, scheduling clientele, basic accounting procedures, and ensuring compliance with OSHA standards, blood borne pathogens and HIPAA training. - Lab Fee: $20

**TMSG 2021 - Massage Practice Business Theory**  
*(2 Credits)*  
This course focuses on providing students with knowledge of business management skills for massage practitioners. Students will demonstrate skills in business management including financial organization, accounting basics, taxes and maintaining proper documentation. Topics include legal and ethical issues, record-keeping, taxes, pricing, bookkeeping, inventory maintenance, interviewing skills and resume development. The student will be provided with an overview of OSHA, HIPAA and ADA regulations as they relate to the massage profession. (Prerequisite: RHAB 1110, 1030, TMSG 1020, 1030) Lecture: 2 hours

**TMSG 2030 - Clinical Internship I**  
*(2 Credits)*  
The focus of this course is to gain experience providing massage therapy services to the healthy population, or to special populations including those with various pathologies and injuries. Students will be supervised by qualified healthcare providers employed at various community and healthcare facilities. Clinical placements are available in a variety of settings including private offices, nursing homes, group homes, athletic training facilities and hospitals. In addition to gaining clinical experience, students will participate with record maintenance, accounting procedures, and ensuring OSHA standards in the health care environment.

**TMSG 2040 - Foundation of Evidence-Based Outcomes for Massage Therapists**  
*(3 Credits)*  
This course is designed to provide students with information necessary to evaluate the effectiveness of various massage techniques, with client populations under various conditions. The emphasis is to provide the student with skills to conduct a literature search, appreciate the value of evidence-based practice for massage therapists, to critically evaluate research studies, and to use the information to design more effective treatment plans. Students will demonstrate the ability to use this evidence to inform consumers, health care providers, government agencies, and professional association of the value of massage in the health care system. (Prerequisites: RHAB 1110, 1030, TMSG 1020, 1030, 2010, 2020, 2021; Corequisites: TMSG 2030, 2135) Lecture: 3 hours

**TMSG 2110 - Advanced Sports Massage**  
*(3 Credits)*  
The role of the Sports Massage Therapist in the athletic setting will be expanded. The course will focus on the uses of massage in the athletic training environment. Students will learn to recognize and apply specific massage skills for Repetitive Use Injuries, including hamstring strains, shoulder, knee and foot pathologies. Application of techniques for these specific problems will provide opportunities for psychomotor mastery that will be evaluated in hands on sessions. Indications and contraindications for heat and cold applications an adjunct to tissue and muscle healing will be addressed. Specific methods such as muscle energy techniques, including proprioceptive neuromuscular facilitation (PNF), a comparison of types of stretching methods and self-myofascial release techniques will be demonstrated in hands on sessions. Students will learn about overtraining syndrome causes and effects and the role of massage in supporting the over-trained athlete. An introduction to the Kinesio Taping method will also be provided outlining foundational concepts of this modality and specific applications for minor repetitive use conditions. - Lab Fee: $20

**TMSG 2130 - Clinical Internship II**  
*(2 Credits)*  
The focus of this course is to gain experience providing massage therapy to the healthy population, or to special populations including those with various pathologies and injuries. Students will be supervised by qualified healthcare providers employed at various community and healthcare facilities. Clinical placements are available in a variety of settings including private offices, nursing homes, group homes, athletic training facilities and hospitals. In addition to gaining clinical experience, students will participate with records maintenance, accounting procedures, and ensuring OSHA standards in the health care environment.

**TRVL (Travel and Tourism)**

**TRVL 1010 - Introduction to Travel and Tourism**  
*(3 Credits)*  
This course provides an overview of the travel and tourism profession. Students explore a full range of travel products and destinations, as well as the business and technical skills necessary to begin a productive travel career. Lecture: 3 hours

<tr>
<td>XRAY 1000</td>
<td>Introduction to Radiography</td>
<td>3</td>
<td>This course is designed to give prospective Radiography students an introduction to allied health professions in general and to diagnostic imaging in particular. Topics include admission and graduation requirements for health programs. Medical terminology and an overview of anatomy is taught, along with basic imaging concepts. Radiation safety and patient care issues are addressed. An observation in an affiliated radiology department will be arranged. Note: This course is a requirement for Radiography students but is open to all students. (Prerequisite: ENGL 1010) Lecture: 3 hours</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 1010</td>
<td>Clinical Radiography</td>
<td>3</td>
<td>This course familiarizes students with the field of radiological technology. Topics include basic anatomy, radiation protection and safety, as well as medical ethics and law as related to radiographic practice. The anatomy, positioning and film critique for selected procedures are included and coordinated with laboratory practice and clinical application. Students are assigned to a four-week clinical rotation upon successful completion of the classroom and lab portion of this course. Lecture: 2.5 hours per week/6 weeks, Lab: 3.5 hours per week/6 weeks, and Clinical: 40 hours/week for 4 weeks. - Lab Fee: $20</td>

<tr>
<td>XRAY 1220</td>
<td>Principles of Radiography II</td>
<td>(3 Credits)</td>
<td>This course is a continuation of XRAY 1110 and is designed to give the student a thorough knowledge of the manipulation of exposure factors and to construct technique charts. Lecture: 3 hours</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 1230</td>
<td>Patient Care for Radiographers</td>
<td>(1 Credit)</td>
<td>This course is designed to develop skills needed to address the needs of patients in the radiology department. Medical asepsis, patient assessment, communication skills, patients' rights and standard of care are addressed, in addition to routine and emergency care. Lecture: 1 hour</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 1910</td>
<td>Radiography I</td>
<td>(6 Credits)</td>
<td>This course is a study of basic positioning for extremities, chest, abdomen and the bony thorax. Proper patient communication, radiation protection and identification of structures on radiographs are incorporated into each unit of study. This course is coordinated with practical application in the radiography laboratory and at the affiliated hospital. (Prerequisite: XRAY 1010 and XRAY 1110) Lecture: 3 hours, Lab: 2 hour, Clinical: Total 224 hours - Lab Fee: $20</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 1920</td>
<td>Radiography II</td>
<td>(6 Credits)</td>
<td>This course is a study of the vertebral column, skull and facial bones. This course also studies the alimentary canal, biliary tract and the urinary system in relationship to the contrast agents and positioning utilized for each examination. This course is coordinated with practical application in the radiography laboratory and at the affiliated hospital. Lecture: 3 hours, Lab: 2 hours, Clinical: 16 hours per week - Lab Fee: $20</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 1930</td>
<td>Radiography III</td>
<td>(6 Credits)</td>
<td>This course is designed to expand the students' working knowledge of technique formulation and conversion factors; to understand the use and limitations of the X-ray tube; to develop an understanding of the function and use of various types of imaging equipment and accessories; and to examine methods for producing radiographic images in fluoroscopy, the operating room and at the patient's bedside. This is related to the students' ongoing clinical experience and their use of computer-assisted imaging modalities in a hospital setting. Lecture: 4 hours, Clinical: 32 hours per week</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 2340</td>
<td>Quality Assurance in Radiography</td>
<td>(1 Credit)</td>
<td>This course is designed to examine the effective functioning of a radiology department. Methods for evaluating quality, equipment testing and documentation will be discussed, as well as the role of the registered radiographer in maintaining quality. Lecture: 1 hour</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 2410</td>
<td>Introduction to Radiation Biology</td>
<td>(3 Credits)</td>
<td>This course presents basic radiobiology in relationship to the possible genetic and somatic effects of radiation dependent upon dose and the rate to specific types of human cells, organs, and systems. Every known method used to limit ionizing radiation from diagnostic examinations is presented. Lecture: 3 hours.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 2430</td>
<td>Sectional Imaging</td>
<td>(3 Credits)</td>
<td>This course is a study of human anatomy from a sectional perspective. The anatomy of the head, neck, thorax, abdomen, pelvis and vertebral column are studied. This anatomy is related to the use of computer-assisted imaging modalities. Common pathological findings in each area are discussed. Lecture: 3 hours</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>XRAY 2460</td>
<td>Principles of Imaging Diverse Patient Populations</td>
<td>(3 Credits)</td>
<td>This course allows students to apply their knowledge of radiographic imaging and patient care to a variety of non-traditional patient populations such as pediatric, geriatric, and trauma patients. Prerequisites: XRAY 1220 and 1920 Lecture: 3 hours</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**XRAY 2470 - Radiographic Pathology**  
(1 Credit)  
This course examines the most common congenital and acquired diseases that are demonstrated radiographically. Etiology, symptoms, treatment and prognosis are discussed. Students evaluate the quality of radiographs of patients with these conditions. Lecture: 1 hour

**XRAY 2910 - Radiography IV**  
(7 Credits)  
This course deals with the specialized and highly technical procedures in radiography, the equipment and contrast media employed and the general indications for each examination. This course is coordinated with practical application in the radiographic laboratory and the clinical affiliate, where practical skills associated with these procedures are developed. Lecture: 3 hours, Lab: 2 hour, Clinical: 24 hours per week - Lab Fee: $20

**XRAY 2920 - Radiography V**  
(4 Credits)  
This course requires students to prepare a research project that forms the basis for a written paper and an oral presentation. Students are also required to read and evaluate material on selected topics in health care and new imaging modalities. Mastery of previously learned material is evaluated by comprehensive examinations. Mastery of clinical skills built on previously learned material is also evaluated. Observations in associated imaging modalities is required. Lecture: 1 hour, Clinical: 24 hours per week

NOTIFICATION OF STUDENT RIGHTS UNDER FERPA

The Family Educational Rights and Privacy Act (including its implementing regulations, “FERPA”) affords students certain rights with respect to their education records, as defined in FERPA. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the community college receives a request for access.
   a. A student should submit to the Office of Enrollment Services the “Student Request To Inspect and Review Education Records” form that identifies the record(s) the student wishes to inspect. The Office of Enrollment Services will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading or otherwise in violation of the student’s privacy rights under FERPA.
   a. A student who wishes to ask the community college to amend a record should write the community college official responsible for the record (as identified by the Office of Enrollment Services), clearly identify the part of the record the student wants changed and specify why it should be changed.
   b. If the community college decides not to amend the record as requested, the community college will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment at the Office of the Associate Vice President for Student Services. Any additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the community college discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.
   a. The community college discloses education records without a student’s prior written consent under one FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the community college or the Rhode Island Board of Education (the “RIBE”) in an administrative, supervisory, academic, research or support staff position (including law enforcement unit personnel and health staff); an individual or a private or governmental entity (including, for example, any other institution in the Rhode Island system of public higher education) with whom the community college or the RIBE has contracted as its agent to provide a service to the community college instead of using community college or RIBE employees or officials (such as an attorney, auditor or collection agent), whether or not that individual or entity is compensated for that service; a person serving on the RIBE; or a student or volunteer serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.
   b. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the community college or the RIBE.
   c. Upon request, the community college also discloses education records without consent under another FERPA exception to officials of another school in which a student seeks or intends to enroll or is already enrolled so long as the disclosure is for purposes related to the student’s enrollment or transfer.
   d. FERPA contains other exceptions to a student’s right to provide written consent before the community college discloses personally identifiable information from the student’s education records.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the community college to comply with the requirements of FERPA.
   a. The name and address of the office that administers FERPA is:
   b. Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington, DC 20202-5901

PUBLIC NOTICE FOR DIRECTORY INFORMATION UNDER FERPA

The Family Educational Rights and Privacy Act (including its implementing regulations, “FERPA”) requires that the community college, with certain exceptions, obtain a student’s consent prior to the disclosure of personally identifiable information from the student’s education records. The community college, however, may disclose appropriately designated “directory information” without the student’s written consent, unless the student has advised the community college to the contrary in accordance with the community college’s procedures. Directory information is information contained in an education record that would not generally be considered harmful or an invasion of privacy if disclosed. Directory information may be used in community college publications, and may be disclosed to any person or organization whether or not affiliated with the community college, without the student’s written consent.
The community college has designated the following types of personally identifiable information concerning a student as directory information:

- Name
- Official community college electronic mail address
- Major field of study
- Dates of attendance
- Class level
- Enrollment status (enrolled or not, full time or part time)
- Participation in officially recognized activities and sports
- Degrees, honors and awards received (including dates)
- Existence or nonexistence of a pending or accepted application for enrollment
- Most recent educational agency or institution attended

If a student does not want the community college to disclose directory information from the student’s education records without her or his prior written consent, the student must sign and deliver to the Office of Enrollment Services (“OES”) the form entitled “Refusal To Permit Designation of Directory Information.” Any “Refusal To Permit Designation of Directory Information” is effective for the remainder of the academic year during which it is signed and delivered by the student unless it is withdrawn as required on the form. Any “Refusal To Permit Designation of Directory Information” will not apply in a subsequent academic year during which the student attends the community college unless renewed. There is no deadline for signing and delivering a “Refusal To Permit Designation of Directory Information,” but until it is signed and delivered, it will be assumed that the above information may be disclosed for the remainder of the current academic year.
