

*The NSA Cyber Exercise (NCX) will be offered for NCAE-C designated schools this academic year, and all students enrolled in designated programs will be eligible to attend the NCX Tech Talks.*

NCX Tech Talks are offered monthly between September and April and offer focused instruction on the NCX scenario subjects. Instructors are NSA technical directors and experts in their field. The webinars are offered twice each month to ensure maximum participation.

**The next NCX Tech Talk on *Malware* will be offered October 19 and 21 at 7:30 pm EST. *Policy* will be offered on October 26 and 28 at 7:30pm EST.** To receive information on how to join, please register [here](#) or visit the [CAE Community events page](#).

NCX was established to train and reinforce cyber skills of the US Service Academy cadets and midshipmen, Reserve Officer Training Corps (ROTC) and Senior Military College (SMC) cadets and students. It is designed to develop and test cybersecurity skills, teamwork, planning, communication, and decision-making. Students gain a deeper understanding of current threat environments and learn new techniques and tools. An NCX fact sheet is attached.
