Associate Degree and Practical Nursing
Mission Statements

Associate Degree Nursing

The Community College of Rhode Island (CCRI) is the state's only public associate degree registered nursing program with seamless options to become a certified nursing assistant and licensed practical nurse. We provide students with the opportunity to acquire the knowledge, skills, and attitudes necessary for developing effective communication, critical thinking, clinical reasoning and teamwork/collaboration skills. Building upon a rich tradition of teaching excellence and high academic and collegial standards, our faculty and staff are committed to developing a strong, responsive, and diverse nursing workforce aimed at advancing the health of our communities, state, and nation.

Approved: 3/07; Revised: 8/11, 5/16
Reviewed: 5/12, 5/13, 7/14, 8/15, 5/16, 5/19

Practical Nursing

The Community College of Rhode Island is the state’s only public practical nursing program. We provide students with the opportunity to acquire the knowledge, skills, and attitudes necessary for developing effective communication, critical thinking, clinical reasoning and teamwork/collaboration skills. Building upon a rich tradition of teaching excellence and high academic and collegial standards, our faculty and staff are committed to developing a strong, responsive, and diverse nursing workforce aimed at advancing the health of our communities, state, and nation.

Associate Degree and Practical Nursing
Philosophies

Associate Degree Nursing
Nursing is an art and science reflective of and responsive to an ever-changing healthcare environment. Nursing professionals utilize clinical judgment, quality improvement, informatics, teamwork and collaboration to provide safe, culturally-competent, patient-centered care. The goal of the professional nurse is to protect, promote, and restore comfort and health throughout the lifespan.

Education as a life-long, interactive process provides the opportunity for the adult learner to develop personally, socially, and intellectually. The adult learner’s previous life experiences and knowledge provide a foundation for acquiring new knowledge, skills, and attitudes.

Associate Degree Nursing (ADN) prepares the graduate for entry into professional nursing practice. As a registered nurse generalist the ADN graduate leads, manages, and provides direct care to individuals, families, and groups across various healthcare environments.

Approved: 4/03; Revised: 3/07, 5/16, 8/16

Practical Nursing
Nursing is an art and science reflective of and responsive to an ever-changing healthcare environment. Nursing professionals utilize clinical judgment, quality improvement, informatics, teamwork and collaboration to provide safe, culturally-competent, patient-centered care. The goal of the licensed practical nurse (LPN) is to protect, promote, and restore comfort and health throughout the lifespan.

Education as a life-long, interactive process that provides the opportunity for the adult learner to develop personally, socially, and intellectually. The adult learner’s previous life experiences and knowledge provide a foundation for acquiring new knowledge, skills, and attitudes.

Practical Nursing (PN) prepares the graduate for entry into nursing practice. As a PN generalist, the PN graduate leads, manages, and provides direct care to individuals, families, and groups across various healthcare environments.

1. **Patient-centered care** is focused on the patient or designee as the source of control in consideration of patient and family cultural preferences, beliefs, and values. As an advocate, the nurse provides timely, compassionate, and coordinated care.

2. **Nursing judgment** is the process of applying critical thinking and scientific reasoning skills to make appropriate clinical decisions based on current best evidence.

3. **Safety** involves minimizing the risk of harm to patients, families, and providers through established best practices. **Quality improvement** utilizes clinical data to monitor and improve healthcare outcomes.

4. **Professional identity** incorporates actions that reflect integrity, leadership, accountability and legal/ethical responsibility in accordance with established nursing standards of practice.

5. **Teamwork** involves functioning effectively within nursing and inter-professional teams. **Collaboration** fosters effective communication, mutual respect and shared decision-making to achieve quality patient-centered care.

6. **Informatics** is the use of technology to access appropriate information, communicate effectively, and implement best nursing practices to support safe clinical decision-making.

Associate Degree and Practical Nursing
Core Values of the Nursing Student

What it means to be a CCRI Nursing Student:
written by the nursing students in the Student Nurse Organization
for their peers in preparation for entering the nursing profession.

Professionalism:
We strive to maintain the highest standards in our care by using admirable qualities, beliefs, and communication skills that are characterized by respect for others, responsibility, integrity, courage, humility and the willingness to advocate.

Excellence:
We believe that it is vital for us to have a commitment to continued growth; within the concept we include all opportunities for in-depth learning and skill enhancement by the use of evidence based resources.

Compassion:
We demonstrate empathy, sensitivity, kindness, and warmth; in doing so, we provide compassionate care that is professional, and this in turn creates better nursing student/patient relationships. We strive to preserve patient safety and dignity by providing patients with care, comfort, and support to help them meet their goals and achieve their highest levels of independence and wellness.

We demonstrate these same compassionate traits toward one another, creating and maintaining a culture of caring within the nursing program. We recognize that each student carries burdens that add to the challenges of a nursing education, and by supporting and encouraging one another, we create a safe place in which nursing students are free to learn and grow.

Diversity:
We celebrate knowing that each of us is unique. Differences of race, ethnicity, gender, sexual orientation, socioeconomic status, age, physical abilities, and religious beliefs make up the rich tapestry that is our student body. We believe that each nursing student brings his or her own uniqueness to our program, and we acknowledge, explore, and welcome our difference with kindness and positivity.

Associate Degree and Practical Nursing
Program Competencies

Associate Degree Nursing

Upon successful completion of the Associate of Science in Nursing degree, the graduate will:

1. Provide safe, quality, evidence-based, patient-centered nursing care in a variety of healthcare settings to diverse patients across the lifespan. (safety and patient-centered care)
2. Apply critical thinking and clinical reasoning to make evidence-based decisions. (nursing judgment)
3. Implement established quality measures to improve patient care. (quality improvement and safety)
4. Participate in collaborative relationships with members of the inter-professional team, the patient, family and/or designee to achieve quality patient-centered care. (teamwork and collaboration)
5. Utilize information systems and patient care technology to communicate, implement best nursing practices, minimize risk, and support clinical decision-making. (informatics)
6. Demonstrate leadership skills in a variety of healthcare settings for diverse patients. (professional identity)
7. Exhibit professional behaviors within legal and ethical practice frameworks. (professional identity)

Approved: 5/16
Reviewed 5/19

Practical Nursing

1. **Patient-centered Care:** Provide safe, evidence-based patient-centered nursing care to a diverse population in a variety of health care settings.
2. **Nursing Judgment:** Provide a rationale for judgments used in the provision of safe, quality care and for decisions that promote health of patients and their families within their community.
3. **Safety and Quality Improvement:** Implement established quality measures to improve desired health outcomes from an individual, unit and systems perspective.
4. **Professional Identity:** Demonstrate accountability for the delivery of standard-based nursing care that is consistent with legal and ethical principles.
5. **Teamwork and Collaboration:** Function effectively in collaborative relationships within the healthcare team.
6. **Informatics:** Utilize information management systems and patient care technologies to implement best nursing practices.

Technical Standards for the CCRI Nursing Student

Department of Labor Classification: Moderate

The Department of Nursing at the Community College of Rhode Island does not discriminate on the basis of race, color, religion, sex, gender identity or expression, age, national origin, disability, marital status, sexual orientation, or protected military status, in any of its activities or operations.

CCRI Nursing Faculty have determined that candidates for associate nursing degrees or practical nursing diplomas must be able to meet the following minimum technical standards with or without reasonable accommodations for successful completion of program requirements. Technical Standards are defined as functional ability requirements of the nursing student that are necessary to deliver safe and effective nursing care. The nursing student must demonstrate all of the technical standards with reasonable accommodation to meet the minimum level of required activity to care safely for patients. The Technical Standards listed below identify the skills and behaviors required to successfully complete the nursing program and safely prepare the student for the practice of nursing. The National Council of the State Boards of Nursing has delineated the following functional abilities that a nurse must possess to practice safely and effectively in the clinical setting.

General Observational Skills:

- Ability to see and distinguish colors, hear, touch, and smell
- Ability to utilize data obtained by the senses and further integrate, analyze and synthesize such data accurately
- Ability to perform health assessments and interventions; obtain diagnostic specimens; and obtain data from digital and analog representations to assess patient status
- Sufficient visual acuity to administer medications, detect alterations in patient status, and identify changes in skin color, and wound characteristics
- Sufficient auditory ability to detect sounds related to bodily functions or mechanical equipment alarms
- Sufficient tactile abilities to distinguish temperature alterations related to the patient condition or equipment malfunction, and the ability to assess edema and/or abnormal skin masses

Gross Motor/ Fine Motor Skills:

- Adequate motor function to execute movements required to provide safe general care and management of patients in all healthcare settings
- Fine motor skills sufficient to obtain assessment data by palpation, percussion, auscultation and other diagnostic maneuvers
- Physical endurance sufficient to complete an 8-12 hour assignment and manage a suitable patient assignment
- Mobility sufficient to carry out patient-care procedures, patient treatments, administration of medications, operation of medical equipment, emergency procedures and lifting (safe patient handling)
- Strength sufficient to carry out emergency activities (CPR), safe patient handling and fall intervention/prevention

Continues on next page
Communication:
• Ability to speak and write with accuracy, clarity and efficiency with patients, families and all members of the healthcare team
• Ability to elicit and record patient data regarding health history, current health status and response to patient care interventions
• Ability to sufficiently convey information to patients, families and members of the healthcare team, encompassing the ability to teach, direct and counsel
• Ability to utilize computerized technology to document, obtain the results of laboratory and diagnostic studies, and remain informed of the medical-care progression and maintenance

Intellectual, Conceptual, and Quantitative:
• Ability to learn, think critically, analyze, assess, problem-solve and reach reasoned judgements
• Ability to problem-solve utilizing measurement, calculation, reasoning, analyzing and synthesizing both objective and subjective data to make accurate decisions, in exigent circumstances, that reflect consistent and thoughtful consideration and sound clinical judgement for laboratory and diagnostic interpretation
• Ability to assess data, develop a plan of care, prioritize, and monitor treatment modalities
• Sufficient cognitive skills to calculate medications
• Sufficient conceptual ability to analyze and synthesize data to implement a plan of care
• Quantitative ability to assess data, prioritize need and anticipate outcomes
• Ability to comprehend spatial relationships to accurately administer parenteral medications or assess varying degrees of wound management

Social Attributes:
• Ability to demonstrate compassion, integrity, and motivation
• Ability to demonstrate responsibility, accountability, and good judgment.
• Ability to establish rapport with patients, families and all members of the healthcare team from a variety of social, emotional, cultural, and intellectual backgrounds
• Ability to adapt to changing and stressful environments, and to accept and integrate constructive criticism and function cooperatively and efficiently in the uncertainties inherent in clinical practice

All students admitted to the Community College of Rhode Island will be measured by consistent academic standards. Regardless of disability and reasonable accommodations, a student must be successful in all courses and master all essential competencies.

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program and are counseled to pursue alternate careers.

National Student Nurses’ Association (NSNA), Inc.
Code of Academic and Clinical Conduct

PREAMBLE
Students of nursing have a responsibility to society in learning the academic theory and clinical skills needed to
provide nursing care. The clinical setting presents unique challenges and responsibilities while caring for human
beings in a variety of health care environments.

The Code of Academic and Clinical Conduct is based on an understanding that to practice nursing as a student is
an agreement to uphold the trust with which society has placed in us. The statements of the code provide guidance
for the nursing student in the personal development of an ethical foundation and need not be limited strictly to the
academic or clinical environment but can assist in the holistic development of the person.

A CODE FOR NURSING STUDENTS:

1. Advocate for the rights of all clients.
3. Take appropriate action to ensure the safety of clients, self, and others.
4. Provide care for the client in a timely, compassionate and professional manner.
5. Communicate client care in a truthful, timely and accurate manner.
6. Actively promote the highest level of moral and ethical principles and accept responsibility for our actions.
7. Promote excellence in nursing by encouraging lifelong learning and professional development.
8. Treat others with respect and promote an environment that respects human rights, values, and choice of
cultural and spiritual beliefs.
9. Collaborate in every reasonable manner with the academic faculty and clinical staff to ensure the highest
quality of client care.
10. Use every opportunity to improve faculty and clinical staff understanding of the learning needs of nursing
students.
11. Encourage faculty, clinical staff, and peers to mentor nursing students.
12. Refrain from performing any technique or procedure for which the student has not been adequately trained.
13. Refrain from any deliberate action or omission of care in the academic or clinical setting that creates
unnecessary risk of injury to the client, self, or others.
14. Assist the staff nurse or preceptor in ensuring that there is full disclosure and that proper authorization is
obtained from clients regarding any form of treatment or research.
15. Abstain from the use of alcoholic beverages or any substances in the academic and clinical setting that
impair judgment.
16. Strive to achieve and maintain an optimal level of personal health.
17. Support access to treatment and rehabilitation for students who are experiencing impairments related to
substance abuse and mental or physical health issues.
18. Uphold school policies and regulations related to academic and clinical performance, reserving the right to
challenge and critique rules and regulations as per school grievance policy.

For expanded view on each of the above topics, visit the following website:
http://www.nsna.org/nsna-code-of-ethics.html

Adopted by the NSNA Board of Directors, October 27, 2009, in Phoenix AZ.

Approved: 5/16; Revised: 5/19
Reviewed 5/17
College-wide Student Handbook Policies

In addition to the policies contained in this Nursing Student Policy Manual, Nursing students, must comply with policies in the CCRI college-wide Student Handbook.

Health Insurance Portability and Accountability Act (HIPAA) Policy

1. Students will comply with HIPAA regulations that protect patient privacy and Protected Health Information (PHI).

2. Patient identifiers will not be disclosed, transmitted or maintained in any form or medium. This includes computers, cell phone, iPad or any other qualified equipment via Internet, electronic media, Twitter®, Facebook® or any social network. Patient identifiers include but are not limited to the following: name, birth date, social security number, medical records numbers, relatives’ and/or employer’s name, phone numbers, fax numbers, e-mail, health plan beneficiary, hospital account numbers, certificate or license numbers, fingerprints or voiceprints, websites and photographic images of any part of the patient.

3. Students must abide by facility/agency policy for electronic documentation at assigned clinical facility.

4. All email and faxes with care plans or assessment forms must include a confidentiality note. Confidentiality note will read:

   CONFIDENTIAL HEALTH INFORMATION ENCLOSED. Health information is personal and sensitive information related to a person’s healthcare. You, the recipient, are required to maintain this information in a safe, secure and confidential manner.

   Re-disclosure without appropriate authorization or as permitted or required by law is prohibited.

5. Students will not use social media to communicate PHI or experiences in the clinical setting.

6. Students will not discuss any patient-related experiences outside of the realm of clinical/educational values in any format and should refrain from comments regarding institutions utilized for clinical as well.

7. If there is any violation of this policy, the student/s responsible may be expelled from the Nursing Program.
Honor Code

Academic honesty is important to the college and to the nursing profession. The objective of the Honor Code is to promote an environment of intellectual honesty, professionalism, trust, and integrity in the Nursing Program. It is intended to guide the professional behavior of students studying in the Nursing Program and applies to all endeavors and conduct pertaining to those studies. Students share with faculty and staff the responsibility for promoting a climate of integrity.

By accepting admission into the Nursing Program, the student affirms the commitment to uphold the Honor Code values. Students will not lie, cheat, or steal in their academic endeavors, nor will the students accept the actions of those who do. Students will conduct themselves responsibly and honorably in all activities as CCRI nursing students.

Honor Code violations include, but are not limited to:

- **Lying:** Includes, but is not limited to, communicating untruths in order to gain an unfair academic or employment advantage.
- **Plagiarism:** Taking credit for someone else’s work or ideas regardless of the type; NOTE: Students found in violation will be subject to a zero (0) for assignment and/or further disciplinary actions.
- **Cheating:** the act of wrongfully using or attempting to use unauthorized materials, information, study aids, or the ideas or work of another in order to gain an unfair advantage; also includes:
  - allowing a substitute to take an exam or act as a substitute for another student
  - any attempt to circumvent testing procedures in order to benefit from another’s work (i.e. exchanging assigned numbers, computers and/or seats)
  - any attempt to procure test information, either verbal or written, including transportation of information related to test from testing environment
    NOTE: Cheating will result in a zero (0) for an exam/assignment and possible disciplinary action. Refer to the Exam Policy for further information.
- **Stealing:** the act of intentionally taking or appropriating the property of another, including academic work, without the consent or permission and with the intent to keep or use the property without the permission of the owner or the rightful possessor.

Reviewed: 4/11
CCRI Drugs and Alcohol Policy

Revised: 5/12, 5/19
Reviewed: 5/13, 7/14, 8/1, 5/17

CCRI No Harassment Policy
Sexual and other Unlawful Harassment

CCRI does not tolerate harassment of its students. This type of behavior may result in immediate suspension or expulsion from the college. Harassment includes, but is not limited to, slurs, jokes, and other verbal, graphic or physical conduct relating to race, color, sex, religion, national origin, citizenship, sexual orientation, age or handicap. If a student feels that he or she is being harassed in the above manner, the student should notify his or her instructor or the Associate Vice President for Student Services immediately. Students’ complaints will be kept as confidential as possible, and students will not be penalized in any way for reporting such conduct. Students should not assume that the college is aware of their problem. It is a student’s responsibility to bring his or her complaints and concerns to the college’s attention so that officials can help resolve them.

For more detail, see Student Handbook, pp. 39-49.

Revised: 5/19, 5/19
Reviewed: 5/12, 5/13, 7/14, 8/15, 5/17
Social Networking Policy

All policies related to HIPAA and patient confidentiality in the CCRI Nursing Department Student Policy Manual apply equally to social networking sites such as Facebook, Instagram, or Twitter, Whatsapp, Skype, Snapchat, or any other social network available.

Description of circumstances pertaining to patient care can make the patient identifiable even without violating HIPAA. Information that leads to identification of confidential patient information posted on a networking site is a serious breach of professional ethics. This breach of professional ethics is considered serious and will result in dismissal from the nursing program.

No photographs may be taken on patient units at any time. Students found in violation of this policy will be dismissed from the Nursing program.

Personal social networking sites are subject to scrutiny by prospective employers, law enforcement, and school administration. Students must be aware that statements made in personal social networking sites may meet criteria for prosecution for defamation of character, or libel, and may impact the student’s professional character.

Approved: 6/23/11, Revised: 7/14, 8/15, 5/17, 5/19
Reviewed: 5/12, 5/13

Student Communication Policy

1. Addressing Faculty: Students should address faculty by their title (Professor or Dr. or Mrs., etc.). All communication, both verbal and written, must be respectful and consistent with behaviors outlined in Professional/Academic/Clinical Conduct.

2. Chain of Contact: Communication begins with involved faculty. If further information is needed, or an issue is not resolved with the involved individual(s), the course Lead Teacher should be contacted. The next level of communication is the Department Chair. If further communications is required to resolve an issue, a student has a right to file a grievance. For information, see Student Handbook, pp. 20-22.  

3. Generating Communication: The preferred method of communication with faculty and administrative assistants is via email. Messages should contain the following information:
   a. Name and student ID number
   b. Course and section number indicated in the subject line
   c. Detailed information in the body of the email
   d. Proper salutation and closing/student signature

NOTE: Students should communicate via email with their CCRI email addresses only. Faculty and staff should not respond to messages sent from a personal email address.

Approved: 10/08; Revised: 11/8, 2/9, 7/14, 5/19
Reviewed: 3/10, 4/11, 5/12, 5/13, 8/15
Cancellation of Clinical Practice for Inclement Weather

College cancellations will be announced on local radio and TV stations, posted on the CCRI website and announced via (Rave) text alert and email notification. Students and faculty sign up for Rave alerts; instructions are located on the CCRI website, https://www.ccri.edu/emergency/rave.html.

Also, based on the honest assessment of weather conditions, individual clinical instructors have the option to cancel or delay clinical practice.

It is suggested that a telephone tree be developed between faculty and clinical groups to facilitate communication. If the clinical day is canceled, but the college remains open, faculty will be responsible to reschedule the clinical day.

Special Announcement Lines:
- Knight Campus: 825-2344
- Flanagan Campus: 333-7171
- Liston Campus: 455-6000
- Newport Campus: 851-1717

Revised: 10/98, 4/06, 5/12, 5/13, 7/14, 5/19
Reviewed: 11/00, 3/03, 4/08, 4/09, 3/10, 4/11, 5/16, 5/17

Student Participation in Outside Service Projects while in Uniform

Situations arise when nursing students are asked to participate in health fairs, screening programs and other public or private service projects. Since the school uniform identifies the student as enrolled in the Nursing Program at CCRI, approval from the Department Chairperson and Dean is necessary for students to participate in activities while wearing the school uniform. Any activity approved must be under the direct supervision of faculty.

Students are free to participate in activities as private citizens as long as they do not identify themselves as nursing students of CCRI’s Nursing Program through uniform, name tags, or other means.

Approved: 12/97
Reviewed: 11/00, 3/03, 4/06, 4/08, 4/09, 3/10, 4/11, 5/12, 5/13, 7/14, 8/15, 5/19
Guidelines for Nursing Student Uniform/Professional Appearance/Required Supplies

The uniform is one of the symbols of the nursing profession. The student’s appearance is a form of communication to patients, co-workers and the general public. The school uniform consists of green pants or green skirt, official green scrub top (may select Flex-Fit top), official lab coat, and identification badge. Clean, solid color, (brown, black or white) clinical type shoes and white stockings/socks or solid color socks are required. No cloth shoes, sling backs, clogs, or open toe/open back shoes are allowed. Students should not wear a sweater or lab coat while giving care. Each student must carry a watch (with the capability of counting seconds), scissors, black ink pen, stethoscope and penlight. Pagers, cellular phones, and all other personal electronic devices are prohibited from clinical areas unless permission is obtained from faculty.

Students will not wear nursing student uniforms or scrubs on any campus or satellite except for the purposes of simulation.

Students will:

1. Wear a clean, neat uniform over a clean body into patient care areas. Undergarments must not be visible.
2. Keep fingernails short, clean, and without polish, artificial nails, or gel/shellac nails.
3. Wear no jewelry or rings other than a wedding band. One pair of small stud earrings for pierced ears is allowed. No other objects are to be worn through pierced body parts. Heavy make-up will not be allowed and no false eyelashes will be worn.
4. Avoid extreme hair colors and style, and keep hair clean and off the collar in accordance with the policies of the clinical agency.
5. Refrain from smoking while in uniform. Students must comply with posted NO SMOKING facility regulations (CCRI grounds and clinical setting).
6. Refrain from wearing scented products.
7. Keep body art covered with clothing or bandaging material while in uniform or practicing in clinical settings, unless otherwise determined by clinical agency policy.
8. Have no headwear except when required for religious and/or cultural reasons.
9. Keep facial hair well groomed, neat, and trimmed; preferably beards trimmed to the jaw line and mustaches trimmed to lip line (except when required for religious and/or cultural reasons) for infection control and professional purposes.

When visiting a clinical site/community agency for clinical duty or to obtain an assignment when school uniform is not required, the following rules apply:

- All cleavage and midriff skin will be covered.
- Lab coat should be worn over business casual clothing when visiting a clinical site to obtain assignment.
- “Business casual” clothing should be professional, i.e., no jeans, shorts, sweats, spandex.
- Must wear official CCRI identification badge.

Revised: 3/00, 12/00, 5/03, 11/03, 3/04, 4/06, 4/07, 4/08, 4/09, 1/10, 3/10, 4/11, 5/12, 7/14, 8/16, 5/19
Professional/Academic/Clinical
Conduct Policy

1. Professional Behaviors - Students must:
   a. Assume accountability and responsibility for own actions and professional conduct.
   b. Accept constructive criticism in a professional manner.
   c. Prepare and complete all clinical/classroom assignments as directed by faculty.
   d. Report patient status changes promptly to Clinical Instructor/Faculty.
   e. Follow all policies and procedures as outlined in the CCRI Student Handbook
   f. Communicate with all faculty, staff (internal and external), and peers in a respectful and civil manner.
   g. Arrive to clinical placement on time. Absences will be handled in accordance with the Clinical Attendance policy.

2. General Information
   a. Academic and clinical conduct will be consistent with the National Student Nurse Association Code of Academic/Clinical Conduct.
   b. No talking, eating or drinking during class. This applies to nursing classes held in the large classroom, Nursing laboratory or other rooms.
   c. Under NO circumstances will children or pets be allowed in the classroom or Nursing laboratory.
   d. Only students enrolled in the Nursing Program may attend class.
   e. Any student with a documented disability may arrange reasonable accommodations through the Disability Student Services (DSS) Office at any campus. As part of this process, students are encouraged to contact the DSS Office as early in the semester as possible (www.ccri.edu/dss).
   f. Pages, cellular phones, and all personal electronic devices, with the exception of the school required iPad, are prohibited unless permission is obtained from faculty. No texting is allowed during clinical and class.

3. Audio Taping
   a. Students may not tape lectures without the consent of the lecturer.
   b. Students requiring academic accommodations are eligible to record class lectures only for the purpose of personal study.
   c. Lectures recorded for personal study may not be shared with other people without the consent of the lecturer.
   d. Recorded lectures may not be used in any way against the faculty member, other lecturers, or students whose classroom comments are taped as part of the class activity.
   e. Information contained in the recorded lecture is protected under federal copyright laws and may not be published or quoted without the express consent of the lecturer and without giving proper identity and credit to the lecturer.

4. Attendance
   a. Students should plan to arrive at least five minutes before class/clinical begins. This may necessitate making needed changes in your home/work schedule period. If unavoidably late to class, the student should enter quietly and take the first available seat.
   b. Students must be able to maintain alertness/safety and productivity in both the clinical and classroom settings. This may necessitate making changes in a student’s home/work schedule. It is strongly recommended students not work a shift prior to clinical hours and will be dismissed from clinical if found to be fatigued. Such dismissal will be considered an unexcused absence and may result in course failure.

   Continues on next page
5. Faculty Control
   a. The lecturer has the authority to reprimand and/or exclude from the classroom any student or students who are disruptive including those whose lateness might be disruptive.

Revised: 10/98, 5/00, 4/06, 4/08, 3/10, 7/14, 5/19
Health Requirements/CPR Certification/ Background Criminal Investigation (BCI) Check for Nursing Students Policy

In order to facilitate compliance with health records, CPR certification, and Background Criminal Investigation (BCI) checks, the Nursing Department has selected CastleBranch Screening Solutions to manage student records.

It is the student's responsibility to remain compliant in CastleBranch throughout the program. CastleBranch will send email alerts to students as requirements approach their due dates. It can take 2-4 business days (Monday through Friday) after a submission before a record will reflect any updates.

A student whose health/CPR/BCI requirements become non-compliant in CastleBranch will not be allowed to participate in clinical site activities. Personal records submitted to faculty will not satisfy compliance requirements. This student will be placed on clinical probation (learning contract) for failing to comply with CCRI policy and clinical agency requirements. Any student that misses two clinical days due to a single episode of a non-compliant health record within one course will be unable to complete course requirements. Subsequent episodes of non-compliance at any point in the program, will result in dismissal from the program.

In addition to submitting health records to CastleBranch, students must also submit a copy of their record to the CCRI School Health Services Office located in Room 1240 on the Knight Campus (Phone: 401-825-2103, Fax: 401-825-1077, Email: nurse@ccri.edu).

Insurance
Health insurance is the responsibility of each student and is required. For those students not covered by a family or individual plan, a variety of student health and dental discount programs are available. All students accepted into the Nursing Program must complete and return the Health Insurance Coverage Form (Appendix G – Declaration of Health Insurance Coverage).

Revised: 11/08, 7/14, 8/16, 5/17, 5/19
Reviewed: 3/10, 4/11, 5/12, 5/13, 8/15
Challenge Examination Policy

Challenge of non-nursing courses should be done through the appropriate department. Requests for information regarding challenge examinations should be directed to the respective Department Chair.

The only Nursing course eligible for challenge is NURS 1061: Pharmacology I. Successful challenge of this course requires a grade of 90% or higher on the Math Competency Test and a grade of 75% or higher on the course exam.

Students eligible to challenge NURS 1061 include:

- Licensed Practical Nurses (LPNs) seeking acceptance into the LPN-to-RN Option of the Associate Degree Nursing Program:
  - CCRI graduates from Summer 2017 or before
  - Non-CCRI graduates
  NOTE: Graduates of the CCRI Practical Nurse Program (NURP), Summer 2018 and after, will not need to challenge this course as NURS 1061P will satisfy the requirements of NURS 1061. If Degree Evaluation does not show credit for this course requirement, a Course Waiver Form will need to be submitted by the Department Chair.
- Students accepted into the CCRI Associate Degree Nurse program seeking to transfer credits from an accredited nursing school

**Challenge Examination Procedure**

1. **Student must:**
   a. Possess an active LPN license and have completed at least 1,000 hours of work as an LPN in a clinical practice environment within the past five (5) years
   b. Contact the Level I Nursing Department Chairperson for eligibility assessment
   c. Schedule exam date with Nursing Department Administrative Assistant
   d. Obtain Credit Award Form from Nursing Department Administrative Assistant
   e. Bring completed Credit Award Form with payment to the Bursar’s Office
   f. On exam date, present Credit Award Form, stamped by Bursar as “paid,” to the faculty proctor
   NOTE: Exam will not be administered without a stamped Credit Award Form.

2. **Nursing Department Administrative Assistant, after eligibility is determined, will:**
   a. Schedule date, time, location, and proctor for examination
   b. Provide review materials to student
   c. Format and print Math Competency Test, Course Exam and keys
   d. File completed tests in student file
   e. After tests are graded, bring Credit Award Form (with grade entered by proctor) to the Office of Enrollment Services for documentation on student transcript

3. **Faculty proctor will:**
   a. Grade the exam (pass or fail)
   b. Indicate the grade on the Credit Award Form and initial the form
   c. Submit (initialed and graded) Credit Award Form to Nursing Department Administrative Assistant

Exam Policy

Unit exams and quizzes may be administered via iPad in the regular classroom/lab or in Room 4080, Knight Campus. Testing location is determined by the Lead Teacher.

1. All students, regardless of testing accommodations or testing location, must arrive at least **15 minutes** prior to the exam start time. Students are required to download exams from ExamSoft onto their iPad prior to arriving for the exam. Students are responsible for remembering usernames and passwords. Once testing is in progress, admittance into the exam room will be denied and the student is disqualified from taking the exam or quiz at that time. (See Make-up Exam Policy.)

2. Students will assemble at the door for their campus with their CCRI student ID or other valid picture ID accessible. The proctor will sign in students and may assign seating at this time.

3. All personal items including books, bags, jackets, hats, scarves, watches, ID badges, electronic devices (other than school-required iPad) shall be placed at the front of the room before taking a seat. Electronic devices, other than school-required iPad, should be TURNED OFF. No coats are allowed on back of student chairs. Unless medically necessary, no food or drink is allowed in the electronic classroom. No items are allowed on desk/table top, except faculty-issued scrap paper, a simple calculator and pencil (no pens are allowed). Except when required for religious or cultural reasons, no headwear is allowed.

4. Once signed into the room, students are NOT ALLOWED TO LEAVE until the exam is in progress. Once the exam begins, a student may request a restroom break and will be accompanied by a faculty member. Only one (1) student will be allowed out of the room at any time. Any evidence that material was removed from testing room and/or placed previously in restroom will result in a zero for the exam and may result in further disciplinary action.

5. Once seated, student should power up the iPad, plug in earplugs and log in to exam portal. Exam password, if needed, will be documented on classroom whiteboard.

6. Any information found on or in the vicinity of individual testing stations will be grounds for a zero (0) exam result and possible further disciplinary action. This includes writing on desks, body, unauthorized papers, cups and/or food.

7. Scrap paper (with a CCRI logo) will be provided to all students. All scrap paper must be signed by the student and submitted to proctor before exiting the exam room. Students who fail to hand in scrap paper will earn a zero (0) for an exam grade.

8. Observation of verbal and/or non-verbal communication between students during testing session will result in termination of the test and a grade of zero (0) will for the exam.

9. Any student needing to communicate with a faculty proctor during the examination should remain seated and raise his/her hand. Communication with proctors must be respectful at all times. Refusal to follow the exam proctor directions may result in a zero (0) for the exam.

10. iPads or computers must be placed squarely in front of the student, not angled to the side. Dividers may be used to separate workstations.

*Continues on next page*
11. Upon completion of the exam, students should remain quietly seated and should not utilize their iPad or other electronic device until the exam period is ended.

12. Faculty proctor/s will be circulating in the testing room for the duration of the exam. All students must submit the exam upon completion or when directed to do so by the proctor. Failure to submit an exam or quiz when instructed to do so by proctor will result in a zero (0). Students who submit an exam or quiz before all questions are answered will receive a grade based on the questions that were answered.

NOTE: In the event of technical difficulty with the iPad or ExamSoft, a student may be required to take a paper examination. Upon completion of the exam, the student must submit exam, answer sheet (if applicable), and scrap paper to proctor. Exam will be graded by proctor or Lead Teacher at a time determined by Lead Teacher.

Approved: 9/08; Revised: 11/08, 11/10, 9/10, 11/10, 4/11, 5/12, 5/13, 7/14, 3/18, 5/19
Reviewed: 8/15; 5/17

Math Testing Policy

In order to ensure safe entry into the practice setting all students must demonstrate a proficient understanding of basic principles of math and dosage calculations. Students will be subject to periodic testing and evaluation as outlined below.

Material for each Math Competency Test is leveled appropriately to the outcomes for each course in which math competency is tested: NURS 1061, NURS 1061P, NURS 1062, NURS 1062P, NURS 1063, NURS 2060.

Students will have two attempts to achieve at least 85% for math competency in the following ADN and PN Semester 1 and Semester 2 courses: NURS 1061, NURS 1061P, NURS 1062, NURS 1062P. Students will have two attempts to achieve at least 90% for math competency in the following ADN Semester 3 & Semester 4 courses: NURS 1063, NURS 2060. An unsuccessful first attempt at math competency will result in:

- Clinical probation (with a Learning Contract established by the clinical instructor) for the associated clinical nursing course (NURS 1010, NURP 1010, NURS 1020, NURP 1020, NURS 2040, NURS 2050, NURS 2060)
- The need for remediation initiated by the student*
- The need to take Math Competency Test #2, scheduled by the Lead Teacher (in the ADN program) or Program Director (in the PN program).

*Both ADN and PN students may remediate independently, with a student’s clinical instructor, or with Lead Teachers during open lab hours. Both ADN and PN students may attend open lab hours.

- If a second Math Competency test is required
  
  - For ADN Students: Only students who are unsuccessful on the first attempt will be required to take a not-for-credit Math Competency Test #2. The grade on Math Competency Test #1 will be counted toward the final grade as indicated on the corresponding course Syllabus A.
  
  - For PN Students: Only students who are unsuccessful on the first attempt will be required
to take Math Competency Test #2; their grade on this second test will be counted toward the final grade as indicated on the corresponding course Syllabus A.

- **For Students in ADN and PN Programs:** An unsuccessful attempt on Math Competency Test #2 will require the student to withdraw from the student’s Nursing Program. This withdrawal will be considered one (1) course attempt. The student will need to petition the Scholastic Standing Committee (SSC) for reinstatement into the Nursing Program. For more information, refer to Reinstatement Policy.

**No Show Policy Statements**

- Students that miss Math Test 1 due to an unexcused absence (late arrival, emergent/unforeseen circumstance occurred but did not call in advance to report it) will forfeit the opportunity to take two tests. Math Test 2 will be "for credit."
- Students that miss Math Test 1 or Math Test 2 due to an excused absence (military duty, called in advance to report an emergent/unforeseen circumstance) will take a make-up test.

**Policy Statement Regarding Math Competency Testing for Students Repeating a Nursing Course**

- Students repeating a clinical nursing course that successfully passed the associated pharmacology course (NURS 1061, 1062, 1063) do not need to retake the math competency test associated with the clinical nursing course to be repeated.

Revised: 3/11; 5/13; 7/14, 8/15; 8/16; 11/16; 5/17, 3/18, 5/18, 8/18, 5/19
Reviewed: 5/12; 8/16

**Make-up Examination Policy**

Students are required to attend all examinations as scheduled.

When this is not possible due to a serious illness or emergency, the student must notify Lead Teacher, via e-mail, within one (1) hour of the scheduled examination time explaining the reason for absence from the examination and should leave a phone number where they can be reached. Students in compliance with this policy will be given a make-up examination. Make-up examinations may include alternate format items, e.g. essay, completion, fill-in-the-blank. Students who do not comply with the above procedure may receive a zero (0) for the exam.

The Lead Teacher will determine the date, time, and location for a make-up exam and will notify the student, accordingly.

Remediation Policy

It is the goal of the Community College of Rhode Island Nursing Department that all students succeed. Remediation is an essential goal to success and students who perform below expected benchmarks must seek remediation. A remediation plan is required for:

- a grade < 77% on a unit examination
- a score <850 on a HESI test
- marginal performance in the clinical setting.

Students are expected to establish a remediation plan within seven (7) days of an exam, and develop a documented plan that addresses areas of weakness. Failure to complete remediation plan/assignments may result in course failure.

It is the responsibility of the student to seek this assistance and meet the goals of the remediation plan. The remediation plan will be filed in the student’s folder.

Approved: 7/14, 8/16, 5/19
Reviewed: 8/15, 5/17

Health Education Systems Incorporated (HESI) Testing Policy

Health Education System Incorporated testing (HESI) is used in conjunction with other evaluation methods in nursing courses throughout the curriculum as stated on course Syllabi A.

- All students are required to have and access HESI testing products for the duration of their time in the Nursing Program.

- The NURS and NURP courses that require HESI testing include: NURS 1010, NURS 1023, NURS 2050, NURS 2060, NURS 2500, NURP 1010, NURP 1020, NURP 1030.

- For NURS and NURP courses requiring a HESI exam, two (2) MANDATORY proctored HESI exams, Version 1 and Version 2, will be delivered during the semester. All students must take both scheduled proctored HESI exams. Refer to Make-up Examination Policy for cases of absence.

- The first proctored HESI exam will be given approximately 4-5 weeks before the end of the semester. Upon completion of the first proctored exam, a detailed, individualized exam analysis will be available to each student. It is expected that students review their exam analysis and complete the recommended remediation activities prior to taking the second proctored exam. The second proctored HESI exam will be given at the end of the semester.

- HESI Exam scores will be converted by dividing the raw score by 10, not to exceed 100 points. HESI Exam scores, both Version 1 and Version 2, will be weighted according to evaluation methodologies listed in the corresponding course Syllabus A. Minimum HESI scores, required to pass certain Nursing courses, are posted in the corresponding course Syllabus A.

Revised: 8/16, 5/17, 5/19
Grading Policy

The grading system in the Department of Nursing is different than and takes precedence over the grading system for other college courses. Letter grades are assigned according to the following grading scheme for all NURS and NURP courses.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numerical Grade</th>
<th>Points toward GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94 – 100</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>91 – 93</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>88 – 90</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>84 – 87</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>81 – 83</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>78 – 80</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>75 – 77</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>70 – 74</td>
<td>1.0</td>
</tr>
<tr>
<td>F*</td>
<td>≤ 70</td>
<td>0.0</td>
</tr>
</tbody>
</table>

*F: Failure: this grade is also used when a student fails the clinical component of any nursing course.

NOTE: C is the required letter grade to pass a nursing course. The cut-off for a C is 74.5. Any grade below 74.5, i.e. 74.49 and below is considered a failing grade.

Nursing Program Guidelines for
Student Honors Projects

1. To be eligible for the Honors Program, a student must have completed at least twelve (12) semester hours and earned at least a 3.25 grade point average. Students who do not meet these eligibility requirements can apply for an Honors Project, if recommended by faculty. The Honors Application Form must be completed with a faculty advisor that will oversee the project. The application, signed by the student, faculty, and Nursing Department Chair, must be submitted to one of the Honors Program Coordinators by the due date stated on the Honors Program website. The application form and further information is available at www.ccri.edu/honors/.

2. Proposals should be “active” in nature, i.e. a research paper alone is not acceptable. Honors projects must complement the subject matter of the nursing course. Time spent by the student on this project should be equivalent to at least twenty (20) hours. The project must be initiated early in the semester. Faculty may withhold approval if the project is proposed later than Week Three of the semester.

3. The student and faculty will collaborate on a plan to monitor the student’s progress with the project. This monitoring necessitates a meeting two (2) or three (3) times during the semester during which the student will present a written report of progress.

4. The student will submit a final/complete project prior to the end of the semester. Faculty will evaluate and enter project grade, which appears as a separate honors course, into Banner. The student will receive 0.5 additional credits for successful honors project/honors course completion. If a student completes four (4) honors projects, they become Honors Program Graduates and are recognized at Awards Night and at Graduation.

Associate Degree Nursing
Academic Progression

1. Associate Degree Nursing Program courses are set per semester and must be taken concurrently (unless a course is being repeated) as indicated below. Students must earn a minimum grade of “75/C” in all NURS courses. All courses within one semester must be satisfactorily completed before progressing to the next semester courses.
   a. Semester I Courses: NURS 1010, NURS 1015, NURS 1061
   b. Semester II Courses: NURS 1020, NURS 1023, NURS 1062
   c. Semester III Courses: NURS 2040, NURS 2050, NURS 1063
   d. Semester IV Courses: NURS 2060, NURS 2500

2. Students must pass both the theoretical (earn a minimum grade of 75/C) and clinical (earn “satisfactory” for all clinical outcomes) components of each clinical nursing course. The faculty may dismiss, at any time, a student who gives evidence of being unable to meet program requirements. Reasons for dismissal may include, but are not limited to: clinical absences, academic deficiency standing, and unsafe nursing practice.

3. Students who wish to be promoted to next semester courses must:
   a. Demonstrate satisfactory clinical performance of prior semester clinical NURS courses
   b. Earn a minimum grade of 75/C in all prior NURS courses
   c. Earn a minimum of B- in BIOL 1020, BIOL 2202, or equivalent course
   d. Earn a minimum of C in PSYC 2030

4. A minimum cumulative grade point average (GPA) of 2.5 is required for graduation and for the awarding of an Associate of Science degree at the completion of the Nursing Program.

5. Students in the Associate Degree Nursing program may repeat only one (1) clinical nursing course and one (1) non-clinical nursing course, unless all courses are withdrawn or failed within the same semester, such as NURS 1015 and NURS 1061 or NURS 1020 & NURS 1023. This exception does not apply to NURS 2040 and NURS 2050 taken in the same semester – each will be considered a separate attempt. All attempts are counted, i.e. when a student withdraws, at any point in the semester before course completion, it will be considered one attempt.

6. Students who fail a nursing course will be dismissed from the Nursing Program and must petition (write a letter to the) Scholastic Standing Committee (SSC) for reinstatement. See Scholastic Standing Guidelines for Reinstatement.

Practical Nursing
Academic Progression

1. Practical Nursing Program courses are set per semester and must be taken concurrently (unless a course is being repeated) as indicated below. Students must earn a minimum grade of “75/C” in all NURP and NURS courses. All courses within one semester must be satisfactorily completed before progressing to the next semester courses.

   a. Semester I Courses: NURP 1010P, NURS 1015P, NURS 1061P
   b. Semester II Courses: NURP 1020, NURS 1062P
   c. Semester III Courses: NURP 1030, NURP 2500

2. Students must pass both the theoretical (earn a minimum grade of 75/C) and clinical (earn “satisfactory” for all clinical outcomes) components of each clinical nursing course. The faculty may dismiss, at any time, a student who gives evidence of being unable to meet program requirements. Reasons for dismissal may include, but are not limited to: clinical absences, academic deficiency standing, and unsafe nursing practice.

3. Students who wish to be promoted to next semester courses must:

   a. Demonstrate satisfactory clinical performance of prior semester clinical NURP courses
   b. Earn a minimum grade of 75/C in all NURP courses
   c. Earn a minimum of C in BIOL 1070 or equivalent/higher course
   d. Earn a minimum of C in PSYC 2010

4. A minimum cumulative grade point average GPA of 2.0 is required for graduation and for the awarding of a Diploma in Practical Nursing at the completion of the Practical Nurse program.

5. Students in the Practical Nursing Program may repeat only one (1) clinical nursing course and one (1) non-clinical nursing course, unless all courses are withdrawn or failed within the same semester. All attempts are counted, i.e. when a student withdraws, at any point in the semester before course completion, it will be considered one attempt.

7. Students who fail a nursing course will be dismissed from the Nursing Program and must petition (write a letter to the) Scholastic Standing Committee (SSC) for reinstatement. See Scholastic Standing Guidelines for Reinstatement.

Approved: 5/17; Revised 5/19
Clinical Attendance Policy

1. To maintain the quality and standards of the Nursing Program, faculty believe that a student must attend all clinical practice sessions to develop the skills and knowledge necessary to meet course objectives and requirements for graduation. When attendance is not possible because of serious illness or an emergency in the immediate family, the student must notify their instructor, via email or phone contact, prior to the beginning of the clinical session. Absences will be deemed “excused” or “unexcused” using the criteria listed below.

Excused Absences may include:
- Medical conditions or American Disabilities Act (ADA) protected disabilities, provided the student has submitted all necessary documentation (as listed in item #3 below)
- Court appearances
- Death/funeral of an immediate family member. Immediate family shall be defined as father, mother, brother, sister, spouse, domestic partner, civil union partner, step-children, step-parents, mother-in-law, father-in-law, brother-in-law, sister-in-law, son-in-law, daughter-in-law, grandmother, grandfather, grandchildren, and any person living in the student’s household.
- Verified accidents
- Military assignments

Additional circumstances not listed above will be reviewed per the discretion of the faculty and/or the Department Chair. The Nursing Department may require written documentation to substantiate excused absences, failure to submit requested documentation will result in an “unexcused” absence.

Unexcused absences include:
- Vacation
- “No Call – No Show”
- Dismissal from the clinical site for failure to comply with professional nursing practice (see #6 below)
- Routine appointments (non-emergent medical/dental/etc.)
- Non-compliance with required clinical documentation (see #4 below)
- Outside Employment that interferes with clinical time
- Undocumented “excused” absence

More than one (1) unexcused absence may result in failure of the course

2. Faculty will record all clinical absences on the evaluation form. All clinical absences must be made up or remediated, either through attendance at additional clinical/laboratory sessions or through make-up assignments, per discretion of clinical faculty. Undocumented, unexcused, non-remediated clinical days may result in course failure. (Refer to Dismissal Policy). Students requiring more than 2 remediated clinical days in a given semester may be required to repeat the course, as all clinical learning objectives may not be achievable if the student cannot remediate in the clinical setting. Students at risk for course failure must meet with their clinical faculty for development of a remediation plan.

Continues on next page
3. Students with any medical conditions where activity is restricted are required to inform their clinical instructor prior to the start of each semester. Permanent disabilities should be documented with the Disability Services for Students (DSS) office, per CCRI policy. In rare cases, a student’s documented disability may, upon verification, support the need for excused absences; however (as stated above) all clinical absences must be made up or remediated. Temporary conditions such as an infectious disease, sprained ankle, broken bone, or medical conditions related to pregnancy can be challenging, painful and/or debilitating. However, Federal disability law such as the Americans with Disabilities Act of 1990, amended in 2008, does not recognize these and other short-term medical conditions as eligible for ADA protection or disability-related accommodations. Despite this, the CCRI Nursing Department may, in good faith, as resources and participating clinical agencies allow, be able to make accommodations for students with non-ADA-qualifying limitations provided appropriate medical documentation is submitted to the DSS office and Department of Nursing. No student can be accepted into the clinical area with a cane, brace, crutches, or cast. Any student with a permanent brace must obtain clinical clearance from the DSS office. Students who have an injury, condition or surgery occur during the semester which may temporarily restrict activity, potentially impacting student and/or patient safety, are required to submit proper documentation to the DSS office and Nursing Department. Any student with a temporary physical condition which will prevent them from fulfilling the responsibilities of direct patient care, and who is unable to make up excused absences prior to the end of the semester, may not be allowed to complete the course. These responsibilities include but are not limited to lifting, ambulating, transporting, moving, and administering care to patients.

4. No student will be allowed in the clinical area without documentation of required immunizations, completion of AHA BLS for Health Care Providers training, and a Criminal Background Information Check. Missed clinical days that are the result of missing clinical documentation (health records, BCI, CPR) will be considered unexcused absences that may result in course failure. (See Health/CPR Certification/BCI Check for Nursing Students Policy.)

5. No student will be excused for routine appointments during clinical time.

6. The clinical instructor has the right to refuse to accept a student in the clinical area who does not comply with professional nursing practice guidelines. This may include risks to patient/staff/student safety, arriving more than 15 minutes late to clinical or lab, or non-adherence to any student policy in the Student Policy Manual.

7. Outside employment must be planned so that it does not interfere with clinical laboratory attendance or with meeting the objectives of the Nursing Program.
Clinical Evaluation of Students Policy

The student is provided with a factual evaluation of clinical performance based upon established clinical outcomes for each clinical nursing course. Specific incidences should be cited to support evaluations. A Learning Contract will be initiated when the student exhibits unsafe practices, unprofessional behaviors and/or fails to meet clinical outcomes. This evaluation is designed to identify clinical weaknesses/problem behaviors to the student that must be corrected in order for the student to earn a “satisfactory” grade in the course. (Refer to Probationary Status Policy). The clinical instructor will review the Learning Contract with the student. The student should sign the form upon review. Failure of the student to make the necessary improvement will result in an “Unsatisfactory” grade on the evaluation. Students must achieve a “satisfactory” performance for each clinical outcome and may not progress if any outcome is cited as “needs improvement.” Clinical evaluations must be completed, at least twice (during the midterm week and the final week) for a 15-week course and at least once (during the final week) for a 7.5-week course. Students on probation (i.e. on learning contracts) should have weekly meetings with clinical instructor.

The purposes of evaluation are to:

1. Inform the student about clinical performance/progress
2. Cite areas of strength
3. Identify weaknesses and a plan for correction
4. Determine a grade of satisfactory or unsatisfactory on each clinical outcome

The clinical evaluation is reviewed with the student and should be signed by the student to indicate that it has been read and reviewed. A student signature does not necessarily indicate agreement with the evaluation.

Students are required to complete a self-evaluation on the “Student Clinical Self-Evaluation” form and provide a copy to their clinical instructor.

Both the Faculty Evaluation of Student and Student Self-Evaluation will be placed in the student’s file. Faculty should maintain their own anecdotal records for a period of at least two years.

Disagreement between faculty and student regarding the evaluation necessitates a meeting with the Department Chairperson. The student may initiate further action according to the Student Grievance Procedure as outlined on p. 20 of the CCRI Student Handbook.

Criteria for Unsafe Clinical Practice

Unsafe clinical practice is any act, practice or omission during clinical practice that fails to conform to the accepted standards of the nursing profession and which may directly or indirectly cause physiological and/or emotional harm to others.

Unsafe clinical performance may include, but is not limited to, the following behaviors:

1. Fails to prepare for clinical assignments by not obtaining sufficient data as to patient’s diagnosis, needs, and planning nursing care.

2. Fails to accurately assess, determine significance of, and/or promptly report changes in patient’s physical and/or emotional status to appropriate resource people.

3. Fails to provide nursing care, which may be required to stabilize a patient’s condition or prevent complications, congruous with knowledge base derived from previous and current learning.

4. Fails to provide clear, accurate, and complete written documentation regarding a patient’s condition, treatment, and nursing care according to the agency policy.

5. Fails to administer medications and/or treatment in a safe, responsible manner.

6. Fails to demonstrate the application of previously learned skills and principles in providing nursing care.

7. Practices beyond educational level, experience, or responsibilities within the role of the student nurse.

8. Demonstrates impaired judgment, inappropriate behavior, or fatigue.

9. Fails to understand and accept constructive feedback related to clinical performance.

Unsafe clinical practice results in failure of the nursing course. Students who fail clinical for unsafe clinical practice before the end of the semester cannot continue to attend clinical sessions.

Approved: 12/97; Revised: 5/00, 11/00, 04/06, 7/14
Reviewed: 3/03, 4/08, 4/09, 3/10, 4/11, 5/12, 5/13, 8/15, 5/19
Graduation Requirements

Students should perform a Degree Evaluation: [https://www.ccri.edu/oes/runadegreeevaluation.html](https://www.ccri.edu/oes/runadegreeevaluation.html) PRIOR to graduation to track personal achievement of graduation requirements.

**Associate Degree Nurse Program:**

- Cumulative GPA of 2.5
- Minimum grade of 75/C in all NURS courses
- Passing grade in both the theoretical and clinical components of each clinical nursing course
- Minimum grade of B- in BIOL 1020, BIOL 2202 or equivalent course
- Minimum grade of C in PSYC 2030
- Successful completion of BIOL 2210

Revised: 4/06, 3/10, 5/12, 7/14, 8/16, 5/19
Reviewed: 5/03, 4/07, 4/08, 4/09, 4/11, 5/13, 8/15, 5/17

**Practical Nurse Program:**

- Cumulative GPA of 2.0
- Minimum grade of 75/C in all NURP courses
- Passing grade in both the theoretical and clinical components of each nursing course
- Minimum grade of C in BIOL 1070 or equivalent/higher course
- Minimum grade of C in PSYC 2010

Approved: 5/17; Revised 5/19
Probationary Status Policy

When a student gives evidence of not meeting clinical objectives, the student will be placed on probationary status. Faculty will present written documentation of the student’s inability to meet course objectives by completing a Learning Contract which will provide specific reasons for probationary status, specific goals for behavioral changes, and activities to meet these goals.

Upon meeting the contractual obligations, full status in the program will be restored to the student, unless the probationary status is due to non-compliant health records/BCI status/CPR certification. Once a Learning Contract is established for non-compliant health records/BCI status/CPR certification, it will remain in effect for the duration of the course. See Learning Contract for Health Record/BCI Status/CPR Certification Non-compliance. A subsequent episode of health record/BCI status/CPR certification non-compliance will result in dismissal from the program. If the student does not fulfill the contractual obligations, unsatisfactory clinical performance will result in clinical failure.

Learning contracts/documentation of probationary status will be placed in the student’s file.

Faculty may require a student to meet with the appropriate Department Chairperson.

LPN-to-RN (L2R) Option

Licensed Practical Nurses (LPNs) who desire to enter the Associate Degree Nursing Program must apply for the LPN-to-RN (L2R) Option through a performance-based application process. Admission guidelines are listed at: https://www.ccri.edu/dean-hrs/admissions/lpntornadmissions2019.html
The L2R Option Program of Study is posted at: https://www.ccri.edu/nursing/pdfs/LPN-to-RN%20Option%20Pgm_of_Study.pdf.

Withdrawal Summary Policy

Upon a student’s withdrawal from the Nursing Program, the clinical instructor should prepare a Student Withdrawal Form (See Appendix D–Withdrawal Form). The form will include the reason for withdrawal and a faculty recommendation for reinstatement. The form will be kept in the student’s file.

Leave of Absence (LOA) Policy

The student requesting a Leave of Absence (LOA) has the ultimate responsibility to guard his/her position in the program by initiating an exit interview with the Department Chairperson and submitting a written statement with reasons for LOA request and plans for reinstatement.

Reasons for requesting a Leave of Absence (LOA) require documentation and may include:

1. Illness
2. Extenuating circumstances
3. Necessity to provide care to an ill family member
4. Military Service

The student must have a passing grade in both clinical and theoretical components of a nursing course in order to be granted a leave of absence.

The student will be granted a maximum leave of one (1) calendar year unless otherwise negotiated with the Department Chairperson. When ready to return from LOA, student must initiate request for reinstatement to Department Chair. Reinstatement is accomplished on a space-available basis.

Reviewed: 11/00, 3/03, 4/06, 4/08, 4/09, 3/10, 4/11, 5/12, 5/13, 7/14, 8/15, 5/19
Dismissal Policy

Once matriculated into the Nursing Program, students are required to complete the nursing courses in the planned sequence. For NURS course progression, see Appendix A. For NURP course progression, see Appendix B. For L2R Option course progression, see:

Non-nursing courses must be completed prior to or within the semester as indicated in the appropriate course progression chart. Students unable to complete all course requirements within a given semester, will be dismissed from the Nursing Program, but may be eligible to apply for reinstatement (see Reinstatement Policy).

Students must pass the theoretical (including the Math Competency Test) and clinical component for each clinical nursing course. Faculty reserve the right to dismiss, from the Nursing Program, any student who gives evidence of being unable to carry out the responsibilities of the program.

Reasons for dismissal may include, but are not limited to:

1. Absences from the clinical practice area that prevent the student from achieving the clinical outcomes
2. Impairment of physical and/or psychological status that affects the ability to provide safe nursing care
3. Inability to carry out safe nursing care (see Criteria for Unsafe Clinical Practice).
4. Non-compliance with Learning Contract requirements for probationary status (see Probationary Status Policy)
5. Inability to meet course and clinical objectives
6. Refusal to complete/submit required assignments as directed

Approved: 10/98; Revised: 3/00, 11/00, 4/08, 8/16, 5/19
Reviewed: 3/03, 4/06, 4/09, 3/10, 4/11, 5/12, 5/13, 7/14, 8/15, 5/17
Reinstatement Policy

A student must pass each nursing course in order to progress to the next required course, with the exception of NURS 2040 and NURS 2050, both of which can be taken in either Session 1 or Session 2 of Semester 3 (see Appendix A). A passing status requires:

- A minimum grade of 75/C for all clinical and non-clinical nursing courses
- “Satisfactory” performance for all clinical outcomes in all clinical nursing courses
- Passing math competency grade in associated courses (per Math Testing Policy)

In the event that a student fails the math or clinical component of a course prior to the end of the course, the student will be required to withdraw. If, at the end of a clinical course, the student is unable to satisfactorily achieve all clinical outcomes, a final course grade of “F” will apply, whether or not the student has a passing average in the theoretical course component. Course withdrawal and course failure result in dismissal from the Nursing Program and both require reinstatement.

Reinstatement Process:

1. When a student withdraws from or fails a nursing course and desires reinstatement, the student must submit a letter requesting reinstatement to the Scholastic Standing Committee (SSC). The SSC will review the student’s record (transcript, evaluations, etc) and reinstatement letter.

2. After review of a student’s record (transcript, evaluations, etc) and reinstatement letter, the SSC will make one of the following recommendations:
   - Reinstatement on a space-available basis
   - Reinstatement following completion of remedial course work (may include nursing courses, HEAL courses, science or math courses, etc.)
   - Denial of reinstatement with recommendation for alternatives such as application to the Practical Nursing program
   - Denial of reinstatement with no further consideration for readmission

3. A student cannot bypass the SSC and go directly to a grievance hearing. A student who wishes to appeal a SSC decision must follow the grievance procedure as outlined in the CCRI Student Handbook http://www.ccri.edu/advising/new_students/student_handbook/Student%20Handbook%202018-19.pdf. This procedure includes contacting the Dean of Health and Rehabilitative Sciences (HARS) prior to requesting a hearing before the Student Grievance Board. Both parties, student and involved faculty, must be present for the Student Grievance Board to convene. Recommendations by the Student Grievance Board will take into consideration the existing nursing curriculum and Nursing Department policies.

4. A student is eligible to repeat only one non-clinical nursing course with the exception of dropping/failing multiple non-clinical nursing courses within the same semester, e.g. NURS 1015 and NURS 1061 during Semester 1. If only one Nursing non-clinical course is dropped/failed during Semester 1, that single class will be considered one attempt.

5. A student is eligible to repeat only one nursing clinical course, with the exception of dropping/failing multiple nursing clinical courses within the same semester, e.g. NURS 1020 and NURS 1023 during Semester 2 or NURS 2040 and NURS 2050 during Semester 3. If only one Nursing clinical course is dropped/failed during Semesters 2, 3, or 4, that single class will be considered one attempt.

Continues on next page
6. Exceptions to the number of times a student can repeat a nursing course, clinical or non-clinical, will be made at the discretion of the SSC.

7. Students eligible for reinstatement into the Nursing Program must have all health records complete, up-to-date, and recorded in CastleBranch.

8. See the following related policy for more information: **SSC Guidelines for Reinstatement of Students.**

Approved: 2/02; Revised: 1/03, 10/03, 12/05, 4/06, 11/07, 4/08, 3/10, 7/14, 8/16, 5/17, 5/19
Reviewed: 4/09, 4/11, 5/12, 5/13, 8/15
Scholastic Standing Committee (SSC) Guidelines
For Reinstatement of Students

The Scholastic Standing Committee (SSC) is a committee comprised of nursing faculty that reviews the records and reinstatement requests of nursing students who have withdrawn or failed a nursing course. This committee determines a student’s eligibility for reinstatement and, if eligible, makes recommendations for successful completion of the nursing program.

Students seeking reinstatement into the Nursing program must submit a letter of appeal to the SSC via email to nursssc@ccri.edu. The purpose of the letter is to provide the student with an opportunity to reflect on the situation that led to the withdrawal/failure. The letter should include the reasons for withdrawal/failure, as well as, what changes will be made to promote success in a subsequent course attempt. Students will be notified, via email or Blackboard course announcement, of SSC meeting dates and reinstatement request deadlines. Reinstatement is not automatic and must be approved/recommended by the SSC.

1. During the SSC meeting, the committee will review any or all of the following documents:
   a. Student appeal for reinstatement
   b. Withdrawal Summary (completed by clinical instructor/s)
   c. Clinical evaluations
   d. Transcripts
   e. Other pertinent data

2. Students who leave their Nursing Program in poor academic standing or as a result of theoretical or clinical failure may be required to provide evidence of change and/or personal growth, that would promote successful completion of the Nursing Program.

3. Possible SSC decisions/recommendations include:
   a. Direct readmission
   b. Additional coursework required prior to reinstatement
   c. Repeat of previous coursework prior to reinstatement
   b. Denial of reinstatement

5. SSC decision/recommendation letters will be sent to students approximately (1) week after the SSC meeting.

6. Upon receipt of a letter recommending direct readmission, student should contact appropriate Department Chair for reinstatement options.

7. Upon receipt of a letter recommending additional or repeat of previous coursework, student should contact appropriate Department Chair after conditions for reinstatement have been met.

8. Reinstatement is accomplished on a space-available basis.

Bloodborne Pathogen Exposure Policy

INTRODUCTION

The Community College of Rhode Island recognizes the importance of preventing student exposure to Bloodborne Pathogens. Bloodborne Pathogen Exposure Control Plans for minimizing the potential for such exposure to the student are available through training and engineering controls. Students should take the recommended vaccination series. If, and when, a Bloodborne Pathogen exposure incident does occur, CCRI recognizes its responsibility to affected persons and the necessity for prompt action to minimize the potential for disease transmission.

This policy prepares CCRI to respond to every Bloodborne Pathogen exposure incident in a timely and appropriate manner. The policy coordinates the procedures followed at outside clinical agencies with those followed at CCRI. It describes the treatment and counseling options available, follow-up care and recordkeeping. Copies of this policy MUST be given to all students. Students MUST read this policy when they enroll in a CCRI health program, and MUST sign the waiver of understanding that they understand CCRI’s policy on Bloodborne Pathogen exposure response and its medical and financial implications (See Appendix E - Bloodborne Pathogen Declaration Form).

Medical procedures to be followed in case of exposure are taken from CDC guidelines and are updated by the Bloodborne Pathogen Exposure Response Committee. Each Health and Rehabilitative Sciences program will continue to orient its students to Universal and Standard Precautions.

Procedure to be followed by Students in Case of a Bloodborne Pathogen Exposure

Everyone who is exposed to potentially infectious bodily fluids at CCRI or at an outside clinical agency must follow the medical procedures (Items 1 through 4) listed below. The administrative guidelines (Item 5) pertain, in particular, to students. Exposure includes the following:

- Contaminated needle sticks
- Puncture wound from contaminated sharps
- Splashes in the eye, mouth, or on broken skin with possibly contaminated body fluids (whole blood, plasma, serum)

Post-Exposure Procedure

1. Immediately clean the wound thoroughly with antimicrobial soap and water. For eye and mouth exposure, rinse for ten minutes with running water.

2. The clinical supervisor or other person in charge of the site must be informed of the incident. The CCRI Dean of Health and Rehabilitative Sciences must also be informed by calling 401-825-1122 or 401-333-7111.

3. A CCRI Incident Report Form must be filled out (See Appendix F - Incident Report Form). The original should go to the Program Director/Department Chair; a copy should go to the Dean of Health and Rehabilitative Sciences.

4. If the incident takes place at an outside clinical site and that site has an exposure follow-up protocol in place, CCRI recommends that the student be tested, treated and counseled at that site. It is the
student’s right, however, to choose the site for treatment and counseling. Students are financially responsible for their own healthcare treatment. In any case, it is imperative that treatment be initiated within two hours of exposure.

5. If testing, treatment and counseling are not available at the clinical site or if the exposure takes place on CCRI property, the student should go immediately to the nearest emergency room or to their own physician, per student’s choice. Students who are exposed to Bloodborne Pathogens are urged by the College to undergo CDC procedures following such exposure. Specifically, the exposure recipient should be offered baseline testing for HIV, HBV, and HCV. If possible, the source patient’s blood should also be tested for HIV, HBV, and HCV. The exposure recipient should be offered follow-up counseling, possible treatment and post-exposure prophylaxis if it is needed. Again, the student is financially responsible for their own healthcare treatment. It is imperative that treatment be initiated within two hours of exposure.

6. Students may receive care at any site of their choice. Note: CCRI students who are exposure recipients are not covered by Workers Compensation or by CCRI insurance. Students MUST pay their own medical bills for testing, counseling and follow-up treatment. All students who enroll in CCRI health programs MUST be made aware of this fact, MUST be shown a copy of this policy and MUST sign a statement that they understand the policy. The cost of treatment, testing and follow-up counseling for a Bloodborne Pathogen Exposure may be $500 or more for the initial visit. Costs for follow-up visits may be less. The cost of prophylactic antiviral medication may be extremely high. Students exposed to Bloodborne Pathogens are urged by the College to follow CDC Testing and Treatment Guidelines as outlined at the end of this policy, including baseline testing for HIV, HBV, and HCV, counseling, and follow-up treatment when necessary.

**Centers for Disease Control (CDC)**

**Testing and Treatment Guidelines**

Whatever the site of the exposure incident and treatment, CDC guidelines should be followed and the following testing should be done: The source patient’s and the exposure recipient’s blood should be tested as soon as possible for anti-HBsAG, anti-HCV and anti-HIV. The exposure recipient should be tested for anti-HBsAG, anti-HCV and anti-HIV the same day as the exposure to provide baseline data. Liver function tests should be obtained. Hepatitis B testing is not required if the exposure recipient has received the hepatitis B vaccine and was post- tested to prove seroconversion immunity. The exposure recipient should receive counseling concerning the signs and symptoms associated with the anti-HIV seroconversion and given the opportunity for further clinical evaluation. The health care provider at the chosen treatment site should be asked to determine whether to give information on AZT or other prophylaxis.

Questions about this policy may be directed to CCRI’s Dean of Health and Rehabilitative Sciences at 401-333-7102 or the Allied Health Department Chair,

Approved: 11/01; Revised: 5/17, 5/19
Reviewed: 5/11, 5/15, 5/16
Incident Reporting Policy

An “incident” is any event that is inconsistent with the educational practices of the nursing program or one in which the safety of an individual is jeopardized. It may involve an act of commission or omission.

An “Incident Report” form will be completed by the student and the instructor (See Appendix F – Incident Report Form).

A copy of the clinical facility incident report form (Medical Error Reporting System [MERS]/Safety Net, etc.) should be attached to CCRI’s Incident Report Form. The Department Chairperson will be notified. A copy of the documents will be placed in the student’s file. The original CCRI incident report must be sent to the Office of the Dean of Health and Rehabilitative Sciences.

Policy for Student Recommendations

Students may request written recommendation for employment and/or scholarships from faculty. The process for writing student references is as follows:

1. Student will formally request a written recommendation for employment.

2. Student will submit to faculty the appropriate form, e.g. scholarship form or Nursing Employment Reference Form (Appendix H – Nursing Employment Reference Form), along with an addressed stamped envelope. Nursing Employment Reference Forms may be retrieved from the Nursing Department or online via Blackboard.

3. Faculty member will mail completed form using the addressed stamped envelope.

Date of graduation will be verified upon request from a potential employer. No other information may be disclosed without written permission of the student.

A transcript of the academic record of a former student will be sent to a potential employer UPON WRITTEN REQUEST BY THE GRADUATE TO THE REGISTRAR.
iPad Policy

1. Apple iPad mini may be purchased through the CCRI campus bookstore or student may use own device if it meets system operating requirements.
2. Students must set up their iPad off campus. The internet security on campus interferes with setup.
3. Students are responsible for maintaining their device in a secure manner to prevent damage or loss. Students are responsible for any losses incurred.
4. Students are responsible for ensuring their device is fully charged and for bringing their charger with them.
5. To ensure patient confidentiality all students must follow the clinical set up guidelines as stated:
   a. Prior to each clinical encounter students must disable the camera function on the iPad. Please follow the directions in Blackboard.
   b. The camera must be disabled during clinical time. Anyone found non-compliant with this policy is subject to disciplinary action, up to and including dismissal from the program.
6. When using a simulated medical record (SimChart or other simulated electronic health record) to enter patient information, the student will not use any personal identifiers in free text or drop down applications to include:
   - Patient initials; instead student will use 1,2 for patient initials and 3, 4 for provider initials
   - Actual age; instead, student will add 100 to the actual age
   - Hospital
   - Medical record number
   - Room number
   - City or state
7. All current Nursing policies relating to confidentiality, HIPAA compliance, and hospital confidentiality attestations apply to this policy. Any violations will result in disciplinary action, up to and including dismissal from the program.

COMMUNITY COLLEGE OF RHODE ISLAND
Health and Rehabilitative Science Programs

Bloodborne Pathogen Exposure Policy for Students

Declaration Form

I have been provided a copy of the Community College of Rhode Island’s Bloodborne Pathogen Exposure Policy for Students. I understand that 1) I am financially responsible for any health care costs such as may be required in the event of an occupational exposure to Bloodborne pathogens during the laboratory/clinical portion of the health or rehabilitative science program in which I am enrolled, and 2) follow-up care may be costly. I have had an opportunity to review the policy and ask questions. My signature below indicates that I fully understand the content of the policy.
